1. Articulate the fundamental knowledge base and ideas of the major fields of geoscience. (Specialized Knowledge)

2. Collect and interpret geoscience field data. (Applied Learning)

**Requirements**

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

**Institutional Degree Requirements**

The following institutional degree requirements apply to all CMU or WCCC Associate of Science (AS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours total.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade of "C" or higher must be earned in all Essential Learning courses in order to be accepted for transfer under the Colorado Core Transfer Consortium General Education curriculum or gtPathways, Colorado's guaranteed transfer program.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 15 semester credit hours for an associate degree. A maximum of 6 of the 15 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

**Essential Learning Requirements**

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

1 Students that intend to continue with Colorado Mesa University should take ESSL 290 and ESSL 200 during the final semester of their Associate of Science work.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVZone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html. If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Geology (Minor)

Minor: Geology
Program Code: M420

About This Minor . . .

The Geology Minor is designed for students who wish to take additional basic geology courses in support of their degree aspirations in other areas. A total of 21 geology credit hours are required. Most classes have a strong field component so that students can enjoy the diverse geological setting of the Grand Junction area. Laboratory work takes place in a state-of-the-art science complex.
Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives can be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog requirements a student must fulfill in order to graduate. Visit with your advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar’s Office.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

- GEOL 444L and Sedimentology and Stratigraphy Laboratory

Total Semester Credit Hours 21

1. Either GEOL 111/GEOL 111L or GEOL 113/GEOL 113L may be taken for credit, but not both.
2. Either GEOL 204 or GEOL 250 may be taken for credit, but not both.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.
Watershed Science (Minor)
Minor: Watershed Science
Program Code: M470

About This Minor . . .
The minor in watershed science is an interdisciplinary program designed
to serve the regional need for scientists with a strong background in
water-related issues (e.g., Bureau of Land Management, U.S. Geological
Survey, U.S. Forest Service, U.S. Fish and Wildlife Service, and the
Colorado Division of Wildlife). Some government agencies, such as the
U.S. Forest Service, are shifting their management organization to focus
on watersheds, and this minor supports needs in this area.

The minor complements majors in physical and environmental science
and biology by providing students in these fields with certification
of focused coursework. Combined with the relevant B.S., plus
additional calculus and physics courses, the minor satisfies the federal
government's requirements for qualification as a hydrologist. The
proximity of Colorado Mesa to the Colorado, Gunnison, and Green Rivers,
the drainages of the Colorado National Monument, and the high arroyos
create an ideal location for the study of watershed science.

Requirements
Each section below contains details about the requirements for this
program. Select a header to expand the information/requirements for
that particular section of the program's requirements.

To print or save an overview of this program's information, including the
program description, learning outcomes, requirements, suggested course
sequencing (if applicable), and advising and graduation information,
scroll to the bottom of the left-hand navigation menu and select 'Print
Options.' This will give you the options to either 'Send Page to Printer' or
'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information.
The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements
The following institutional requirements apply to all CMU minors. Specific
programs may have different requirements that must be met in addition
to institutional requirements.

• A minor consists of 15-24 semester hours. There may be
  prerequisites required for the minor which will increase the total
  number of credit hours for a student who has not already taken those
  prerequisites.
• Courses taken to satisfy Essential Learning, major requirements, or
  electives can be counted toward the minor if applicable.
• At least 33 percent of the credit hours required for the minor must be
  in courses numbered 300 or above.
• At least 25 percent of the classes must be taken at CMU.
• 2.00 cumulative GPA or higher for the courses used for the minor.
• A minor is not a degree by itself and must be earned at the same time
  as a baccalaureate degree.
• A minor must be outside the major field of study.
• A student may earn up to five minors with any baccalaureate degree
  at CMU.
• The Catalog Year determines which program sheet and degree
  requirements a student must fulfill in order to graduate. Visit with
  your advisor or academic department to determine which catalog
  year and program requirements sheet you should follow.
• See "Requirements for Undergraduate Degrees and Certificates" in
  the catalog for a complete list of graduation requirements.

Gerontology

Program Description
The Gerontology program focuses on the psychological and social impact of aging. It provides theoretical and practical experiences of human services, policies and programs related to the aging population and the aging brain for the student to gain access to entry level positions in the field. The program provides a variety of subjects in community activities, cognitive behavior of the elderly, Alzheimer’s and end-of-life care. Graduates of this program may find careers in social services, community services for the elderly, housing authorities, nursing homes, private home care programs and other public agencies.

Activity Assistant, Gerontology (Technical Certificate)
Award: Technical Certificate
Program of Study: Gerontology
Specialization: Activity Assistant
Program Code: 1164

About This Program . . .
The program is for individuals who wish to develop careers in the field of aging, those already employed or active in gerontology or related fields who wish to enhance their career paths, and those seeking challenging and meaningful career changes in response to new opportunities created by an aging society.

For more information on what you can do with this major, visit WCCC’s Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in communication fluency, quantitative fluency, specialized knowledge/applied learning, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Define the changing developments across life spans. (Communication Fluency)
2. Apply math and applied physics concepts for industry to meet job requirements. (Quantitative Fluency)
3. Interpret the psychology of aging of the person and the caretaker. (Critical Thinking)
4. Demonstrate knowledge of ethical law in aging. (Specialized Knowledge/Applied Learning)
5. Define the impact that the elderly have on culture and society. (Specialized Knowledge/Applied Learning)
6. Demonstrate ability to act ethically, compassionately and responsibly toward the elderly in the health care industry. (Specialized Knowledge/Applied Learning)

Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options’. This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page’. The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements
The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than “C” will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Behavioral and Cognitive Care, Gerontology (Technical Certificate)

Award: Technical Certificate
Program of Study: Gerontology
Specialization: Behavioral and Cognitive Care
Program Code: 1165

About This Program . . .

The program is for individuals who wish to develop careers in the field of aging, those already employed or active in gerontology or related fields who wish to enhance their career paths, and those seeking challenging and meaningful career changes in response to new opportunities created by an aging society.

For more information on what you can do with this major, visit WCCC’s Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

1. Define the changing developments across life spans. (Communication Fluency)
2. Apply math and applied physics concepts for industry to meet job requirements. (Quantitative Fluency)
3. Interpret the psychology of aging of the person and the caretaker. (Critical Thinking)
4. Demonstrate knowledge of ethical law in aging. (Specialized Knowledge/Applied Learning)
5. Define the impact that the elderly have on culture and society. (Specialized Knowledge/Applied Learning)
6. Demonstrate ability to act ethically, compassionately and responsibly toward the elderly in the health care industry. (Specialized Knowledge/Applied Learning)
Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements
The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than “C” will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

End of Life Care, Gerontology (Technical Certificate)

Award: Technical Certificate
Program of Study: Gerontology
Specialization: End of Life Care
Program Code: 1166

About This Program...

The program is for individuals who wish to develop careers in the field of aging, those already employed or active in gerontology or related fields who wish to enhance their career paths, and those seeking challenging and meaningful career changes in response to new opportunities created by an aging society.

For more information on what you can do with this major, visit WCCC’s Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in communication fluency, quantitative fluency, specialized knowledge/applied learning, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Demonstrate the ability to write a resume. (Communication Fluency)
2. Define the impact that the elderly have on culture and society. (Critical Thinking)
3. Demonstrate ability to act ethically, compassionately and responsibly toward the elderly in the health care industry. (Specialized Knowledge/Applied Learning)

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Gerontology Specialist (AAS)

Degree: Associate of Applied Science
Major: Gerontology Specialist
Program Code: 1305

About This Major...

The Gerontology program is for individuals who wish to develop careers in the field of aging, those already employed or active in gerontology or related fields who wish to enhance their career paths, and those seeking challenging and meaningful career changes in response to new opportunities created by an aging society.

For more information on what you can do with this major, visit WCCC's Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus#wide student learning outcomes, graduates of this major will be able to:

1. Demonstrate ability to write a resume (Communication Fluency).
2. Demonstrate ability to act ethically, compassionately and responsible toward the elderly in the health care industry (Critical Thinking).
3. Demonstrate knowledge of ethical law in aging, current society practices and principals as it relates to ethical law (Specialized Knowledge/Applied Learning).

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options'. This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page'. The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.
Essential Learning Requirements  
(16 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated
requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process
Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Graphic Design
Program Description
The Bachelor of Fine Arts degree with a Graphic Design: Visual Design major focuses on design as a professional craft and as a vehicle for communication and connecting with society. Students learn to see design as a visual language and force for cultural change within our world by giving them the tools to enhance the visual experience of the public. Course work includes color theory, drawing, traditional illustration, digital illustration, composition, typography, letterpress, identity design, web design and UX Design. All course work focuses on the best practices for designers to meet the needs of the profession. The degree concludes with a portfolio development course and the successful degree candidate is prepared to enter professions within graphic design including advertising, marketing, packaging design, identity design, illustration, digital design, web design and a myriad of related fields.

Transfer students, like all students pursuing a degree in Graphic Design, are expected to complete and pass a Sophomore Review before being formally admitted into the program. Admission to the program will be contingent upon the student satisfying the following requirements:
- Completion of the Graphic Design Admission Application Form;
- Coursework at CMU in or transfer credits equivalent to ARTE 101 Two-Dimensional Design, ARTE 102 Three-Dimensional Design, ARTS 151

Foundation Drawing I, ARTG 215 Graphic Design I, and ARTG 221 Graphic Design II, with a grade of B or A in each course;
- Successful completion of the Graphic Design Entrance Exam with a minimum score of 80%; and
- A Portfolio Review comprised of Graphic Design work showing competency in 200-Level graphic design, typography and layout skills.

The graphic design minor acquaints students with some of the core elements related to the study and profession of graphic design. Courses will consist of both academic lecture and practical studio. This minor provides students an opportunity to integrate personal creativity with any specified major degree. A background in graphic design can promote a variety of professional opportunities including areas of applied design, public relations, business graphics, product design, marketing and advertising.

Please see a faculty advisor and the programs listed in the Programs of Study tab for program requirement details.

Programs of Study
Bachelors/Minors
- Graphic Design (Minor) (p. 403)
- Visual Design, Graphic Design (BFA) (p. 400)

Visual Design, Graphic Design (BFA)
Degree: Bachelor of Fine Arts
Major: Graphic Design
Concentration: Visual Design
Program Code: 3274

About This Major . . .
The Graphic Design–Visual Design concentration focuses on current and professional industry standards within graphic design. Our degree is illustration-based and combines traditional hands-on media with the digital. The program, like the professional world is a fast-paced environment that mimics real-world design studios. Students will learn traditional layout design, composition, screenprinting, drawing, graphic design art history, CNC routing all as it applies to design. These areas are all combined with conceptual skills to make graduates in the area marketable. Entry in the program is contingent upon the successful completion of a portfolio review and exam during the sophomore year. A portfolio capstone course prepares students upon graduation for employment with a portfolio designed to gain employment. The program boasts two Graphic Design computer labs each furnished with Apple computers and the latest graphic design application software. Students can be a part of a community of student designers involved in a graphic design activities and field trips locally, nationally and abroad.

Entering students are encouraged to pay close attention to course sequencing and consult their advisor in order to complete the degree in four years. The successful Graphic Design degree candidate is prepared to enter professions within graphic design including advertising design, web design, package design, illustration, marketing and a myriad of related fields.
Important information about this program:

- No more than 6 semester hours of independent study courses can be used toward the degree.
- KINA Activity courses can NOT be used to fulfill general elective credit requirements.
- In an effort to meet industry standards, Macintosh computers are used exclusively in all computer-based ARTG courses. Majors are strongly advised to consider purchasing a Macintosh and related print and web publishing software for personal use.
- ARTG 300-level courses and ARTG 400-level courses may be taken upon acceptance into the Graphic Design Program.
- Admission in the program after the sophomore year will be contingent upon the student's satisfying the following requirements:
  - Completion of Graphic Design Admission Application Form.
  - Completion of ARTE 101 Two-Dimensional Design, ARTE 102 Three-Dimensional Design, ARTG 215 Graphic Design I, ARTG 221 Graphic Design II, and ARTG 222 Illustration I with a grade of B or A.
  - A grade of B or A in all coursework in the major.
  - Successful completion of the Graphic Design entrance exam with a minimum score of 80%.
  - Portfolio Review comprised of Graphic Design work that meets the established Portfolio Review Criteria.
  - Transfer students must pass the Portfolio Review and entrance exam to be formally accepted into the Graphic Design Program.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Interpret and apply formal elements and principles of design. (Specialized Knowledge)
2. Demonstrate proper use of tools, materials, techniques, and proper use and care for equipment through quality craftsmanship. (Applied Learning)
3. Generate individual response through concept and relevant sources of information to create personal content. (Communication Fluency and Information Literacy)
4. Communicate clearly regarding the critical analysis of art and design both historical and contemporary. (Critical Thinking/ Communication Fluency)
5. Reflect on and respond to ethical, social, civil, and/or environmental challenges as they relate to art, design, and new media. (Personal and Social Responsibility)
6. Design and publish a professional portfolio that meets current industry standards. (Applied Learning)
7. Demonstrate technical, aesthetic, and conceptual decisions based on the application of the design process. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.
Visual Design, Graphic Design (BFA)

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

### Graphic Design (Minor)

**Minor: Graphic Design**  
**Program Code: M201**

**About This Minor...**

The Graphic Design Minor will acquaint students with some of the core elements related to the study and profession of Graphic Design. Courses will consist of both academic lecture and practical studio-based media. This minor provides students an opportunity to integrate personal creativity with any specified major degree. A background in Graphic Design can promote a variety of professional opportunities including areas of applied design, public relations, business graphics, product design, marketing, museum work and/or advertising.

**Requirements**

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

### Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives can be counted toward the minor if applicable.

---

### Advising and Graduation

#### Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

### Program Code and Major Information

- Program Code: M201
- Major: Graphic Design
• At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
• At least 25 percent of the classes must be taken at CMU.
• 2.00 cumulative GPA or higher for the courses used for the minor.
• A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
• A minor must be outside the major field of study.
• A student may earn up to five minors with any baccalaureate degree at CMU.
• The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
• See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Program Specific Minor Requirements
(24 semester hours, must maintain 3.00 cumulative GPA or higher)

- In an effort to meet industry standards, Macintosh computers are used exclusively in all computer-based ARTG courses. Majors are strongly advised to consider purchasing a Macintosh and related publication software for personal use.
- Graphic Design majors are required to complete a formal Portfolio Review before being admitted to 300 level Graphic Design courses.
- Review before being admitted to 300 level Graphic Design courses. Graphic Design majors are required to complete a formal Portfolio Review before being admitted to 300 level Graphic Design courses. In an effort to meet industry standards, Macintosh computers are used exclusively in all computer-based ARTG courses. Majors are strongly advised to consider purchasing a Macintosh and related publication software for personal use.

Graduation Process
A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the “Intent to Graduate” form.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Health Information Technology Systems

Program Description
This multi-disciplinary certificate prepares students in the foundations of healthcare informatics, database management systems, and information systems security and privacy. This certificate combines coursework in business, health sciences, and nursing.

Health Information Technology Systems (Professional Certificate)

Award: Professional Certificate
Program of Study: Health Information Technology Systems
Program Code: 1604

About This Program . . .
The Professional Certificate in Health Information Technology Systems prepares health care professionals to support the collection, management, retrieval, exchange, and/or analysis of information in electronic form, in health care and public health organizations. This role functions at an operational level to provide comprehensive management of health care information and its secure exchange between healthcare consumers and providers. These specialists participate in processing, managing and transforming data from information to knowledge. This specialist works within the health care environment interacting with both health care professionals and IT specialists. The informatics specialty maintains the big picture of health care informatics while providing an in-depth perspective of nursing informatics. The ANA Scope and Standards of Nursing Informatics as well as other frameworks such as American Medical Informatics Association’s definition of biomedical informatics and their current work in the development of biomedical informatics.

Advising and Graduation
Advising Process and DegreeWorks
Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar’s Office.
competencies and the International Medical Informatics Association’s work on informatics competencies. The following areas of knowledge will be taught in the certificate program: Foundations/Introduction to Healthcare Informatics; Database Management Systems; Information Systems Security and Privacy; Information Systems Life Cycle; Semantic Representation.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU certificate graduates are expected to demonstrate proficiency in critical thinking, communication fluency, quantitative fluency, and specialized knowledge/applied learning. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Explore the use of information systems in health care and nursing practice.
2. Review the development of an overall framework for analyzing the use of information by organizations along with examples of different types of information systems.
3. Explore selected health informatics projects in clinical settings
4. Evaluate outcomes-based quality assessment and improvement methods in health care
5. Process techniques and tools of project management in the health care setting.
6. Explore the principles of evidence-based medicine in bringing informatics to the bedside.

**Requirements**

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

**Institutional Certificate Requirements**

The following institutional requirements apply to all CMU Professional Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Primarily 300-400 level courses.
- At least fifty percent of the credit hours must be taken at CMU.
- 2.00 cumulative GPA or higher in all CMU coursework.
- A grade lower than "C" in the program of study will not be counted toward meeting the certificate's requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

**Advising and Graduation**

**Advising Process and DegreeWorks**

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended certificate.
DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

• Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
• Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
• Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
• Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your “Intent to Graduate” does not automatically move to a later graduation date.

History

Program Description

The study of history prepares the student for understanding present society and culture through a study of the past. The history program familiarizes students with the great historical civilizations and issues that have shaped our present world. History teaches students how to critically analyze information and make a compelling argument; skills that everyone needs to be successful in all their endeavors. Internships are available through museums, historical societies and public agencies. CMU history graduates pursue careers in teaching and public history, as well as private employment, and have also been very successful in gaining entrance to graduate study and law school.

The Center for Teacher Education offers a comprehensive program of study that leads to licensure in Colorado. Faculty offer one-on-one guidance for course selection, field placements, student teaching and employment. Students accumulate over 200 hours of classroom experience before beginning student teaching. School districts throughout western Colorado provide opportunities to gain experience with children of all ages and backgrounds in a variety of school settings.

The secondary licensure program provides teacher education candidates with broad content knowledge in history and prepares them as teachers for grades 7 through 12. A minimum of 75 credit hours of essential learning and content area coursework must be completed with a minimum GPA of 2.80 before a candidate may apply for admission to the Center for Teacher Education secondary licensure program. Please see the Teacher Education Admission Packet for further information on admissions criteria. EDUC 115 and EDUC 215 must be taken before applying to the program.

About This Major . . .

The study of history prepares the student for understanding present society and culture through a study of the past. The history program familiarizes students with the great historical civilizations and issues that have shaped our present world. History teaches students how to critically analyze information and make a compelling argument; skills that everyone needs to be successful in all their endeavors. Internships are available through museums, historical societies and public agencies. CMU history graduates pursue careers in teaching and public history, as well as private employment, and have also been very successful in gaining entrance to graduate study and law school.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Formulate the relationships of cause and effect (Specialized Knowledge/Applied Learning);
2. Assess the importance of historical context (Specialized Knowledge/Applied Learning);
3. Critically analyze an argument based on secondary sources (Critical Thinking);
4. Critically analyze primary sources (Critical Thinking);
5. Formulate a clear and persuasive argument based on evidence (Communication Fluency);
6. Construct a clear thesis with strong topic sentences (Communication Fluency).

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.
To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Specific to this degree:

- A grade of 'C' or better must be earned in all required courses, unless otherwise stated.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.
If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Education: Secondary Education, History (BA)

Degree: Bachelor of Arts
Major: History
Concentration: Secondary Education
Program Code: 3704

About This Major . . .
The Center for Teacher Education offers a comprehensive program of study that leads to licensure in Colorado. Our professors are experienced, knowledgeable, accessible, and dedicated to the improvement of public education. At Colorado Mesa University, we pride ourselves on the personal touch. Faculty offer one-on-one guidance for course selection, field placements, student teaching, and employment. Our mission is to develop Educators as Innovators; we are always looking to improve the quality of learning in our programs and K-12 schools.

As a student, you will gradually accumulate over 200 hours of classroom experience before beginning student teaching. School districts throughout western Colorado provide opportunities to gain experience with children of all ages and backgrounds in a variety of school settings.

The secondary licensure program provides teacher education candidates with broad content knowledge in history and prepares them as teachers for grades 7 through 12. A minimum of 75 credit hours of Essential Learning and content area coursework must be completed with a minimum GPA of 2.80 before a candidate may apply for admission to the Center for Teacher Education secondary licensure program. Please see the Teacher Education Admission Packet for further information on admissions criteria. EDUC 115 and EDUC 215 must be taken before applying to the program.

Important information about this program:

• 2.80 cumulative GPA or higher in all CMU coursework.
• 2.80 cumulative GPA or higher in coursework toward the major content area.
• A grade of 'C' or better must be earned in all required courses, unless otherwise stated.
• All EDUC prefix courses must be completed with a grade of "B" or better.
• Students must pass the PRAXIS II exam in the content area prior to beginning the internship. Also, all other coursework toward the degree must be successfully completed prior to the internship.

For more information on what you can do with this major, visit Career Services' What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:
1. History Outcome 1: Formulate the relationships of cause and effect (Specialized Knowledge/Applied Learning);
2. History Outcome 2: Assess the importance of historical context (Specialized Knowledge/Applied Learning);
3. History Outcome 3: Critically analyze an argument based on secondary sources (Critical Thinking);
4. History Outcome 4: Critically analyze primary sources (Critical Thinking);
5. History Outcome 5: Formulate a clear and persuasive argument based on evidence (Communication Fluency);
6. History Outcome 6: Construct a clear thesis with strong topic sentences (Communication Fluency);
7. Teacher Education Outcome 1: Demonstrate mastery of major area's content knowledge and pedagogical strategies through fieldwork with learners in professional settings. (Specialized Knowledge/Applied Learning)
8. Teacher Education Outcome 2: Design and establish a safe, inclusive, and respectful learning environment for a diverse population of students. (Specialized Knowledge/Applied Learning)
9. Teacher Education Outcome 3: Plan and deliver effective instruction to students, based on research-based pedagogical practices. (Communication Literacy/Information Literacy)
10. Teacher Education Outcome 4: Collect and analyze student assessment data and use results to inform planning and instruction. (Quantitative Fluency)
11. Teacher Education Outcome 5: Demonstrate professionalism through ethical conduct, reflection, and leadership. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Specific to this program:
- 2.80 cumulative GPA or higher in all CMU coursework.

Essential Learning Requirements

(31 semester hours, must earn a grade of ‘C’ or better in each course, unless otherwise stated.)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Praxis II Exam Passed

Total Semester Credit Hours: 77

1. Must earn a “B” or better in all EDUC courses.
2. Program Requirements: ENGL 111, ENGL 112, PSYC 233, EDUC 115 and EDUC 215 (all with a grade of “B” or better) and formal acceptance to the Teacher Education Program.
3. This course is only offered in the fall semester. It may be taken with either the 300-level or 400-level EDUC courses but must be taken before the student teaching semester.

All EDUC prefix courses listed above must be completed with a grade of B or better to progress through the program sequence. Students must PASS the PRAXIS II exam in the content area prior to commencing the internship. Also, ALL other coursework toward the degree must be successfully completed prior to the internship.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.
Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

• Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
• Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
• Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
• Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

History (Minor)

Minor: History
Program Code: M720

About This Minor. . .

The study of history prepares the student for understanding present society and culture through a study of the past. The history program familiarizes students with the great historical civilizations and issues that have shaped our present world. History teaches students how to critically analyze information and make a compelling argument; skills that everyone needs to be successful in all their endeavors. Internships are available through museums, historical societies, and public agencies.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

• A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
• Courses taken to satisfy Essential Learning, major requirements, or electives can be counted toward the minor if applicable.

• At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
• At least 25 percent of the classes must be taken at CMU.
• 2.00 cumulative GPA or higher for the courses used for the minor.
• A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
• A minor must be outside the major field of study.
• A student may earn up to five minors with any baccalaureate degree at CMU.
• The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
• See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Hospitality Management

Program Description

The Bachelor of Applied Science (BAS) in Hospitality Management combines the technical skills and business proficiency necessary for success. A unique program, the BAS degree allows students who have already earned an Associate of Applied Science (AAS) degree to build upon their technical specialties with essential learning courses and junior and senior level business courses. This allows associate degree holders to gain a 4-year degree in approximately four additional full-time semesters, depending upon prior coursework. Upon completion of the program, students will be technically and academically prepared for leadership positions in their chosen industries. Prospective students not holding an associate of applied science degree can begin their university career at CMU in a chosen field of study with a 2-year degree and then progress to a 4-year degree using the BAS. This degree will provide students with upward mobility in their area of employment as they move into supervision/management positions.

Upon completion of the Associate of Applied Science (AAS) in Hospitality Management, students will be prepared for an entry-level position in the broad and expanding hospitality industry, as well as be prepared to pursue the Bachelor of Applied Science in Hospitality Management. Business courses to be taken include courses in marketing, promotion, management, accounting, finance, small business management and entrepreneurship.

The Minor in Hospitality Management is designed to prepare students to enter the world of hospitality management. Coursework in the areas of marketing, management, and community tourism will provide students the basic skills needed in order to contribute more efficiently and

Degree: Bachelor of Applied Science
Major: Hospitality Management
Program Code: 3163

About This Major . . .

The Bachelor of Applied Science in Hospitality Management combines the technical skills and business proficiency necessary for success in today's business world. A unique program, the B.A.S. allows students who have already earned an associate of applied science degree to build upon their technical specialties with Essential Learning courses and junior and senior level business courses. This allows associate of applied science degree holders to gain a 4-year degree in approximately four additional full-time semesters, depending upon prior coursework.

Business courses to be taken include courses in marketing, promotion, management, accounting, finance, small business management and entrepreneurship. Upon completion of the program, students will be technically and academically prepared for leadership positions in the hospitality industry. Potential employment opportunities with this 4-year degree include management in any of the following areas: resort and hotel management, food and beverage management, travel and tourism management, health care and education food service management, etc. With the ever expanding world hospitality market, this degree has endless opportunities.

Prospective students not holding an associate of applied science degree can begin their college career at CMU in a chosen field of study with a 2-year degree and then progress to a 4-year degree using the B.A.S. This degree will provide students with upward mobility in their area of employment as they move into supervision/management positions.

Important information about this program:

- Formal admission to a BAS program requires completion of the appropriate AAS degree from an accredited institution. Any exceptions to this must be approved in advance by the department BAS advisor and the academic department head. All students must meet with the BAS advisor to plan and schedule all classes.
• To be admitted to the BAS degree, certain prerequisites must be satisfied. Please see the Business department head for complete requirements and application form.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in critical thinking, communication fluency, quantitative fluency, and specialized knowledge/applied learning. In addition to these campus-wide student learning outcomes, students in this major complete a plan of study that fulfills our department mission and requires demonstrated comprehension of program specific learning outcomes. These are as follows:

**Mission:** As a student-focused teaching and research department, Colorado Mesa University’s Business Department prepares students to be sound decision makers and serves businesses in the Rocky Mountain region, the nation, and the world. We strive to develop prepared students who demonstrate strong ethical principles, superior critical thinking, effective communication, and robust business acumen.

**Student Learning Outcomes:**

1. Apply business knowledge and skills in appropriate business contexts (Critical Thinking) (SLO #1: Critical Thinking/Problem Solving Skills)
2. Transfer knowledge and skills to new business situations. (Critical Thinking) (SLO #1: Critical Thinking/Problem Solving Skills)
3. Analyze business data critically, reason logically, and apply quantitative analysis methods correctly to develop appropriate business conclusions. (Quantitative Fluency) (SLO #1: Critical Thinking/Problem Solving Skills)
4. Analyze business data critically, reason logically, and apply qualitative analysis methods correctly to develop appropriate business conclusions. (Critical Thinking) (SLO #1: Critical Thinking/Problem Solving Skills)
5. Communicate clearly, appropriately, and persuasively to the audience in writing. (Communication Fluency) (SLO #2: Effective Communication Skills)
6. Communicate clearly, appropriately, and persuasively to the audience orally (Communication Fluency) (SLO #2: Effective Communication Skills)
7. Demonstrate an understanding of the role of teams in organizations (Specialized Knowledge/Applied Learning) (SLO #3: Teamwork)
8. Demonstrate behaviors consistent with effective teamwork (Specialized Knowledge/Applied Learning) (SLO #3: Teamwork)
9. Analyze an issue within an ethical framework (Specialized Knowledge/Applied Learning) (SLO #4: Ethical Awareness)
10. Recommend a solution based on an ethical framework (Specialized Knowledge/Applied Learning) (SLO #4: Ethical Awareness)

**Institutional Degree Requirements**

The following institutional degree requirements apply to all CMU Bachelor of Applied Science (BAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 33 upper-division credits.
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements. The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

**Essential Learning Requirements**

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audits on a regular basis and should discuss questions or concerns with their advisors or academic department heads. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process
Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.
If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

**Hospitality Management (AAS)**

Degree: Associate of Applied Science  
Major: Hospitality Management  
Program Code: 1163

**About This Major . . .**

The field of Hospitality Management combines the technical skills and business proficiency necessary for success in today's business world. Business courses to be taken include courses in marketing, business law, business technology, management, accounting, finance, economics, and hospitality specific courses. Upon completion of the program, students will be prepared for an entry-level position in the broad and expanding hospitality industry, as well as prepared to continue for advanced study in the Bachelor of Applied Science in Hospitality Management.

For more information on what you can do with this major, visit Career Services' What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore-major.html) resource.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Locate, gather and organize information on an assigned hospitality management topic. (Specialized Knowledge)
2. Recognize mathematical concepts and methods in relation to hospitality management issues. (Quantitative Fluency)
3. Communicate clearly and appropriately basic hospitality management information. (Communication Fluency)
4. Describe beginning hospitality management concepts in appropriate business contexts. (Critical Thinking)

**Requirements**

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

**Institutional Degree Requirements**

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

### Specific to this degree:

- 66 semester hours total for the AAS, Hospitality Management.

**Essential Learning Requirements**

(16 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
• Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
• Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
• Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Hospitality Management (Minor)

Minor: Hospitality Management
Program Code: M141

About This Minor. . .

The minor in Hospitality Management is designed to prepare students to enter the world of hospitality. Coursework in the areas of sales and marketing, hospitality management strategies and hotel operations will provide students the basic skills needed in order to contribute more efficiently and effectively in the area of hospitality. For the student interested in the area of hospitality, a minor coupled with a bachelor’s degree can increase the employment opportunities available in a variety of hospitality-related areas.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

• A minor must be outside the major field of study.
• A student may earn up to five minors with any baccalaureate degree at CMU.
• The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
• See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.
Humanities

Program Description

The Humanities refer to disciplines that focus on the human condition, including the social and cultural relationships we form with others. In contrast to math and the natural sciences, which privilege empirical methods to study society and the natural world, the humanities tend to use analytical and speculative approaches to understand our social, cultural, and personal contexts. After completing Essential Learning requirements, students will choose courses that help them explore how we understand and express ourselves, from Art, Dance, English, Graphic Art, and Foreign Languages, to Literature, Mass Communication, Music, Philosophy, Speech, and Theater. The Associate of Arts (AA) degree can be a terminal degree or serve as a pathway to a baccalaureate degree in the humanities.

Programs of Study

Associates

- Humanities, Liberal Arts (AA) (p. 421)

Humanities, Liberal Arts (AA)

Degree: Associate of Arts
Major: Liberal Arts
Emphasis: Humanities
Program Code: 2230

About This Major . . .

The Associate of Arts degree (AA) works in two ways: 1) it can function as a terminal degree; 2) it can function as a pathway into a baccalaureate degree in the humanities. The degree program meets the requirements of the Colorado Statewide Essential Learning Core. A student who is granted this degree can transfer to any institution in Colorado and graduate in a baccalaureate degree program by taking no more than 60 hours from that institution. The same applies for students who decide to move from the AA program into any Colorado Mesa BA program. A number of emphases are available within the AA degree. Students can build a course of study that focuses on their area of interest in the following disciplines: Creative Writing Fine and Performing Arts, Foreign Languages, Literature, Mass Communications, Philosophy and/or Speech.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU or WCCC Associate of Arts (AA) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours total.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade of “C” or higher must be earned in all Essential Learning courses in order to be accepted for transfer under the Colorado Core Transfer Consortium General Education curriculum or gtPathways, Colorado’s guaranteed transfer program.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 15 semester credit hours for an AA degree. A maximum of 6 of the 15 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

- Network Technician, Information and Communication Technology (Technical Certificate) (p. 428)

Information and Communication Technology (AAS)

Degree: Associate of Applied Science
Major: Information and Communication Technology
Program Code: 1318

About This Major . . .

The Information and Communication Technology (ICT) program provides the student with the foundation skills and knowledge for entry into the broad spectrum of ICT careers. It is designed to educate students in areas of business-class computer hardware and software, convergent data/voice/media communication hardware and software, computer network hardware and software, Internet of Things hardware and software, 3D printing hardware and software, unmanned aerial Systems (UAS) and robotics hardware, software and management. The program utilizes CISCO curriculum for most courses, including the core Cisco Certified Network Associate (CCNA) courses to prepare students for the certification exam.

Curriculum is accredited, approved and aligned with national and international certifications by major business and industry in the networking and ICT career fields.

For more information on what you can do with this major, visit WCCC's Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Apply business communication using listening, verbal and written, and electronic forms that are needed for entry level employment. (Communication Fluency)
2. Apply Mathematical and applied physics concepts for industry to meet employment requirements. (Quantitative Fluency)
3. Research, evaluate, synthesize and apply information/data relevant to business, sciences, and technical careers. (Critical Thinking)
4. Demonstrate knowledge of terminology, symbols, business practices, and principles and application of associated technical skills. (Specialized Knowledge)
5. Perform the necessary applied skill sets to fulfill the needs of entry level employment. (Applied Learning)
6. Demonstrate ethical, civic, and work place responsibility as part of professional behavior. (Specialized Knowledge)

**Requirements**

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

**Institutional Degree Requirements**

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

**Specific to this program:**

- 60-61 semester hours total for the AAS, Information and Communication Technology.

**Essential Learning Requirements**

(15 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Suggested Course Plan

Though the following suggested course plan culminates in a total of 61 credit hours, this program requires only a minimum of 60 credit hours, including successful completion of all degree requirements, for completion of degree. This is due to potential variation in the hours used to satisfy the Essential Learning Mathematics requirement. Student may complete MATH 108, a 4 credit hour course, or a higher level Essential Learning eligible Mathematics course to complete this requirement, which allows for potential completion of this requirement at 3 credit hours.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at [http://www.coloradomesa.edu/registrar/graduation.html](http://www.coloradomesa.edu/registrar/graduation.html).

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Healthcare Information Networking, Information and Communication Technology (Technical Certificate)

Award: Technical Certificate

Program of Study: Information and Communication Technology

Specialization: Healthcare Information Networking

Program Code: 1116

About This Program . . .

This certificate prepares students for Healthcare ICT jobs by teaching them the special needs of the healthcare industry including the Health Insurance Portability and Accountability Act, Electronic Health Records, the Universal Protocol and how to design, implement, monitor, and troubleshoot networks in healthcare environments. This course complements the Cisco CCNA curriculum and is designed for students who would like to expand their networking abilities by developing specialized healthcare networking skills. Hands-on labs throughout the course help students gain practical experience, including procedural and troubleshooting labs, skills integration challenges, and model building.

For more information on what you can do with this major, visit WCCC’s Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.
All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in communication fluency, quantitative fluency, specialized knowledge/applied learning, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Describe the concepts and provisions of Electronic Health Records and the Health Insurance Portability and Accountability Act
2. Describe how Information and Communication Technology is used in the Healthcare Industry
3. Describe the unique requirements and solutions for protecting healthcare information and networks.
4. Explain how to support, maintain, and troubleshoot a medical group network.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than “C” will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Program Specific Certificate Requirements

(27 semester hours, must earn a grade of “C” or better in each course.)

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic
department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process
Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Help Desk Technician, Information and Communication Technology (Technical Certificate)

Award: Technical Certificate
Program of Study: Information and Communication Technology
Specialization: Help Desk Technician
Program Code: 1117

About This Program . . .
Upon completion of the program the student will be able to demonstrate skills, knowledge, and training for employment in an Information and Communication Technology Help Desk support position. Students learn the fundamentals of computer hardware and software, mobile devices, security and networking concepts, the responsibilities of the help desk technician and how to provide customer support.

