

CYBER SECURITY

Program Description

Professional Certificate in Cyber Security

The Professional Certificate in Cyber Security includes courses and topics from basic computer and system security to more advanced topics in network and application security areas of information assurance.

Cybersecurity (Minor)

The minor in Cybersecurity, a collaborative effort between Computer Information Systems for Business (CISB) and Computer Science (CSCI) faculty, provides a solid base of understanding in macro cybersecurity strategies and principles, as well as an in-depth review of applied cybersecurity tools and techniques

These programs are excellent enhancements to computer science and related fields. They are designed to provide students interested in careers in cybersecurity areas with the knowledge and skills necessary for success in this very important and demanding field of information assurance.
