CULTURAL RESOURCE MANAGEMENT

Program Description
The certificate in cultural resource management is designed to give students all of the basic skills necessary for entry-level (field technician) positions in applied archaeology. These will include, but are not limited to, basic archaeological field methods, basic archaeological lab methods, the use of Geographic Information Systems and Public Interpretation. Beyond these skills, however, the certificate program strives to produce creative, engaged and informed archaeologists who can articulate Cultural Resource Management’s role in inquiry-based archaeology and its larger anthropological goals.