For more information on what you can do with this major, visit WCCC's Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in communication fluency, quantitative fluency, specialized knowledge/applied learning, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Identify best practice information security policies.
2. Describe the use of Convergent Technologies in a computer network.
3. Demonstrate proficiency and knowledge required for basic use of computer hardware, software, and the Internet.
4. Ability to install, configure and provide instruction on basics of using common office software tools.
5. Ability to identify, manage and overcome barriers to communication.

Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' Network Technician, Information and Communication Technology (Technical Certificate)

Award: Technical Certificate
Program of Study: Information and Communication Technology
Specialization: Network Technician
Program Code: 1118

About This Program . . .

This certificate is based on the Cisco CCNA Routing and Switching series of courses and prepares students for the Cisco Certified Network Associate exam. The CCNA certification will prepare students for any entry-level networking career. Additional classes cover computers, information security, convergent communications technologies, best practice customer relations and workplace behavior.

The coursework in this certificate is aligned with national and international certifications including Cisco, A+/N+, CET, and Convergent Technology Professional (CTP). Program content has been structured to give a basic education to all graduates entering this field. Emphasis has been placed on providing a common core of training for all students due to the convergence of the communication industries.

For more information on what you can do with this major, visit WCCC's Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in communication fluency, quantitative fluency, specialized knowledge/applied learning, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Apply business communication using listening, verbal and written, and electronic forms that are needed for entry level employment. (Communication Fluency)
2. Apply Mathematical and applied physics concepts for industry to meet employment requirements. (Quantitative Fluency)
3. Research, evaluate, synthesize and apply information/data relevant to business, sciences, and technical careers. (Critical Thinking)
4. Demonstrate knowledge of terminology, symbols, business practices, and principles and application of associated technical skills. (Specialized Knowledge)
5. Perform the necessary applied skill sets to fulfill the needs of entry level employment. (Applied Learning)
6. Demonstrate ethical, civic, and work place responsibility as part of professional behavior. (Specialized Knowledge)

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.
Innovation

The Professional Certificate in Innovation is a three-course sequence designed to spark new thinking for any CMU undergraduate student. All students can benefit from augmenting innovation into their chosen majors and minors to create products and processes that have not existed before. Students experience the process of innovation, examine the development of historical innovations, and take their own innovation from ideation through commercialization in the Maverick Innovation Center.

Programs of Study Certificates

Innovation (PCT)

Award: Professional Certificate
Program of Study: Innovation
Program Code: 1701

About This Program...

The Professional Certificate in Innovation is a three-course sequence designed to spark new thinking for any CMU undergraduate student. All students can benefit from augmenting innovation into their chosen majors and minors to create products and processes that have not existed before. Students experience the process of innovation, examine the development of historical innovations, and take their own innovation from ideation through commercialization in the Maverick Innovation Center.

While not mandated, students are strongly encouraged to complete a minor that is not traditionally seen as being closely aligned with their chosen major in order to broaden their perspective and spark critical thinking. In the book, ‘The Opposable Mind’, Roger Martin notes ‘innovative thinkers have the capacity to hold two diametrically opposed ideas in their heads. Without panicking or simply setting one alternative or the other, they’re able to produce a synthesis that is superior to either opposing idea.’ Fundamentally this exemplifies the essence of a Liberal Arts education.

In lieu of choosing a minor significantly different from their major, students have the option of working with an innovation advisor in selecting a group of courses that would best augment their integrated pathway.

This certificate may be completed beginning in a student’s sophomore year.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU certificate graduates are expected to demonstrate proficiency in critical thinking, communication fluency, quantitative fluency, and specialized knowledge/applied learning. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

Requirements

Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your "Intent to Graduate" does not automatically move to a later graduation date.

Insurance
Program Description

The Professional Certificate in Insurance is designed to certify students who possess the knowledge and skills needed to work as insurance agents. The certificate will provide students with a foundation for further study toward an insurance concentration in the BBA, which more fully prepares a person for a career in the insurance industry.

About This Program . . .

The Certificate in Insurance is designed to prepare students with the knowledge and skills needed to engage in insurance agent activities in the workplace. The certificate will provide students with an overview of information they would encounter if they went on to earn the Insurance Concentration in the BBA, which more fully prepares a person for a career as an insurance agent.

For more information on what you can do with this major, visit Career Services' What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU Professional Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Primarily 300-400 level courses.
- At least fifty percent of the credit hours must be taken at CMU.
- 2.00 cumulative GPA or higher in all CMU coursework.
- A grade lower than “C” in the program of study will not be counted toward meeting the certificate’s requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
International Studies

• Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.

• Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.

• The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.

• See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Certificate Requirements
(9 semester hours, must earn a grade of ‘C’ or better in each course.)

Advising and Graduation
Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

• Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
• Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
• Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
• Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your “Intent to Graduate” does not automatically move to a later graduation date.

International Studies
Program Description

The international studies minor recognizes the complex interconnections between academic disciplines, peoples in varying cultural contexts and opportunities for social and economic advancement for our graduates. Students from a wide variety of disciplines can supplement their major in business, social sciences, natural sciences or humanities with an international focus through this minor. Students choose from a menu of options drawn from disciplines across the campus. The interdisciplinary nature of the international studies minor is essential for preparing students to enter the new global marketplace of ideas and goods. Students taking the international studies minor are encouraged to enhance their experience by participating in a variety of study abroad opportunities available while attending CMU.

International Studies (Minor)

Minor: International Studies
Program Code: M753
About This Minor . . .

The International Studies Minor recognizes the complex interconnections between academic disciplines, peoples in cultural contexts, and opportunities for social and economic advancement for our graduates.

Students from a wide variety of disciplines can supplement their major in business, social sciences, natural sciences or humanities with an international focus through this minor. This will help them to understand the changing nature of their field while making their degree more marketable in a global workforce.

Students choose from a menu of options drawn from disciplines across the campus. The interdisciplinary nature of the international studies minor is essential for preparing our students to enter into the new global marketplace of ideas and goods. Students taking the International Studies Minor are encouraged to enhance their experience at Colorado Mesa by participating in a variety of Study Abroad opportunities available while attending CMU.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives can be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Program Specific Minor Requirements

(24 semester hours)

- As part of their program, students will be encouraged to participate in an international experience in consultation with their advisors. This experience could be a semester or summer abroad, an international internship, an intensive immersion language program in another country, or participation in a growing number of study abroad opportunities offered by Colorado Mesa University. The credits received from this experience could be used to fulfill essential learning requirements or program requirements including unrestricted electives, but are not intended to add to the 120-hour graduation requirement. Substitutions would need to be approved by an advisor and department chair prior to the international experience.

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the “Intent to Graduate” form.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Jazz Studies

(See Music (p. 524))

Kinesiology

Program Description

The Bachelors of Arts in Kinesiology includes two concentration options: Adapted Physical Education and K-12 Teaching.

Students concentrating in adapted physical education will learn to adapt or modify the physical education curriculum and/or instruction to address specific abilities of individuals. Students will learn to develop activities that are appropriate and effective for persons with disabilities. Career opportunities include: adapted physical education teacher (K-12), which requires completing the K-12 concentration coursework; activity director at an assisted living center or rehabilitation facility; physical therapist\(^1\); and occupational therapist\(^1\).

\(^1\) Career requires additional post-baccalaureate studies.

The K-12 teaching concentration prepares students to teach elementary, middle and high school physical education. The degree plan includes coursework covering human anatomy and physiology, team and individual sports, exercise science and teaching methods courses. Students will gradually accumulate over 200 hours of classroom experience before beginning student teaching. School districts throughout western Colorado provide opportunities to gain experience with children of all ages and backgrounds in a variety of school settings. Before being admitted into the teacher education program, the following courses must be completed with a grade of B or better:

<table>

<td>1</td>
</tr>
</tbody>
</table>

A grade of C or better is required for MATH 110. Also, a minimum cumulative GPA of 2.8 (including transfer and CMU coursework) is required of all students for admission into the program.

Students enrolled in the personal training certificate should have a strong interest in fitness, health promotion and personal training. Students will engage in practical experiences that will help them with the possibility of a future career in personal training. Students will explore subject areas that include: anatomy, physiology, kinesiology, applications of physical fitness and exercise physiology.

About This Major . . .
Students who select this major will learn to adapt or modify the physical education curriculum and/or instruction to address specific abilities of individuals. Students will learn to develop activities that are appropriate and effective for persons with disabilities. Career opportunities include: adapted physical education teacher (K-12) which requires completing the K-12 concentration coursework; activity director at an assisted living center or rehabilitation facility; physical therapist; occupational therapist. Colorado Mesa students frequently continue their study towards graduate or professional degrees at other universities.

Career requires additional post-baccalaureate studies.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Describe physiological and biomechanical concepts related to movement and be able to communicate and formulate conclusions about the results. (Critical Thinking)
2. Apply motor development theory and principles related to skillful movement, physical activity, and fitness. (Communication Fluency, Specialized Knowledge)
3. Identify the scope and definitions of health, fitness, and human performance with the ability to analyze the data critically. (Applied Learning, Quantitative Fluency)
4. Develop developmentally appropriate learning experiences that address the diverse needs of all individuals. (Applied Learning)
5. Use a variety of assessments and feedback procedures to foster student learning. (Applied Learning, Quantitative Fluency)

Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements
The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Essential Learning Requirements
(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Education: K-12 Education, Kinesiology (BA)

Degree: Bachelor of Arts
Major: Kinesiology
Concentration: K-12 Teaching
Program Code: 3137

About This Major . . .

Students will be prepared to teach elementary, middle, and high school physical education. The degree plan includes coursework covering human anatomy and physiology, team and individual sports, exercise science, and teaching methods courses. Students will gradually accumulate over 200 hours of classroom experience before beginning student teaching. School districts throughout western Colorado provide opportunities to gain experience with children of all ages and backgrounds in a variety of school settings.

Before being admitted into the Teacher Education program, the following courses must be completed with a grade of B or better:

**1 PSYC 150 - General Psychology recommended.**
student learning outcomes, graduates of this major will be able to:

- Responsibility, and information literacy. In addition to these campus-wide fluency, communication fluency, critical thinking, personal and social proficiency in specialized knowledge/applied learning, quantitative fluency,

All CMU baccalaureate graduates are expected to demonstrate career/students/explore/major.html

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

A grade of C or better is required for MATH 110. Also, a minimum cumulative GPA of 2.8 (including transfer and CMU coursework) is required of all students for admission into the program.

Important information about this program:

- Students must maintain a 2.80 cumulative GPA or higher in all CMU coursework.
- All other coursework toward the degree must be successfully completed prior to the internship.
- Kinesiology licensure students must pass the Praxis II content exam prior to student teaching (fee required).
- Students must have ENGL 111 & ENGL 112 (or ENGL 219), PSYC 233, EDUC 115, EDUC 215 with grade of "B" or higher and MATH 110 or higher (with grade of "C" or higher) and formal acceptance to the Teacher Education Program.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Kinesiology Outcome 1: Apply scientific concepts that relate to the development of physically educated individuals. (Critical Thinking)
2. Kinesiology Outcome 2: Consistently display competent motor skills and fitness levels. (Applied Learning)
3. Kinesiology Outcome 3: Plan and teach developmentally appropriate standard based lesson plans. (Specialized Knowledge)
4. Kinesiology Outcome 4: Demonstrate teaching skills and strategies that improve learning for all student abilities. (Communication Fluency)
5. Kinesiology Outcome 5: Use a variety of assessments and feedback procedures to foster student learning. (Applied Learning, Quantitative Fluency)
6. Kinesiology Outcome 6: Engage in behaviors that reflect professional ethics, professional growth, and advocacy of physical education. (Applied Learning)
7. Teacher Education Outcome 1: Demonstrate mastery of major area’s content knowledge and pedagogical strategies through fieldwork with learners in professional settings. (Specialized Knowledge/Applied Learning)
8. Teacher Education Outcome 2: Design and establish a safe, inclusive, and respectful learning environment for a diverse population of students. (Specialized Knowledge/Applied Learning)
9. Teacher Education Outcome 3: Plan and deliver effective instruction to students, based on research-based pedagogical practices. (Communication Literacy/Information Literacy)
10. Teacher Education Outcome 4: Collect and analyze student assessment data and use results to inform planning and instruction. (Quantitative Fluency)
11. Teacher Education Outcome 5: Demonstrate professionalism through ethical conduct, reflection, and leadership. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options'. This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page'. The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.
Essential Learning Requirements
(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Personal Training (Professional Certificate)

Award: Professional Certificate
Program of Study: Personal Training
Program Code: 1145

About This Program . . .

Students enrolled in the Personal Training certificate program should have a strong interest in fitness, health promotion, and personal training. Students will engage in practical experiences that will help them with the possibility of a future career in personal training. Students will explore subject areas that include: anatomy, physiology, kinesiology, nutrition, applications of physical fitness, and exercise physiology. This program is designed to provide the student with the knowledge required to pass national certification examinations to become a National Strength and Conditioning Association – Certified Personal Trainer (NSCA-CPT), National Strength and Conditioning Association – Certified Strength and Conditioning Specialist (NSCA-CSCS), American College of Sports Medicine Certified Personal Trainer (ACSM-CPT), and/or American College of Sports Medicine Certified Exercise Physiologist (ACSM c-EP).

Important information about this program:

- 33 semester hours for the Professional Certificate in Personal Training.
- 2.00 cumulative GPA or higher in the certificate is required.
- At least 33 percent of the credit hours required for the certificate must be in courses numbered 300 or above.
- CPR/First Aid Certification is a graduation requirement for this certificate.
- Students are required to provide documentation (proof of payment and scheduled date) that they are registered to take one of the following exams:
  - American College of Sports Medicine Certified Personal Trainer (ACSM-CPT)
  - American College of Sports Medicine Certified Exercise Physiologist (ACSM c-EP)
  - National Strength and Conditioning Association Certified Personal Trainer (NSCA-CPT)
  - National Strength and Conditioning Association Certified Strength and Conditioning Specialist (NSCA-CSCS)

Both of these certificates require the student to be in their final semester of the baccalaureate degree.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU certificate graduates are expected to demonstrate proficiency in critical thinking, communication fluency, quantitative fluency, and specialized knowledge/applied learning. In addition to these campus wide student learning outcomes, graduates of this major will be able to:

1. Evaluate the functions of the individual body systems.
2. Identify risk factors associated with chronic disease.
3. Identify exercise cautions and other safety concerns.
4. Describe procedures for physiological assessments.
5. Demonstrate the ability to clearly communicate specialized knowledge.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.
Institutional Certificate Requirements

The following institutional requirements apply to all CMU Professional Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Primarily 300-400 level courses.
- At least fifty percent of the credit hours must be taken at CMU.
- 2.00 cumulative GPA or higher in all CMU coursework.
- A grade lower than "C" in the program of study will not be counted toward meeting the certificate's requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Program Specific Certificate Requirements

(33 semester hours, must earn a grade of “C” or better in each course.)

Additional notes about requirements for completion of this degree:

- At least 33 percent of the credit hours required for the certificate must be in courses numbered 300 or above.
- CPR/First Aid Certification is a graduation requirement for this certificate.
- Students are required to provide documentation (proof of payment and scheduled date) that they are registered to take one of the following exams:
  - American College of Sports Medicine Certified Personal Trainer (ACSM-CPT)
  - American College of Sports Medicine Certified Exercise Physiologist (ACSM c-EP)
  - National Strength and Conditioning Association Certified Personal Trainer (NSCA-CPT)
  - National Strength and Conditioning Association Certified Strength and Conditioning Specialist (NSCA-CSCS)

Both of these certificates require the student to be in their final semester of the baccalaureate degree.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your “Intent to Graduate” does not automatically move to a later graduation date.
Land Surveying and Geomatics

Program Description

The Land Surveying program prepares students to use equipment that is an integral part of land development for areas of engineering, construction projects and planning. Students learn to measure elevations, use equipment to measure on or below the surface and use technology to process data. The students will gain the knowledge needed for state certification.

All surveyor-specific courses can be completed for the two-year degree.

An on-line certificate program allows students who are already working as survey interns to complete the necessary computation/calculation, error analysis, and math and ethics coursework to enable them to take and successfully pass the state's Professional Surveyor Exam (progressive work experience in land surveying and geomatics is an additional requirement for examination eligibility).

Land Surveying and Geomatics students will:

- Understand the fundamentals of land surveying and the importance of record research;
- Use the components of Global Positioning Systems (GPS) and Geographical Information Systems (GIS) and be able to gather and analyze data from these systems;
- Develop spreadsheets and utilize other relevant computer programs (CAD and industry specific software programs) to provide accurate surveying analytics;
- Apply higher level mathematical concepts that are necessary to complete complex survey tasks (analytical geometry, upper level algebra, calculus, statistics);
- Utilize the Common Law roots of Boundary Law, its importance in maintaining accurate records and be able to apply those principles in surveying;
- Work within the ethical, as well as the practical, role of surveying, including the applicable state and local laws.

Career Opportunities

- Surveyors
- Geodetic Surveyors
- Soil and Water Conservationists
- Landscape Architects
- Title Examiners, Abstractors, and Searchers
- Appraisers, Real Estate

Land Surveying and Geomatics (AAS)

Degree: Associate of Applied Science
Program of Study: Land Surveying and Geomatics
Program Code: 1334

About This Major...

The Land Surveying and Geomatics program prepares students to use surveying equipment that is an integral part of land development for areas of engineering, construction projects and planning. Students learn to use surveying equipment to measure elevations, and positions on or below the surface of the earth. They also learn to use technology to process the measured data. Students also learn the mathematical and technical calculation fundamentals associated with their measurements, and the fundamental boundary law principles as they apply to boundary surveys and boundary determinations.

The AAS in Land Surveying and Geomatics degree meets the Colorado education requirements to be eligible to take the Fundamentals of Surveying examination for Land Surveyor Intern in the state of Colorado under C.R.S. 12-25-212 (3) (a) (II) (A) ‘Have graduated from a board-approved two-year surveying curriculum’, provided they have the requisite progressive land surveying experience listed under part (II)(B) ‘Have a cumulative record of two years or more of progressive land surveying experience’.

The AAS in Land Surveying and Geomatics degree also meets the Colorado education requirements to be eligible to take the Professional Land Surveyor’s examination for licensure as a Professional Land Surveyor in the state of Colorado under C.R.S. 12-25-214 (2)(a) and (b)(III)(A) ‘Have graduated from a board-approved two-year surveying curriculum or a four year engineering curriculum that included surveying course work as specified by the board by rule’, provided they have the requisite progressive land surveying experience under (III)(B) ‘Have six years of progressive land surveying experience of which four years shall have been under the supervision of a professional land surveyor or an exempt federal employee as defined under 12-25-203 (1)(b), and (III)(C) ‘Have been enrolled as a land surveyor-intern in this state’.

For more information on what you can do with this major, visit WCCC’s Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Demonstrate the theoretical knowledge used in the performance of land surveying and geomatics professions. (Specialized Knowledge)
2. Demonstrate the practical skills and use of surveying tools according to the Land Surveying and Geomatics curriculum. (Applied Learning)
3. Demonstrate the practical skills and use of other surveying, drafting, and GIS tools according to the Land Surveying and Geomatics curriculum. (Applied Learning)

Certificates

- Land Surveying and Geomatics (Technical Certificate) (p. 445)
4. Demonstrate and apply higher level mathematical concepts that are necessary to complete complex survey tasks. (Quantitative Fluency)

5. Describe and understand the Common Law roots of Boundary Law and their importance in maintaining and generating accurate land transaction records and be able to apply those principles in land surveying. (Communication Fluency)

6. Analyze surveying problems and issues to determine the proper approach to the correct solution, including proper measuring and calculation techniques and the common law legal principles to apply to arrive at the proper results and interpretation of these surveying problems. (Critical Thinking)

7. Describe the ethical, as well as the practical role of surveying, including the applicable federal, state and local laws. (Personal and Social Responsibility)

8. Demonstrate an ability to meet the expected norms of the workforce. (Personal and Social Responsibility)

Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements
The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.

Specific to this degree:
- 61 credit hours total required for the AAS in Land Surveying and Geomatics.

Essential Learning Requirements
(17 semester hours)
See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Land Surveying and Geomatics (Technical Certificate)

Award: Technical Certificate
Program of Study: Land Surveying and Geomatics
Program Code: 1122

About This Program . . .

WCCC/CMU has established a post-baccalaureate certificate in an online format that allows individuals across Colorado — and in surrounding states — to complete 37 hours of surveying and math-specific coursework and a combined internship/capstone project. Colorado state law has established certain educational requirements for licensure as a Professional Land Surveyor. The Colorado Architects, Professional Engineers, and Professional Land Surveyors Board (AES Board) has then established more detailed educational requirements to meet the state law. This certificate would allow students who have an engineering degree of four or more years that needs the supplemental education in surveying and math-specific course work as established by the AES
Board to meet the education requirements for eligibility to take the Colorado required exams for the Professional Land Surveyor's License.

For those students with a non-surveying curriculum or non-engineering curriculum of four or more years, additional courses in technological and/or business disciplines, basic science disciplines, and additional math disciplines may be required above this certificate in order to meet the educational requirements for eligibility to take the Colorado required exams to attain a Professional Land Surveyor's License. For those with a bachelor's degree in a non-surveying or non-engineering field, contact the Program Director of the Land Surveying and Geomatics Program for an opinion on whether the Post Baccalaureate Certificate will meet the AES Board defined education requirements when combined with their bachelor's degree. For some, the Associates of Applied Science in Land Surveying and Geomatics may be the more appropriate route to meet that requirement.

As an Admissions requirement for this Post Baccalaureate Certificate Program, students must provide evidence of an earned bachelor's degree in any field from an accredited bachelor's granting program to the Program Director before acceptance into the program can occur.

For more information on what you can do with this major, visit WCCC's Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in communication fluency, quantitative fluency, specialized knowledge/applied learning, and critical thinking. In addition to these campuswide student learning outcomes, graduates of this major will be able to:

1. Demonstrate the theoretical knowledge used in the performance of land surveying and geomatics professions. (Specialized Knowledge)
2. Demonstrate the practical skills and use of surveying tools according to the Land Surveying and Geomatics curriculum. (Applied Learning)
3. Demonstrate and apply higher level mathematical concepts that are necessary to complete complex survey tasks. (Quantitative Fluency)
4. Describe the Common Law roots of Boundary Law and their importance in maintaining and generating accurate land transaction records and be able to apply those principles in land surveying. (Communication Fluency)
5. Analyze surveying problems and issues to determine the proper approach to the correct solution, including proper measuring and calculation techniques and the common law legal principles to apply to arrive at the proper results and interpretation of these surveying problems. (Critical Thinking)
6. Describe the ethical, as well as the practical role of surveying, including the applicable federal, state and local laws. (Personal and Social Responsibility)
7. Demonstrate an ability to meet the expected norms of the workforce. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Program Specific Requirements:

As an Admissions requirement for this Post Baccalaureate Certificate Program, students must provide evidence of an earned bachelor's degree in any field from an accredited bachelor's granting program to the Program Director before acceptance into the program can occur.

For those with a bachelor's degree in a non-surveying or non-engineering field, contact the Program Director of the Land Surveying and Geomatics Program for an opinion on whether the Post Baccalaureate Certificate will meet the Colorado State Board of Architects, Professional Engineers, and Professional Land Surveyors education requirements when combined with their bachelor's degree. For some, the Associates of Applied Science in Land Surveying and Geomatics may be the more appropriate route to meet that requirement instead of this certificate.

Program Specific Certificate Requirements

(37-39 semester hours, must earn a grade of “C” or better in each course.)

### Advising and Graduation

#### Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

### Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
Bachelors/Minors

- Education: Elementary Education, English, Liberal Arts (BA) (p. 448)
- Education: Elementary Education, Mathematics, Liberal Arts (BA) (p. 452)
- Education: Elementary Education, Social Science, Liberal Arts (BA) (p. 456)
- General Studies, Liberal Arts (BA) (p. 460)
- Interdisciplinary Studies, Liberal Arts (BAS) (p. 461)

Education: Elementary Education, English, Liberal Arts (BA)

Degree: Bachelor of Arts
Major: Liberal Arts, Elementary Education
Concentration: English
Program Code: 3291

About This Major . . .

The Center for Teacher Education offers a comprehensive program of study that leads to licensure in Colorado. Our professors are experienced, knowledgeable, accessible, and dedicated to the improvement of public education. At Colorado Mesa University, we pride ourselves on the personal touch. Faculty offer one-on-one guidance for course selection, field placements, student teaching, and employment. Our mission is to develop Educators as Innovators; we are always looking to improve the quality of learning in our programs and K-12 schools.

As a student, you will gradually accumulate over 200 hours of classroom experience before beginning student teaching. School districts throughout western Colorado provide opportunities to gain experience with children of all ages and backgrounds in a variety of school settings.

The elementary licensure program provides teacher education candidates with a broad content knowledge and prepares them as teachers for grades kindergarten through six. A minimum of 60 credit hours of
Essential Learning and content area coursework must be completed with a minimum GPA of 2.80 before a candidate may apply for admission to the Center for Teacher Education elementary licensure program. Please see the Teacher Education Admission Packet for further information on admissions criteria. EDUC 115 and EDUC 215 must be taken before applying to the program.

Important information for this program:

- Students must maintain 2.80 cumulative GPA or higher in all CMU coursework.
- Must earn a grade of "C" or better in all required courses, unless otherwise noted.
- Foreign language proficiency must be demonstrated by high school course work (2 years), college coursework (2 semesters), or competency testing.
- Students must pass the PRAXIS II exam in the content area prior to beginning the internship. All other coursework toward the degree must be successfully completed prior to the internship.
- The program requires ENGL 111, ENGL 112, PSYC 233, EDUC 115 and EDUC 215, MATH 105, and MATH 205 (all with a grade of "B" or better) and formal acceptance to the Teacher Education Program.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. English Outcome 1: Express themselves effectively in a variety of forms. (Communication Fluency)
2. English Outcome 2: Support interpretive claims about a variety of texts. (Critical Thinking)
3. English Outcome 3: Identify the salient features of literary texts from a broad range of English and American literary periods. (Specialized Knowledge)
4. English Outcome 4: Employ knowledge of literary traditions to produce imaginative writing. (Communication Fluency/Applied Learning)
5. English Outcome 5: Use research to assist in problem-solving. (Critical Thinking)
6. English Outcome 6: Demonstrate knowledge of the history or structure of the English language. (Specialized Knowledge)
7. Teacher Education Outcome 1: Demonstrate mastery of major area's content knowledge and pedagogical strategies through fieldwork with learners in professional settings. (Specialized Knowledge/Applied Learning)
8. Teacher Education Outcome 2: Design and establish a safe, inclusive, and respectful learning environment for a diverse population of students. (Specialized Knowledge/Applied Learning)
9. Teacher Education Outcome 3: Plan and deliver effective instruction to students, based on research-based pedagogical practices. (Communication Literacy/Information Literacy)
10. Teacher Education Outcome 4: Collect and analyze student assessment data and use results to inform planning and instruction. (Quantitative Fluency)
11. Teacher Education Outcome 5: Demonstrate professionalism through ethical conduct, reflection, and leadership. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options'. This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 126 semester hours required for the BA in Liberal Arts, Elementary Education, English.

Essential Learning Requirements

(31 semester hours, must earn a grade of “C” or better in each course, unless otherwise noted.)
See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Total Semester Credit Hours 31

1 Must receive a grade of “B” or better and must be completed by the time the student has 60 semester hours.
2 Must be taken after MATH 105.
3 HIST 131 or HIST 132 recommended.
4 ENGL or HIST course recommended.
5 One course must include a lab.

### Program Specific Degree Requirements
(89 semester hours, must earn a grade of “C” or better in each course, unless otherwise noted. Must also maintain a 2.80 cumulative GPA or higher in coursework in this area. A grade of “B” or better is required for all EDUC courses.)

- Students must pass the PRAXIS II exam in the content area prior to beginning the internship. All other coursework toward the degree must be successfully completed prior to the internship.
- The program requires ENGL 111, ENGL 112, PSYC 233, EDUC 115 and EDUC 215, MATH 105, and MATH 205 (all with a grade of “B” or better) and formal acceptance to the Teacher Education Program.

ENGL 245  Imaginative Writing  3
or ENGL 250  Introduction to Creative Writing  3
Essential Learning - Biology  3
Essential Learning - Biology Lab  1
Elementary Core - Social Sciences  3

Total Semester Credit Hours  16

Spring Semester
ENGL 240  Children's Literature  3
ESSL 290  Maverick Milestone  3
ESSL 200  Essential Speech  1
Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Education: Elementary Education, Mathematics, Liberal Arts (BA)

Degree: Bachelor of Arts
Major: Liberal Arts, Elementary Education
Concentration: Mathematics
Program Code: 3491

About This Major . . .

The Center for Teacher Education offers a comprehensive program of study that leads to licensure in Colorado. Our professors are experienced, knowledgeable, accessible, and dedicated to the improvement of public education. At Colorado Mesa University, we pride ourselves on the personal touch. Faculty offer one-on-one guidance for course selection, field placements, student teaching, and employment. Our mission is to develop Educators as Innovators; we are always looking to improve the quality of learning in our programs and K-12 schools.

As a student, you will gradually accumulate over 200 hours of classroom experience before beginning student teaching. School districts throughout western Colorado provide opportunities to gain experience with children of all ages and backgrounds in a variety of school settings.

The elementary licensure program provides teacher education candidates with a broad content knowledge and prepares them as teachers for grades kindergarten through six. A minimum of 60 credit hours of Essential Learning and content area coursework must be completed with a minimum GPA of 2.80 before a candidate may apply for admission to the Center for Teacher Education elementary licensure program. Please see the Teacher Education Admission Packet for further information on admissions criteria. EDUC 115 and EDUC 215 must be taken before applying to the program.

Important information for this program:

- Students must maintain 2.80 cumulative GPA or higher in all CMU coursework.
- Must earn a grade of "C" or better in all required courses, unless otherwise noted.
• Foreign language proficiency must be demonstrated by high school course work (2 years), college coursework (2 semesters), or competency testing.
• Students must pass the PRAXIS II exam in the content area prior to beginning the internship. All other coursework toward the degree must be successfully completed prior to the internship.
• The program requires ENGL 111, ENGL 112, PSYC 233, EDUC 115, EDUC 215, MATH 105 and MATH 205 (all with a grade of "B" or better) and formal acceptance to the Teacher Education Program.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Mathematics Outcome 1: Demonstrate familiarity with the logical and historical development of mathematics and the implications of this development. (Specialized Knowledge)
2. Mathematics Outcome 2: Demonstrate a deep and coherent proficiency in the mathematics underlying elementary curricula. (Quantitative Fluency)
3. Mathematics Outcome 3: Effectively communicate mathematics using oral and written exposition appropriate for teachers of mathematics. (Communication Fluency)
4. Mathematics Outcome 4: Reason mathematically and communicate precisely using clear definitions, appropriate symbols, correct units of measure with an appropriate degree of precision, proper labels, and coherent chains of logic. (Applied Learning)
5. Teacher Education Outcome 1: Demonstrate mastery of major area’s content knowledge and pedagogical strategies through fieldwork with learners in professional settings. (Specialized Knowledge/Applied Learning)
6. Teacher Education Outcome 2: Design and establish a safe, inclusive, and respectful learning environment for a diverse population of students. (Specialized Knowledge/Applied Learning)
7. Teacher Education Outcome 3: Plan and deliver effective instruction to students, based on research-based pedagogical practices. (Communication Literacy/Information Literacy)
8. Teacher Education Outcome 4: Collect and analyze student assessment data and use results to inform planning and instruction. (Quantitative Fluency)
9. Teacher Education Outcome 5: Demonstrate professionalism through ethical conduct, reflection, and leadership. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

• 120 semester hours minimum.
• Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
• 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
• 2.00 cumulative GPA or higher in all CMU coursework.
• A course may only be used to fulfill one requirement for each degree/certificate.
• No more than six semester hours of independent study courses can be used toward the degree.
• Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
• Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
• Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
• The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
• See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Specific to this degree:

• 126 semester hours required for the BA in Liberal Arts, Elementary Education, Mathematics.

Essential Learning Requirements

(31 semester hours, must earn a grade of “C” or better in each course, unless otherwise noted.)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

5. Demonstrate professionalism through ethical conduct, reflection, and leadership. (Personal and Social Responsibility)

Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.
Institutional Degree Requirements
The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.

Specific to this degree:
- 126 semester hours required for the BA in Liberal Arts, Elementary Education, English.

Essential Learning Requirements
(31 semester hours, must earn a grade of “C” or better in each course, unless otherwise noted.)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.
Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

**General Studies, Liberal Arts (BA)**

Degree: Bachelor of Arts  
Major: Liberal Arts - General Studies  
Program Code: 3250

**About This Major . . .**

While Colorado Mesa University provides a wide range of programs, the university may not offer a standard bachelor's degree program that serves a student's particular need. A liberal arts degree, however, is designed to offer a student the opportunity to craft a plan of study to suit his/her individual career and academic aspirations. Under the direction of an advisor, a liberal arts major will design a coherent program by choosing appropriate courses that focus on a very specific field of study.

For more information on what you can do with this major, visit Career Services' What to Do with a Major? ([https://www.coloradomesa.edu/career/students/explore/major.html](https://www.coloradomesa.edu/career/students/explore/major.html)) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Evaluate the interconnections of knowledge within and across at least two major disciplines;
2. Synthesize insights, content, and/or methodologies of two or more major disciplines
3. Develop solutions to specific problems by drawing from several relevant fields of study
4. Effectively defend conclusions in verbal and written presentations

**Requirements**

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

**Institutional Degree Requirements**

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

**Essential Learning Requirements**

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Interdisciplinary Studies, Liberal Arts (BAS)

Degree: Bachelor of Applied Science
Major: Interdisciplinary Studies
Program Code: 3050
About This Major . . .

The Bachelor of Applied Science in Interdisciplinary Studies builds upon a technical specialty to hone the critical thinking, communication, and problem-solving skills necessary to move into leadership positions in any industry. By completing the full Essential Learning curriculum, including the Essential Learning Capstone, students will gain exposure to multiple disciplines and ways of approaching problems. Students will work with an advisor to identify upper-division courses that will best meet their interests and career goals. The BAS in Interdisciplinary Studies is a path for two-year technical degree graduates to earn a 4-year degree in approximately four additional full-time semesters, depending upon prior coursework. Upon completion of the program, students will be technically and academically prepared for leadership positions in their chosen field.

Important information about this degree:

• Formal admission to a BAS program requires completion of the appropriate AAS degree from an accredited institution.
• In order to pursue the BAS: Interdisciplinary Studies, a student must first provide to the Office of Academic Affairs a signed letter from a faculty member in her or his chosen focus area indicating a course sequencing for the focus area as well as a broad description of the student’s summative project. Upon approval by an Assistant Vice-President for Academic Affairs, the student will be declared a BAS: Interdisciplinary Studies major, and the faculty recommender will be assigned as academic advisor. Changes to the course sequencing provided in the letter will require approval by the academic advisor.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? ([https://www.coloradomesa.edu/career/students/explore-major.html](https://www.coloradomesa.edu/career/students/explore-major.html)) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Construct a summative project, paper or practiced-based performance that draws on current research, scholarship and/or techniques, and specialized knowledge in a discipline (communication; specialized knowledge/applied learning).
2. Integrate knowledge between their applied field and one other discipline (critical thinking).
3. Describe reasoned conclusions that articulate the implications and consequences for a particular decision by synthesizing information and methodologies (critical thinking).

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU Bachelor of Applied Science (BAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

• 120 semester hours minimum.
• Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
• 33 upper-division credits.
• 2.00 cumulative GPA or higher in all CMU coursework.
• A course may only be used to fulfill one requirement for each degree/certificate.
• No more than six semester hours of independent study courses can be used toward the degree.
• Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
• Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
• Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements. The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
• See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks
Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audits on a regular basis and should discuss questions or concerns with their advisors or academic department heads. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process
Students must complete the following in the first two months of the semester prior to completing their degree requirements:

• Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
• Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
• Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
• Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

University Studies, Liberal Arts (AA)
Degree: Associate of Arts
Major: Liberal Arts
Emphasis: University Studies
Program Code: 2050
About This Major . . .

