

AIRFRAME AND POWERPLANT MECHANIC

Overview

Program Description

This program has been approved by CMU and has been submitted to the accreditor. This program is pending HLC review.

The Airframe and Powerplant Mechanic program will certify students to safely and legally perform installations and repairs on aircraft under current FAA regulations. Students will earn their General Mechanic, Airframe Mechanic, and Powerplant Mechanic certifications through the FAA. The program will prepare students to enter the workforce in a high demand, well paying industry.

Important information about this program:

- Additional Program Cost - \$1500-\$2500 for tools which students will retain for use during employment upon completion of the program.
- Minimum of 40 semester hours must be taken at CMU in no fewer than three semesters.
- Cumulative grade point average of 2.5 or higher must be maintained for all courses taken.