The Associate of Arts (AA) degree is designed for students who intend to continue their education and obtain a baccalaureate degree. The AA is the appropriate choice for students who will take upper division coursework in the arts, humanities, or social and behavioral sciences. The degree program includes the Colorado Statewide General Education Core and meets the lower-division general education requirements at most public institutions in Colorado. The University Studies emphasis, by offering a broad range of flexibility in elective courses, provides an opportunity for students who may be potentially exploring their career and major options without regard to a particular disciplinary track.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Locate, gather and organize evidence on an assigned topic addressing a course or discipline-related question or a question of practice in a work or community setting (specialized knowledge/applied learning);
2. Use program-level mathematical concepts and methods to understand, analyze, and explain issues in quantitative terms (quantitative fluency);
3. Make and defend claims in a well-organized, professional document and/or oral presentation that is appropriate for a specific audience (communication fluency);
4. Identify and gather the information/data relevant to the essential question, issue and/or problem and develop informed conclusions (critical thinking).

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU or WCCC Associate of Arts (AA) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours total.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade of “C” or higher must be earned in all Essential Learning courses in order to be accepted for transfer under the Colorado Core Transfer Consortium General Education curriculum or gtPathways, Colorado’s guaranteed transfer program.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 15 semester credit hours for an AA degree. A maximum of 6 of the 15 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Students that intend to continue with Colorado Mesa University for baccalaureate study should take ESSL 290 and ESSL 200 during the final semester of their Associate of Arts work.

**Advising and Graduation**

**Advising Process and DegreeWorks**

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

**Graduation Process**

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at [http://www.coloradomesa.edu/registrar/graduation.html](http://www.coloradomesa.edu/registrar/graduation.html).

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

**Manufacturing Technology**

**Program Description**

**Computer-Aided Design Technology**

The Computer Aided Design program prepares the student for employment in Mechanical, Architectural and Civil Design. Through the use of current CAD software, students will build their skill level beginning with two dimensional drawings and working their way up to three dimensional solid based modeling. With the majority of the work completed on the computer and a project in the area of student's interest which ties the course to real world concepts. Career options include Architectural Drafter/Designer, Mechanical Drafter/Designer and Civil Drafter/Designer.
Machine and Manufacturing Trades

The machining and manufacturing trades specialization offers classroom instruction and related lab work with hands-on activities in the use of machine tools and the operation of equipment found in manufacturing. Students work in the area of blueprint reading, computer numerical control (CNC), machining, general machining and maintenance, CAD and related mathematics. The program is designed to meet competency-based standards set by the industry. Attitude and quality of workmanship are stressed. Career options include entry level machinist, computer-numerical control operator, numerical tool and process technician, manufacturing engineering technician and manufacturing inspection technician.

Machining Technology

The Associate of Applied Science with the manufacturing technology major offers classroom instruction and related lab work with hands-on activities in the use of machine tools and the operation of equipment found in manufacturing. In the machining technology emphasis students learn to apply industrial knowledge and skills to plan and implement designs, operate manual mills and lathes, operate computer-aided machinery with CAD/CAM software and computer-numerical controlled (CNC) machines. Students also develop the skills that enable them to read blueprints, apply appropriate mathematical concepts and understand the properties of metal and polymers. This course of study is designed to meet competency-based standards set by the manufacturing industry. With this degree, students will be qualified for the following employment opportunities: entry-level machinist, computer-numerical control operator, numerical tool and process technician, manufacturing engineering technician and manufacturing inspection technician.

Welding Technology

The welding technology program is designed to provide training and opportunity to become proficient at SMAW, GMAW, GTAW, FCAW, OAW, OAC, PAC, CAC-A on plate, and Robotic Welding with state-of-the-art welding instruction. This program offers classroom lecture and related lab work. Students study welding, cutting, layout, fabrication and technical math. Safety, attitude and quality of workmanship are stressed throughout this course. The welding certificate prepares students for entry-level placement in a wide range of jobs in the welding industry and is designed to meet competency based standards set by the American Welding Society. This program trains students to become certified AWS, API, ASME welders in the welding industry.

The welding technology AAS degree prepares students for advanced level placement in a wide range of jobs in the welding industry and is designed to meet competency based standards set by the American Welding Society.

Certificate programs are designed to be employment-directed for beginning level jobs. Students should check with a welding instructor/advisor about options for specialized employment training requiring a shorter period of training.

The Associate of Applied Science degree program includes many of the same technical courses as the technical certificate. Also included are machining and Computer Aided Design (CAD) courses that are essential for job advancement to more technical levels after employment.

Courses are designed to give students an adequate knowledge of metals, layout work and welding processes, along with an opportunity to gain hands-on skills and the related information needed to enter and progress in various welding occupations. Instruction and shop practice is offered in SMAW, GMAW, FCAW and GTAW of mild steel in all positions as well as pipe and specialty welding. Various cutting and fabrication methods are included. Students can arrange work experience as an elective part of the regular program after completing two semesters or more.

About This Major . . .

The Associate of Applied Science with the Manufacturing Technology major offers classroom instruction and related lab work with hands-on activities in the use of tools and the operation of equipment found in manufacturing. In the Machining Technology emphasis students learn to apply industrial knowledge and skills to plan and implement designs, operate manual mills and lathes, operate computer-aided machinery with CAD/CAM software, and computer-numerical controlled (CNC) machines. Students also develop the skills that enable them to read blueprints, apply appropriate mathematical concepts, and understand...
the properties of metal and polymers. This course of study is designed to meet competency-based standards set by the manufacturing industry. With this degree, students will be qualified for the following employment opportunities: entry-level machinist, computer-numerical control operator, numerical tool and process technician, manufacturing engineering technician, and manufacturing inspection technician.

For more information on what you can do with this major, visit WCCC's Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Use written and oral communication skills needed for entry level employment in the manufacturing industry (Communication Fluency).
2. Apply mathematical concepts to perform machining tasks (Quantitative Fluency).
3. Summarize business practices, principles and application of associated technical skill in the machining industry (Specialized Knowledge).
4. Apply the necessary machining skill sets to perform specified manufacturing processes (Applied Learning).
5. Determine ethical and civil responsibility necessary for employees in the machining industry (Specialized Knowledge).

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options'. This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Specific to this program:

- 61 semester hours total for the AAS, Manufacturing Technology - Machining Technology.

Essential Learning Requirements

(15 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

### Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at [http://www.coloradomesa.edu/registrar/graduation.html](http://www.coloradomesa.edu/registrar/graduation.html).

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

## Welding Technology, Manufacturing Technology (AAS)

Degree: Associate of Applied Science
Major: Manufacturing Technology
Emphasis: Welding Technology
Program Code: 1332

About This Major . . .

This Welding Technology Degree program is designed to provide training and opportunity to become proficient at SMAW, GMAW, GTAW, FCAW, OAC, PAC, blueprint reading, pipe welding, fabrication, automation, layout, mathematics, and safety. This program offers classroom lecture and related lab work. Students study welding, cutting, layout, fabrication and technical math. Safety, attitude and quality of workmanship are stressed throughout this course. The welding AAS degree prepares students for advanced level placement in a wide range of jobs in the welding industry and is designed to meet competency based standards set by the American Welding Society. This program prepares students to become AWS certified welders.

For more information on what you can do with this major, visit WCCC's Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus#wide student learning outcomes, graduates of this major will be able to:

1. Apply business communication using listening, verbal and written forms that are needed for entry level employment in the industry. (Communication Fluency)
2. Apply Mathematical concepts for the Welding industry to meet entry level employment requirements. (Quantitative Fluency)
3. Research, evaluate, synthesize and apply information/data relevant to the welding industry. (Critical Thinking)
4. Demonstrate knowledge of terminology, symbols, business practices, principles and application of associated technical skills in the industry. (Specialized Knowledge)
5. Perform the necessary applied welding skill sets to fulfill the needs of entry level employment. (Applied Learning)
6. Demonstrate ethical and civic responsibility necessary for employees in the welding industry. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Specific to this program:

- 65 semester hours total for the AAS, Manufacturing Technology - Welding Technology.

Essential Learning Requirements

(15 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

#### Advising and Graduation

**Advising Process and DegreeWorks**

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.
Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Civil Drafting, Manufacturing Technology (Technical Certificate)

Award: Technical Certificate
Program of Study: Manufacturing Technology
Specialization: Civil Drafting
Program Code: 1176

About This Program . . .

In this Technical Certificate, students will gain fundamental knowledge of civil drafting. The majority of a student’s work will be completed on the computer. A project in the area of the student’s interest will tie the course to real world concepts.

For more information on what you can do with this major, visit WCCC’s Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in communication fluency, quantitative fluency, specialized knowledge/applied learning, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Apply principles of grammar and vocabulary in documentation required to perform the duties of a Civil Drafting technician and effectively interview clients and community constituents. (Communication Fluency)
2. Apply mathematical concepts and practices that are required to properly perform calculation for design. (Quantitative Fluency)
3. Utilize correct materials, size and design based upon client consultation and industry knowledge. (Critical Thinking)
4. Demonstrate mastery of terminology, concepts, methodologies in the Civil Drafting industry. (Specialized Knowledge)
5. Demonstrate mastery of Specific Civil Design CAD software and generate substantially error free designs. (Specialized Knowledge)

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.
CNC Machinist, Manufacturing Technology (Technical Certificate)
Award: Technical Certificate
Program of Study: Manufacturing Technology
Specialization: CNC Machinist
Program Code: 1129

About This Program...
WCCC's Machine Technology program offers affordable, accessible, high quality manufacturing education and training at the Archuleta Engineering Center. Students learn to apply industrial knowledge and skills to plan and implement designs, operate manual mills and lathes, operate computer aided machinery with CAD/CAM software, and computer-numerical controlled (CNC) machines.

For more information on what you can do with this major, visit WCCC's Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in communication fluency, quantitative fluency, specialized knowledge/applied learning, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Apply the necessary CNC machining skill sets to perform specified manufacturing processes. (Applied Learning)
2. Demonstrate the basic operation of manual mills, lathes and operate computer-aided machinery with software. (Specialized Knowledge)

Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements
The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.

Computer Aided Design/Computer Aided Manufacturing (CAD/CAM), Manufacturing Technology (Technical Certificate)

Award: Technical Certificate
Program of Study: Manufacturing Technology
Specialization: CAD/CAM
Program Code: 1111

About This Program . . .

Through the use of Computer-aided Manufacturing (CAM) and Computer-aided Design (CAD), the student will learn the techniques of basic drafting principles and methods used in today's manufacturing industry. Dimensioning, and geometric construction will be explored with CAD/CAM software and transferred to Computer Numerical Controlled (CNC) machines to operate machine tools and related machinery in the manufacturing and design of work pieces.

For more information on what you can do with this major, visit WCCC’s Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in communication fluency, quantitative fluency, specialized knowledge/applied learning, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Use written and oral communication skills needed for entry level employment in the manufacturing industry. (Communication Fluency)
2. Apply mathematical concepts to perform machining tasks. (Quantitative Fluency)
3. Distinguish between tolerances and dimensions, as used in the machining industry. (Critical Thinking)
4. Summarize business practices, principles and application of associated technical skill in the machining in industry. (Specialized Knowledge)
5. Apply the necessary machining skill sets to perform specified manufacturing processes. (Applied Learning)
6. Determine ethical and civil responsibility necessary for employees in the machining industry. (Specialized Knowledge)

(19 semester hours)
Entry Level Machining, Manufacturing Technology (Technical Certificate)

Award: Technical Certificate
Program of Study: Manufacturing Technology
Specialization: Entry Level Machining
Program Code: 1127

About This Program . . .
Entry Level Machining program introduces manufacturing, print reading/sketching, and machining. Produces machined parts by operating a computer numerical control (CNC) machine; maintaining quality and safety standards; keeping records; maintaining equipment and supplies.

For more information on what you can do with this major, visit WCCC's Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in communication fluency, quantitative fluency, specialized knowledge/applied learning, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

### Machine and Manufacturing Trades, Manufacturing Technology (Technical Certificate)

**Award:** Technical Certificate  
**Program of Study:** Manufacturing Technology  
**Specialization:** Machine and Manufacturing Trades  
**Program Code:** 1337

### About This Program . . .

This program offers classroom instruction and related lab work with hands-on activities in the use of tools and the operation of equipment found in manufacturing. Students will work in the areas of blueprint reading, computer numerical control (CNC) machining, general machining and maintenance, computer-aided drafting (CAD), and related mathematics. This course is designed to meet competency-based standards set by the industry. Attitude and quality of workmanship is stressed. Career options include entry level machinist, computer-numerical control operator, numerical tool and process technician, manufacturing engineering technician, and manufacturing inspection technician.

For more information on what you can do with this major, visit WCCC’s Programs of Study ([https://www.coloradomesa.edu/wccc/programs/](https://www.coloradomesa.edu/wccc/programs/)) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in communication fluency, quantitative fluency, specialized knowledge/applied learning, and critical thinking. In addition to these campus#wide student learning outcomes, graduates of this major will be able to:

1. Use written and oral communication skills needed for entry level employment in the manufacturing industry (Communication Fluency).  
2. Summarize business practices, principles and application of associated technical skill in the machining industry (Specialized Knowledge).
3. Apply the necessary machining skill sets to perform specified manufacturing processes (Applied Learning).

Manual Machinist, Manufacturing Technology (Technical Certificate)

Award: Technical Certificate
Program of Study: Manufacturing Technology
Specialization: Manual Machinist
Program Code: 1128

About This Program . . .

WCCC's Manual Machinist program provides an intensive overview of skills necessary to perform manual machining. Students learn how to apply industrial knowledge and skills work holding, math, inspection, safety, machining, materials, quality, grinding, and assembly to work as a Manual Machinist.

For more information on what you can do with this major, visit WCCC’s Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in communication fluency, quantitative fluency, specialized knowledge/applied learning, and critical thinking. In addition to these campus#wide student learning outcomes, graduates of this major will be able to:

1. Distinguish between tolerances and dimensions, as used in the machining industry. (Quantitative Literacy)
2. Apply the necessary Manual machining skill sets to perform specified manufacturing processes. (Applied Learning)

Advising and Graduation
Advising Process and DegreeWorks
Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process
Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

• Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
• Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
• Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
• Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Mechanical Drafting, Manufacturing Technology (Technical Certificate)
Award: Technical Certificate
Program of Study: Manufacturing Technology
Specialization: Mechanical Drafting
Program Code: 1177

About This Program . . .
In this Technical Certificate, students learn drafting concepts and the processes of orthographic projection, pictorial drawing, dimensioning, and geometric construction by hand and with CAD software and equipment. Students will also gain fundamental knowledge of mechanical drafting. The majority of a student’s work will be completed on the computer. A project in the area of the student’s interest will tie the course to real world concepts.

For more information on what you can do with this major, visit WCCC’s Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in communication fluency, quantitative fluency, specialized knowledge/applied learning, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Apply principles of grammar and vocabulary in the documentation required to perform the duties of a Mechanical Drafting technician and interviewing clients and communicating with constituents. (Communication Fluency)
2. Apply mathematical concepts and practices that are required to properly perform calculation for design. (Quantitative Fluency)
3. Interview clients, to help decide on materials, size and design, based on client's needs and students’ knowledge of the industry. (Critical Thinking)
4. Demonstrate mastery of terminology in the Mechanical drafting industry. (Specialized Knowledge)
5. Demonstrate mastery of Specific Mechanical Design CAD software and generate substantially error free designs. (Specialized Knowledge)

Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements
The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

• Consists of 5-59 semester hours.
• Consists of 100-200 level courses.
• At least fifty percent of the credit hours must be taken at CMU/WCCC.
• 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
• A grade lower than "C" will not be counted toward meeting the requirements.
• A course may only be used to fulfill one requirement for each degree/certificate.
• Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
• Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
• Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
• The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
• See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

• Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
• Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
• Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
• Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Welding Technology, Manufacturing Technology (Technical Certificate)

Award: Technical Certificate
Program of Study: Manufacturing Technology
Specialization: Welding Technology
Program Code: 1338

About This Program . . .

This Welding Technology program is designed to provide training and opportunity to become proficient at SMAW, GMAW, GTAW, FCAW, OAC, PAC, blueprint reading, fabrication, layout, mathematics, and safety. This program offers classroom lecture and related lab work. Students study welding, cutting, layout, fabrication and technical math. Safety, attitude and quality of workmanship are stressed throughout this course. The welding certificate prepares students for entry level placement in a wide range of jobs in the welding industry and is designed to meet competency based standards set by the American Welding Society. This program prepares students to become AWS certified welders in the welding industry.

For more information on what you can do with this major, visit WCCC’s Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in communication fluency, quantitative fluency, specialized knowledge/applied learning, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Apply business communication using listening, verbal and written forms that are needed for entry level employment in the industry. (Communication Fluency)
2. Apply Mathematical concepts to meet entry level employment requirements. (Quantitative Fluency)
3. Research, evaluate, synthesize and apply information/data relevant to the industry. (Critical Thinking)
4. Demonstrate knowledge of welding terminology, symbols, business practices, principles and application of associated technical skills (Specialized Knowledge/Applied Learning)
5. Perform the necessary applied welding skill sets to fulfill the needs of entry level employment. (Applied Learning)
6. Demonstrate ethical and civic responsibility necessary for employees in the industry. (Specialized Knowledge)

Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements
The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than “C” will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Certificate Requirements
(33 semester hours, a grade of “C” or higher is required for all WELD courses.)

- Students in Welding may be required to purchase approximately $500.00 in tools and personal safety welding equipment. This does not include required textbooks. These costs may vary with student need and brand or quality of tools or equipment purchased. All safety glasses must meet the minimum industry safety standard of Z-87 with side shields.

Mass Communication

Program Description

The Mass Communication program provides students with a concentration in media strategies and applications. Students have opportunities to develop the knowledge, theory, and skills that prepare them for the ever-changing, broad field of mass communication. Mass Communication graduates find successful careers across the country in traditional mass media (magazines, newspapers, radio, and TV stations, public relations and advertising), as well as in non-traditional settings such as the Internet, non-profits and government agencies.

Media Strategies and Applications, Mass Communication (BA)

Degree: Bachelor of Arts
Major: Mass Communication
Concentration: Media Strategies and Applications
Program Code: 3256

About This Major . . .

The Bachelor of Arts degree in Mass Communication is a concentration in Media Strategies and Applications. The overriding goal of the program is to offer students opportunities to develop the knowledge, theory and skills that will assist them in securing careers in the ever-changing fields of mass communication.

Graduates of Colorado Mesa University’s Mass Communication program establish successful careers in media (magazines, newspapers, radio, television, public relations, advertising, and Internet-based media), as well as in other venues such as non-profit organizations, and government agencies.

For more information on what you can do with this major, visit Career Services’ What To Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Apply specific paradigms for critical thinking to mass communication. (Critical Thinking)
2. Evaluate and apply diversity, objectivity, and balance to any form of mass communication. (Critical Thinking)
3. Justify the decision for resolving moral or ethical mass communication dilemmas. (Specialized Knowledge)
4. Write a compelling content that demonstrates proper grammar, well-organized facts, and story-telling techniques for a variety of media. (Communication Fluency)
5. Determine validity of sources and research techniques. Additionally, they will be able to interpret data. (Quantitative Fluency)
6. Identify specific examples of media evolution. (Specialized Knowledge)
7. Evaluate mass communication theories and assess their use. (Specialized Knowledge)
8. Demonstrate proper application of industry tools and techniques common to mass communication. (Applied Learning)
9. Determine the best methods and strategies for developing a message. (Communication Fluency)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.
• 120 semester hours minimum.
• Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
• 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
• 2.00 cumulative GPA or higher in all CMU coursework.
• A course may only be used to fulfill one requirement for each degree/certificate.
• No more than six semester hours of independent study courses can be used toward the degree.
• Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
• Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
• Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
• The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
• See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

**Essential Learning Requirements**

*(31 semester hours)*

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

**Advising and Graduation**

**Advising Process and DegreeWorks**

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It
is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

**Graduation Process**

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at [http://www.coloradomesa.edu/registrar/graduation.html](http://www.coloradomesa.edu/registrar/graduation.html). If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

**Mass Communication (Minor)**

Minor: Mass Communication  
Program Code: M250

**About This Minor. . .**

The Bachelor of Arts degree in Mass Communication is a concentration in Media Strategies and Applications. The overriding goal of the program is to offer students opportunities to develop the knowledge, theory and skills that will assist them in securing careers in the ever-changing fields of mass communication.

Graduates of Colorado Mesa University’s Mass Communication program establish successful careers in media (magazines, newspapers, radio, television, public relations, advertising, and Internet-based media), as well as in other venues such as non-profit organizations, and government agencies.

**Requirements**

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

**Institutional Minor Requirements**

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives can be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

**Program Specific Minor Requirements**

(19 semester hours, must maintain a 2.50 cumulative GPA or higher.)

**Advising and Graduation**

**Advising Process and DegreeWorks**

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended minor.
DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the “Intent to Graduate” form.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Mathematics

Program Description

An Associate of Science in Mathematics provides students with a reasonable exposure to foundational college-level mathematics. This degree program includes the Colorado Statewide General Education Core and meets the lower division general education requirements at most public institutions in Colorado. By completing this degree, students should be able to matriculate into a baccalaureate degree in mathematics with only 60 additional hours of coursework.

Pursuing a Baccalaureate degree in Mathematics, students develop powerful problem-solving, logical and critical thinking skills. By completing the required coursework, students gain an understanding of the nature of proof, a broad general understanding of mathematics and a deep understanding of at least one area of mathematics. Math majors also develop independent learning skills and oral and written mathematical communication skills. Mathematics majors get jobs in a wide variety of areas. CMU graduates have worked for local businesses, have run their own businesses and have worked for scientific companies. Other graduates have continued their educations by attending graduate school (in mathematics, computer science and engineering), law school, medical school and veterinary school.

Students who pursue a Baccalaureate degree in Mathematics with a concentration in Applied Mathematics will develop powerful problem-solving, logical and critical thinking skills. Students will use methods of applied mathematics from areas including modeling, linear algebra, ordinary and partial differential equations, numerical methods, computer programming, and statistics to model and solve applied problems. Students will also gain an understanding of the nature of proof and will complete a senior capstone project that includes developing research skills, writing skills, and presentation skills. Applied mathematics graduates can choose to find work in a variety of areas within business, industry, and government or may choose to continue their educations by attending graduate school in areas such as applied mathematics, computer science, and engineering.

The Baccalaureate degree in Mathematics with a concentration in Secondary Education will prepare students to teach in both middle schools and in high schools. While completing this degree, students develop problem-solving and critical thinking skills and are introduced to the logical and historical development of mathematical ideas. Students also learn the professional skills in teaching methods and content necessary for secondary mathematics teachers. Nationally recommended curriculum guidelines are followed in order to ensure that graduates have the mathematical content and conceptual understanding necessary for all high school mathematics courses. Graduates from this program are in demand both locally and statewide with the scarcity of mathematics teachers.

With a Baccalaureate degree in Mathematics with a concentration in Statistics, students develop problem-solving, logical and critical thinking skills. While completing the required coursework, students gain an understanding of the nature of proof, a general understanding of mathematics and an understanding of statistical reasoning, necessary assumptions and the correct use of statistical analysis procedures. Students also develop statistical software skills and oral and written mathematical communication skills. The statistics concentration in mathematics prepares students for graduate work in statistics or to enter the job force. With some additional job-specific training, students entering the job market could function as applied statisticians working in areas such as actuarial science, wildlife management, marketing, quality control and epidemiology to name a few.

With a Baccalaureate degree in Mathematics with a concentration in Actuarial Science, students develop problem-solving, logical and critical thinking skills. While completing this degree, students develop a general understanding of mathematics and an understanding of statistical reasoning including using statistical software to aid in problem-solving and investigation, applying appropriate statistical procedures and drawing valid statistical conclusions. Coursework in economics and finance also helps prepare students for graduate work in actuarial science or to enter the job force. With some additional job-specific training, students entering the job market could function as actuaries in the insurance field or as applied statisticians working in areas such as risk management and marketing.

A Minor in Mathematics is a natural enhancement to many majors outside mathematics where an understanding of mathematics is needed (e.g. physics, computer science, chemistry, biology, geology). A minor in mathematics enables non-mathematics majors to complete a focused course of study in mathematics on a smaller scale.

A Minor in Statistics is a natural enhancement to many majors outside statistics where an understanding of statistical analysis of data is needed (e.g. biology, business, psychology, sociology, history, human performance and wellness, political science). A minor in statistics enables students to complete a focused course of study in statistics on a smaller scale.

The Graduate Certificate in Applied Mathematics is intended to provide licensed secondary mathematics teachers the credentials required by the Higher Learning Commission to teach concurrent enrollment classes and to enable other professionals to enhance their knowledge of applied mathematics. For more complete program information: Applied Mathematics (Graduate Certificate) (p. 320).

Special Requirements

Additional expenses: A graphing calculator is recommended for several mathematics and statistics courses. See department for recommended models.

About This Major...
The actuarial science concentration in mathematics prepares students for graduate work in actuarial science or to enter the job force. With some additional job-specific training, students entering the job market could function as actuaries in the insurance field or as applied statisticians working in areas such as risk management and marketing.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Construct multi-step problem-solving strategies and communicate solutions effectively in written form. (Specialized Knowledge, Quantitative Fluency)
2. Use statistical software (including calculators) to aid in problem-solving and investigation, and understand its limitations. (Applied Learning)
3. Apply appropriate statistical procedures and justify chosen assumptions. (Applied Learning, Personal and Social Responsibility)
4. Investigate, discuss, and respond to ethical and social challenges in a mathematical context. (Communication Fluency, Personal and Social Responsibility, Information Literacy)
5. Draw statistical conclusions and evaluate the validity of others’ conclusions. (Critical Thinking, Information Literacy)
6. Communicate technical analyses to non-specialists. (Communication Fluency)

Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements
The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Essential Learning Requirements
(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

**General Electives**

All college level courses appearing on your final transcript, not listed above, that will bring your total semester hours to 120 hours, including
40 upper-division credit hours. 20-21 semester hours; 3-7 hours of upper division may be needed.

Suggested Course Plan

While the sequencing below culminates in a total of 119-121 semester credit hours, students must complete a minimum of 120 semester credit hours as required for completion of this degree, including satisfactory completion of all required courses. Plan to complete requirements with varying hour options accordingly.

Advising and Graduation

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.
Applied Mathematics, Mathematics (BS)

Degree: Bachelor of Science
Major: Mathematics
Concentration: Applied Mathematics
Program Code: 3437

About This Major . . .

Applied mathematicians use mathematics to solve problems. This program provides mathematics coursework commonly found in applied math settings. Applied mathematics graduates can choose to find work in a variety of areas, or may choose to continue their educations by attending graduate school in areas such as applied mathematics, computer science and engineering.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource and the Society for Industrial and Applied Mathematics (https://www.siam.org/Students-Education/Programs-Initiatives/Thinking-of-a-Career-in-Applied-Mathematics/) career information web page.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Use methods of applied mathematics to model and solve applied problems (Specialized Knowledge, Applied Learning, Quantitative Fluency)
2. Use mathematical software (including calculators) to aid in problem-solving and investigation, and understand its limitations. (Applied Learning)
3. Prove propositions deductively from definitions and theorems, using clear and precise prose. (Critical Thinking)
4. Investigate, discuss, and respond to ethical and social challenges in a mathematical context. (Communication Fluency, Personal and Social Responsibility, Information Literacy)
5. Demonstrate comprehension of applied mathematics and deliver a substantial written and oral presentations. (Specialized Knowledge, Communication Fluency, Information Literacy)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Total Semester Credit Hours 117-123

Advising and Graduation Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at [http://www.coloradomesa.edu/registrar/graduation.html](http://www.coloradomesa.edu/registrar/graduation.html).

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Mathematics (BS)

Degree: Bachelor of Science
Major: Mathematics
Program Code: 3424

About This Major . . .

Mathematics majors get jobs in a wide variety of areas. Our graduates have worked for local businesses, have run their own businesses, and have worked for scientific companies. Other graduates have continued their educations by attending graduate school (in mathematics, computer science and engineering), law school, medical school, and veterinary school.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? ([https://www.coloradomesa.edu/career/students/explore/major.html](https://www.coloradomesa.edu/career/students/explore/major.html)) resource and the Mathematics ([https://www.coloradomesa.edu/math-stat/](https://www.coloradomesa.edu/math-stat/)) website.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Construct multi-step problem-solving strategies and communicate solutions effectively in written form. (Specialized Knowledge, Quantitative Fluency)
2. Use mathematical software (including calculators) to aid in problem-solving and investigation, and understand its limitations. (Applied Learning)

3. Prove propositions deductively from definitions and theorems, using clear and precise prose. (Critical Thinking)

4. Investigate, discuss, and respond to ethical and social challenges in a mathematical context. (Communication Fluency, Personal and Social Responsibility, Information Literacy)

5. Demonstrate comprehension of an advanced topic in mathematics and deliver written and oral presentations. (Specialized Knowledge, Communication Fluency, Information Literacy)

Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements
The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Essential Learning Requirements
(31 semester hours)
See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Education: Secondary Education, Mathematics (BS)

Degree: Bachelor of Science
Major: Mathematics
Concentration: Secondary Education
Program Code: 3430

About This Major . . .

The major in mathematics with a concentration in secondary education will prepare students to teach in both middle schools and in high schools. While completing this degree, students develop problem-solving and critical thinking skills and are introduced to the logical and historical development of mathematical ideas. Students also learn the professional skills in teaching methods and content necessary for secondary mathematics teachers. Nationally recommended curriculum guidelines are followed in order to ensure that graduates have the mathematical content and conceptual understanding necessary for all high school mathematics courses. Graduates from this program are in great demand both locally and statewide with the scarcity of mathematics courses. Graduates from this program are in great demand both locally and statewide with the scarcity of mathematics teachers.

Important information for this program:

• 2.80 cumulative GPA or higher required in all CMU coursework.
• 2.80 cumulative GPA or higher required in coursework toward the major content area.
• All EDUC prefix courses must be completed with a grade of “B” or better.
• Students must pass the PRAXIS II exam in the content area prior to beginning the internship. Also, all other coursework toward the degree must be successfully completed prior to the internship.
• A grade of “C” or better must be earned in all required courses, unless otherwise stated.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource and the Mathematics (https://www.coloradomesa.edu/math-stat/) website.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Mathematics Outcome 1: Construct multi-step problem solving strategies and communicate solutions effectively in written form. (Specialized Knowledge, Quantitative Fluency)  
2. Mathematics Outcome 2: Use mathematical software (including calculators) to aid in problem-solving and investigation, and understand its limitations. (Applied Learning)  
3. Mathematics Outcome 3: Prove propositions deductively from definitions and theorems in clear and precise prose. (Critical Thinking)  
4. Mathematics Outcome 4: Investigate, discuss, and respond to ethical and social challenges in a mathematical context. (Communication Fluency, Personal and Social Responsibility, Information Literacy)  
5. Mathematics Outcome 5: Demonstrate familiarity with the logical and historical development of mathematics and the implications of this development. (Specialized Knowledge)  
6. Mathematics Outcome 6: Effectively communicate mathematics using oral and written exposition appropriate for teachers of mathematics. (Specialized Knowledge, Communication Fluency, Information Literacy)  
7. Teacher Education Outcome 1: Demonstrate mastery of major area’s content knowledge and pedagogical strategies through fieldwork with learners in professional settings. (Specialized Knowledge/Applied Learning)  
8. Teacher Education Outcome 2: Design and establish a safe, inclusive, and respectful learning environment for a diverse population of students. (Specialized Knowledge/Applied Learning)  
9. Teacher Education Outcome 3: Plan and deliver effective instruction to students, based on research-based pedagogical practices. (Communication Literacy/Information Literacy)  
10. Teacher Education Outcome 4: Collect and analyze student assessment data and use results to inform planning and instruction. (Quantitative Fluency)  
11. Teacher Education Outcome 5: Demonstrate professionalism through ethical conduct, reflection, and leadership. (Personal and Social Responsibility)  

Requirements  
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.  

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.  

Institutional Degree Requirements  
The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.  

- 120 semester hours minimum.  
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.  
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).  
- 2.00 cumulative GPA or higher in all CMU coursework.  
- A course may only be used to fulfill one requirement for each degree/certificate.  
- No more than six semester hours of independent study courses can be used toward the degree.  
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.  
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.  
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.  
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.  
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.  

Specific to this degree:  
- 2.80 cumulative GPA or higher required in all CMU coursework.  

Essential Learning Requirements  
(31 semester hours, must pass all courses with a grade of "C" or higher, unless otherwise noted.)  

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

This course is only offered in the fall semester. It may be taken with either the 300-level or 400-level EDUC courses but must be taken before the student teaching semester.

All EDUC prefix courses listed above must be completed with a grade of B or better to progress through the program sequence.

EDUC 497C is only offered in the fall semester. It may be taken with either the 300-level or 400-level EDUC courses but must be taken before the student teaching (internship) semester.

Students must take the PRAXIS II exam in the content area prior to commencing the internship. Also, all other coursework toward the degree must be successfully completed prior to the internship.

**General Electives**

All college level courses appearing on your final transcript, not listed above that will bring your total semester hours to 120 hours. 2-3 semester hours. Must earn a grade of ‘C’ or higher.

<table>

**Advising and Graduation Advising Process and DegreeWorks**

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic advisor.
department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process
Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Statistics, Mathematics (BS)
Degree: Bachelor of Science
Major: Mathematics
Concentration: Statistics
Program Code: 3434

About This Major . . .
The statistics concentration in mathematics prepares students for graduate work in statistics or to enter the job force. With some additional job-specific training, students entering the job market could function as applied statisticians working in areas such as actuarial science, wildlife management, marketing, quality control, and epidemiology to name a few.

For more information on what you can do with this major, visit Career Services' What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Construct multi-step problem-solving strategies and communicate solutions effectively in written form. (Specialized Knowledge, Quantitative Fluency)
2. Use mathematical software (including calculators) to aid in problem-solving and investigation, and understand its limitations. (Applied Learning)
3. Apply appropriate statistical procedures and justify chosen assumptions. (Applied Learning, Personal and Social Responsibility)
4. Draw statistical conclusions and evaluate the validity of others’ conclusions. (Critical Thinking, Information Literacy)
5. Investigate, discuss, and respond to ethical and social challenges in a mathematical context. (Communication Fluency, Personal and Social Responsibility, Information Literacy)
6. Demonstrate comprehension of an advanced topic in statistics and deliver written and oral presentations (Specialized Knowledge, Communication Fluency, Information Literacy)

Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements
The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Essential Learning Requirements
(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.
### Other Lower Division Requirements

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Mathematics, Liberal Arts (AS)

Degree: Associate of Science
Major: Liberal Arts
Emphasis: Mathematics
Program Code: 2425

About This Major . . .

The Associate of Science (A.S.) degree with an emphasis in mathematics provides students with a reasonable exposure to foundational college-
level mathematics. The A.S. is the appropriate choice for students who will take upper division coursework in mathematics, biological sciences, and physical sciences. The degree program includes the Colorado Statewide General Education Core and meets the lower division general education requirements at most public institutions in Colorado. By completing this degree, students should be able to matriculate into a baccalaureate degree in mathematics with only 60 additional hours of coursework.

Important information for this degree:

- Students must maintain a 2.5 cumulative GPA or higher in all CMU coursework.

For more information on what you can do with this major, visit Career Services' What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource and the Mathematics (https://www.coloradomesa.edu/math-stat/) website.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking and personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Construct multi-step problem-solving strategies, and communicate solutions effectively in written form. (Specialized Knowledge/Quantitative Fluency)
2. Use mathematical software (including calculators) to aid in problem-solving and investigation, and understand its limitations. (Applied Learning)

**Requirements**

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

**Institutional Degree Requirements**

The following institutional degree requirements apply to all CMU or WCCC Associate of Science (AS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours total.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade of “C” or higher must be earned in all Essential Learning courses in order to be accepted for transfer under the Colorado Core Transfer Consortium General Education curriculum or gtPathways, Colorado’s guaranteed transfer program.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 15 semester credit hours for an associate of science degree. A maximum of 6 of the 15 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

**Specific to this degree:**

- Students must maintain a 2.5 cumulative GPA or higher in all CMU coursework.

**Essential Learning Requirements**

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

1 Recommended: MATH 240 or CSCI 111.

Suggested Course Plan

While the sequencing below culminates in a total of 60-62 semester credit hours, students must complete a minimum of 60 semester credit hours as required for completion of the degree, including satisfactory completion of all required courses. Plan to complete requirements with varying hour options accordingly.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:
• Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
• Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
• Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
• Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Mathematics (Minor)

Minor: Mathematics
Program Code: M460

About This Minor...

A minor in mathematics is a natural enhancement to many majors outside mathematics where an understanding of mathematics is needed (e.g. physics, engineering, computer science, chemistry, biology, geology). A minor in mathematics enables non-mathematics majors to complete a focused course of study in mathematics on a smaller scale.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

• A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
• Courses taken to satisfy Essential Learning, major requirements, or electives can be counted toward the minor if applicable.
• At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
• At least 25 percent of the classes must be taken at CMU.
• 2.00 cumulative GPA or higher for the courses used for the minor.
• A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
• A minor must be outside the major field of study.

• A student may earn up to five minors with any baccalaureate degree at CMU.
• The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
• See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Program Specific Minor Requirements

Total Semester Credit Hours 18-21
Mechanical Engineering requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process
A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Mechanical Engineering Program Description
Colorado Mesa University and the University of Colorado Boulder have created a partnership to deliver a mechanical engineering program in its entirety in Grand Junction. The CMU/CU-Boulder Mechanical Engineering Partnership Program prepares students for careers in a wide range of industries through the rigorous study of mechanical engineering. Students completing the program will be awarded a Bachelor of Science in Mechanical Engineering degree from CU-Boulder.

Special Requirements
Students enter CMU as "pre-engineering" majors. They may apply to the Mechanical Engineering Partnership Program:

- After one year at CMU if they have completed a two-course sequence in calculus and a two-course sequence in physical science with As or Bs and have an overall GPA of 3.0 or better, or
- After completing all required lower-division coursework at CMU with a GPA in technical courses (calculus, science, and engineering) of 3.0 or better

Interested students can learn more about the program and admission options on the Department of Computer Science and Engineering website (https://www.coloradomesa.edu/engineering/).

Mechanical Engineering, CMU/CU-Boulder Partnership Program (BSME)
Degree: Bachelor of Science in Mechanical Engineering
Major: Mechanical Engineering
Program Code: 3451

This section provides a link to information for the CMU/CU-Boulder Mechanical Engineering Partnership Program. An official review of your coursework will be performed by CU administration to ensure completion of all graduation requirements.

Important information for this program:

- In order to take any Math, Science or Engineering courses, each listed prerequisite (or an equivalent course) must be completed with a grade of "C" or better.
- All engineering students must take ENGL 111 and 112 unless they meet or exceed one of the following criteria: ACT ENGL 27 or SATRW 630 or AP English (Lit & Comp or Lang & Comp) 4 or IB English 4.
- Minimum credits to graduate: 128 hrs

More information for CMU/CU-Boulder Partnership Degree in Mechanical Engineering (https://www.coloradomesa.edu/engineering/degrees/mechanical-engineering-partnership.html)

Mechanical Engineering Technology Program Description
The Bachelor of Science in Mechanical Engineering Technology aims to provide the knowledge necessary to apply state-of-the-art techniques to design and build products and systems to meet the current and future needs of society. The mechanical engineering technology major is designed for a student who is a doer or implementer—one who is able to apply mathematics, the natural and engineering sciences, engineering principles and current engineering practices to the solution of design problems and to the operation and testing of mechanical systems. Laboratory courses are an integral component of the mechanical engineering technology program and are designed to develop student competence to apply experimental design methods, as well as provide a "hands-on" approach to designing and building products and systems to meet the current and future needs of society.

The Associate of Applied Science in Mechanical Engineering Technology provides graduates the skills and knowledge for a successful transition to either a career as a mechanical engineering technician or to continue in the Bachelor of Science program.

Bachelors
• Mechanical Engineering Technology (BS) (p. 511)

Mechanical Engineering Technology (AAS)
Degree: Associate of Applied Science
Major: Mechanical Engineering Technology
Program Code: 1453

About This Major . . .
The objective of the Associate of Applied Science (AAS) in Mechanical Engineering Technology (MET) is to provide the knowledge necessary to aid in the design and realization of products and systems to meet the current and future needs of society. Completion of this applied engineering technology program provides graduates with the skills and knowledge for a successful transition to either a career as a mechanical engineering technician or to the Bachelor of Science program in Mechanical Engineering Technology.

The AAS in MET is designed for a student who is a doer or implementer - one who is able to apply mathematics, the natural and engineering sciences, engineering principles, and current engineering practices to the operation and testing of mechanical systems. Laboratory courses are an integral component of the MET program and are designed to develop student competence to apply experimental design methods, as well as provide a “hands-on” approach to building products and systems.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Apply the knowledge, techniques, skills, and modern tools of engineering to engineering problems. (Critical Thinking/Applied Learning)
2. Apply knowledge of mathematics, science, and technology to engineering problems. (Quantitative Fluency)
3. Effectively use oral, written, and graphical communication skills to address both technical and non-technical audiences. (Communication Fluency)
4. Apply the ethical standards of the discipline to engineering problems. (Specialized Knowledge)

Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. Institutional Degree Requirements
The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

• 60 semester hours minimum.
• Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
• 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
• A course may only be used to fulfill one requirement for each degree/certificate.
• No more than six semester hours of independent study courses can be used toward the degree.
• Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
• Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
• Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
• The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
• See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Specific to this degree:
• 63 semester hours total for the AAS, Mechanical Engineering Technology.

Essential Learning Requirements
(15 semester hours)
See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).
DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

**Graduation Process**

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

**Mechanical Engineering Technology (BS)**

Degree: Bachelor of Science
Major: Mechanical Engineering Technology
Program Code: 3453

**About This Major . . .**

The objective of the Mechanical Engineering Technology Program (MET) is to provide the knowledge necessary to apply state-of-the-art techniques to design and build products and systems to meet the current and future needs of society. The Bachelor of Science Degree in Mechanical Engineering Technology is designed for a student who is doer or implementer - one who is able to apply mathematics, the natural and engineering sciences, engineering principles, and current engineering practices to the solution of design problems and to the operation and testing of mechanical systems.

The MET graduate applies established procedures that use current state-of-the-art techniques to work with mechanical systems. Laboratory courses are an integral component of the MET program and are designed to develop student competence to apply experimental design methods, as well as provide a "hands-on" approach to designing and building products and systems to meet the current and future needs of society. The employment of METs in manufacturing related areas should increase as the demand for improved machinery and machine tools grows and industrial machinery and processes become increasingly complex. Emerging technologies in biotechnology, and nanotechnology will create new job opportunities for METs. In addition to job openings from growth, many openings should result from the need to replace workers who leave the labor force.

For more information on what you can do with this major, visit Career Services' What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Apply knowledge, techniques, skills and modern tools of mathematics, science, engineering, and technology to solve broadly-defined engineering problems appropriate to the discipline (Critical Thinking/Applied Learning)
2. Design systems, components, or processes meeting specified needs for broadly-defined engineering problems appropriate to the discipline (Specialized Knowledge)
3. Apply written, oral, and graphical communication in broadly defined technical and non-technical environments, and identify and use appropriate technical literature (Information Literacy, Communication Fluency)
4. Conduct standard tests, measurements, and experiments and analyze and interpret the results to improve processes (Quantitative Fluency)
5. Function effectively as a member as well as a leader on technical teams
6. Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts (Ethical Reasoning)

**Requirements**

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

**Institutional Degree Requirements**

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
• Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
• Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
• Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
• The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
• See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Specific to this degree:
• 127 semester hours for the BS in Mechanical Engineering Technology.
• Students must register for and complete the Fundamentals of Engineering (FE) exam at an NCEES-approved test center prior to graduation.

Essential Learning Requirements
(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Mechatronics

Program Description
The mechatronics program is developed around the interface of mechanical and electrical systems frequently used in manufacturing. Other applied fields involve commercial and industrial companies that use automated mechanical and electrical systems to assemble, separate, monitor, and transfer products.

Through sequenced coursework, students learn how to integrate various types of electrical, pneumatic, and mechanical motors. Specifically, instruction focuses on the use of Program Logic Controller (PLC) programming and diagnostics. Students will also learn how to read and create schematics for mechanical-electrical component production and installation for real-world applications.

Ultimately, students will build functioning interdependent PLC-driven systems using hydraulic, pneumatic, electrical, and motor controls. Using this combination of software and hardware culminates in the construction of a fully functioning assembly line trainer to help students develop the design, implementation, and troubleshooting skills required across various industries. Hands-on experience is provided through our on-campus labs as well as the Sturm-ANB Bank Mobile Learning Lab a state of the art mobile lab that incorporates modern manufacturing equipment and controllers to create a mini manufacturing floor specifically designed for learning. The Mobile Learning Lab is used to provide experience in operations, troubleshooting, and repair of electromechanical systems.

Programs of Study

Graduation Process
Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Certificates

- Mechatronics (AAS) (p. 515)

Automation and Instrumentation, Mechatronics (Technical Certificate)

Award: Technical Certificate
Major: Mechatronics
Emphasis: Automation and Instrumentation
Program Code: 1198

About This Program . . .
The Mechatronics Technician program responds to a new and emerging career that trains technicians with “multi-craft” skills to work on robotic and “intelligent” equipment ranging from ATM machines to multi-million-dollar manufacturing cells. The skills taught include electrical, mechanical, and computer technologies. Mechatronics technicians will assist the design, development and engineering staff, and install, maintain, modify and repair mechatronic systems, equipment and component parts. The program combines academic training with hands-on activities.

For more information on what you can do with this major, visit WCCC’s Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

2. Demonstrate basic electrical/electronic circuit troubleshooting skill sets and repair skill sets to fulfill the needs of entry-level employment (Critical Thinking).
3. Demonstrate basic hydraulic, pneumatic, troubleshooting skill sets and repair skill sets to fulfill the needs of entry-level employment (Critical Thinking).

Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.
Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Mechatronics (AAS)

Degree: Associate of Applied Science
Major: Mechatronics
Major Code: 1398

About This Major . . .

The Mechatronics program responds to a new and emerging career that trains technicians with “multi-craft” skills to work on robotic and “intelligent” equipment ranging from ATM machines to multi-million-dollar
manufacturing cells. The skills taught include electrical, mechanical, and computer technologies. Mechatronics technicians will assist the design, development and engineering staff, and install, maintain, modify and repair mechatronic systems, equipment and component parts. The program combines academic training with hands-on activities. For more information on what you can do with this major, visit WCCC’s Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Demonstrate communication skills to include listening, speaking, writing and electronic formats (Communication Fluency).
2. Demonstrate ethical, civic, and workplace responsibility as part of professional behavior (Specialized Knowledge).
4. Demonstrate basic troubleshooting skill sets and repair skill sets to fulfill the needs of entry-level employment (Critical Thinking).
5. Analyze and implement systems containing hardware and software components (Specialized Knowledge).

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Specific to this degree:
- A minimum of 61 semester credit hours is required for the AAS in Mechatronics.

Essential Learning Requirements

(15 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation
Advising Process and DegreeWorks
Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process
Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.
Medical Laboratory Technician

Program Description

The Medical Laboratory Technician (MLT) Program at Colorado Mesa University is five semesters in length. Essential Learning requirements and foundation courses are taken the first year and summer and the second year consists mainly of MLT program courses, followed by one semester of clinical internship at an affiliated site in western Colorado. The Medical Laboratory Technician program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS).

The majority of MLT courses are delivered in a blended format. Lecture is delivered online with lab sessions held on campus. All MLT courses are taken concurrently for each semester offered and in sequence starting in the fall.

The student will receive an Associate of Applied Science degree upon successful completion of the program. The graduate is eligible to take the Medical Laboratory Technician national certification exam through the American Society for Clinical Pathologists (ASCP). A passing score on the ASCP exam will allow the student to use the credentials of MLT (ASCP)CM after their name.

Phlebotomy courses are also offered to non-degree seeking students on a permission and space available basis; see the health sciences department for additional information.

Special Requirements

Admission into the University does not guarantee admission into the medical laboratory technology program which requires a separate application submitted in the spring for fall semester courses. Students planning on enrolling in medical laboratory technology courses must submit additional requirements. See the Health Sciences Department (https://www.coloradomesa.edu/health-sciences/) for additional information.

1 These courses may only be taken by Program Director Approval.
2 Must be completed with a grade of “B” or higher.
DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

**Graduation Process**

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at [http://www.coloradomesa.edu/registrar/graduation.html](http://www.coloradomesa.edu/registrar/graduation.html).

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

**Medical Office Assistant**

**Program Description**

This program prepares individuals to perform routine clinical and administrative functions in health care facilities, primarily medical clinics or physician’s offices. Students who successfully complete this program will be able to perform the administrative tasks of a medical receptionist and work in the clinical areas by providing assistance with physical examinations, diagnostic tests and treatment procedures. All students who successfully complete the program are eligible to take the national certification examination offered by the American Medical Technologists, a national certifying agency, to become a Registered Medical Assistant.

Students admitted to the Medical Office Assistant program must undergo a background check, submit proof of immunizations, and obtain professional liability insurance.

About This Major . . .
This program prepares individuals to perform clinical and administrative functions in health care facilities, primarily medical clinics or physician's offices. Students successfully completing this program will be able to perform administrative tasks and work in the clinical areas by providing assistance with physical examinations, diagnostic tests, treatments, and procedures.

All students successfully completing the program are eligible to take the national certification examination offered by the American Medical Technologists, a national certifying agency, to become a Registered Medical Assistant.

For more information on what you can do with this major, visit WCCC's Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus#wide student learning outcomes, graduates of this major will be able to:

1. Demonstrate proficient client assessment and use of information management systems in the medical setting.
2. Demonstrate accurate mathematical skills and quantitative reasoning as a base for patient care decisions.
3. Demonstrate effective oral and written communication utilizing medical terminology, computerized technology, accurate documentation, and verbal expression.
4. Provide safe, quality care by incorporating evidenced-based practice.

Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements
The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Specific to this degree:
- 61 semester hours total for the AAS, Medical Office Assistant.
- A minimum of 16 hours taken at CMU in no fewer than two semesters.

### Advisory Council

The Advisory Council for this program is composed of representatives from the Medical Office Administration field. It provides feedback on the relevance of the program’s objectives, course content, and delivery methods to current and future needs of the workforce. The council meets annually to review and update the program to ensure alignment with industry standards and trends.

### Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at [http://www.coloradomesa.edu/registrar/graduation.html](http://www.coloradomesa.edu/registrar/graduation.html).

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

## Medical Office Assistant (Technical Certificate)

**Award:** Technical Certificate  
**Program of Study:** Medical Office Assistant  
**Program Code:** 1158

### About This Program . . .

This program prepares individuals to perform routine clinical and administrative functions in health care facilities, primarily medical clinics or physician’s offices. Students successfully completing this program...
will be able to perform the administrative tasks of a medical receptionist and work in the clinical areas by providing assistance with physical examinations, diagnostic tests and treatment procedures.

All students successfully completing the program are eligible to take the national certification examination offered by the American Medical Technologists, a national certifying agency, to become a Registered Medical Assistant.

For more information on what you can do with this major, visit WCCC's Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in communication fluency, quantitative fluency, specialized knowledge/applied learning, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Locate, gather and organize evidence on an assigned topic. (Specialized Knowledge)
2. Use program-level mathematical concepts and methods to understand, analyze, and explain issues in quantitative terms. (Quantitative Fluency)
3. Make and defend claims in a well-organized, professional and/or oral presentation that is appropriate for a specific audience. (Communication Fluency)
4. Identify and gather the information/data relevant to the essential question, issue and/or problem and develop informed conclusions. (Critical Thinking)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 41 semester hours for the Technical Certificate in Medical Office Assistant.

Program Specific Certificate Requirements

(41 semester hours, must earn a grade of "C" or better in each course.)

Semester Credit Hours: 17
Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Music

Program Description

The Bachelor of Music with Elective Studies in Business is designed for students who desire a career within the music industry. The comprehensive core curriculum in music includes courses in theory, history, literature, music technology, improvisation, applied study on the major instrument or voice and ensemble performance. Also included are specialized courses in Music Industry and Marketing, Entrepreneurship, Arts Management, Electronic Music, and Advanced Music Technology. Required business courses include options in the areas of Marketing, Management, Accounting, Economics, and the Legal Environment of Business. Finally, an internship component provides the opportunity for students to gain real-world experience in the music industry areas of their choice. Professional success in the musical arts requires a comprehensive understanding of the new business models at work in our digital world. Our program seeks to provide this up-to-date information to enhance success for the student at every level.

The Bachelor of Music Performance is designed for those students who desire a performance-focused career. A strong core curriculum of musicianship courses includes music theory, history, literature, pedagogy, ensemble performance, and applied study. These courses develop students’ abilities and prepare them to perform in a plethora of venues and genres such as symphony orchestras, chamber ensembles, armed forces ensembles, musical theaters, opera, and countless entertainment venues. As a musician in the 21st Century, this degree also seeks to create excellent performers who “create their own future and not simply enter a future that’s been created for them.” A second goal of this program is to train musicians with current skills so they have the ability to make their own opportunities, shape their careers like entrepreneurs, produce their own performances, collaborate with artists from other genres and art forms and perform at a high artistic level. Training in the following areas will assist performers to create a meaningful career in music: Creating and Leveraging a Personal Network, Developing and Executing an Action Plan, Identifying Entrepreneurial Opportunities in Music and the Creative Sector, Interdisciplinary Collaborations, E Marketing your Music, Creating an Artist’s Digital Portfolio, Video Marketing, Independent Business Website.

The Bachelor of Music Education (K-12) degree provides students with the knowledge, skills, and musicianship to become successful music educators. Studies in music theory, history, literature, ensemble performance, and applied study give the student a strong foundation on which to build a successful teaching career. Classes in conducting, instrumental, choral, and elementary techniques as well as music education philosophy develop the skills and knowledge needed for a rewarding career as a K-12 educator. These skills and knowledge are applied during field experiences as well as during the student teaching internship. As a student, you will gradually accumulate over 200 hours of classroom experience before beginning student teaching. School districts throughout Colorado provide opportunities to gain experience with children of all ages and backgrounds in a variety of school settings.

The Bachelor of Arts in Music is a liberal arts degree with a breadth of general studies in English, Math, Humanities, Natural Sciences, History, Social and Behavioral Sciences and Fine Arts. Combined with courses in music theory, music history and literature, ensembles and applied studies, this curriculum provides a strong foundation that is integrated with 25 course credits of the student’s choosing, allowing the flexibility to creatively design a personalized degree program. Students in this major have the ability to create a curriculum tailored to their strengths and career interests that can focus on traditional music, contemporary commercial music, their own musical compositions, or an interdisciplinary program of study designed by the student.

The minor in instrumental music offers students in other majors the opportunity to stay involved with music in college, gaining experience and skills in music lessons, ensembles, and academics. The minor includes three years of ensembles and lessons on an applied instrument; academic courses in music theory, appreciation, and literature; as well as an upper-division elective.

The vocal music minor provides training and performance opportunities for students seeking music development in voice as their secondary area.
of study. Fundamental studies in piano, music reading and theory, two years of voice lessons, three years of performing in choral ensembles, studies in diction and conducting and performance training in opera scenes comprise this minor. Audition for acceptance into the vocal minor is required.

The jazz studies minor provides the opportunity for students to obtain a comprehensive set of fundamental skills in the jazz area, including large-ensemble performance, small-group performance, improvisation, composition and arranging, history and literature, and private instruction. Music majors who add this minor will broaden their skill set and marketability beyond the classical music area, and non-music majors may add this minor as a secondary area of study. Entrance to the jazz studies minor requires an audition and prior jazz experience.

Special Requirements
Students seeking admittance as a music major must pass a performance audition, a music theory placement exam and a piano proficiency assessment. Admission to Colorado Mesa University does not guarantee admission into a music degree program. Prospective music majors should consult the music department website or contact the music department for information about audition material and scheduling an audition with the faculty in their area of interest.

Following the audition, students will be notified of audition results. Students admitted as new music majors will be assigned an advisor and should plan to attend an orientation, registration and advising session. If the advisor is unavailable, students should contact the Department Head of Music.

About This Major . . .
The Bachelor of Arts in Music is a liberal arts degree with a breadth of general studies in English, math, humanities, natural sciences, history, social and behavioral sciences and fine arts. Combined with courses in music theory, music history and literature, ensembles and applied studies, this curriculum provides a strong foundation that when innovatively integrated with 25 course credits of the student’s choosing, allows the flexibility to creatively design a personalized degree program. Students in this major have the ability to create a curriculum tailored to their strengths and career interests that can focus on traditional music, contemporary-commercial music, their own musical compositions or an interdisciplinary program of study, designed by the student.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Develop and express music judgments through solo performance. (Critical Thinking)
2. Use music knowledge to formulate insights, perspectives, or demonstrate practical applications relating to other disciplines. (Specialized Knowledge)
3. Conduct research on a specialized topic in music that results in a well-organized document or oral presentation. (Communication Fluency)

Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements
The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a
baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.

- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

**Essential Learning Requirements**

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

- Some Essential Learning credits will have to be completed in the junior year.

**Program Specific Degree Requirements**

(35 semester hours, must pass all courses with a “C” or better and maintain a 2.0 cumulative GPA or higher in coursework in this area.)

- Students must complete eight semesters of Music Lessons (MUSL), two at each academic level.
- Students deficient in piano skills will be required to complete MUSA 130 (2), MUSA 131 (2), MUSA 230 (2), and/or MUSA 231 (2), in the first two years.
- Students must meet departmental recital/concert attendance requirements.
- Students must pay close attention to the Department’s two-year course rotation.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

• Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
• Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
• Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
• Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Education: Music Education K-12 (BME)

Degree: Bachelor of Music Education
Major: Music Education K-12

Program Code: 3282

About This Major . . .

The Music Education K-12 degree provides students with the knowledge, skills, and musicianship to become a successful music educator. Studies in music theory, history, literature, ensemble performance, and applied study give the student a strong foundation on which to build a successful teaching career. Classes in conducting, instrumental, choral, and elementary techniques develop the skills and knowledge needed for a rewarding career as a K-12 educator. These skills and knowledge are applied during field experiences as well as during the student teaching internship.

As a student, you will gradually accumulate over 200 hours of classroom experience before beginning student teaching. School districts throughout western Colorado provide opportunities to gain experience with children of all ages and backgrounds in a variety of school settings. A minimum of 75 credit hours of Essential Learning and content area coursework must be completed with a minimum GPA of 2.80 before a candidate may apply for admission to the Center for Teacher Education secondary licensure program. Please see the Teacher Education Admission Packet for further information on admissions criteria.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Music Education Outcome 1: Develop and express music judgments through solo performances (Intellectual Skills - Critical Thinking)
2. Music Education Outcome 2: Identify current national and state music education standards (Specialized Knowledge)
3. Music Education Outcome 3: Demonstrate mastery of major area’s content knowledge and pedagogical strategies through fieldwork with learners in professional settings. (Specialized Knowledge/Applied Learning)
4. Music Education Outcome 4: Conduct research on a specialized topic in music that results in a well-organized document or oral presentation (Intellectual Skills – Communication Fluency)
5. Music Education Outcome 5: Demonstrate teaching techniques in an instrumental or vocal setting (Specialized Knowledge)
6. Teacher Education Outcome 1: Demonstrate mastery of major area’s content knowledge and pedagogical strategies through fieldwork with learners in professional settings. (Specialized Knowledge/Applied Learning)
7. Teacher Education Outcome 2: Design and establish a safe, inclusive, and respectful learning environment for a diverse population of students. (Specialized Knowledge/Applied Learning)
8. Teacher Education Outcome 3: Plan and deliver effective instruction to students, based on research-based pedagogical practices. (Communication Literacy/Information Literacy)
9. Teacher Education Outcome 4: Collect and analyze student assessment data and use results to inform planning and instruction. (Quantitative Fluency)
10. Teacher Education Outcome 5: Demonstrate professionalism through ethical conduct, reflection, and leadership. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Specific to this program:

- 126 semester hours required for the BME in Music Education K-12.
- 2.80 cumulative GPA or higher in all CMU coursework.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

For this program, some Essential Learning credits will have to be completed in the junior year. See suggested course sequencing for more details.

- MUSA 129 Singer’s Diction I: English and German 1
- MUSA 229 Singer’s Diction II: Italian & French 1
Suggested Course Plan
Suggested 8-semester course sequencing

It is highly suggested to take summer and J-term courses to finish the degree in this time frame. Most students require remedial piano courses to meet their piano proficiency requirement as well.

While the total semester hours below reads 122-134, students in this program (both vocal and keyboard/instrumental) actually complete a minimum of 126 hours. This variation in the total hours count is due to differences in requirements for vocal versus instrumental and keyboard students and how specific course ranges reflect in the total count.

</table>

1. While the total for this section reads 24-26, students must complete 25 hours. The variation is due to courses that differ for vocal versus instrumental and keyboard students.

2. Students must select the option that aligns with their area of focus.

3. Must be completed with a grade of “B” or better.

4. Program Requirements: ENGL 111, ENGL 112, PSYC 233, EDUC 115 and EDUC 215 (all with a grade of “B” or better) and formal acceptance to the Teacher Education Program.

All EDUC prefix courses listed above must be completed with a grade of ‘B’ or better to progress through the program sequence. Students must pass the PRAXIS II exam in the content area prior to commencing the internship. Also, ALL other coursework toward the degree must be successfully completed prior to the internship.

Advising and Graduation
Advising Process and DegreeWorks
Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process
Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Music Performance - Instrumental (BM)
Degree: Bachelor of Music
Major: Music Performance – Instrumental Performance
Program Code: 3285
About This Major . . .

The Bachelor of Music Performance is designed for those students who desire a performance-focused career. A strong core curriculum of musicianship courses includes music theory, history, literature, pedagogy, ensemble performance, and applied study. These courses develop the student's abilities and prepare them to perform in a plethora of venues. As a musician in the 21st Century, this degree also seeks to create excellent performers who create their own future. This program will train musicians with professional skills to make their own opportunities, shape their careers like entrepreneurs, produce their own performances, collaborate with artists from other genres and art forms, and perform at a high artistic level. Training in the following areas will assist performers to create a meaningful career in music: identifying entrepreneurial opportunities in music and the creative sector, interdisciplinary collaborations, e-marketing your music, creating an artist's digital portfolio, video marketing, and independent business website.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Develop and express music judgments through solo performances (Critical Thinking)
2. Demonstrate knowledge of music history and music theory in oral and written presentations. (Communication Fluency)
3. Synthesize knowledge of repertory and pedagogy specific to the student’s instrument. (Specialized Knowledge)
4. Create digital portfolio, and create their own marketing and/or business brand that reflects current trends in the music profession. (Communication Fluency)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

1. 120 semester hours minimum.
2. Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
3. 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
4. 2.00 cumulative GPA or higher in all CMU coursework.
5. A course may only be used to fulfill one requirement for each degree/certificate.
6. No more than six semester hours of independent study courses can be used toward the degree.
7. Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
8. Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
9. Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
10. The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
11. See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either ‘Send Page to Printer’ or 'Download PDF of This Page.’ The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

• 120 semester hours minimum.
• Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
• 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
• 2.00 cumulative GPA or higher in all CMU coursework.
• A course may only be used to fulfill one requirement for each degree/certificate.
• No more than six semester hours of independent study courses can be used toward the degree.
• Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
• Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
• Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
• The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
• See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

**Essential Learning Requirements**

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

**Program Specific Degree Requirements**

(56 semester hours, must pass each course with a “C” or better and maintain a 2.0 cumulative GPA or higher in coursework in this area.)

- MUSP and MUSL credits may only be used once on a program sheet. Student should consult their advisor when determining the section to use these courses.
- Students deficient in piano skills will be required to complete MUSA 130, MUSA 131, MUSA 230, and MUSA 231 in the first two years. Some Essential Learning credits will have to be completed in the junior year.

Advising and Graduation
Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Music Performance - Vocal (BM)

Degree: Bachelor of Music
Major: Music Performance – Vocal Performance
Program Code: 3287

About This Major . . .

The Bachelor of Music Performance is designed for those students who desire a performance-focused career. A strong core curriculum of musicianship courses includes music theory, history, literature, pedagogy, ensemble performance, and applied study. These courses develop the student's abilities and prepare them to perform in a plethora of venues. As a musician in the 21st Century, this degree also seeks to create excellent performers who create their own future. This program will train musicians with professional skills to make their own opportunities, shape their careers like entrepreneurs, produce their own performances, collaborate with artists from other genres and art forms and perform at a high artistic level. Training in the following areas will assist performers to create a meaningful career in music: identifying entrepreneurial opportunities in music and the creative sector, interdisciplinary collaborations, e-marketing your music, creating an artist’s digital portfolio, video marketing, and independent business website.

For more information on what you can do with this major, visit Career Services' What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Develop and express music judgments through solo performances (Critical Thinking)
2. Demonstrate knowledge of music history and music theory in oral and written presentations. (Communication Fluency)
3. Synthesize knowledge of repertory and pedagogy specific to the student's instrument. (Specialized Knowledge)
4. Create digital portfolio, and create their own marketing and/or business brand that reflects current trends in the music profession. (Communication Fluency)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options'. This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
• No more than six semester hours of independent study courses can be used toward the degree.
• Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
• Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
• Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
• The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
• See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Essential Learning Requirements  
(31 semester hours)
See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Program Specific Degree Requirements
(56 semester hours, must pass each course with a “C” or better and maintain a 2.0 cumulative GPA or higher in coursework in this area.)

• MUSP and MUSL credits may only be used once on a program sheet. Student should consult their advisor when determining the section to use these courses.
• Students deficient in piano skills will be required to complete MUSA 130, MUSA 131, MUSA 230, and MUSA 231 in the first two years. Some Essential Learning credits will have to be completed in the junior year.

Advising and Graduation
Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Music with Elective Studies in Business (BM)

Degree: Bachelor of Music
Major: Music with Elective Studies in Business
Program Code: 3281

About This Major . . .

The Bachelor of Music with Elective Studies in Business is designed for students who desire a career within the music industry. The comprehensive core curriculum in music includes courses in theory, history, literature, music technology, improvisation, and applied study on the major instrument or voice and ensemble performance. Also included are specialized courses in Music Industry and Marketing, Entrepreneurship and Advanced Music Technology. Required business courses include the areas of Marketing, Management, Economics, and the Legal Environment of Business. This degree will also result in completion of the requirements for a Certificate in Entrepreneurship. Finally, an internship component provides the opportunity for students to gain real world experience in the music industry areas of their choice. Professional success in the musical arts requires a comprehensive understanding of the new business models at work in our digital world.

Our program seeks to provide this up-to-date information to enhance success for the student at every level.

For more information on what you can do with this major, visit Career Services’ What To Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.
All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Develop and express music judgments through solo performances. (Critical Thinking)
2. Create materials for effective marketing in the arts field. (Communication Fluency)
3. Apply music industry concepts to an approved capstone, which may consist of a senior presentation and/or recital. (Applied Learning)
4. Produce digital audio projects through multi-track recording, sequencing and editing using industry standard software. (Applied Learning)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Total Semester Credit Hours 6

Suggested Course Plan
While the total semester hours below reads 118-123, students must complete a minimum of 120 hours for this degree. This variation is due to different options for vocal and instrumental student, which results in varying potential credit hours by semester. Students should work with their advisor to make sure the correct number of Music Elective hours are completed depending on the course selected to complete this requirement.

Semester Credit Hours 12

Total Semester Credit Hours 118-122

1 Students only need to complete MUSA 129, MUSA 229, or MUSA 368. MUSA 129 and MUSA 229 are options for vocal students, and MUSA 368 is an option for instrumental students. For semesters in which these courses are listed, MUSA 129, MUSA 229, or MUSA 368 only need to be taken if two of the other options are not in the student's plan for progress to degree. This results in variation in hours suggested for enrollment for these semesters.

2 Student must complete either MUSA 326 (offered in Fall only) or MUSA 327 (offered in Spring only), as well three credits of Music Electives. If a student opts to take MUSA 326 their Third Year/Fall Semester, then they should complete their Music Elective in Third Year/Spring Semester. Alternatively, if a student opts to take MUSA 327 in Third Year/Spring Semester, then they should complete their Music Elective in Third Year/Fall Semester.

Advising and Graduation
Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic...
Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

• Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
• Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
• Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
• Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Jazz Studies (Minor)

Minor: Jazz Studies

Program Code: M213

About This Minor . . .

The Jazz Studies Music Minor provides the opportunity for students to obtain a comprehensive set of fundamental skills in the jazz area, including large-ensemble performance, small-group performance, improvisation, composition and arranging, history and literature, and private instruction. Music majors who add this minor will broaden their skill set and marketability beyond the classical music area, and non-music majors may add this minor as a secondary area of study. Entrance to the Jazz Studies Music Minor requires an audition and prior jazz experience.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

• A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
• Courses taken to satisfy Essential Learning, major requirements, or electives can be counted toward the minor if applicable.
• At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
• At least 25 percent of the classes must be taken at CMU.
• 2.00 cumulative GPA or higher for the courses used for the minor.
• A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
• A minor must be outside the major field of study.
• A student may earn up to five minors with any baccalaureate degree at CMU.
• The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
• See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the “Intent to Graduate” form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Music - Instrumental (Minor)

Minor: Music - Instrumental
Program Code: M210

About This Minor...

The Minor in Instrumental Music offers students in other majors the opportunity to stay involved with music in college, gaining experience and skills in music lessons, ensembles, and academics. The minor includes three years of ensembles and lessons on an applied instrument; academic courses in music theory, appreciation, and literature; as well as an upper division elective.

Requirements

The Vocal Music Minor provides training and performance opportunities for students seeking music development in voice as their secondary area of study. Fundamental studies in piano, music reading and theory, two years of voice lessons, three years of performing in choral ensembles, studies in diction and conducting, and performance training in opera scenes comprise this minor. Audition for acceptance into the Vocal Minor is required.

Advising and Graduation
Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the “Intent to Graduate” form.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Nurse Aide
Program Description

The Nurse Aide certificate program provides the student with entry-level skills required for employment as a nurse aide in a long-term care facility, an acute care facility, or a home health care agency. Special needs of the geriatric population are emphasized. Students who successfully complete this certificate qualify to take the National Nurse Aide Assessment Program (NNAAP) Examination in order to become certified and placed on the Colorado Nurse Aide Registry. Instruction includes basic nursing skills, personal care skills, care of cognitively impaired clients, skills that meet the psycho-social and mental health needs of clients, and basic restorative services. Students gain an understanding of professional communication and interpersonal skills in health care, infection control, safety and emergency procedures, promoting clients’ independence, and respecting clients’ rights. A minimum of 92 hours of training is required.

Students admitted to the Nurse Aide program must undergo a background check, submit proof of immunizations, and obtain professional liability insurance.

Program Code: 1602

About This Program . . .

This certificate is designed to provide the student with entry-level skills required for employment as a nurse’s aide in a long-term care facility, an acute care facility or a home health care agency. Special needs of the geriatric population are emphasized. Students who successfully complete this certificate qualify to take the State Certification Examination. Instruction includes basic nursing assistant procedures,
skills, restorative services, general household activities, patient care, safety, and emergency care. Students gain an understanding of the responsibilities involved in working with patients of all ages, in both wellness and illness, issues of mental health, patient rights, and patient/family interactions. A minimum of 92 contact hours hours of training is required.

For more information on what you can do with this major, visit WCCC's Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in communication fluency, quantitative fluency, specialized knowledge/applied learning, and critical thinking. In addition to these campuswide student learning outcomes, graduates of this program will be able to:

1. Examine the professional certified nursing assistant’s potential strength in various roles within the health care delivery system (Specialized Knowledge)
2. Demonstrate skills outlined by the State board of Nursing for nursing assistants in regards to the five terminal competencies (Applied Learning)
3. Discuss the characteristics that healthcare workers demonstrate that promote professionalism and explain the importance of each characteristic (Specialized Knowledge)
4. Describe the ethical standards that govern the nursing profession in particular and the health care profession in general. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than “C” will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Program Specific Certificate Requirements

(5 semester hours, must maintain a 2.00 cumulative GPA or higher in coursework.)

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.
Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Nursing

Program Description

The practical nurse (PN) program is designed for students interested in an entry-level position in the nursing career ladder program. The PN program is accredited by the Accreditation Commission for Education in Nursing (ACEN) and has full approval by the Colorado State Board of Nursing. Completion of the PN certificate allows students to progress for advanced placement in the Bachelor of Science in Nursing degree. The PN program prepares the student to be a direct care giver in hospitals, long-term facilities and ambulatory care-clinic settings. This program has selective admission requirements. Admission to the University does not guarantee admission to the program; a separate admission application to the program is required.

The LPN–BSN program for licensed practical nurses who are seeking to obtain an RN degree opens up greater employment opportunities, increased compensation and more job security within the nursing profession. The LPN–BSN program is accredited by the Commission on Collegiate Nursing Education (CCNE) and has full approval by the Colorado State Board of Nursing. The LPN–BSN program offers a balance between general college study and nursing education and prepares students to be direct caregivers in a variety of health care settings. This program has selective admission requirements. Admission to the University does not guarantee admission to the program; a separate admission application to the program is required. The LPN-BSN program begins in the spring each year and is completed in three semesters.

The RN-BSN nursing program enrolls Registered Nurses with current RN licenses from associate degree and diploma programs into the baccalaureate BSN program with advanced standing. The Registered Nurse student will be considered in terms of the Colorado Nursing Articulation Model. The RN may complete the professional component of the program by attending college full time or part time online. The RN to BSN program offers an accelerated model of instruction. Courses will be offered in a 7-week online format. There will be five start dates for the 7-week format and students may take one or two classes per session. The RN-BSN program is accredited by the Commission on Collegiate Nursing Education (CCNE). This program is designed for associate and diploma

RN's. Admission to the University does not guarantee admission to the program.

The Bachelor of Science in Nursing (BSN) is designed for high school graduates and students without prior nursing certificates or degrees. The four-year program provides educational experiences which prepare a professional nurse generalist to practice in a variety of health care settings. It is accredited by the Commission on Collegiate Nursing Education (CCNE) and approved by the Colorado State Board of Nursing. The BSN program integrates nursing theory, practice and science with a broad liberal arts education. It has been developed to prepare highly competent professionals with the education necessary to meet the increasing needs for quality health care in society and provides students with the foundation for graduate study in nursing. Admission to the University does not guarantee admission to the program; a separate admission application to the program is required.

The Masters of Science in Nursing (MSN) program prepares nurses for roles as family nurse practitioners (FNPs) or nurse educators (NE) in healthcare or academic settings. MSN graduates formulate clinical, administrative, or policy decisions to promote health among patients, families or communities along the continuum of wellness and illness.

Graduates may advance to higher levels of education through doctoral programs. Students choose one of two cognates as their substantive area of study: NE or FNP. The courses are delivered via an online format, allowing students to reside in their home communities. However, students may be required to travel for completion of clinical hours or for GPSI sessions. Admission to the university does not guarantee admission to the program. The MSN program is accredited by the Commission of Collegiate Nursing Education (CCNE).

The Doctor of Nursing Practice (DNP) degree is for nurses who are interested in an advanced practice role as a family nurse practitioner (FNP) and nurse leader in healthcare systems. DNP graduates are prepared as experts in the delivery of primary care, with a focus on critical thinking, leadership and public policy skills needed to advocate for and create changes in healthcare practice at all levels. Courses are delivered online allowing students to reside in their home communities. Admission to the University does not guarantee admission to the program. The DNP program is accredited by the Commission of Collegiate Nursing Education (CCNE).

Special Requirements

Admission to Colorado Mesa University does not guarantee admission into the nursing programs. Please contact the Health Sciences Department for additional information.

Progression requirements: All nursing courses must be completed in sequence. In the traditional BSN program, all required 300-level courses must be completed before 400-level nursing courses may be taken. The graduate nursing programs (MSN and DNP) require a Bachelor of Science in Nursing degree from a nationally accredited institution.

Students transferring in credit for human anatomy and physiology taken at out-of-state accredited colleges/universities must provide evidence that these courses had separate laboratory components before the course can be accepted to fulfill program requirements.

High school courses in biology, chemistry and algebra are recommended. All non-nursing college courses must be completed before a student can be admitted to the nursing programs with the exception of the RN-BSN program. An admission committee selects students from applicants who
best meet requirements. All admission materials must be on file in the Department of Health Sciences office prior to deadlines established for each program:

Application deadlines for each program are as follows:

- **PN Program:**
  - March 1 for fall entrance
- **AAS Program**
  - April 15 for fall entrance
- **LPN—BSN Program:**
  - October 1 for spring entrance
- **BSN Program:**
  - September 15 for spring entrance, or
  - February 15 for fall entrance
- **RN-BSN:**
  - Five start dates, please see dates online
- **MSN Program:**
  - April 1 for fall entrance
- **DNP Program:**
  - April 1 for fall entrance

Undergraduate students must have a 2.0 ("C") on a 4.0 scale or higher grade for all courses required for completion of the undergraduate nursing programs (PN, AAS, BSN, LPN-BSN, RN-BSN). This policy applies regardless of when the course was taken.

Graduate students must have a 3.0 ("B") on a 4.0 scale or higher grade for all courses required for completion of the graduate nursing programs (MSN, DNP). This policy applies regardless of when the courses were taken. A “C” grade or lower in any required course will not count toward graduation requirements. See Graduate Programs section of this catalog for complete degree requirements.

Students admitted to undergraduate nursing programs must undergo a background check and drug screening and must maintain CPR certification and professional liability insurance for clinical practice. Students in the RN-BSN program must also maintain a current nursing license. Students enrolling in graduate nursing clinical courses are required to hold unencumbered RN licenses in states where clinical rotations are completed. Students must maintain RN licenses, cardiopulmonary resuscitation (CPR) certification, liability insurance, and current vaccinations for the duration of their graduate studies.

### Nursing (AAS)

**Degree:** Associate of Applied Science

**Major:** Nursing

**Program Code:** 1615

### About This Major...

This program, which is offered on the Montrose campus, allows the student to achieve an Associate of Applied Science in Nursing degree, opening up greater employment opportunities, increased compensation, and more job security. The Associate of Applied Science in Nursing program prepares the student to achieve a balance between general college and nursing education. The Associate of Applied Science in Nursing RN is prepared to be a direct caregiver in hospitals, long-term facilities, and ambulatory care-clinical settings.

This program has selective admission requirements. It is the student’s responsibility to obtain the current admission requirements.

Important information for this program:

- All essential learning requirements and prerequisite courses must be in progress or completed before applying to the program. Additional admission requirements also apply. Please visit the Department of Health Sciences’ website for a complete list of admission requirements and program information.

For more information on what you can do with this major, visit Career Services’ "What to Do with a Major?" resource.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Exhibit professional nursing care to diverse patients across the lifespan. (Specialized Knowledge/Applied Learning)
2. Utilize health information systems to provide safe patient care throughout the health care environment. (Specialized Knowledge/Applied Learning)
3. Incorporate therapeutic communication into all interactions. (Communication Fluency)
4. Incorporate evidence based practice in the application of care to provide safe quality outcomes. (Critical Thinking)
5. Utilize principles of leadership and management skills in caring for patients throughout the lifespan. (Specialized Knowledge/Applied Learning)

For more information on what you can do with this major, visit Career Services’ "What to Do with a Major?" resource.
6. Display accountability utilizing ethical reasoning. Incorporate compassionate and empathetic behaviors while providing care. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 79 semester hours required for the AAS in Nursing.
- Must have a ‘C’ or better in all courses.

Essential Learning Requirements

(15 Semester hours, must earn a grade of ‘C’ or better in each course for this degree.)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

### Advising and Graduation

#### Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

#### Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at [http://www.coloradomesa.edu/registrar/graduation.html](http://www.coloradomesa.edu/registrar/graduation.html).

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

### Doctor of Nursing Practice - Family Nurse Practitioner (DNP-FNP)

Degree: Doctor of Nursing Practice
Program of Study: Family Nurse Practitioner (FNP)
About This Program . . .

The Doctor of Nursing Practice (DNP) is designed for those nurses who are interested in assuming an advanced nursing practice role as a Family Nurse Practitioner (FNP). DNP graduates are prepared as clinical experts in the delivery of primary care, with a focus on critical thinking, leadership, and policy skills needed to advocate and create changes in healthcare practice at all individual (patient and family) and aggregate (organization, community, public policy) levels. The program includes 1000 hours of immersion in clinical practice to build and assimilate knowledge for advanced practice at a high level of complexity. These experiences provide the context within which the final DNP scholarly project is completed.

The DNP degree is built upon the generalist foundation acquired through a baccalaureate in nursing; advanced placement is also available for students with a prior master’s degree in nursing. Graduates prepared for an advanced practice role as a Family Nurse Practitioner will demonstrate practice expertise, specialized knowledge, and expanded responsibility and accountability in the care and management of individuals and families.

The program uses an online delivery format, providing flexibility for students to remain in their current work positions and home communities. Opportunities for personal interactions are included with faculty and peers in focused intensive sessions at selected points during the semester. Students will complete most clinical requirements in their home communities, but may need to travel for specialized clinical experiences including rural health care settings.

Important information about this program:

• Admission to the program follows the general admissions policies & procedures for graduate programs outlined in the university catalog.
• A bachelor’s degree in nursing from a regionally accredited college or university is required, prior to beginning the program. Applicants must have maintained a GPA of 3.0 or better in baccalaureate nursing coursework.
• 78 Semester Hours are required for the Doctor of Nursing Practice Degree.
• Applicants must hold a current, unrestricted license to practice as a registered nurse in their state of practice.
• It is recommended that students work closely with a faculty advisor when selecting courses and scheduling classes prior to registration.

All CMU doctoral-level graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, information literacy, and ethical reasoning. In addition to these campus-wide student learning outcomes, a graduate of this program will be able to:

1. Build intra and interprofessional collaboration to improve health-care quality across diverse populations. (CMU 2) (NONPF – Leadership, Quality, Health Delivery System) (DNP Essentials – VI, VII, VIII)
2. Compile and evaluate health care information systems to strengthen, support, or improve the health delivery system. (CMU 2) (NONPF – Scientific Foundation, Practice Inquiry) (DNP Essentials – III, IV, VII)
4. Develop theoretical and scientific practice initiatives and/or policies for quality improvement to promote a culture of safety in diverse organizational cultures and populations. (CMU 1, 6) (NONPF – Leadership, Quality, Policies, Ethics) (DNP Essentials – I, II, V)
6. Improve the delivery of care to individuals, families, and communities through advanced nursing science. (CMU 1, 4, 5) (NONPF – Scientific Foundation, Independent Practice, Practice Inquiry, Health Delivery System) (DNP Essentials – I, VI, VII, VIII)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page To Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Graduate Degree Requirements

The following institutional requirements apply to all CMU graduate-level degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

• Graduate certificates consist of a minimum of 5 credit hours. Master’s degrees consist of a minimum of 30 credit hours. Doctoral degrees consist of a minimum of 60 credit hours
• All credits in a graduate program must be minimally at the 500-level.
• At least fifty percent of the credit hours must be taken at CMU.
• Students must achieve a 3.00 cumulative GPA or higher in all CMU coursework.
• Students may not apply coursework with a grade lower than a "B" toward graduation requirements.
• A course may only be used to fulfill one requirement for each degree/certificate.
• Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Requirements.
• The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
• See "Graduate Degree Requirements (p. 82)" in this catalog for a complete list of graduation requirements.
• All policies for graduate degrees are outlined in the Graduate Policies and Procedures Manual (https://www.coloradomesa.edu/graduate/documents/GraduatePoliciesProcedures.pdf), Capstone Guidelines Manual (https://www.coloradomesa.edu/graduate/capstone-guidelines-oct-2018.pdf), and Thesis and Dissertation
Specific to this degree:
- 78 semester hours are required for the Doctor of Nursing Practice degree.

Program Specific Requirements
(78 semester hours, no class grade lower than a "B" will be counted toward the degree. It is recommended that students work closely with a faculty advisor when selecting courses and scheduling classes prior to registration.)

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your "Intent to Graduate" does not automatically move to a later graduation date.

Family Nurse Practitioner, Nursing (MSN)

Degree: Master of Science in Nursing
Major: Nursing
Cognate: Family Nurse Practitioner (FNP)
Program Code: 8615

About This Program . . .

The Family Nurse Practitioner program at the Master of Science in Nursing (MSN) level is designed for students wishing to practice as advanced practice nurses in primary care across the lifespan. Graduates of master's degree programs in nursing are prepared with additional knowledge and clinical expertise building on baccalaureate nursing practice. The MSN program at Colorado Mesa University is based on the "Essentials of Masters Education for Advanced Nursing Practice" identified by the American Association of Colleges of Nursing.

MSN graduates will be prepared to advance to higher levels of nursing education including Doctor of Nursing Practice (DNP) or Doctor of Philosophy in Nursing (PhD) programs. The program is an online format, providing flexibility for students to remain in their current work positions and home communities. Opportunities for personal interaction are included with faculty and peers in focused intensive sessions at selected points during the program.

Graduates of the Family Nurse Practitioner cognate are prepared for an advance practice role as a Family Nurse Practitioner will demonstrate practice expertise, specialized knowledge, and expanded responsibility and accountability in the care and management of individuals and families.

Important information for this program:

- There are 47 credit hours for the MSN in Nursing: Family Nurse Practitioner.
- Admission to the program follows general admission policies and procedures for graduate programs outlined in the university catalog.
- A bachelor's degree in nursing from a regionally accredited college or university is required, prior to beginning the program. Applicants must have maintained a GPA of 3.0 or better in baccalaureate nursing coursework.
- Applicants must hold a current, unrestricted license to practice as a registered nurse in their state of licensure.
- It is recommended that students work closely with a faculty advisor when selecting courses and scheduling classes prior to registration.

All CMU masters-level graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, information literacy, and ethical reasoning. In addition to these campus-wide student learning outcomes, a graduate of this program will be able to:

1. Develop leadership skills and behaviors for interprofessional collaboration. (Master's Essential II - Org Systems Leadership;
Master’s Essential VII – Interprofessional collaboration; (CMU 1, 3; Specialized Knowledge/Applied Learning; Communication Fluency); (Bloom’s Analyzing, Level 5); (NONPF – Leadership, Quality, Independent Practice)

2. Analyze quality improvement initiatives to improve the practice environment. (Master’s Essential III – Quality Improvement; Master’s Essential IV – Scholarship; (CMU 1, 2, 3, 4, 5; Specialized Knowledge/Applied learning; Quantitative Fluency; Communication Fluency; Critical Thinking; Information Literacy); (Bloom’s Analyzing, Level 4); (NONPF – Quality, Policies, Independent Practice)

3. Utilize information technology for interprofessional collaboration, learning, and practice. (Essential V – Informatics Technology; Essential IX – Master’s level nursing practice; (CMU 5, 6 – Information Literacy; Ethical Reasoning); (Bloom’s Applying, Level 3); (NONPF – Technology Information Literacy, Independent Practice)

4. Evaluate legal, ethical, and regulatory processes that impact professional nursing practice. (Master’s Essential VI – Health policy advocacy); (CMU 6; Ethical reasoning); (Bloom’s Analyzing – Level 5); (NONPF – Policies, Ethics, Independent Practice)

5. Create culturally relevant health policy strategies for individual and aggregate populations. (Master’s Essential VIII – Clinical Prevention and Population Health); (CMU 4 5 – Information Literacy; Ethical Reasoning); (Bloom’s Creating – Level 6); (NONPF - Practice Inquiry, Health Delivery System, Independent Practice)

6. Synthesize nursing and related sciences for applied learning across diverse populations. (Master’s Essential I – Science Humanities; Master’s Essential IX Level Nursing Practice); (CMU 1, 4, 5 – Specialized Knowledge; Critical Thinking; Information Literacy); (Bloom’s Creating, Level 6); (NONPF – Scientific Foundation, Practice Inquiry, Health Delivery System, Independent Practice)

Students may not apply coursework with a grade lower than a “B” toward graduation requirements.

A course may only be used to fulfill one requirement for each degree/certificate.

Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Requirements.

The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.

See “Graduate Degree Requirements (p. 82)” in this catalog for a complete list of graduation requirements.

Specific to this program:

• 47 semester hours are required for the MSN in Nursing: Family Nurse Practitioner (FNP) degree.

Nurse Educator, Nursing (MSN)

Degree: Master of Science in Nursing
Cognate: Nurse Educator
Program Code: 8614

About This Program . . .

The Master of Science in Nursing (MSN) degree provides graduates with a foundation for practice as an entry-level educator in health care systems or academic settings. MSN graduates are prepared with additional knowledge and clinical expertise building on baccalaureate nursing practice. The MSN program at Colorado Mesa University is based on the "Essentials of Masters Education for Advanced Nursing Practice" identified by the American Association of Colleges of Nursing.

The MSN program is designed for students already possessing a baccalaureate degree in nursing and adds the first graduate step on the nursing career ladder at Colorado Mesa University. MSN graduates are prepared to advance to higher levels of nursing education including Doctor of Nursing Practice (DN) or Doctor of Philosophy in Nursing (PhD) programs. The program is offered in an online format, providing flexibility for students to remain in their current work positions and home communities. Opportunities for personal interaction are included with faculty and peers in focused intensive sessions at selected points.

Important information for this program:

- Admission to the MSN Nurse Educator program follows the general admissions policies & procedures for graduate programs outlined in the university catalog.
- A bachelor’s degree in nursing from a regionally accredited college or university is required, prior to beginning the program. Applicants...
must have maintained a GPA of 3.0 or better in baccalaureate nursing coursework.

- 36 semester hours are required for the MSN Nurse Educator degree.
- Applicants must hold a current, unrestricted license to practice as a registered nurse in their state of practice.
- It is recommended that students work closely with a faculty advisor when selecting courses and scheduling classes prior to registration.

All CMU masters-level graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, information literacy, and ethical reasoning. In addition to these campus-wide student learning outcomes, a graduate of this program will be able to:

1. Develop leadership skills and behaviors for interprofessional collaboration. (Master’s Essential II - Organizational Systems Leadership; Master’s Essential VII – Interprofessional Collaboration); (CMU 1 3; Specialized Knowledge/Applied Learning; Communication Fluency); (NONPF – Leadership, Quality, Independent Practice)

2. Analyze quality improvement initiatives within the practice environment. (Master’s Essential III – Quality Improvement; Master’s Essential IV – Scholarship); (CMU – 1, 2, 3, 4, 5; Specialized Knowledge/Applied Learning; Quantitative Fluency; Communication Fluency; Critical Thinking; Information Literacy); (NONPF – Quality, Policies, Independent)

3. Utilize information technology for interprofessional collaboration, learning, and practice. (Essential V – Informatics Technology; Essential IX – Master’s Level Nursing Practice); (CMU 5, 6 – Information Literacy, Ethical Reasoning); (NONPF – Technology Information Literacy, Independent Practice)

4. Evaluate legal, ethical, and regulatory processes that impact professional nursing practice. (Master’s Essential VI – Health Policy Advocacy); (CMU – 6; Ethical Reasoning); (NONPF – Policies, Ethics, Independent Practice)

5. Create culturally relevant health policy strategies for individual and aggregate populations. (Master’s Essential VIII – Clinical Prevention and Population Health); (CMU 4 5 – Information Literacy, Ethical Reasoning); (NONPF - Practice Inquiry, Policies, Independent Practice)

6. Synthesize nursing and related sciences for applied learning across diverse populations. (Master’s Essential I – Science Humanities; Master’s Essential IX Level Nursing Practice); (CMU 1, 4, 5 – Specialized Knowledge; Critical Thinking; Information Literacy); (NONPF – Scientific Foundation, Practice Inquiry, Health Delivery System, Independent Practice)

**Requirements**

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

**Institutional Graduate Degree Requirements**

The following institutional requirements apply to all CMU graduate-level degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Graduate certificates consist of a minimum of 5 credit hours.
- Master’s degrees consist of a minimum of 30 credit hours. Doctoral degrees consist of a minimum of 60 credit hours.
- All credits in a graduate program must be minimally at the 500-level.
- At least fifty percent of the credit hours must be taken at CMU.
- Students must achieve a 3.00 cumulative GPA or higher in all CMU coursework.
- Students may not apply coursework with a grade lower than a "B" toward graduation requirements.
- A course may only be used to fulfill one requirement for each degree/ certificate.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Graduate Degree Requirements (p. 82)” in this catalog for a complete list of graduation requirements.

**Specific to this program:**

- 36 semester hours are required for the Master of Science in Nursing, Nurse Educator degree.

**Program Specific Requirements**

(36 semester hours, must earn a grade of “B” or better in each course. It is recommended that students work closely with a faculty advisor when selecting courses and scheduling classes prior to registration.)

### Advising and Graduation

**Advising Process and DegreeWorks**

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

**Graduation Process**

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at [http://www.coloradomesa.edu/registrar/graduation.html](http://www.coloradomesa.edu/registrar/graduation.html).

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your “Intent to Graduate” does not automatically move to a later graduation date.

**LPN to BSN, Nursing (BSN)**

Degree: Bachelor of Science in Nursing  
Major: Nursing  
Concentration: LPN-BSN Option  
Program Code: 3610

**About This Major . . .**

The Bachelor of Science in Nursing (LPN-BSN option) is approved by the Colorado State Board of Nursing. This program is designed for Licensed Practical Nurses to achieve a bachelor of science in Nursing Degree, opening up greater employment opportunities, increased compensation, and more job security. The LPN-BSN program integrates nursing theory, practice and science with a liberal arts education. This program has selective admission requirements. It is the student’s responsibility to obtain the current admission requirements.

All Essential Learning requirements, other lower-division requirements, and foundation courses must be in progress or completed before applying to the program with a C or higher. Additional admission requirements also apply. Please visit the Department of Health Sciences’ website ([https://www.coloradomesa.edu/health-sciences/](https://www.coloradomesa.edu/health-sciences/)) for a complete list of admission requirements and program information.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? ([https://www.coloradomesa.edu/career/students/explore/major.html](https://www.coloradomesa.edu/career/students/explore/major.html)) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Construct a practice-based performance/project drawing on knowledge, skills, and attitudes specific to the discipline of nursing. (Specialized Knowledge)
2. Employ quantitative reasoning in making judgments and reaching conclusions. (Quantitative Fluency)
3. Make and defend assertions about a nursing practice topic in a well-organized evidence-based document or presentation. (Communication Fluency)
4. Demonstrate critical thinking behaviors as a basis for practice. (Critical Thinking)
5. Utilize information from relevant sources to improve health among diverse populations. (Information Literacy)
6. Engage in ethical reasoning to provide optimal nursing care. (Personal and Social Responsibility)

Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements
The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

### Essential Learning Requirements
(31 semester hours)
See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are
Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

1. Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
2. Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
3. Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
4. Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Nursing (BSN)

Degree: Bachelor of Science in Nursing
Major: Nursing
Program Code: 3611

About This Major . . .

The four-year Bachelor of Science in Nursing program provides educational experiences to prepare a professional nurse generalist to practice in a variety of health care settings. The program integrates nursing theory, practice, and science with a broad liberal arts education. The program has been developed to prepare a highly competent professional with the education necessary to meet the increasing need for quality health care in society today and provides students with the foundation for graduate study in nursing. The department usually receives more nursing applications than it can accept. Therefore, grades and completion of required courses are considered in the application process, as well as the score on a standardized entrance test. Colorado Mesa’s BSN nursing program started in 1988 and is fully accredited. The BSN Program is approved by the Colorado State Board of Nursing and accredited by the Commission on Collegiate Nursing Education (CCNE).

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Construct a practice-based performance/project drawing on knowledge, skills, and attitudes specific to the discipline of nursing. (Specialized Knowledge)
2. Employ quantitative reasoning in making judgements and reaching conclusions. (Quantitative Fluency)
3. Make and defend assertions about a nursing practice topic in a well-organized evidence-based document or presentation. (Communication Fluency)
4. Demonstrate critical thinking behaviors as a basis for practice. (Critical Thinking)
5. Utilize information from relevant sources to improve health among diverse populations. (Information Literacy)
6. Engage in ethical reasoning to provide optimal nursing care. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options': This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page'. The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.
Essential Learning Requirements
(31 semester hours)

### Advising and Graduation

#### Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

#### Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at [http://www.coloradomesa.edu/registrar/graduation.html](http://www.coloradomesa.edu/registrar/graduation.html).

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.
RN to BSN, Nursing (BSN)

Degree: Bachelor of Science in Nursing
Major: Nursing
Concentration: RN-BSN Option
Program Code: 3613

About This Major . . .

The Registered Nurse to Baccalaureate of Science in Nursing (BSN) Program is accredited by the Commission on Collegiate Nursing Education (CCNE). This program is designed for Associate degree and Diploma RNs. Up to 38 credits from the Associate or diploma degree may transfer toward this BSN degree. The program provides educational experiences to prepare a professional nurse generalist to practice in a variety of health care settings. The program integrates nursing theory, practice, and science with a broad liberal arts education. The program has been developed to prepare a highly competent professional with the education necessary to meet the increasing need for quality health care in society today and provides students with the foundation for graduate study in nursing.

Colorado Mesa's BSN nursing program started in 1988 and has been fully accredited since its inception. The RN-BSN program began originally in 1979 and currently provides all nursing courses in an online format to provide better access to registered nurses.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Construct a practice-based performance/project drawing on knowledge, skills, and attitudes specific to the discipline of nursing. (Specialized knowledge)
2. Employ quantitative reasoning in making judgements and reaching conclusions. (Quantitative fluency)
3. Make and defend assertions about a nursing practice topic in a well-organized evidence-based document or presentation. (Communication fluency)
4. Demonstrate critical thinking behaviors as a basis for practice. (Critical Thinking)
5. Utilize information from relevant sources to improve health among diverse populations. (Information Literacy)
6. Engage in ethical reasoning to provide optimal nursing care. (Personal and Social Responsibility)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-college courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.

- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.

- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.

- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Practical Nursing (Technical Certificate)

Award: Technical Certificate
Program of Study: Practical Nursing
Program Code: 1612

About This Program . . .

This program is designed for students interested in becoming a Licensed Practical Nurse as an entry into the nursing career ladder program. Completion of the Practical Nurse Certificate allows students to progress on to the Bachelor of Science in Nursing, LPN to BSN program. The Practical Nursing program prepares the student to be a direct care giver in hospitals, long-term facilities, and ambulatory care-clinic settings.

This program has selective admission requirements. It is the student's responsibility to obtain the current admission requirements.

Important information about this program:

- All Essential Learning requirements and prerequisite courses must be in progress or completed before applying to the program. Additional admission requirements also apply. Please visit the Department of Health Sciences' website (https://www.coloradomesa.edu/health-sciences/) for a complete list of admission requirements and program information.

For more information on what you can do with this major, visit Career Services' What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in communication fluency, quantitative fluency, specialized knowledge/applied learning, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Promote a therapeutic environment supporting communication across the lifespan for vulnerable and diverse populations. (Communication Fluency)

2. Recognize changes, and responses to interventions while providing a safe environment. (Quantitative Fluency)

3. Implement the nursing process, utilizing critical thinking by collecting patient data, identifying patient needs, reporting findings, and providing input into the plan of care. (Specialized knowledge/Applied learning)
4. Utilize critical thinking skills in the application of the nursing process to provide safe quality care by incorporating evidence-based practice. (Critical Thinking)

5. Organize and incorporate assessment data collaboratively (using critical thinking) to plan/revise patient care based on established nursing diagnosis, assessments, and evaluation data. (Specialized knowledge/Applied learning)\

6. Utilize data to ensure quality improvement and support of evidence-based practice. (Quantitative Fluency)\

7. Demonstrate competent nursing practice within a legal and ethical framework providing effective and individualized patient care, which respects values, culture and expressed needs. (Specialized knowledge/Applied learning)\

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Specific to this program:

- 58 semester hours for the Technical Certificate in Practical Nursing.

Essential Learning Requirements

(15 Semester Hours, must maintain a 2.0 cumulative GPA or higher for coursework in this area.)

---

1. Students desiring to progress onto the LPN-Bachelor of Science should check with their advisor to develop a full time schedule of Essential Learning and program requirements during this first year.
2. BIOL 209/BIO 209L and BIOL 210/BIO 210L must have been completed within five years prior to applying to the nursing program.
3. This course is counted with the Essential Learning courses, but is a prerequisite for the Licensed Practical Nursing program.

### Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at [http://www.coloradomesa.edu/registrar/graduation.html](http://www.coloradomesa.edu/registrar/graduation.html).

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

### Outdoor Recreation Industry Studies

#### Program Description

The Outdoor Recreation Industry Studies degree program prepares students to enter the world of outdoor industry business management, sales, and marketing, adventure services, guide services, adventure programming, expedition planning and adventure leadership. The Outdoor Recreation Industry Studies degree program recognizes the multifaceted nature of the outdoor industry, combining a wide range of coursework in outdoor leadership, business management, innovation and entrepreneurship, adventure planning, tourism, risk management, stewardship and sustainability.

Through study and experience, students completing the degree in Outdoor Recreation Industry Studies will be prepared to work in one of the largest growing segments of the economy: the outdoor recreation industry. At more than 2% of the GDP and over $880B in consumer spending per year, the outdoor recreation industry is a powerhouse economic driver that demands a highly skilled workforce. Students will gain qualifications for jobs in such fields as outdoor industry business-including retail and manufacturing-resort and ski area management, state and national park service, outdoor education, camp administration, and professional guiding.

Outdoor Recreation Industry Studies (BS)

Degree: Bachelor of Science
Major: Outdoor Recreation Industry Studies
Program Code: 3151

About This Major . . .
The Outdoor Recreation Industry Studies degree program prepares students to enter the world of outdoor industry business management, sales, and marketing, adventure services, guide services, adventure programming, expedition planning and adventure leadership. The Outdoor Recreation Industry Studies degree program recognizes the multifaceted nature of the outdoor industry, combining a wide range of coursework in outdoor leadership, business management, innovation and entrepreneurship, adventure planning, tourism, risk management, stewardship and sustainability.

Through study and experience, students completing the degree in Outdoor Recreation Industry Studies will be prepared to work in one of the largest growing segments of the economy: the outdoor recreation industry. At more than 2% of the GDP and over $880B in consumer spending per year, the outdoor recreation industry is a powerhouse economic driver that demands a highly skilled workforce. Students will gain qualifications for jobs in such fields as outdoor industry business-including retail and manufacturing-resort and ski area management, state and national park service, outdoor education, camp administration, and professional guiding.

For more information on what you can do with this major, visit Career Service’s What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Critically evaluate historical, socio-economical, and philosophical aspects of the outdoor recreation industry. (Critical Thinking)
2. Apply fundamental concepts of management, administration, marketing, finance, and economics to the outdoor recreation industry. (Applied Learning)
3. Apply technical skills of survival, risk management, and leadership in outdoor settings. (Applied Learning)
4. Construct codes of personal ethics and apply codes of professional and environmental ethics within the outdoor recreation industry profession. (Personal and Social Responsibility)
5. Explain and navigate the relationships between the outdoor recreation industry and state/federal legislation, public lands and water, climate science, wildlife corridors, and regulatory agencies. (Critical Thinking, Information Literacy)
6. Articulate the implications of economic development, education and workforce, public health and wellness, and conservation and stewardship within the outdoor recreation industry. (Specialized Knowledge, Quantitative Fluency)

Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements
The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

• 120 semester hours minimum.
• Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
• 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
• 2.00 cumulative GPA or higher in all CMU coursework.
• A course may only be used to fulfill one requirement for each degree/certificate.
• No more than six semester hours of independent study courses can be used toward the degree.
• Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
• Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
• Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
• The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
• See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Specific to this degree:
• Wilderness First Responder course certificate

Essential Learning Requirements
(31 semester hours)
See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for
your major, you must use it to fulfill the major requirement and make a
different selection for the Essential Learning requirement.

**Wellness Requirements**

- KINE 100 Health and Wellness
- KINA 143 Orienteering
- Choose one of the following courses:
  - KINA 108A Stand Up Paddle Boarding
  - KINA 109 Kayaking
  - KINA 110 River Rafting

**Essential Learning Capstone**

- ESSL 290 Maverick Milestone
- ESSL 200 Essential Speech

**Foundation Courses Requirements**

- Must receive a grade of "C" or better and must be completed by the time the student has 60 semester hours.
- This is a 4 semester credit hour course. 3 credits apply to Essential Learning requirements and 1 credit applies as an elective credit.
- One course must include a lab.
- ENVS 101 - Intro to Environmental Science is recommended because it is a prerequisite for ENVS 204/ENVS 204L.

**Program Specific Requirements**

- Total Semester Credit Hours 48
General Electives Requirements

All college level courses appearing on your final transcript, not listed above that will bring your total semester hours to 120 hours. 12 semester hours, including 1 credit of upper division, needed to meet graduation requirements. HMGT 496 - Resort and Recreation Management is strongly recommended.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.
Students enrolled in the program will earn 31 credit hours that may be applied toward Associate or Bachelor’s degrees at Colorado Mesa University.

This is an intensive 16-week course that requires full-time participation during the weeks of enrollment, including some weekends. Many course days are 12 hours long. Mandatory Physical Fitness training occurs throughout the semester. This Academy is sponsored by the Grand Junction P.D., Mesa County S.O., and the 21st Judicial District Attorney’s Office. The program is not an open enrollment program and requires a separate application to the Academy. Please contact the Academy Director or visit our web page for details.

For more information on what you can do with this major, visit WCCC’s Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in communication fluency, quantitative fluency, specialized knowledge/applied learning, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Illustrate communication and writing skills that are formal and professional in nature. (Communication Fluency)
2. Apply mathematical concepts required of entry level law enforcement and criminal justice professionals. (Quantitative Fluency)
3. Demonstrate critical thinking skills by evaluating and analyzing contemporary issues in law enforcement and criminal justice using knowledge of criminal justice concepts, terminology, and theories. (Critical Thinking)
4. Demonstrate specialized and holistic knowledge of the Criminal Justice system and the law enforcement profession. (Specialized Knowledge)
5. Demonstrate proficiency in basic skills required for entry level law enforcement and criminal justice professionals. (Applied Learning)
6. Examine ethical standards and practices, specific to law enforcement, the courts, and corrections. (Specialized Knowledge)

Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements
The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
A grade lower than "C" will not be counted toward meeting the requirements.

A course may only be used to fulfill one requirement for each degree/certificate.

Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.

Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.

Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.

The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.

See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Semester Credit Hours 31

Total Semester Credit Hours 31

Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

### Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at [http://www.coloradomesa.edu/registrar/graduation.html](http://www.coloradomesa.edu/registrar/graduation.html).

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

### Personal Training

**Philosophy**

**Program Description**

Philosophy explores fundamental questions such as: What is important? What is valuable? How do we tell truths from falsehoods? How should we behave? What is the best way to live? How do we know what we know? What is beautiful? The answers to these questions apply to other disciplines, problems, and life endeavors. Studying philosophy improves one’s ability to think critically, read closely, and write clearly, and these are skills used in every career and profession.

Minors

- Philosophy (Minor) (p. 578)
Philosophy (Minor)

Minor: Philosophy
Program Code: M280

About This Minor. . .

Philosophy is unlike any other field, yet it applies to them all as it is the field from which all others arose. Philosophy retains as part of its function the critical inquiry into all other disciplines, problems, and life endeavors. While a career in philosophy usually means teaching philosophy, many professionals—writers, journalists, psychologists, doctors, lawyers, scientists, and many others—have degrees in philosophy because the skills philosophical thinking requires are essential to so many other areas.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives can be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Physician Assistant

The Master of Physician Assistant Studies (MPAS) Program consists of didactic and clinical academic work over the course of 27 months. Graduates of the program will be eligible to sit for the national certification examination for physician assistants through the National Commission on the Certification of Physician Assistants (NCCPA) and
will be able to apply for licensure through the Board of Medical Examiners in the state in which they wish to practice medicine. The MPAS Program has been granted Accreditation-Provisional status by the Accreditation Review Commission on Education for the Physician Assistant (ARC-PA). Accreditation-Provisional is an accreditation status granted when the plans and resource allocation, if fully implemented as planned, of a proposed program that has not yet enrolled students appear to demonstrate the program's ability to meet the ARC-PA Standards or when a program holding Accreditation-Provisional status appears to demonstrate continued progress in complying with the Standards as it prepares for the graduation of the first class (cohort) of students.

For updates on program accreditation and general program information, please visit the Masters of Physician Assistant Studies (https://www.coloradomesa.edu/kinesiology/graduate/pa-program/) website.

Programs of Study
Graduate
• Physician Assistant (MPAS) (p. 579)

Physician Assistant (MPAS)
Degree: Master of Physician Assistant Studies
Program of Study: Physician Assistant
Program Code: 8160

About This Program . . .
The Physician Assistant program is a post-baccalaureate program, leading to a Master of Physician Assistant Studies degree (MPAS).

A Physician Assistant (PA) is a healthcare professional who is licensed to practice medicine under the supervision of a Doctor of medicine (MD) or Doctor of osteopathic medicine (DO) and can exercise delegated autonomy in decision-making. Physician Assistants can make clinical decisions and provide a variety of diagnostic, therapeutic, preventive, and health maintenance services to patients.

The CMU PA program offers a student-centered curriculum that has a unique emphasis on training compassionate and competent PAs to be ambassadors of wellness in their careers and communities. Our program places emphasis on wellness promotion and disease prevention for the individual patient and the community. The program is a rigorous 27-month, full-time on campus program consisting of 112 credits. The CMU PA Program curriculum is designed to educate clinicians with the knowledge and skills to be agents of excellence and innovation in the delivery of quality healthcare to the communities of Western Colorado and beyond.

To become a certified PA following completion of a Master’s program, you must pass the Physician Assistant National Certifying Exam (PANCE) (http://www.nccpa.net/).

Important information for this program:
• Enrollment requires PA program acceptance. Please see the catalog and program website for specific admissions requirements.
• All courses and course sequencing are required and must be completed at CMU.
• Students must successfully pass all didactic, clinical course work, and summative exam.

All CMU masters-level graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, information literacy, and ethical reasoning. In addition to these campus-wide student learning outcomes, a graduate of this program will be able to:

1. Demonstrate creativity and the ability to think critically and analytically.
2. Demonstrate the ability to work individually and in collaboration with others, in contributing to the scholarly advancement in their field.
3. Demonstrate advanced written and oral communication skills and the ability to access and analyze information from various literary sources.
4. Demonstrate the ability to recognize and articulate moral and ethical challenges within their discipline and demonstrate leadership.

Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options’. This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page’. The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Graduate Degree Requirements
The following institutional requirements apply to all CMU graduate-level degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

• Graduate certificates consist of a minimum of 5 credit hours.
• Master’s degrees consist of a minimum of 30 credit hours. Doctoral degrees consist of a minimum of 60 credit hours.
• All credits in a graduate program must be minimally at the 500-level.
• At least fifty percent of the credit hours must be taken at CMU.
• Students must achieve a 3.00 cumulative GPA or higher in all CMU coursework.
• Students may not apply coursework with a grade lower than a "B" toward graduation requirements.
• A course may only be used to fulfill one requirement for each degree/certificate.
• Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Requirements.
• The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
• See “Graduate Degree Requirements (p. 82)” in this catalog for a complete list of graduation requirements.

Specific to this program:
• 112 semester hours for the MPAS in Physician Assistant.

Total Semester Credit Hours: 112

Suggested Course Plan
Note: The below rotation schedule is a version of a possible schedule. Individual student’s rotation schedules during the clinical year will vary.
Also, while the sequencing below culminates in a total of 113-115 semester credit hours, students must complete a minimum of 112 semester credit hours as required for completion of the degree, including satisfactory completion of all required courses. Plan to complete requirements with varying hour options accordingly and consult with advisor.

Physics is the study of the universe: what it’s made of and how it works. Physics uses a small collection of basic laws and principles to describe a vast range of natural phenomena, such as black holes, galaxies, plasmas, superconductivity, nanostructured materials, lasers, photons and atoms.

Physics is the foundation of other fields such as engineering, materials science, electronics and chemistry. Beyond these, it finds application in many technical fields, such as optics, scientific instrumentation, biology and medicine.

A degree in Physics equips students with strong analytical problem solving, mathematical, experimental and computational skills. These have enabled physics majors to secure employment in research, engineering, medical physics and business as well as enter graduate programs in physics, chemistry, aerospace engineering, nuclear engineering and planetary science.

A physics minor is a valuable complement to a major in mathematics, biology, chemistry, geology or environmental science.

Physics (BS)
Degree: Bachelor of Science
Major: Physics
Program Code: 3471

About This Major . . .
Physics is the study of the universe: what it is made of and how it works, ranging from stars and galaxies to atoms and nuclei and everything in between. Physics forms the foundation of many technical fields including electronics and optics. Physics also features prominently in many of the hottest areas of current research and innovation, such as the multidisciplinary fields of nanotechnology and biophysics.

The physics program serves as a foundation for a wide array of careers. Physics majors from Colorado Mesa University have gone on to graduate programs in physics, astrophysics, chemistry, materials science, and aerospace engineering. They have also gone directly into jobs in engineering, business, and research.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Show fluency with the major fields of physics (classical mechanics, electromagnetism, statistical physics, and quantum theory).

(Specialized Knowledge)

Advising and Graduation
Advising Process and DegreeWorks
Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. Some courses are critical to complete in specific semesters while others may be moved around.

Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process
Students must complete the following in the first two months of the semester prior to completing their degree requirements:

• Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
• Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
• Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
• Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your “Intent to Graduate” does not automatically move to a later graduation date.

Physics
Program Description
Physics is the study of the universe: what it’s made of and how it works. Physics uses a small collection of basic laws and principles to describe a vast range of natural phenomena, such as black holes, galaxies, plasmas, superconductivity, nanostructured materials, lasers, photons and atoms.

Physics is the foundation of other fields such as engineering, materials science, electronics and chemistry. Beyond these, it finds application in...
2. Use mathematical representations to analyze physical scenarios. (Quantitative Fluency)
3. Use laboratory techniques to investigate experimentally physical phenomena. (Applied Learning)
4. Communicate effectively about topics in physics. (Communication Fluency)
5. Execute a project which addresses a significant and complex issue in physics. This project will integrate knowledge and techniques from different areas of physics. (Specialized Knowledge/Applied Learning)

Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options’. This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements
The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

---

### Essential Learning Requirements
(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation
Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Physics, Liberal Arts (AS)

Degree: Associate of Science
Major: Liberal Arts
Emphasis: Physics
Program Code: 2433

About This Major...

The Associate of Science (AS) degree is designed for students who intend to continue their education and obtain a baccalaureate degree. The AS is the appropriate choice for students who will take upper division coursework in mathematics, biological sciences, and physical sciences. The degree program includes the Colorado Statewide Essential Learning Core and meets the lower division Essential Learning requirements at most public institutions in Colorado. A number of emphases are available within the AS degree. Students choosing one of these emphases will take courses in a discipline in addition to the Essential Learning core.

Physics is the study of the universe: what it's made of and how it works, ranging from stars and galaxies to atoms and nuclei and everything in between. Physics forms the foundation of many technical fields including electronics and optics. Physics also features prominently in many of the hottest areas of current research and innovation, such as the multidisciplinary fields of nanotechnology and biophysics. Our goal is to provide students with the critical and analytical thinking skills needed to solve problems. This skill set prepares students for further study and for jobs in engineering, business, and research.

For more information on what you can do with this major, visit Career Services' What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Show fluency with aspects of the major fields of physics typical for introductory and sophomore level physics courses. (Specialized Knowledge)
2. Use mathematical representation to analyze physical scenarios. (Quantitative Fluency)
3. Use laboratory techniques to analyze physical scenarios. (Critical Thinking)
Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU or WCCC Associate of Science (AS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours total.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade of “C” or higher must be earned in all Essential Learning courses in order to be accepted for transfer under the Colorado Core Transfer Consortium General Education curriculum or gtPathways, Colorado’s guaranteed transfer program.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 15 semester credit hours for an associate of science degree. A maximum of 6 of the 15 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Physics (Minor)

Minor: Physics
Program Code: M430

About This Minor...

Physics is the study of the universe: what it is made of and how it works, ranging from stars and galaxies to atoms and nuclei and everything in between. Physics forms the foundation of many technical fields, including electronics and optics. Physics features prominently in many of the hottest areas of current research and innovation, such as the multidisciplinary fields of nanotechnology and biophysics.

A physics minor is a good complement to a mathematics, chemistry, geology, environmental science, or biology major.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

1 Students that intend to continue with Colorado Mesa University should take ESSL 290 and ESSL 200 during the final semester of their Associate of Science work.
Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives can be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the “Intent to Graduate” form.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Political Science

Program Description

The political science program provides students with a working knowledge of the concepts, theories, approaches and practical applications of political and governmental systems within the local, state, national and international arenas. Graduates are equipped to compete in the job market and the marketplace of ideas.

Regarding the job market, majors work closely with their academic advisor to customize a curriculum that prepares them for competitive applications to law or graduate school, and/or careers in government, non-profit organizations, global advocacy, business, military or homeland security, and emergency management. In addition to holding elective office, graduates have worked as lobbyists, congressional staff members, gubernatorial staff, and state agency officials. Graduates have also been admitted to law school or graduate school at: Denver University, Cornell University, Colorado State University, George Mason University, The University of Minnesota, the University of New Mexico, UC Denver, and the University of Colorado. Internship opportunities allow students to gain experience and employment while furthering their education. Recent interns have served in the U.S. Congress, the Colorado General Assembly, the Mesa County District Attorney’s Office, state-level agencies, the City of Fruita, and congressional campaigns. Many former student interns are now working in jobs they obtained directly as a result of their internship experience.

Regarding the marketplace of ideas, the program builds engaged, global citizens who explore all sides of issues, think critically, communicate clearly, and use their skills responsibly. To that end, students work with faculty on research projects (as volunteers or as paid research assistants) on recreation management, natural resource management, and/or economic development. Faculty in the Program sponsor a Political Science Club and a local chapter of the national honor society Pi Sigma Alpha.

A minor in political science is an excellent complement for students majoring in many other fields, particularly mass communications, business, and criminal justice. The minor provides a diverse understanding of politics and government organizations; this is helpful to anyone working in a career that is either regulated by government, has
government as a customer, or needs to lobby government to protect its interests.

Desmond Tutu famously said: “Don’t raise your voice, improve your argument.” Nowhere does this advice seem more pertinent than in today’s political environment. Graduates leave the program with strong arguments and marketable skills. The goal of the political science faculty is to help students become well-rounded citizens by preparing them to compete in both the employment market and the marketplace of ideas.

• Political Science (Minor) (p. 591)

Political Science (BA)
Degree: Bachelor of Arts
Major: Political Science
Program Code: 3718

About This Major . . .
The Political Science program provides students with a working knowledge of the concepts, theories and approaches to the discipline of Political Science and their practical application to political and governmental systems within the state, national and international arenas. Students majoring in Political Science are prepared for careers in government, law, criminal justice, and non-governmental organizations. Many graduates are currently employed as Congressional Staff members, Gubernatorial Staff, state agency officials, hold elective office or have successfully graduated from law school.

One attractive aspect of the program is the opportunity to intern in a variety of settings in Washington, D.C., Denver and Grand Junction. These internships allow students a chance to acquire practical experience while increasing the opportunity to network. Many of our student interns are now working in jobs they obtained directly as a result of their intern experience. CMU political science graduates have also been successful in gaining entrance to graduate and law schools. The Political Science program supports a Political Science Club and a local chapter of the national honor society Pi Sigma Alpha.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Critically analyze the theories and concepts relevant to political science (Specialized Knowledge);
2. Defend a political argument using established methods (empirical and normative) in the field of political science (Intellectual Skills, Communication Fluency);
3. Articulate diverse perspective surrounding a political issue (Critical Thinking);
4. Devise a strategy to promote civic involvement within the broader community for themselves and others (Civic Engagement)

Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements
The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

1. 120 semester hours minimum.
2. Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
3. 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
4. 2.00 cumulative GPA or higher in all CMU coursework.
5. A course may only be used to fulfill one requirement for each degree/certificate.
6. No more than six semester hours of independent study courses can be used toward the degree.
7. Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
8. Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
9. Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
10. The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
11. See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Total Semester Credit Hours: 16

**Suggested Course Plan**
While the sequencing below culminates in at total of 119-120 semester credit hours, students must complete a minimum of 120 semester credit hours as required for completion of the degree, including satisfactory completion of all required courses. The number of General Electives hours taken by a student can be adjusted to meet this minimum.

**Political Science (Minor)**

Minor: Political Science  
Program Code: M730

**About This Minor. . .**

A minor in Political Science is a great complement for students majoring in any other field, particularly Mass Communications and Criminal Justice. The degree provides a thorough understanding of politics and government organizations which is helpful to anyone working in a career that is either regulated by government, has government as a customer, or needs to lobby government to protect its interests.

**Requirements**

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

**Institutional Minor Requirements**

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives can be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Advising and Graduation
Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process
A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Process Systems Technology
Program Description
The process systems technology program prepares students for entry-level employment as process operators or technicians. A process operator/technician is a key member of a team of people responsible for planning, analyzing, and controlling the production of products from the acquisition of raw materials through the production and distribution of products to customers in a variety of process industries.

This program provides an understanding of process equipment and its principles of operation and control. The graduate will understand the technical aspects of the work, the responsibilities of the work and the importance of safety in this vitally important, shift-oriented position. Industries interested in the graduates from the program include, but are not limited to, oil exploration and production, mining and mineral processing, petroleum product manufacturing, advanced manufacturing, pharmaceutical production, food and beverage, electric power generation, drinking water treatment and wastewater treatment.

For more information on what you can do with this major, visit WCCC’s Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in communication fluency, quantitative fluency, specialized knowledge/applied learning, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Apply business communication using listening, verbal and written and electronic forms that are needed for entry level employment. (Communication Fluency)
2. Apply mathematical and applied physics concepts for industry to meet employment requirements. (Quantitative Fluency)
3. Research, evaluate, synthesize and apply information/data relevant to business, sciences and technical careers. (Critical Thinking)

4. Demonstrate knowledge of terminology, symbols, business practices, and principles and application of technical skills. (Specialized Knowledge)

5. Perform the necessary applied skill sets to fulfill the needs of entry level employment. (Applied Learning)

6. Demonstrate ethical, civic and workplace responsibility as part of professional behavior. (Specialized Knowledge)

Requirements

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than “C” will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Electronics Technician, Process Systems Technology (Technical Certificate)

Award: Technical Certificate
Program of Study: Process Systems Technology
Specialization: Electronics Technician
About This Program . . .

Students enrolled in Process Technology Program learn a multitude of skills to help prepare them to enter a variety of careers: Entry level employment as electronics technicians, process operators or technicians, related to computer systems, computer system administration and networking, electronics, and telecommunications engineering. Students begin the program studying basic core classes including communications, DC/AC circuitry, information technology hardware and software, and Cisco Systems Network training.

The coursework in this certificate is aligned with the Associate Level certification called the Associate Certified Electronics Technician (CeTa) is given by the ETA. This represents the electronics industry, which incorporates from the technician and educator to the corporate institution. Widely known for electronics certification programs and accredited by the International Certification Accreditation Council (ICAC), Program content has been structured to give a basic education to all graduates entering this field.

For more information on what you can do with this major, visit WCCC’s Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in communication fluency, quantitative fluency, specialized knowledge/applied learning, and critical thinking. In addition to these campuswide student learning outcomes, graduates of this major will be able to:

Psychology

Program Description
The psychology program provides students with a working knowledge of the methods and findings of modern psychology. Students may pursue the Bachelor of Arts (BA) in Psychology or the BA in Psychology with a concentration in counseling psychology. All majors are required to complete some laboratory coursework in which they conduct psychological science research. Internships are required for counseling students and are available at nearby human service agencies and treatment centers. Students majoring in psychology are prepared to work in a wide variety of settings, including human services (counseling and social work), public affairs, business, sales, criminal justice and (following graduate study) psychotherapy, teaching and research. The psychology program provides a strong foundation for graduate study in psychology and related disciplines.

The psychology program sponsors the Psychology Club and a local chapter of the national honor society in psychology, Psi Chi. Through active membership in these organizations, students are encouraged to become involved in community service and to attend and present their research at regional and national conferences.

A minor in psychology requires the student to acquire working knowledge of the methods and findings of modern psychology. To earn the minor, a student must take the research methods course, along with several topical courses in psychology. A student with this minor will have a deeper understanding of the processes that shape behavior, which can then be applied to a wide variety of areas.

A minor in forensic investigation – psychology provides students a base in forensic psychology. Students may be better prepared to enter graduate programs in forensic psychology. Students will be better prepared to use psychological concepts in criminal justice investigation jobs.

Counseling Psychology, Psychology (BA)

Degree: Bachelor of Arts
Major: Psychology
Concentration: Counseling Psychology
Program Code: 3724

About This Major . . .

Students may pursue the Psychology BA degree or the Psychology BA degree with a concentration in Counseling Psychology. All majors are required to complete some laboratory coursework in which they conduct research in psychological science. Practica are required for counseling students and are available at nearby human service agencies and treatment centers. The psychology programs provide students with a working knowledge of the methods and findings of modern psychology. Students majoring in psychology are prepared to work in a wide variety of settings, including human services (counseling and social work), public affairs, business, sales, criminal justice, and (following graduate study) psychotherapy, teaching and research. The psychology program provides a strong foundation for graduate study in psychology and related disciplines.

Many of CMU’s psychology majors have successfully continued their education in graduate programs in psychology. A few have continued on to medical school or law school. The psychology program sponsors a Psychology Club and a local chapter of the national honor society in psychology, Psi Chi. Through active membership in these organizations, students are encouraged to become involved in community service and to attend and present their research at regional and national conferences.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Think critically to solve problems in psychological of analysis using academic sources of information. (Specialized Knowledge/Applied Learning)
2. Compare basic research methodology in psychology, including research design, data analysis and interpretation. (Critical Thinking/Personal and Social Responsibility)

3. Communicate clearly in written and oral presentations in standard American Psychological Association format. (Communication Fluency)

4. Apply statistical concepts to decision making and problem solving in areas of psychological application. (Quantitative Fluency)

5. Think critically to solve problems in psychological areas of analysis using academic sources of information. (Critical Thinking)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation
Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Psychology (BA)

Degree: Bachelor of Arts
Major: Psychology
Program Code: 3726

About This Major . . .

Students may pursue the Psychology B.A. degree or the Psychology B.A. degree with a concentration in Counseling Psychology. All majors are required to complete some laboratory coursework in which they conduct psychological science research. Practica are required for counseling students and are available at nearby human service agencies and treatment centers. The psychology programs provide students with a working knowledge of the methods and findings of modern psychology. Students majoring in psychology are prepared to work in a wide variety of settings, including human services (counseling and social work), public affairs, business, sales, criminal justice, and (following graduate study) psychotherapy, teaching and research. The psychology program provides a strong foundation for graduate study in psychology and related disciplines.

The psychology program sponsors a Psychology Club and a local chapter of the national honor society in psychology, Psi Chi. Through active membership in these organizations, students are encouraged to become involved in community service and to attend and present their research at regional and national conferences.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:
1. Critically analyze the historical trends in psychology (Specialized Knowledge)
2. Compare basic research methodology in psychology, including research design, data analysis and interpretation (Applied Learning)
3. Communicate clearly in written and oral presentations in standard American Psychological Association format (APA) (Broad Integrative Knowledge/Applied Learning)
4. Apply statistical concepts to decision making and problem solving in areas of psychological application (Quantitative Fluency)
5. Think critically to solve problems in psychological areas of analysis using academic sources of information. (Intellectual Skills)

Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements
The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Essential Learning Requirements
(31 semester hours)
See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Forensic Investigation - Psychology (Minor)

Minor: Forensic Investigation - Psychology
Program Code: M716

About This Minor. . .
This minor combines courses in psychology with forensic investigation courses. It provides a student a base in forensic psychology. Students may be better prepared to enter graduate programs in forensic psychology. Students may also be better prepared to use psychological concepts in criminal justice and investigative jobs.

Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements
The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

• A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
• Courses taken to satisfy Essential Learning, major requirements, or electives can be counted toward the minor if applicable.
• At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
• At least 25 percent of the classes must be taken at CMU.
• 2.00 cumulative GPA or higher for the courses used for the minor.
• A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
• A minor must be outside the major field of study.
• A student may earn up to five minors with any baccalaureate degree at CMU.
• The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
• See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the “Intent to Graduate” form.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Psychology (Minor)

Minor: Psychology
Program Code: M740

About This Minor.

A minor in Psychology requires the student to acquire working knowledge of the methods and findings of modern psychology. To earn the minor, a student must take the research methods course, along with several topical courses in psychology. A student with this minor will have a deeper understanding of the processes that shape behavior, which can then be applied to a wide variety of areas.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the “Intent to Graduate” form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Public Administration/Public Safety

Program Description

This program is currently inactive, and no new applicants are being considered.

The Bachelor of Applied Science (BAS) in Public Administration/Public Safety combines the technical skills required of first responders with the management training necessary for success in areas related to public safety. A unique program, the BAS allows students who have already earned an Associate of Applied Science degree or have completed a federal or state certified training program in law enforcement, fire sciences, emergency medical services or related fields to build on their technical specialties with essential learning courses and junior and senior level management classes. Depending on their previous education, students should be able to complete the BAS degree within four additional full-time semesters.

BAS students will be technically and academically prepared for leadership positions in their chosen fields. This degree will assist students in their upward mobility in their area of employment as they move into supervisory positions.

Public History

(See History (p. 406))

Radiologic Sciences

Program Descriptions

The Bachelor of Science in Radiologic Sciences and the Bachelor of Applied Science in Radiologic Science programs at Colorado Mesa University prepare individuals for certification and professional practice in the Radiologic Sciences. Radiologic technologists are an important part of the professional health care team, providing physicians with medical images that are vital for the diagnosis and treatment of injury, degeneration and disease. The BSRS program is accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT).

Bachelor of Science in Radiologic Sciences

The four-year Bachelor of Science program provides educational experiences to prepare a professional radiologic technologist to practice in a variety of health care settings. After meeting the ethics, education and clinical competency requirements, graduates are eligible to take the certifying examination from the American Registry of Radiologic Technologists (ARRT). The program integrates theory, practice, and science with a broad liberal arts education. The program is designed to deliver quality education in both the classroom and clinical settings.

Bachelor of Applied Science in Radiologic Sciences

The Bachelor of Applied Sciences (BAS) in Radiologic Science provides certified radiologic technologists the opportunity to obtain a bachelor degree and to advance in specialty areas in the field of radiologic technology including magnetic resonance imaging or computed tomography. After meeting the ethics, structured education and clinical competency requirements, graduates are eligible to take the appropriate certifying examination from the American Registry of Radiologic Technologists. This can lead to greater employment opportunities, increased compensation and job security. The program is designed
to deliver quality education through online, distance education in the didactic and clinical arena.

**Professional Certificates in Radiologic Sciences**

The Radiologic Sciences program offers certified radiologic technologists with an associate or baccalaureate degree the opportunity for post-primary certification in magnetic resonance imaging or computed tomography. After meeting the ethics, structured education, and clinical competency requirements, graduates are eligible to take the appropriate certifying examination from the American Registry of Radiologic Technologists. This can lead to greater employment opportunities, increased compensation, and job security. All coursework is in an online format.

**Special Requirements**

Students applying to the radiologic science programs must submit additional material. Students applying for admission into the program must be admitted into the general University. Admission to Colorado Mesa University does not guarantee admission into the radiologic sciences programs, which require a separate application. Please contact the health sciences department for additional information.

**Contact Information**

**Programs of Study**

**Bachelors/Minors**

- Radiologic Sciences (BAS) (p. 606)  
- Radiologic Sciences (BSRS) (p. 608)

**Certificates**

- Computed Tomography (Professional Certificate) (p. 604)  
- Magnetic Resonance Imaging (Professional Certificate) (p. 605)

**Computed Tomography (Professional Certificate)**

Award: Professional Certificate  
Program of Study: Computed Tomography  
Program Code: 1605

**About This Program . . .**

The Professional Certificate in Computed Tomography is designed to prepare certified and registered radiologic technologists for post-primary certification and registration with the American Registry of Radiologic Technologists (ARRT) in computed tomography. Students must be registered with the ARRT in radiography, nuclear medicine technology (NMTCB also accepted) or radiation therapy and hold the minimum of an associate degree. Coursework from the certificate can be applied to the Bachelor of Applied Science in Radiologic Sciences.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU certificate graduates are expected to demonstrate proficiency in critical thinking, communication fluency, quantitative fluency, and specialized knowledge/applied learning. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Combine academic theory with practitioner experience and skills (applied learning).
2. Develop critical thinking and problem solving skills that demonstrate a professional level of expertise in the radiologic sciences (critical thinking).
3. Promote value based behaviors for professional practice (critical thinking).

**Requirements**

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options’. This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page’. The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

**Institutional Certificate Requirements**

The following institutional requirements apply to all CMU Professional Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.  
- Primarily 300-400 level courses.  
- At least fifty percent of the credit hours must be taken at CMU.  
- 2.00 cumulative GPA or higher in all CMU coursework.  
- A grade lower than “C” in the program of study will not be counted toward meeting the certificate’s requirements.  
- A course may only be used to fulfill one requirement for each degree/certificate.  
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.  
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.  
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.  
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

**Program Specific Certificate Requirements**

(16 semester hours, a grade of "C" or better is required in each course.)

### Advising and Graduation

#### Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

### Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at [http://www.coloradomesa.edu/registrar/graduation.html](http://www.coloradomesa.edu/registrar/graduation.html).

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your “Intent to Graduate” does not automatically move to a later graduation date.

### Magnetic Resonance Imaging

#### Professional Certificate

**Award:** Professional Certificate  
**Program of Study:** Magnetic Resonance Imaging  
**Program Code:** 1606

### About This Program . . .

The Professional Certificate in Magnetic Resonance Imaging is designed to prepare certified and registered radiologic technologists for post-primary certification and registration with the American Registry of Radiologic Technologists (ARRT) in magnetic resonance imaging. Students must be certified and registered with the ARRT in radiography, nuclear medicine technology (NMTCB also accepted), radiation therapy, or sonography (ARDMS also accepted) and hold the minimum of an associate degree. Coursework from the certificate can be applied to the Bachelor of Applied Science in Radiologic Sciences.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? ([https://www.coloradomesa.edu/career/students/explore/major.html](https://www.coloradomesa.edu/career/students/explore/major.html)) resource.

All CMU certificate graduates are expected to demonstrate proficiency in critical thinking, communication fluency, quantitative fluency, and specialized knowledge/applied learning. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Combine academic theory with practitioner experience and skills (applied learning).
2. Develop critical thinking and problem solving skills that demonstrate a professional level of expertise in the radiologic sciences (critical thinking).
3. Promote value based behaviors for professional practice (critical thinking).

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your “Intent to Graduate” does not automatically move to a later graduation date.

Radiologic Sciences (BAS)

Degree: Bachelor of Applied Science
Major: Radiologic Sciences
Program Code: 3622

About This Major...

The Bachelor of Applied Science in Radiologic Sciences combines the technical skills and patient care skills necessary for success in today’s health care arena. A unique program, the BAS allows students who have already earned an associate of applied science degree to build upon their technical specialties with Essential Learning courses and junior and senior level radiologic science courses. This allows associate degree holders to gain a 4-year degree in approximately four additional full-time semesters, depending upon prior coursework.

Courses to be taken include advanced patient care, quality management, informatics in radiology, research and areas of specialization such as computed tomography, and magnetic resonance imaging. Upon completion of the program, students will be technically and academically prepared for leadership positions in their chosen specialties.

Prospective students not holding an associate of applied science degree can begin their college career at CMU in a chosen field of study with a 2-year degree and then progress to a 4-year degree using the BAS. This degree will provide students upward mobility in their area of employment.
as they move into specialty areas as well as supervision/management positions.

Important information for this program:

- Formal admission to a BAS program requires completion of the appropriate AAS degree from an accredited institution. Any exceptions to this must be approved in advance by the department BAS advisor and the academic department head. All students must meet with the BAS advisor to plan and schedule all classes.
- Applicants must be certified by the American Registry of Radiologic Technologists or its equivalent to be admitted to the program.
- Program applicants must possess an AAS degree in Radiologic Technology or Radiologic Science. Acceptance of AAS radiologic technology credits will be limited to no more than 36 hours unless approved by both the BAS advisor and the academic department head.
- Applicants possessing a certificate of completion from a JRCERT accredited program in Radiologic Technology may also be admitted conditionally to the program while completing the requirements for an AAS degree. Please see the Radiologic Science Program Director for complete requirements and application form.
- All degree requirements must be completed as described. Any exceptions or substitutions must be recommended in advance by the faculty advisor and approved by the Department Head. Students are required to participate in exit examinations or other programs deemed necessary to comply with the university accountability requirement.

For more information on what you can do with this major, visit Career Services' What to Do with a Major? [https://www.coloradomesa.edu/career/students/explore/major.html] resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Relate ethical principles to real-life problems in the radiologic sciences. (Specialized Knowledge)
2. Combine academic theory with practitioner experience and skills. (Applied Learning)
3. Apply quantitative analysis methods to develop appropriate conclusions (Quantitative Fluency)
4. Communicate effectively through written documents. (Communication)
5. Develop critical thinking and problem solving skills that demonstrate a professional level of expertise in advanced specialty areas in the radiologic sciences. (Critical Thinking)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU Bachelor of Applied Science (BAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 33 upper-division credits.
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements. The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Specific to this program:

- 121 semester hours required for the BAS in Radiologic Sciences.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks
Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audits on a regular basis and should discuss questions or concerns with their advisors or academic department heads. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process
Students must complete the following in the first two months of the semester prior to completing their degree requirements:

• Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
• Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
• Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
• Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Radiologic Sciences (BSRS)
Degree: Bachelor of Science in Radiologic Sciences
Major: Radiologic Sciences
Program Code: 3623
About This Major . . .

The Baccalaureate of Science in Radiologic Sciences (BSRS) Program is accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT). The four-year program provides educational experiences to prepare a professional radiologic technologist to practice in a variety of health care settings. The program integrates theory, practice, and science with a broad liberal arts education.

Following successful completion of the Radiologic Sciences Program and after meeting ethics and examination requirements, the graduate is eligible to sit for the national certification examination administered by the American Registry of Radiologic Technologists. A passing score on this examination results in the granting of a certificate of registration that allows the privilege to use the title “Registered Technologist” and to use the abbreviation R.T. following the graduate’s name.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Demonstrate written communication skills (communication).
2. Assess oral communication techniques used in professional practice (communication).
3. Relate ethical principles to real-life problems in the radiologic sciences (specialized knowledge).
4. Combine academic theory with practitioner experience and skills (applied learning).
5. Demonstrate skills to reason and solve quantitative problems in the radiologic sciences (quantitative fluency).
6. Develop critical thinking and problem solving skills that demonstrate a professional level of expertise in the radiologic sciences (critical thinking).
7. Promote value based behaviors for professional practice (critical thinking).

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

## Advising and Graduation

### Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

### Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at [http://www.coloradomesa.edu/registrar/graduation.html](http://www.coloradomesa.edu/registrar/graduation.html).

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

### Real Estate

The certificate in Real Estate is designed to prepare students to learn more about many aspects of the real estate industry. The 3-course sequence, which can be taken in any order, includes topics such as a general real estate industry overview, real estate financing, and real estate development. This certificate is aimed at students in all areas of study to supplement their coursework and increase their understanding of the real estate industry, which will help in many facets of students' personal and professional lives.

### Programs of Study

Certificates
Real Estate (Professional Certificate)

Award: Professional Certificate
Major: Real Estate
Program Code: 1700

About This Program . . .
The Certificate in Real Estate offers students invaluable knowledge of the Real Estate Industry, knowledge that can be used both personally and professionally. With over 5 million people currently employed in the real estate industry, this certificate provides opportunities in many differing real estate careers. Students will be provided opportunities to learn all aspects of the industry to include: appraisal and assessment, property management, commercial and residential investment opportunities and management, real estate law, and real estate financing. Students will also learn the tools needed to analyze and evaluate both personal and professional potential real estate investment opportunities. This certificate is not intended to lead to real estate licensure.

For more information on what you can do with this major visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU certificate graduates are expected to demonstrate proficiency in critical thinking, communication fluency, quantitative fluency, and specialized knowledge/applied learning. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Produce industry appropriate written documentation with the ability to effectively orally communicate real estate information. (Communication Fluency)
2. Construct, apply, and document appropriate financial methodologies to evaluate potential real estate investment opportunities. (Quantitative Fluency)
3. Apply and analyze appropriate investment strategies to evaluate potential real estate investment opportunities. (Critical Thinking)

Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements
The following institutional requirements apply to all CMU Professional Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Primarily 300-400 level courses.
- At least fifty percent of the credit hours must be taken at CMU.

- 2.00 cumulative GPA or higher in all CMU coursework.
- A grade lower than “C” in the program of study will not be counted toward meeting the certificate’s requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Advising and Graduation
Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress.
towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

1. Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
2. Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
3. Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
4. Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your “Intent to Graduate” does not automatically move to a later graduation date.

Social Science

Program Description

The Associate of Arts (AA) degree is designed for students who intend to continue their education and obtain a baccalaureate degree. The AA with an emphasis in social science is the appropriate choice for students who will take upper division coursework in the arts, humanities, or social and behavioral sciences. The degree program includes the Colorado Statewide General Education Core and meets the lower division general education requirements at institutions in Colorado. The social science emphasis provides students with the opportunity to develop a broad understanding of the various disciplines which traditionally constitute the social sciences: anthropology, history, political science, sociology, psychology, economics and geography.

The Social Science graduate certificate is designed for high school teachers who already have a Bachelor’s Degree and need the credentials required by the Higher Learning Commission to teach history and political science courses for lower-division college-level concurrent enrollment classes.

Students in this certificate program will acquire 18 credit hours of graduate coursework in the fields of history and political science. The courses are spread over a two-year period, as shown in the schedule below.

In addition, the program allows students to explore history and political science in greater depth, and to prepare themselves for masters-level graduate degrees in these fields. The transferability of these courses towards a specific master’s degree is not guaranteed, and would depend on the individual Master’s program to which the students choose to enter.

Social Science, Liberal Arts (AA)

Degree: Associate of Arts
Major: Liberal Arts
Emphasis: Social Science
Program Code: 2710

About This Major . . .

The Associate of Arts (AA) degree is designed for students who intend to continue their education and obtain a baccalaureate degree. The AA is the appropriate choice for students who will take upper division coursework in the arts, humanities, or social and behavioral sciences. The degree program includes the Colorado Statewide General Education Core and meets the lower division general education requirements at most public institutions in Colorado.

The Social Science emphasis within the Liberal Arts major provides students with the opportunity to develop a broad understanding of the various disciplines which traditionally constitute the Social Sciences: Anthropology, History, Political Science, Sociology, Psychology, Economics, and Geography.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Analyze social science problems (Specialized Knowledge).
2. Communicate clearly in writing or oral presentations (Communication Fluency).
3. Think critically to solve problems in social science (Critical Thinking).
4. Use program level mathematical concepts to understand, analyze, and explain social science issues (Quantitative Fluency).

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.
scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

**Institutional Degree Requirements**

The following institutional degree requirements apply to all CMU or WCCC Associate of Arts (AA) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours total.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade of “C” or higher must be earned in all Essential Learning courses in order to be accepted for transfer under the Colorado Core Transfer Consortium General Education curriculum or gtPathways, Colorado’s guaranteed transfer program.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 15 semester credit hours for an AA degree. A maximum of 6 of the 15 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

**Essential Learning Requirements**

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

### Program Goals

The Social Work program will:

- Educate students as generalist social work practitioners with knowledge and understanding of the ecological perspective, the strengths perspective, the empowerment approach, and solid problem solving and case management skills.
- Assist students in viewing complex human and social issues from a multi-dimensional, multi-level approach involving micro-, mezzo-, and macro-level interventions.
- Provide opportunities for the application of the social work mission and core values of service, the dignity and worth of all people, the importance of human relationships, integrity, competency, and social and economic justice.
- Maintain high professional standards and knowledge of the National Association of Social Workers (NASW) Code of Ethics.
- Help students strengthen the relationship between theory and practice by engaging them in various service learning projects, leadership development, strong field education placements, and involvement in the social work club.

### Social Work Program Description

Social work is a profession dedicated to social and economic justice. Social workers focus primarily on the needs and empowerment of vulnerable, oppressed, at-risk populations, and those living in poverty.

The CMU BSW Program Mission is: "To educate students as generalist social work practitioners who embrace the mission and core values of the social work profession, including issues of diversity, service, the dignity and worth of all people, and social and economic justice."

Students that intend to continue with Colorado Mesa University should take ESSL 290 and ESSL 200 during the final semester of their Associate of Arts work.

### Advising and Graduation

#### Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Students that intend to continue with Colorado Mesa University should take ESSL 290 and ESSL 200 during the final semester of their Associate of Arts work.

### Social Work Program Description

Social work is a profession dedicated to social and economic justice. Social workers focus primarily on the needs and empowerment of vulnerable, oppressed, at-risk populations, and those living in poverty.

The CMU BSW Program Mission is: "To educate students as generalist social work practitioners who embrace the mission and core values of the social work profession, including issues of diversity, service, the dignity and worth of all people, and social and economic justice."

### Program Goals

The Social Work program will:

- Educate students as generalist social work practitioners with knowledge and understanding of the ecological perspective, the strengths perspective, the empowerment approach, and solid problem solving and case management skills.
- Assist students in viewing complex human and social issues from a multi-dimensional, multi-level approach involving micro-, mezzo-, and macro-level interventions.
- Provide opportunities for the application of the social work mission and core values of service, the dignity and worth of all people, the importance of human relationships, integrity, competency, and social and economic justice.
- Maintain high professional standards and knowledge of the National Association of Social Workers (NASW) Code of Ethics.
- Help students strengthen the relationship between theory and practice by engaging them in various service learning projects, leadership development, strong field education placements, and involvement in the social work club.
Professional social workers are found in every facet of community life—in schools, hospitals, mental health clinics, senior centers, elected office, private practices, prisons, military, corporations, and in numerous public and private agencies that serve individuals and families in need.

Special Requirements
Admission to the University does not guarantee admission to the BSW program; a separate admission application to the BSW program is required, as discussed below.

Admission Requirements
Students must apply to get accepted into the Social Work Program. The application packet is completed during the spring semester of a student’s sophomore year. The application packet and admissions criteria includes:

- Completion of at least 60 credits of coursework before admission into the program (junior status).
- Maintenance of a minimum overall GPA of 2.0 and a minimum GPA of 2.5 in social work classes.
- Personal statement and essay that includes why you would like to choose social work as a major, extracurricular and volunteer activities, work experience, career goals and interests, and a commitment to the social work mission, core values, and the NASW Code of Ethics.
- Quality of written material (on application, personal statement, and essay).
- Faculty evaluations, as indicated by class attendance, participation, communication skills, and ability to work together with other classmates.
- Student will be notified in writing if they have been accepted into the social work program.
- If accepted into the program, students will be a part of a cohort program that will complete coursework together in a sequential format, for their junior and senior years.
- Faculty interview.

The social work program at CMU does not grant course credit for life experience or previous work experience.

The 15 credit-hour minor in Social Work can be combined with a major in any field. No application process is required for the minor. This minor will help equip students who desire to work in a human services field upon graduation. A minor in Social Work is also beneficial for any student hoping to gain admissions into a master’s degree in Social Work (MSW) program.

Bachelors/Minors
- Social Work (BSW) (p. 616)
- Social Work (Minor) (p. 619)

Social Work (BSW)
Degree: Bachelor of Social Work
Major: Social Work
Program Code: 3765

About This Major . . .
Social Work is a profession dedicated to social and economic justice. Social workers focus primarily on the needs and empowerment of vulnerable, oppressed, at-risk populations, and those living in poverty. Social workers help people overcome some of life’s most difficult challenges: poverty, discrimination, abuse, addiction, physical illness, divorce, educational problems, disability, and mental illness.

The practice of social work requires knowledge of human development and behavior; of social, economic, and cultural institutions, and of the interaction of all these factors as well as skills in developing relationships, assessing needs and services while facilitating change. Social workers seek to strengthen relationships among people to promote, restore, maintain, and enhance the well-being of individuals, families, social groups, organizations, and communities (http://www.socialworkers.org/).

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Demonstrate proficiency in utilizing the social work professions 9 core competencies and 31 practice behaviors through a senior-year practicum in a social service agency in our community (Specialized Knowledge).
2. Demonstrate the ability to use practice experience to inform scientific inquiry and use research evidence to inform practice (Quantitative Fluency).
3. Demonstrate effective oral and written communication in working with individuals, families, groups, organizations, communities and colleagues through professional documentation and oral presentations (Communication Fluency).
4. Demonstrate critical thinking to inform and communicate professional judgments through distinguishing, appraising, and integrating multiple sources of knowledge; and through analyzing models of assessment, prevention, intervention, and evaluation (Critical Thinking).

Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option
prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

**Institutional Degree Requirements**

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

**Essential Learning Requirements**

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

**Program Specific Degree Requirements**

(48 semester hours. To graduate with a major in social work, a student must earn, with no more than two attempts, at least a grade of “C” in each course and maintain a 2.50 cumulative GPA or higher in coursework in this area.)

- Students majoring in social work must apply to get into the social work program prior to taking any of the social work core courses. Application requirements include: completion of all Essential Learning requirements, completion of the two foundation courses (maintaining a 2.0 GPA), completion of the two social work introductory courses, completion of 60+ credits (junior standing), and a formal application, essay and faculty evaluation. If accepted into the social work program, students will take the social work core
courses in sequence as part of a cohort system their junior and senior years.

Students must complete the following in the first two months of the Graduation Process:

- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

### Social Work (Minor)

**Minor: Social Work**  
**Program Code: M745**

#### About This Minor...

Social Work is a profession dedicated to social and economic justice. Social workers focus primarily on the needs and empowerment of vulnerable, oppressed, at-risk populations, and those living in poverty. Social workers help people overcome some of life's most difficult challenges: poverty, discrimination, abuse, addiction, physical illness, divorce, educational problems, disability, and mental illness.

The practice of social work requires knowledge of human development and behavior; of social, economic, and cultural institutions, and of the interaction of all these factors as well as skills in developing relationships, assessing needs and services while facilitating change. Social workers seek to strengthen relationships among people to promote, restore, maintain, and enhance the well-being of individuals, families, social groups, organizations, and communities (http://www.socialworkers.org/).

#### Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

#### Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives can be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.

---

### Adapting and Graduation

#### Adapting Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

### Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.

Advising and Graduation
Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the “Intent to Graduate” form.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Sociology

Program Description

Sociology is the scientific study of social life. It is the exploration of social change and the complexities of the causes – and consequences – of human behavior, focusing on the ways social factors shape human behavior. Sociologists study a broad range of topics including families, politics, religion, education, race, class, and gender (and much more!). Sociologists ask questions about patterns of human life, and then answer those questions using a variety of theoretical perspectives and research methodologies. Sociologists frequently contribute to public debate about the causes of social problems and what we could do to help bring about positive social change.

The BA in Sociology exemplifies Colorado Mesa University’s liberal arts mission, emphasizing a wide range of skills and content areas. The sociology program encourages students to develop critical thinking skills, quantitative literacy, and the ability to apply their “sociological imagination” to problems, programs, and policies in the real world. Beyond this, sociology prepares students for responsible action in the social world and provides a foundation for lifelong learning and civic participation.

The American Sociological Association calls sociology a “21st Century Major” because it offers the flexibility students will need in a fast-changing and increasingly global labor market. Graduates who choose to go directly into a career can find work in human resources, social services, government, business, the health professions, the criminal justice system, and a wide variety of other industries. Sociology graduates are also very well-prepared for graduate study in sociology and related disciplines.

Sociology (BA)

Degree: Bachelor of Arts
Major: Sociology
Program Code: 3728

About This Major . . .

Sociology is the scientific study of social life, social change, social organization, and the complex social causes and consequences of human behavior. Since all human behavior is social, the subject matter of sociology covers a broad array of topics, including family, religion, crime, politics, life course, race, gender, and social class. Sociology provides many distinctive perspectives on the social world, as well as a range of research methodologies that can be applied to virtually any aspect of social life, from corporate downsizing to problems of peace and war to the expression of emotion and beyond. Because sociology addresses the most challenging issues of our time, it is an expanding field increasingly...
tapped by those who craft policies and create social programs. For more information on the subject matter of sociology, got to www.asanet.org/topics/.

Sociology majors gain important skills in critical thinking, research methods and responsible citizenship. Sociology majors are prepared for future graduate work in sociology and related disciplines, as well as for a wide variety of careers in such sectors as business, the health professions, the criminal justice system, social services, human resources and government.

For more information on what you can do with this major, visit Career Services' What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource and the American Sociological Association's Careers in Sociology web page.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Articulate the reciprocal relationship between individuals and society (Specialized Knowledge);
2. Interpret published statistical findings on social problems or issues (Quantitative Fluency);
3. Frame and answer complex questions about social issues using theoretical perspectives and the scholarship from the field of sociology (Specialized Knowledge, Critical Thinking);
4. Write a fully developed and empirically supported research paper in standard American Sociological Association (ASA) format (Communication Fluency);
5. Describe ways in which theories and research from the discipline of sociology are applied in real-world organizational and clinical settings (Applied Learning).

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Sociology (Minor)

Minor: Sociology
Program Code: M750

About This Minor . . .

Sociology is the study of social life, social change, social organization, and the social causes and consequences of human behavior. Sociologists investigate the structure of groups, organizations, and societies, as well as how people interact within these contexts. Since all human behavior is social, the subject matter of sociology ranges widely from intimate families to hostile mobs; from organized crime to religious cults; and from the divisions of race, class and gender to the common beliefs in a culture. Sociology provides many distinctive perspectives on the social world, as well as a range of research methodologies that can be applied to virtually any aspect of social life, from corporate downsizing...
Sociology majors gain important skills in critical thinking, research methods, and responsible citizenship. Students who minor in sociology develop an understanding of social behavior and social organization that is useful in any career path they choose.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives can be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Program Specific Minor Requirements

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Spanish

Program Description

This program develops students’ abilities to speak and write Spanish, understand spoken and written Spanish, as well as develop cultural competency which enables them to interact with citizens of various Spanish-speaking countries. In addition to the core classes, students may select from a variety of courses in language, literature, and applied professional Spanish. If they are interested in professional Spanish, students can strengthen their skills in a professional environment, including translation, interpreting, business, and medical and social services. They may also gain experience through internships in a variety of settings, including the sheriff's department, the county courthouse, various medical offices, and non-profit organizations. Students may choose courses that provide theoretical and applied insights into Spanish language, linguistics, and literature. They will examine specific genres (poetry, prose, theatre and film) as well as the periods, regions, and movements. They can explore language variation in the Hispanic world through Phonetics & Phonology and Sociolinguistics. An optional Spanish Summer Study Abroad Program provides direct exposure to language and culture in a variety of countries. Coordinated with the Spanish content courses, the Center for Teacher Education at CMU offers a comprehensive program of study that leads to a secondary teaching license in Colorado. Employers value the ability to communicate in Spanish, and strong language skills enhance graduates’ opportunities, especially when they combine their Spanish degree with other CMU programs such as Law Enforcement, Health Care, Social Work, and Business, among others.

About This Major . . .
Spanish majors for secondary licensure study all aspects of the language and cultures of the Spanish-speaking world and its teaching, including linguistics, phonetics and phonology, foreign language teaching methods, and the literatures of Spain and Latin America.

The Center for Teacher Education offers a comprehensive program of study that leads to licensure in Colorado. Our professors are experienced, knowledgeable, accessible, and dedicated to the improvement of public education. At Colorado Mesa University, we pride ourselves on the personal touch. Faculty offer one-on-one guidance for course selection, field placements, student teaching, and employment. Our mission is to develop Educators as Innovators; we are always looking to improve the quality of learning in our programs and K-12 schools.

As a student, you will gradually accumulate over 200 hours of classroom experience before beginning student teaching. School districts throughout western Colorado provide opportunities to gain experience with children of various ages and backgrounds in a variety of school settings. A minimum of 75 credit hours of Essential Learning and content area coursework must be completed with a minimum GPA of 2.80 before a candidate may apply for admission to the Center for Teacher Education secondary licensure program. Please see the Teacher Education Admission Packet for further information on admissions criteria. EDUC 115 and EDUC 215, must be taken before applying to the program.

Important information about this degree:
• 2.80 cumulative GPA or higher in all CMU coursework.
• 2.80 cumulative GPA or higher in coursework toward the major content area.
• All EDUC prefix courses must be completed with a grade of “B” or better to progress through the program sequence.

• Students must pass the PRAXIS II exam in the content area prior to beginning the internship. Also, all other coursework toward the degree must be successfully completed prior to the internship.
• A grade of “C” or better must be earned in all required foundation and major courses, unless otherwise stated.
• Any combination of FLAS 212, FLAS 301, FLAS 302, and FLAS 303 may also be used to satisfy the requirements of a major in which there exists a foreign language requirement.
• FLAV 496 and FLAS 422 may be taken more than once as long as the title/content of each course differs. Permission may be required to take some Topics courses. Check with the professor.
• Topics courses may be taken more than one time only if the course has a different topic.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Spanish Outcome 1: Express themselves coherently in written and oral Spanish. (Communication)
2. Spanish Outcome 2: Apply knowledge of the structure of the Spanish language, including syntax, phonetics/phonology, and morphology. (Specialized Knowledge)
3. Spanish Outcome 3: Demonstrate an awareness and appreciation of important literary and artistic movements/works, and cultural aspects in relation to the Spanish-speaking world. (Specialized Knowledge)
4. Spanish Outcome 4: Develop a research project focused on second language acquisition or teaching methodologies. (Critical Thinking)
5. Spanish Outcome 5: Compare commonalities and differences between Hispanic and other U.S. cultures. (Critical Thinking)
6. Spanish Outcome 6: Demonstrate knowledge of linguistic variations that exist in the Spanish-speaking world. (Specialized Knowledge)
7. Teacher Education Outcome 1: Demonstrate mastery of major area’s content knowledge and pedagogical strategies through fieldwork with learners in professional settings. (Specialized Knowledge/Applied Learning)
8. Teacher Education Outcome 2: Design and establish a safe, inclusive, and respectful learning environment for a diverse population of students. (Specialized Knowledge/Applied Learning)
9. Teacher Education Outcome 3: Plan and deliver effective instruction to students, based on research-based pedagogical practices. (Communication Literacy/Information Literacy)
10. Teacher Education Outcome 4: Collect and analyze student assessment data and use results to inform planning and instruction. (Quantitative Fluency)
11. Teacher Education Outcome 5: Demonstrate professionalism through ethical conduct, reflection, and leadership. (Personal and Social Responsibility)
Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements
The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Specific to this program:
- 2.80 cumulative GPA or higher in all CMU coursework.

Essential Learning Requirements
(31 semester hours)
See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Total Semester Credit Hours

1 Essential Learning Capstone must be taken after completion of the Essential Learning English and Mathematics requirements, and when a student has earned between 45 and 75 hours.

Foundation Courses
(6 semester hours, must pass all courses with a grade of "C" or higher.)

- Any combination of FLAS 212, FLAS 301, FLAS 302, and FLAS 303 may also be used to satisfy the foreign language requirements.
Program Specific Degree Requirements

(42 semester hours, must pass all courses with a grade of “C” or higher and maintain a 2.80 cumulative GPA or higher in coursework in this area.)

- FLAV 496 and FLAS 422 may be taken more than once as long as the title/content of each course differs. Permission may be required to take some Topics courses. Check with the professor.
- Topics courses may be taken more than one time only if the course has a different topic.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Hispanic Studies, Spanish (BA)

Degree: Bachelor of Arts
Major: Spanish
Concentration: Hispanic Studies
Program Code: 3247

About This Major . . .

Spanish majors at Colorado Mesa University take classes which provide knowledge and skills intended to produce effective communication in Spanish as well as an understanding of the relationship of the Spanish language and its cultures to the world in which we live. Spanish and Hispanic Studies majors gain valuable insights into Peninsular and Latin-American language and literature as well as their histories and cultures. Students are also introduced to the linguistic properties of the Spanish language, with a focused study of Spanish phonetics and phonology. Students also take classes which provide insights into Spanish in the professions, such as translation, interpreting, and medical. Spanish graduates work in a variety of professions, where they apply their
cultural competencies. In addition to that, many continue their studies in graduate schools.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Express themselves coherently in written and oral Spanish. (Communication Fluency)
2. Apply knowledge of the structure of the Spanish language, including syntax, phonetics/phonology, and morphology in speech and writing. (Applied Learning)
3. Demonstrate an awareness, understanding, and appreciation of important literary and artistic movements/works, linguistics, history, translation, interpretation, and/or cultural aspects in relation to the Spanish-speaking world. (Specialized Knowledge)
4. Demonstrate knowledge of the linguistic variations that exist in the Spanish-speaking world. (Specialized Knowledge)
5. Develop a research project focused on the application of Spanish in an area of the student’s choosing (e.g. analyzes significant literary movements/works and the authors; the application of Spanish in a professional context; second language acquisition or teaching methodologies). (Critical Thinking)
6. Compare commonalities and differences between Hispanic and other U.S. cultures. (Critical Thinking)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Spanish (Minor)

Minor: Spanish
Program Code: M245

About This Minor . . .

The minor in Spanish at CMU is focused on developing students' abilities to speak, write and understand the Spanish language, as well as increasing the understanding of the cultures of Spanish-speaking countries. The goal is that those who graduate with this minor will become proficient enough to enable them to use Spanish effectively in a variety of practical settings.

Students pursuing this minor are allowed certain flexibility to choose classes that best complement their major area of study.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the “Intent to Graduate” form.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Sport Management

Program Description

The Master of Science in Sport Management serves to develop students’ conceptual skills, theoretical comprehension, and practical knowledge in order to prepare them as next generation leaders in the sport industry. The degree leads to a wide variety of career choices. Sport management graduates work in school, university, and college settings as athletic administrators, in public relations/marketing, or in professional or amateur sports areas.

The Bachelor of Science in Sport Management prepares students to enter the world of sport business or pursue a graduate degree. The sport management degree provides an overview of the history and role of sport in society and covers topics such as leadership and ethics, governance and communication and legal considerations in sport operations. Students will also obtain business administration skills through courses in accounting, marketing, economics and business information technology.

The Associate of Science in Sport Management is designed for students who intend to continue their education and obtain a baccalaureate degree. The degree program includes the Colorado Statewide General Education Core and meets the lower-division general education requirements at most public institutions in Colorado. Graduates of this program may obtain entry-level positions in sport management or continue to pursue their bachelor-level education to obtain eventual higher-level positions related to sport management, business, or kinesiology.

The minor in Sport Management provides a strong platform for students to combine their interests in business with the business of sports. Students will explore subject areas which include: principles of management, organization/administration/legal considerations, marketing, governance and communication, sport law and risk management, leadership and ethics. This minor complements business or mass communication majors.

Opportunities for college graduates with sport management education and experience are very diverse and challenging. As sport has evolved into an integral part of the American culture, the operations of sports programs have become more sophisticated and complex. With an understanding of the intricacies of sport activities and knowledge of effective business practices, graduates will be prepared to oversee sport programs and facilities. Sport management positions are found in a variety of settings including schools, colleges and universities, public and private agencies, private businesses, government and the military.

Program Code: 3147

About This Major . . .

The Bachelor of Science in Sport Management prepares students to enter the world of sport business or pursue a graduate degree. The Sport Management degree provides an overview of the history and role of sport in society, and covers topics such as leadership and ethics, governance and communication, and legal considerations in sport operations. Students will also obtain business administration skills through courses in accounting, marketing, economics, and business information technology.

Opportunities for college graduates with sport management education and experience are very diverse and challenging. As sport has evolved into an integral part of the American culture, the operations of sports programs have become more sophisticated and complex. With an understanding of the intricacies of sport activities and knowledge of effective business practices, graduates will be prepared to oversee sport programs and facilities. Sport Management positions are found in a variety of settings including schools, colleges, and universities, public and private agencies, government, and the military.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficieny in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Critically evaluate the historical, socio-cultural, and philosophical aspects of sport. (Quantitative Fluency)
2. Apply fundamental concepts of management, administration, marketing, finance, and economics to sport organizations. (Applied Learning)
3. Construct codes of personal ethics and apply professional codes of ethics to a sport setting. (Critical Thinking)
4. Apply skill in interpersonal and organizational communication, to the mass media, in both print and electronic medium. (Communication Fluency)
5. Explain the relationships between sport and state/federal legislation, the court system, contract law, tort liability, agency law, antitrust law, constitutional law and collective bargaining. (Critical Thinking)
6. Articulate the implications of the various agencies that govern sport at the professional, collegiate, high school, and amateur levels. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation
Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Sports Management, Liberal Arts (AS)

Degree: Associate of Science
Major: Liberal Arts
Emphasis: Sport Management
Program Code: 2140

About This Major . . .

The Associate of Science (A.S.) degree is designed for students who intend to continue their education and obtain a baccalaureate degree. The degree program includes the Colorado Statewide General Education Core and meets the lower-division general education requirements at most public institutions in Colorado. Graduates of this program may obtain entry-level positions in sport management or continue to pursue their bachelor-level education to obtain eventual higher-level positions related to sport management, business, or kinesiology.

For more information on what you can do with this major, visit Career Services' What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Critically evaluate the historical, socio-cultural, and philosophical aspects of sport. (Quantitative Fluency)
2. Identify fundamental concepts of management, administration, marketing, finance, and economics to sport organizations. (Applied Learning, Specialized Knowledge)
3. Construct codes of personal ethics and apply professional codes of ethics to a sport setting. (Critical Thinking)
4. Apply skill in interpersonal and organizational communication, to the mass media, in both print and electronic medium. (Communication Fluency)

Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements
The following institutional degree requirements apply to all CMU or WCCC Associate of Science (AS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

• 60 semester hours total.
• Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
• 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
• A grade of “C” or higher must be earned in all Essential Learning courses in order to be accepted for transfer under the Colorado Core Transfer Consortium General Education curriculum or gtPathways, Colorado’s guaranteed transfer program.
• A course may only be used to fulfill one requirement for each degree/certificate.
• No more than six semester hours of independent study courses can be used toward the degree.
• Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 15 semester credit hours for an associate of science degree. A maximum of 6 of the 15 credits may be for cooperative education, internships, and practica.
• Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
• Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
• The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
• See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Essential Learning Requirements
(31 semester hours)
See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Sport Management (Minor)

Minor: Sport Management
Program Code: M103

About This Minor. . .

The minor in Sport Management provides a strong platform for students to combine their interests in business with the business of sports. Students will explore subject areas which include: principles of management, organization/administration/legal considerations, marketing, governance and communication, sport law and risk management, leadership, and ethics. This minor could complement business or mass communications majors.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.
Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives can be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

Sport Management (MS)

Degree: Master of Science
Program of Study: Sport Management
Program Code: 8150

About This Program . . .

The Department of Kinesiology offers the Master of Science degree in Sport Management. The mission of the degree program is to develop students' conceptual skills, theoretical comprehension, and practical knowledge in order that they are prepared to become the next generation of leaders in the sport industry.

The degree leads to a wide variety of career choices. Sport management graduates work in school, university and college settings as athletic administrators, public relations/marketing directors, or in professional or amateur sports areas.

This program requires completion of a thesis or internship-related project.

All CMU masters-level graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, information literacy, and ethical reasoning. In addition to these campus-wide student learning outcomes, a graduate of this program will be able to:

1. Relate advanced principles of the sport management field.
2. Incorporate a variety of oral and written business and professional communications skills.
3. Practice ethical behavior in the workplace.
4. Incorporate advanced sport management principles and theories.
5. Integrate education in the workplace.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option
prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

**Institutional Graduate Degree Requirements**

The following institutional requirements apply to all CMU graduate-level degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Graduate certificates consist of a minimum of 5 credit hours. Master’s degrees consist of a minimum of 30 credit hours. Doctoral degrees consist of a minimum of 60 credit hours.
- All credits in a graduate program must be minimally at the 500-level.
- At least fifty percent of the credit hours must be taken at CMU.
- Students must achieve a 3.00 cumulative GPA or higher in all CMU coursework.
- Students may not apply coursework with a grade lower than a “B” toward graduation requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Graduate Degree Requirements (p. 82)” in this catalog for a complete list of graduation requirements.

**Program Specific Requirements**

(30 semester hours)

In addition to coursework, this program requires completion of a thesis or internship-related project.

**Sport Management Core Courses**

• Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
• Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
• Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If your petition for graduation is denied, it will be your responsibility to apply for graduation in a subsequent semester. Your “Intent to Graduate” does not automatically move to a later graduation date.

Surgical Technology

Program Description
This program prepares the student to work in surgical operations areas under the supervision of surgeons, registered nurses, or other surgical personnel. The program is accredited by the Accreditation Review Council on Education in Surgical Technology and Surgical Assisting (ARC/STSA). Coursework for an Associate of Applied Science degree as well as coursework in Biology are required prior to application to the program. Graduates of the program are eligible to take the certification examination given by the National Board of Surgical Technology and Surgical Assisting (NBSTSA).

The program requires both classroom time and clinical time as described in the course syllabi. Clinical placements will be at surgical site affiliations in western Colorado. The goal of the program is to prepare competent entry-level surgical technologists in the cognitive (thinking), psychomotor (skills), and affective (behavior) learning domains.

This program requires a separate admission to the Program in addition to general admission to CMU. Please contact the Health Sciences Department for further information.

Programs of Study

Associates
• Surgical Technology (AAS) (p. 641)
Surgical Technology (AAS)
Degree: Associate of Applied Science
Major: Surgical Technology
Program Code: 1651

About This Major . . .
The Associates of Applied Science in Surgical Technology Program is designed to cover both the academic and clinical skills necessary to perform as a surgical technologist. The program begins fall semester of each year. Prerequisite courses, including Essential Learning courses, are completed in year one prior to admission to the professional portion (year two) of the program. The application process occurs in the second semester of the first year. Once accepted to the program, the second year prepares students to work as surgical technologists and assist in surgical operations.

Surgical technologists work as members of a healthcare team alongside surgeons, registered nurses, and other health care workers. They prepare operating rooms, arrange equipment, and help doctors during surgeries. Students are prepared to work in a variety of surgical settings. A surgical technologist's responsibilities include preparing patients for surgery, washing and disinfecting incision sites, positioning patients on the operating table, covering patients with sterile drapes, and transporting patients to and from the operating room. Surgical technologists prepare sterile solutions and medications used in surgery and check that all surgical equipment is working properly. They help the surgical team put on sterile gowns and gloves. During operations, surgical technologists pass instruments and supplies to surgeons and first assistants. They hold retractors and may hold internal organs in place during procedures. Surgical technologists may handle specimens taken for laboratory analysis. Surgical technologists who take and pass the certifying examination offered by the NBSTSA (National Board for Surgical Technology and Surgical Assisting) are certified and authorized to use the initials CST to designate their status as Certified Surgical Technologists.

For more information, visit Career Services' What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Describe the scope and breadth of surgical technology and related skills using evidence-based resources. (Specialized Knowledge/ Applied Learning, Critical Thinking)
2. Calculate therapeutic interventions for selected patient populations. (Quantitative Fluency)
3. Summarize discipline-specific case presentations to professionals and peers. (Communication Fluency)
4. Interpret administrative and clinical policies to advocate for patient safety during surgical procedures. (Personal and Social Responsibility)
5. Translate discipline-specific concepts into clinical surgical practice. (Information Literacy)

Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements
The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Specific to this program:
- 67 semester hours total for the AAS, Surgical Technology.

Essential Learning Requirements
(16 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are
Sustainable Agriculture

Program Description

Sustainable agriculture is a holistic approach to agricultural practices, using the principles of ecology – the study of relationships between organisms and their environment. Sustainable practices include an integrated system of plant and animal production practices, often with a long term, site-specific application. These principles are integrated throughout each course of the sustainable agriculture degree, addressing how to enhance environmental quality of food production, while also taking into account the economic viability of farm and ranch operation. Graduates of this Associate of Applied Science degree will be well-prepared for a work place environment with a solid foundation of sustainable agricultural principles, theory-based lectures, and hands-on experiential learning.

Programs of Study

Sustainable Agriculture (AAS)

Degree: Associate of Applied Science
Major: Sustainable Agriculture
Program Code: 1310

About This Major . . .

The Sustainable Agriculture curriculum is designed to provide the entrepreneurial and technical skills necessary to manage a profitable, environmentally sound, community based small farm or agricultural business. Students learn the fundamentals of sustainable agriculture, focusing on crop and animal production with farm business. Emphasis is placed on entrepreneurial and practical field training. Students will complete a business plan and an agricultural internship in marketing and farming. Graduates are qualified for employment in a variety of positions associated with sustainable agriculture, including horticultural and livestock operations, wholesale and retail management, nursery operations, and environmental and agricultural education.

This program will provide the student with an understanding of Sustainable Agriculture and its principles of operation and control. The graduate will understand the technical aspects of the work, the responsibilities of the work and the importance of safety in this vitally important career.

For more information on what you can do with this major, visit WCCC’s Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social
responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Apply business communication using listening, verbal and written and electronic forms that are needed for entry level employment. (Communication Fluency)
2. Apply mathematical and applied physics concepts for industry to meet employment requirements. (Quantitative Fluency)
3. Research, evaluate, synthesize and apply information/data relevant to business, sciences and technical careers. (Critical Thinking)
4. Demonstrate knowledge of terminology, symbols, business practices, and principles and application of technical skills. (Specialized Knowledge)
5. Perform the necessary applied skill sets to fulfill the needs of entry level employment. (Applied Learning)

Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements
The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.

- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Specific to this degree:
- A minimum of 16 hours taken at CMU in no fewer than two semesters.

Essential Learning Requirements
(15 semester hours)
See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

## Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
• Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Teacher Education
(See Art (p. 126), Early Childhood Education (p. 288), Education: Teacher Licensure (p. 301), English (p. 345), History (p. 406), Kinesiology (p. 434), Liberal Arts (p. 448), Mathematics (p. 488), Music (p. 524), and Social Science (p. 613) for graduate and undergraduate programs)

Theatre Arts
Program Description
The theatre program offers rigorous conservatory-style training within a well-rounded liberal arts education at an affordable public school price. The program is constructed to help students meet the rigorous demands of a professional career in theatre and to provide a strong artistic foundation and practical experience. The program is led by a dynamic faculty composed of current and former Artistic Directors, Actors, Singers, Designers, and Dancers with deep connections to top industry professionals from coast to coast.

Acting/Directing students at CMU can expect a full sequence of Stanislavski-based acting classes in addition to training in Shakespeare, voice, speech, acting for the camera, script analysis, movement, stage combat, make-up, dance, and more. Unlike many other undergraduate programs, CMU also offers students the opportunity to not only take directing classes, but also direct full productions as part of the performance season. The program is large enough to tackle ambitious projects and yet small and flexible enough to tailor to students’ particular needs. Classes are intimate, with a small student to faculty ratio, allowing for significant individual attention, and each season’s productions are picked specifically for the current class of students. Opportunities to perform begin immediately in the freshman year in any of the dozens of annual productions.

The Music Theatre concentration represents one of the most unique programs offered in Colorado, stressing strong technical foundations in music, theatre, and dance. This approach creates “triple threats” and enhances a young performer’s potential for a career in musical theatre. To complement technique courses, students also participate in a wide variety of performance-related assignments. Students develop all disciplines of performance in an intimate and rigorous setting. Individuality and diversity are the heart of all acting courses (from contemporary to Shakespeare, vocal studies (including jazz, pop, and rock), and dance classes (jazz, tap, and hip hop).

For our Design/Technology major, we cultivate daring artistic and scholarly pioneers poised to be the luminaries our industry demands. CMU strives to promote an environment where students exist as an ensemble of artists, who create work together and are active supporters of each other. This is an intimate and rigorous program. We give personalized attention to students with a specific focus on making students the best versions of themselves. The program accentuates absolute involvement and immersion in our seasons. This deep involvement within a production process prepares students for the rigors and demands of producing theatre well beyond the walls of CMU. Facilities in the Moss Performing Arts Center are state-of-the-art. We have a multi-level costume construction and design facility, a spacious scenic construction area, a robust and fully rigged proscenium space and an experimental black-box style theatre.

Through the theatre minor, students may choose courses from a broad range of theatrical endeavors including: acting, scenery, costumes, theatre history, the teaching of theatre, arts management and dramatic literature. Students will also have the opportunity to gain hands-on experience in the creation of two mainstage shows during the CMU theatre season. Training afforded by the study of theatre is also attractive to many other professions, including teaching, non-profit leadership, human resources, and law.

Special Requirements
Students seeking admission as theatre majors must successfully audition for acceptance into the acting/directing and music theatre concentrations. Admission to the University does not guarantee admission into one of these programs. Prospective theatre majors should consult the department's website or contact the department directly for information regarding audition dates and requirements. Prospective students interested in departmental scholarships must audition no later than April 15 of the year they seek admission.

• Students deficient in piano skills will be required to complete MUSA 130 (https://catalog.coloradomesa.edu/search/?P=MUSA%20130) and MUSA 131 (https://catalog.coloradomesa.edu/search/?P=MUSA%20131). MUSA 130 (https://catalog.coloradomesa.edu/search/?P=MUSA%20130) and MUSA 131 (https://catalog.coloradomesa.edu/search/?P=MUSA%20131) may be taken as lower division electives or Musical Theatre Support Courses.

• Students deficient in theory skills will be required to complete MUSA 113 (https://catalog.coloradomesa.edu/search/?P=MUSA%20113) before taking MUSA 114 (https://catalog.coloradomesa.edu/search/?P=MUSA%20114). MUSA 113 (https://catalog.coloradomesa.edu/search/?P=MUSA%20113) may be taken as a lower division elective or a Musical Theatre Support Course.

• Theatre Arts, General (BA) (p. 658)

Acting/Directing, Theatre Arts (BFA)
Degree: Bachelor of Fine Arts
Major: Theatre Arts
About This Major . . .

The Department of Theatre Arts offers one of the most successful theatre training degree programs in Colorado. Theatre Arts majors choose from two distinct concentrations in the Bachelor of Fine Arts degree in Theatre Arts (Acting/Directing or Music Theatre), 2 concentrations of the BA (Theatre Arts or Design/Technology) or the BFA in Dance and acquire a sound understanding of the performing arts in state-of-the-art facilities.

The Acting/Directing concentration is constructed to help students meet the rigorous demands of a professional acting career and provide a strong foundation and practical experience for future directors. Beginning with the first semester, students enroll in performance courses taught by academically and professionally experienced faculty. Unlike larger institutions, acting opportunities in all productions at Colorado Mesa University are open to motivated and talented freshmen. In acting courses, students are exposed to techniques and approaches that are industry standards today. Training is grounded in Stanislavski, Cohen, and Chekhov. Voice and movement courses are complemented by performance opportunities in student in faculty directed productions. Acting students also audition for one act plays directed by directing students each year. Experimental and other challenging productions are offered at the Mesa Experimental Theatre.

Colorado Mesa is strategically located at the hub of a circle of important entertainment centers such as Aspen, Telluride, Moab, and Park City, Utah. There are regional theatres of international repute within driving distance, such as the Utah Shakespeare Festival, the Denver Center for the Performing Arts, and the Colorado Shakespeare Festival. There is a thriving theatrical scene in Grand Junction that offers opportunities for summer employment, including CMUs own Mesa Repertory Theatre. At Colorado Mesa, we are committed to the philosophy of training theatrical entrepreneurs. We offer low teacher-to-student ratios so that personal attention and mentoring are possible. Our many graduates in the industry have informed us that Colorado Mesa’s approach was invaluable.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Communicate verbally contemporary and enduring concepts concerning Human Culture through participation and/or observation of the performing arts and speech. (Specialized Knowledge/ Communication)
2. Communicate non-verbally contemporary and enduring concepts concerning Human Culture through participation and/or observation of the performing arts and speech. (Specialized Knowledge/ Communication)
3. Create progressively more challenging projects through the use of intellectual and/or practical skills. (Applied Learning)
4. Demonstrate teamwork and problem solving skills through collaboration and cooperation on creative projects. (Critical Thinking)
5. Demonstrate the knowledge, skills, and versatility of the discipline from conceptualization to application. (Applied Learning)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation
Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process
Students must complete the following in the first two months of the semester prior to completing their degree requirements:

1. Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
2. Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
3. Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
4. Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Music Theatre, Theatre Arts (BFA)

Degree: Bachelor of Fine Arts
Major: Theatre Arts
Concentration: Music Theatre
Program Code: 3266

About This Major . . .

The Department of Theatre Arts offers one of the most successful theatre training degree programs in Colorado. Theatre Arts majors choose from two distinct concentrations in the Bachelor of Fine Arts degree in Theatre Arts (Acting/Directing or Music Theatre), two concentrations of the BA (Theatre Arts or Design/Technology) or the BFA in Dance and acquire a sound understanding of the performing arts in state-of-the-art facilities.

The Music Theatre concentration provides strong technical foundations in Music, Theatre, and Dance. This approach is to create ‘triple threats’ and enhance the young performer’s potential for an exciting career in Musical Theatre. Students begin training with music theory and ear training, private voice instruction, choir and class piano. Acting I and II, Ballet and Tap are also included to complete first year academic requirements. To complement technical courses, students also participate in a wide variety of performance related assignments which include two Main stage productions, Experimental Theatre productions, choral ensembles, dance concerts, student directed one-acts, and technical crew assignments.

Students continue interdisciplinary course work in audition techniques and resume writing, as well as preparing and performing Vocal/Acting auditions and specialty performances throughout their next three years. The Music Theatre concentration offers highly personalized instruction from skilled professors who are seasoned performers, coaches, directors, teachers, and technicians; working graduates cite this as the prime reason for their success in gaining employment in both local and national venues. Music Theatre graduates currently work on Broadway, Off-Broadway, in National Broadway tours, Regional Theatres, dinner theatres, cruise ships, and with Disney and Universal Studios.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Communicate verbally contemporary and enduring concepts concerning Human Culture through participation and/or observation of the performing arts and speech. (Specialized Knowledge/Communication Fluency)
2. Communicate non-verbally contemporary and enduring concepts concerning Human Culture through participation and/or observation of the performing arts and speech. (Specialized Knowledge/Communication Fluency)
3. Create progressively more challenging projects through the use of intellectual and/or practical skills. (Applied Learning)
4. Demonstrate teamwork and problem solving skills through collaboration and cooperation on creative projects. (Critical Thinking)
5. Demonstrate the knowledge, skills, and versatility of the discipline from conceptualization to application. (Applied Learning)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.
Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

## Design/Technology, Theatre Arts (BA)

### Overview

Degree: Bachelor of Arts  
Major: Theatre Arts  
Concentration: Design/Technology  
Program Code: 3262

### About This Major . . .

The Department of Theatre Arts offers one of the most successful theatre training degree programs in Colorado. Theatre Arts majors choose from two distinct concentrations in the Bachelor of Fine Arts degree in Theatre Arts (Acting/Directing or Music Theatre), 2 concentrations of the BA (Theatre Arts or Design/Technology) or the BFA in Dance and acquire a sound understanding of the performing arts in state-of-the-art facilities.

### Advising and Graduation

#### Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

#### Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the "Intent to Graduate" form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at [http://www.coloradomesa.edu/registrar/graduation.html](http://www.coloradomesa.edu/registrar/graduation.html).

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

The Design/Technology concentration exposes students to the visual and technical aspects of Theatre, including Costume, Lighting, Sound, Scenery and Stage Management. The first year centers on courses that develop aesthetic sensitivity and technical proficiency. Subsequent years are devoted to studio work that continues to develop a student’s visual storytelling, creative problem solving and collaborative processes. Coursework focuses on the development of the student as a whole theatre professional, whether they lean toward technology or design areas, and will include classroom and hands-on production experiences in drafting, rendering, scenic and costume construction and craft work, and other methods of communicating, collaborating and contributing to the theatrical production process. The program culminates in a final design or technology project during the fourth year.

Students can expect personalized instruction and supervised ‘hands-on’ design experiences that stretch from designs on paper to fully realized black box and mainstage productions. Graduates of the Design/Technology concentration will have the necessary skills for success in graduate studies or the professional theatre.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Communicate verbally contemporary and enduring concepts concerning Human Culture through participation and/or observation of the performing arts and speech. (Specialized Knowledge/Communication)
2. Communicate non-verbally contemporary and enduring concepts concerning Human Culture through participation and/or observation of the performing arts and speech. (Specialized Knowledge/Communication)
3. Create progressively more challenging projects through the use of intellectual and/or practical skills. (Applied Learning)
4. Demonstrate teamwork and problem solving skills through collaboration and cooperation on creative projects. (Critical Thinking)
5. Demonstrate the knowledge, skills, and versatility of the discipline from conceptualization to application. (Applied Learning)

### Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 120 semester hours minimum.
- Students must complete a minimum of 30 of the last 60 hours of credit at CMU, with at least 15 semester hours in major discipline courses numbered 300 or higher.
- 40 upper-division credits (an alternative credit limit applies to the Bachelor of Applied Science degree).
- 2.00 cumulative GPA or higher in all CMU coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 30 semester credit hours for a baccalaureate degree. A maximum of 15 of the 30 credits may be for cooperative education, internships, and practica.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

The Bachelor of Arts' primary goal is to encourage general theatre studies for students who may be interested in theatrical careers outside of performance or design/technology, such as producing, arts administration, teaching, dramaturgy, and playwriting. Beginning with the first semester, students follow a curriculum that offers a grounding in the fundamentals while allowing the flexibility to focus or move between dance, theatre, musical theatre or design/technical theatre options.

Colorado Mesa is strategically located at the hub of a circle of important entertainment centers such as Aspen, Telluride, Moab, and Park City, Utah. There are regional theatres of international repute within driving distance, such as the Utah Shakespeare Festival, the Denver Center for the Performing Arts, and the Colorado Shakespeare Festival. At Colorado Mesa, we are committed to the philosophy of training theatrical entrepreneurs. We offer low teacher-to-student ratios so that personal attention and mentoring are possible. Our many graduates in the industry have informed us that Colorado Mesa’s approach was invaluable.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

All CMU baccalaureate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Communicate verbally contemporary and enduring concepts concerning Human Culture through participation and/or observation of the performing arts and speech. (Specialized Knowledge/Communication)
2. Communicate nonverbally contemporary and enduring concepts concerning Human Culture through participation and/or observation of the performing arts and speech. (Specialized Knowledge/Communication)
3. Create progressively more challenging projects through the use of intellectual and/or practical skills. (Applied Learning)
4. Demonstrate teamwork and problem solving skills through collaboration and cooperation on creative projects. (Critical Thinking)
5. Demonstrate the knowledge, skills, and versatility of the discipline from conceptualization to application. (Applied Learning)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU baccalaureate degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.
Essential Learning Requirements

(31 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation
Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Theatre (Minor)

Minor: Theatre
Program Code: M270

About This Minor . . .

The Department of Theatre Arts is one of the most successful theatre training programs in Colorado. Through the Theatre Minor, students may choose courses from a broad range of theatrical endeavor including: acting, scenery, costumes, theatre history, the teaching of theatre, arts management, and dramatic literature. Students will also have the opportunity to gain hands on experience in the creation of shows in the CMU Theatre season. The training afforded by study of theatre is also attractive to many professions including teaching, human resources, and law.

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements

The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives can be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.
- A minor must be outside the major field of study.
- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the “Intent to Graduate” form.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Transportation Services

Program Description

The transportation services program covers the theory and fundamentals of operation, troubleshooting, diagnostic testing and repair of: drive trains; gas and diesel engines; hydraulic and air brakes; alignment; suspension and steering; climate control; electronic body and chassis controls; engine performance and emission systems; charging and starting systems; hybrid drive systems; and hydraulic and pneumatic systems; safety; technical mathematics; oral and written communication; and leadership skills. The student may choose one of two certificates and/or an Associate of Applied Science automotive degree and a certificate and/or Associate of Applied Science degree in diesel technology. The focus of the programs is the repair of late-model vehicles, with the emphasis on the computer controls.

The program is accredited by NATEF, the National Automotive Technicians Education Foundation, as a Master Automotive Service Technician program. The courses prepare the student to take the ASE, Automotive Service Excellence, certification examinations; the ASE examinations are administered at CMU quarterly.

By successfully completing a technical certificate or an Associate of Applied Science in Transportation Services, students will be prepared for careers as automotive/diesel technicians, parts and service distributors, industrial sales representatives, service managers and business owners in the transportation services industry.

Special Requirements

Excellent dexterity, eye-hand coordination, and critical thinking is a plus for a technician. Proper selection, care and safe use of power, hand and diagnostic tools, and equipment is emphasized.

Advanced Automotive Service Technician, Transportation Services (AAS)

Degree: Associate of Applied Science
Major: Transportation Services
Emphasis: Advanced Automotive Service Technician
Program Code: 1386

About This Major . . .

In the Associate of Applied Science degree with a major in Transportation Services, and emphasis in Advanced Automotive Service Technician, students learn the fundamentals of electronics, starters, ignition, and charging systems, air conditioning, cooling and heating systems, safety, technical math, use of technical manuals, basic management skills, written and oral communication skills, and leadership. Advanced coursework includes an in-depth study of internal combustion engine disassembly, repair, reassembly, diagnosis and troubleshooting, suspension systems, and alignment and wheel balance. The Advanced Automotive Service Technician emphasis prepares students for careers as automotive technicians, parts and service distributors, industrial sales representatives, service managers, and business owners in the transportation services industry.

For more information on what you can do with this major, visit WCCC's Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campuswide student learning outcomes, graduates of this major will be able to:

1. Apply principles of grammar and vocabulary in the documentation required to perform the duties of a repair technician to properly repair vehicles. (Communication Fluency)
2. Apply Mathematical concepts and practices that are required to properly perform vehicle repair competencies to an (ASE) Automotive Service Excellence standard. (Quantitative Fluency)
3. Evaluate evidence discovered during the diagnosis and troubleshooting of vehicles and apply those findings to strategies to properly repair the vehicle. (Critical Thinking)
4. Describe the scope and application of principle features of the field of study, including core practices in the vehicle repair industry. (Specialized Knowledge)
5. Demonstrate mastery of the current terminology in the Transportation Service industry and generate substantially error-free products or processes that define the duties of a repair technician. (Specialized Knowledge)
6. Perform vehicle repair practices that meet or exceed industry standards as defined by (ASE) Automotive Service Excellence. (Applied Learning)
7. Demonstrate personal and professional ethical behavior as applied to the industry. (Applied Learning)
8. Define the legal and ethical standards required of the vehicle repair industry. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

• 60 semester hours minimum.
• Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
• 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
• A course may only be used to fulfill one requirement for each degree/certificate.
• No more than six semester hours of independent study courses can be used toward the degree.
• Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
• Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
• Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
• The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
• See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Specific to this program:

• 70 semester hours total for the AAS, Transportation Services - Advanced Automotive Service Technician.

Essential Learning Requirements

(15 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for
your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

1. Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
2. Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
3. Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
4. Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Diesel Technology, Transportation Services (AAS)

Degree: Associate of Applied Science
Major: Transportation Services
Emphasis: Diesel Technology

Program Code: 1342

About This Major . . .

In the Associate of Applied Science degree with a major in Transportation Services and emphasis in Diesel Technology, students learn the fundamentals of electronics, starters, ignition, and charging systems; air conditioning, cooling and heating systems; safety; technical math; use of technical manuals; basic management skills; written and oral communication skills; and leadership. Advanced coursework includes an in-depth study of internal combustion engine disassembly, repair, reassembly, diagnosis and troubleshooting; suspension systems; and alignment and wheel balance. The diesel technology emphasis concentrates on on-road trucks and light duty diesel-powered vehicles. Students will be prepared for careers as diesel technicians, parts and service distributors, industrial sales representatives, service managers, and business owners in the transportation services industry.

For more information on what you can do with this major, visit WCCC’s Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus#wide student learning outcomes, graduates of this major will be able to:

1. Apply principles of grammar and vocabulary in the documentation required to perform the duties of a repair technician to properly repair vehicles. (Communication Fluency)
2. Apply Mathematical concepts and practices that are required to properly perform vehicle repair competencies to an (ASE) Automotive Service Excellence standard. (Quantitative Fluency)
3. Evaluate evidence discovered during the diagnosis and troubleshooting of vehicles and apply those finding to strategies to properly repair the vehicle. (Critical Thinking)
4. Describe the scope and application of principle features of the field of study, including core practices in the vehicle repair industry. (Specialized Knowledge)
5. Demonstrate mastery of the current terminology in the Transportation Service industry and generate substantially error-free products or processes that define the duties of a repair technician. (Specialized Knowledge)
6. Perform vehicle repair practices that meet or exceed industry standards as defined by (ASE) Automotive Service Excellence. (Applied Learning)
7. Demonstrate personal and professional ethical behavior as applied to the industry. (Applied Learning)
8. Define the legal and ethical standards required of the vehicle repair industry. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or
Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements:

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Specific to this program:
- 62 semester hours total for the AAS, Transportation Services - Diesel Technology.

Essential Learning Requirements

(15 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Program Specific Degree Requirements

(45 semester hours, must earn a “C” or better in each course.)

- Additional expenses - Students entering the program may be required to purchase or have hand tools and appropriate clothing and safety gear with a total cost of approximately $2500.00. This does not include cost of required textbooks. These costs may vary with student need and brand or quality of tools or equipment purchased. All safety glasses must meet the minimum industry safety standard of Z-87 with side shields.

Automotive Service Technician, Transportation Services (Technical Certificate)

Award: Technical Certificate
Program of Study: Transportation Services
Specialization: Automotive Service Technician
Program Code: 1312

About This Program . . .

Students learn the fundamentals of electronics, starters, ignition, and charging systems, air conditioning, cooling and heating systems, safety, technical math, use of technical manuals; basic management skills, written and oral communication skills, and leadership. Advanced coursework includes an in-depth study of internal combustion engine disassembly, repair, reassembly, diagnosis and troubleshooting, suspension systems, and alignment and wheel balance. Career options include automotive/diesel technician, parts and service distributor, industrial sales representative and service manager.

*Students must complete the Light Duty Technician technical certificate before enrolling in this technical certificate.

For more information on what you can do with this major, visit WCCC’s Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in communication fluency, quantitative fluency,
specialized knowledge/applied learning, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Apply principles of grammar and vocabulary in the documentation required to perform the duties of a repair technician to properly repair vehicles. (Communication Fluency)
2. Apply Mathematical concepts and practices that are required to properly perform vehicle repair competencies to an (ASE) Automotive Service Excellence standard. (Quantitative Fluency)
3. Evaluate evidence discovered during the diagnosis and troubleshooting of vehicles and apply those finding to strategies to properly repair the vehicle. (Critical Thinking)
4. Describe the scope and application of principle features of the field of study, including core practices in the vehicle repair industry. (Specialized Knowledge)
5. Demonstrate mastery of the current terminology in the Transportation Service industry and generate substantially error-free products or processes that define the duties of a repair technician. (Specialized Knowledge)
6. Perform vehicle repair practices that meet or exceed industry standards as defined by (ASE) Automotive Service Excellence. (Applied Learning)
7. Demonstrate personal and professional ethical behavior as applied to the industry. (Applied Learning)
8. Define the legal and ethical standards required of the vehicle repair industry. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See "Requirements for Undergraduate Degrees and Certificates" in the catalog for a complete list of graduation requirements.

Program Specific Certificate Requirements

(40 semester hours)

- Students must complete the Light Duty Technician technical certificate before enrolling in this technical certificate.
- Additional Expenses — Students entering the program may be required to purchase or have hand tools and appropriate clothing and safety gear with a total cost of approximately $2,500.00 This does not include cost of required textbooks. These costs may vary with student need and brand or quality of tools or equipment purchased. All safety glasses must meet the minimum industry safety standard of Z-87 with side shields.

Advising and Graduation
Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process
Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Diesel Mechanics, Transportation Services (Technical Certificate)

Award: Technical Certificate
Program of Study: Transportation Services
Specialization: Diesel Mechanics
Program Code: 1347

About This Program . . .

Students learn the fundamentals of electronics, starters, ignition, and charging systems; air conditioning, cooling and heating systems; safety; technical math; use of technical manuals; basic management skills; written and oral communication skills; and leadership. Advanced coursework includes an in-depth study of internal combustion engine disassembly, repair, reassembly, diagnosis and troubleshooting; suspension systems; and alignment and wheel balance. The diesel mechanics specialization concentrates on on-road trucks and light duty diesel-powered vehicles. Career options include automotive/diesel technician, parts and service distributor, industrial sales representative, and service manager.

For more information on what you can do with this major, visit WCCC’s Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in communication fluency, quantitative fluency, specialized knowledge/applied learning, and critical thinking. In addition to these campus#wide student learning outcomes, graduates of this major will be able to:

1. Apply principles of grammar and vocabulary in the documentation required to perform the duties of a repair technician to properly repair vehicles. (Communication Fluency)
2. Apply Mathematical concepts and practices that are required to properly perform vehicle repair competencies to an (ASE) Automotive Service Excellence standard. (Quantitative Fluency)

| TSTA 150 | Fluid Power |
| TSTA 195 | Climate Control |
| TSTA 265 | Engine Control Services |
| TSTA 286 | Hybrid and Alternative Fueled Vehicles |
| TSTA 289 | Alternative Fueled Vehicles |

Total Semester Credit Hours 4
3. Evaluate evidence discovered during the diagnosis and troubleshooting of vehicles and apply those findings to strategies to properly repair the vehicle. (Critical Thinking)

4. Describe the scope and application of principle features of the field of study, including core practices in the vehicle repair industry. (Specialized Knowledge)

5. Demonstrate mastery of the current terminology in the Transportation Service industry and generate substantially error-free products or processes that define the duties of a repair technician. (Specialized Knowledge)

6. Perform vehicle repair practices that meet or exceed industry standards as defined by (ASE) Automotive Service Excellence. (Applied Learning)

7. Demonstrate personal and professional ethical behavior as applied to the industry. (Applied Learning)

8. Define the legal and ethical standards required of the vehicle repair industry. (Specialized Knowledge)

This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than “C” will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
- The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.

Program Specific Certificate Requirements

(32 semester hours)

- Additional Expenses – Students entering the program may be required to purchase or have hand tools and appropriate clothing and safety gear with a total cost of approximately $2,500.00. This does not include cost of required textbooks. These costs may vary with student need and brand or quality of tools or equipment purchased. All safety glasses must meet the minimum industry safety standard of Z-87 with side shields.

Advising Process and DegreeWorks

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

1. Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
2. Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
3. Submit the "Intent to Graduate" form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
4. Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Light Duty Automotive Technician Foundations I, Transportation Services (Technical Certificate)

Award: Technical Certificate
Program of Study: Transportation Services
Specialization: Light Duty Automotive Technician Foundations I
Program Code: 1119

About This Program . . .

Students learn the fundamentals of electronics, starters, ignition, and charging systems, air conditioning, brakes, suspension and steering, cooling and heating systems, safety, technical math, use of technical manuals, basic management, communication and leadership skills.

Career options include light duty automotive/diesel technician, parts and service distributor.

For more information on what you can do with this major, visit WCCC's Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in communication fluency, quantitative fluency, specialized knowledge/applied learning, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Apply principles of grammar and vocabulary in the documentation required to perform the duties of a repair technician to properly repair vehicles. (Communication Fluency)
2. Apply Mathematical concepts and practices that are required to properly perform vehicle repair competencies to an (ASE) Automotive Service Excellence standard. (Quantitative Fluency)
3. Evaluate evidence discovered during the diagnosis and troubleshooting of vehicles and apply those finding to strategies to properly repair the vehicle. (Critical Thinking)
4. Describe the scope and application of principle features of the field of study, including core practices in the vehicle repair industry. (Specialized Knowledge)
5. Demonstrate mastery of the current terminology in the Transportation Service industry and generate substantially error-free products or processes that define the duties of a repair technician. (Specialized Knowledge)
6. Perform vehicle repair practices that meet or exceed industry standards as defined by (ASE) Automotive Service Excellence. (Applied Learning)
7. Demonstrate personal and professional ethical behavior as applied to the industry. (Applied Learning)
8. Define the legal and ethical standards required of the vehicle repair industry. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information,
scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than "C" will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.
Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Unmanned Aircraft Systems

This program prepares students to be a commercial Unmanned Aircraft Systems (UAS) pilot (a UAS pilot is sometimes referred to as a drone pilot). Students develop skills in flight planning, programming, maintaining and piloting small UAS. Preparation for the Federal Aviation Administration (FAA) Remote Pilot Knowledge test is included. Students learn how to acquire and transmit data and participate in live flight training of UAS, both indoor and outdoor.

The program will also develop students' knowledge and understanding of UAS history, terminology, operational capabilities and limitations, and FAA Part 107 compliance and regulation. Key skills of emphasis include flight operation and maintenance, preflight procedures, and sectional chart reading.

Pilot Small UAS, Unmanned Aircraft Systems (Technical Certificate)

Award: Technical Certificate
Program of Study: Unmanned Aircraft Systems
Specialization: Pilot Small UAS
Program Code: 1139

About This Program . . .

This program prepares students to be a commercial UAS pilot. Students develop skills in flight planning, programming, maintaining and piloting small UAS. Preparation for the FAA Remote Pilot Knowledge test is included. Students learn how to acquire and transmit data and participate in live flight training of UAS are included, both indoor and outdoor.

Important information about this program:

- Must pass FAA Pre-Check background check.
- Must be a member of the Academy of Model Aeronautics and the Grand Junction Modeleurs club.

For more information on what you can do with this major, visit WCCC’s Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in communication fluency, quantitative fluency, specialized knowledge/applied learning, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Operate UAS proficiently as a professional pilot. (Critical Thinking)
2. Interpret FAA charts and forms accurately. (Specialized Knowledge)
3. Explain UAS flight planning as a pilot in a typical environment. (Applied Learning)
4. Explain the maintenance, configuration and programming of UAS. (Quantitative Fluency)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options'. This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page'. The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than “C” will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
• Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
• The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
• See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

• Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.

• Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
• Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
• Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Veterinary Technology

Program Description

This program prepares the student for employment as a Veterinary Technician. These professionals are an integral member of the veterinary care team in private veterinary practices, research laboratories, kennels, zoos, and public practice/government agencies. Students are trained to work with a broad range of animal species and to become proficient in performing a variety of tasks including medical and surgical nursing procedures, laboratory testing, anesthesia induction, recovery maintenance, monitoring, holding and restraining animals during exams and treatments, collecting specimens, taking diagnostic X-rays, administering medication or treatments, assisting in surgery, and assisting with client education.

Successful completion of the program will lead to an Associate of Applied Science in veterinary technology and prepares students to take the Veterinary Technician National Examination for certification.

Students admitted to the Veterinary Technology program must undergo a background check, submit proof of immunizations, and obtain professional liability insurance.

Veterinary Technician Program Accreditation –

Higher Learning Commission (HLC) and Specialized Accreditation American Veterinary Medical Association Committee on Veterinary Technician Education and Activities (AVMA CVTEA)

Western Colorado Community College (WCCC) Veterinary Technology Program is in the process of submitting the required documentation to the Higher Learning Commission (HLC) for program approval as well as submitting an application for accreditation by the American Veterinary Medical Association Committee on Veterinary Technician Education and Activities (AVMA CVTEA). The AVMA CVTEA application does not guarantee accreditation nor does it grant any temporary status of accreditation. While students may take classes that are potentially required for a degree, students will not be matriculated into the Veterinary Technology Program until HLC approval is granted. Students will not be eligible to sit for the Veterinary Technician National Exam until AVMA CVTEA program approval is granted. WCCC is working toward obtaining initial accreditation prior to graduation of the first cohort.

Programs of Study

Veterinary Technology (AAS)

Degree: Associate of Applied Science
Major: Veterinary Technology
Program Code: 1306

About This Major . . .

The Veterinary Technology program is for all individuals who wish to develop careers as an important member of the veterinary care team by providing humane and quality care to animals. Veterinary technicians perform a variety of tasks including medical and surgical nursing procedures, laboratory testing, anesthesia induction, recovery maintenance, monitoring, holding and restraining animals during exams and treatments, collecting specimens, taking diagnostic X-rays, administering medication or treatments, assisting in surgery, and assisting with client education. Your education will lead to an Associate of Applied Science in veterinary technology and prepares you to take the Veterinary Technician National Examination for certification. Graduates may find career opportunities in private veterinary practices, research laboratories, kennels, zoos, and local, state and federal agencies.

Important information about this program:

- Program admission requires a minimum overall GPA of 2.5 and a grade of 'C' or better in ENGL 111, SPCH 101, MATH 108, BIOL 105, and BIOL 105L.
- A minimum grade of C is required for all VETT courses.

For more information on what you can do with this major, visit Career Services’ What to Do with a Major? (https://www.coloradomesa.edu/career/students/explore/major.html) resource.

Veterinary Technician Program Accreditation –

Higher Learning Commission (HLC) and Specialized Accreditation American Veterinary Medical Association Committee on Veterinary Technician Education and Activities (AVMA CVTEA)

Western Colorado Community College (WCCC) Veterinary Technology Program is in the process of submitting the required documentation to the Higher Learning Commission (HLC) for program approval as well as submitting an application for accreditation by the American Veterinary Medical Association Committee on Veterinary Technician Education and Activities (AVMA CVTEA). The AVMA CVTEA application does not guarantee accreditation nor does it grant any temporary status of accreditation. While students may take classes that are potentially required for a degree, students will not be matriculated into the Veterinary Technology Program until HLC approval is granted. Students will not be eligible to sit for the Veterinary Technician National Exam until AVMA CVTEA program approval is granted. WCCC is working toward obtaining initial accreditation prior to graduation of the first cohort.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus#wide student learning outcomes, graduates of this major will be able to:

1. Communicate in a professional manner to the veterinary team and clients, in all formats - written, oral, non-verbal, and electronic (Communication Fluency).
2. Safely and effectively perform applied skill sets and techniques necessary for the profession and applicable to a broad range of animal species, at a competent level and in a proficient manner (Critical Thinking; Specialized Knowledge/Applied Learning).
3. Follow and uphold applicable laws and the veterinary technology profession's ethical codes to provide high quality care to patients (Personal and Social Responsibility).

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program's requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Specific to this degree:

- 81 semester credit hours required for the AAS, Veterinary Technology.
Essential Learning Requirements
(16 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Semester Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 111</td>
<td>English Composition I-GTCO1</td>
<td>3</td>
</tr>
<tr>
<td>SPCH 101</td>
<td>Interpersonal Communications</td>
<td>3</td>
</tr>
<tr>
<td>MATH 108</td>
<td>Technical Mathematics (or higher) 1</td>
<td>3</td>
</tr>
<tr>

</tr>
<tr>
<td>PHIL 105</td>
<td>Health and Wellness</td>
<td>1</td>
</tr>
<tr>
<td>Total Semester Credit Hours</td>
<td>16</td>
<td></td>
</tr>
</tbody>
</table>

1. MATH 108 is a 4 semester credit hour course; however, if a student completes a higher-level, Essential Learning eligible Mathematics course at 3 semester credit hours, that course would fulfill the Mathematics Essential Learning requirement.

2. PHIL 105 is strongly suggested for satisfaction of this requirement for students in this program.

Viticulture and Enology

Program Description
The Viticulture and Enology curriculum is designed to provide the entrepreneurial and technical skills necessary to manage a profitable, environmentally sound vineyard and/or winemaking business. Students learn the fundamentals of sustainable viticulture, focusing on cultivars that are suitable for Colorado, as well as the science of fermentation, and the fundamentals of producing and testing wine. Emphasis is placed on entrepreneurial and practical field training. As part of their education, students will participate in the establishment and management of a vineyard, and the production of wine. Graduates are qualified for employment in a variety of positions associated with viticulture and winemaking businesses.

This program will provide the student with an understanding of the viticulture and enology industry, the principles and science underlying operation and control decisions, and financial practices and measures common to the businesses. The graduate will understand the technical aspects of the work, the responsibilities of the work and the importance of safety in this vitally important career.

Advising and Graduation
Advising Process and DegreeWorks
Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process
Students must complete the following in the first two months of the semester prior to completing their degree requirements:

• Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
• Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
• Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
• Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Viticulture and Enology (AAS)
Degree: Associate of Applied Science
Major: Viticulture and Enology
**About This Major . . .**

About This Major . . . The Viticulture and Enology curriculum is designed to provide the entrepreneurial and technical skills necessary to manage a profitable, environmentally sound, vineyard and/or winemaking business. Students learn the fundamentals of sustainable viticulture, focusing on cultivars that are suitable for Colorado, as well as the science of fermentation, and the fundamentals of producing and testing wine. Emphasis is placed on entrepreneurial and practical field training. As part of their education, students will participate in the establishment and management of a vineyard, and the production of wine. Graduates are qualified for employment in a variety of positions associated with viticulture and winemaking businesses.

This program will provide the student with an understanding of the viticulture and enology industry, the principles and science underlying operation and control decisions, and financial practices and measures common to the businesses. The graduate will understand the technical aspects of the work, the responsibilities of the work and the importance of safety in this vitally important career.

For more information on what you can do with this major, visit WCCC’s Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Apply business communication using listening, verbal and written and electronic forms that are needed for entry level employment. (Communication Fluency)
2. Apply mathematical and applied physics concepts for industry to meet employment requirements. (Quantitative Fluency)
3. Research, evaluate, synthesize and apply information/data relevant to business, sciences and technical careers. (Critical Thinking)
4. Demonstrate knowledge of terminology, symbols, business practices, and principles and application of technical skills. (Specialized Knowledge)

**Requirements**

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

**To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’** This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

**Institutional Degree Requirements**

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A course may only be used to fulfill one requirement for each degree/certificate.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

**Specific to this degree:**

- 65 semester hours total for the AAS, Viticulture and Enology.
- A minimum of 16 semester hours taken at CMU in no fewer than two semesters.

**Essential Learning Requirements**

(15 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

### Advising and Graduation

**Advising Process and DegreeWorks**

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

### Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:
• Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
• Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
• Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
• Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Enology, Viticulture and Enology (Technical Certificate)

Award: Technical Certificate
Program of Study: Viticulture and Enology
Specialization: Enology
Program Code: 1109

About This Program . . .

Enology Technical certificate in the Viticulture and Enology program is a concentrated study in the areas of viticulture, winemaking processes, wine etiquette, and sensory evaluation. The certificate provides information and knowledge base for the students interested in the wine industry.

For more information on what you can do with this major, visit WCCC’s Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in communication fluency, quantitative fluency, specialized knowledge/applied learning, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Apply business communication using listening, verbal and written and electronic forms that are needed for entry level employment. (Communication Fluency)
2. Apply mathematical and applied physics concepts for industry to meet employment requirements. (Quantitative Fluency)
3. Research, evaluate, synthesize and apply information/data relevant to business, sciences and technical careers. (Critical Thinking)
4. Demonstrate knowledge of terminology, symbols, business practices, and principles and application of technical skills. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

• Consists of 5-59 semester hours.
• Consists of 100-200 level courses.
• At least fifty percent of the credit hours must be taken at CMU/WCCC.
• 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
• A grade lower than “C” will not be counted toward meeting the requirements.
• A course may only be used to fulfill one requirement for each degree/certificate.
• Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed twenty-five percent of the semester credit hours required for a technical certificate.
• Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
• Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Certificate Requirements.
• The Catalog Year determines which program sheet and certificate requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
• See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Program Specific Certificate Requirements

(18 semester hours, must earn a grade of “C” or better in each course.)

Water Quality Management
Program Description
The Water Quality Management program prepares students for entry-level employment as technicians in the water processing industry. Course and lab work provide students with knowledge of the regulatory expectations, the science involved in meeting regulatory expectations, the equipment used to process water, and the systems management skills necessary to enter and be successful in the water processing industry.

Water quality technicians work in teams to operate drinking water treatment systems and wastewater treatment systems. Students in the program prepare to become qualified professionals who plan, test for quality, and operate complex equipment to acquire and deliver high quality drinking water or process wastewater for return to the environment.

Program Strengths
- Provides students with an understanding of the science involved in meeting regulatory expectations
- Instruction on the equipment used to process water
- Curriculum emphasizes the necessary systems management skills
- Provide students necessary information to pass state examination for state license.

Career Opportunities
- Occupational Health and Safety Specialist
- Water Treatment Plant Technician
- Wastewater Treatment Plant Technician
- Water Resource Specialist
- Laboratory Analyst
- Water Chemist

Water Quality Management (AAS)

Degree: Associate of Applied Science
Major: Water Quality Management
Program Code: 1365

About This Major . . .

The Water Quality Management Program will prepare students for entry level employment as technicians in the water processing industry. Water quality technicians work in teams to operate drinking water treatment systems and wastewater treatment systems. The workers plan, test for quality, operate complex equipment to acquire and deliver high quality drinking water or process waste water for return to the environment.

This program will provide the student with an understanding of the regulatory expectations, the science involved in meeting regulatory expectations, the equipment used to process water, and the systems management skills necessary to be a successful employee in the water processing industry. The industries interested in hiring graduates of this program are the public drinking water utilities and the wastewater treatment systems. The workers plan, test for quality, operate complex equipment to acquire and deliver high quality drinking water or process waste water for return to the environment.

For more information on what you can do with this major, visit WCCC's Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus#wide student learning outcomes, graduates of this major will be able to:

1. Apply business communication using listening, verbal and written, and electronic forms that are needed for entry level employment. (Communication)
2. Apply Mathematical and applied physics concepts for industry to meet employment requirements (Quantitative Fluency)
3. Research, evaluate, synthesize and apply information/data relevant to business, sciences, and technical careers. (Critical Thinking)
4. Demonstrate knowledge of terminology, symbols, business practices, and principles and application of associated technical skills. (Specialized Knowledge)
5. Perform the necessary applied skill sets to fulfill the needs of entry level employment. (Applied Learning)
6. Demonstrate ethical, civic, and work place responsibility as part of professional behavior. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options'. This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page'. The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- No more than six semester hours of independent study courses can be used toward the degree.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
- Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
- Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Specific to this program:

- 65 semester hours total for the AAS, Water Quality Management.
- A minimum of 16 semester hours taken at CMU in no fewer than two semesters.
Essential Learning Requirements
(17 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Advising and Graduation
Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at http://www.coloradomesa.edu/registrar/graduation.html.

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Introduction to Wastewater Treatment, Water Quality Management (Technical Certificate)

Award: Technical Certificate
Program of Study: Water Quality Management
Specialization: Introduction to Wastewater Treatment
Program Code: 1133

About This Program . . .

Technical Certificate - Introduction to Wastewater Treatment program prepares students for entry-level employment as technicians in the water processing industry. Water quality technicians work in teams to operate drinking water treatment systems and wastewater treatment systems. The program provides an understanding of the regulatory expectations, the science involved in meeting regulatory expectations, the equipment used to process water and the systems management skills necessary to be a successful employee in the water processing industry. The program consists of three Technical Certifications and an Associates of Applied Science degree. The Wastewater Collection & Treatment technical certificate focuses on wastewater collection and treatment for bacterial, and harmful pollutants.

For more information on what you can do with this major, visit WCCC's Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in communication fluency, quantitative fluency, specialized knowledge/applied learning, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Apply business communication using listening, verbal and written, and electronic forms that are needed for entry level employment. (Communication)
2. Apply mathematical and applied physics concepts for industry to meet employment requirements (Quantitative Fluency)
3. Research, evaluate, synthesize and apply information/data relevant to business, sciences, and technical careers. (Critical Thinking)
4. Demonstrate knowledge of terminology, symbols, business practices, and principles and application of associated technical skills. (Specialized Knowledge)
5. Perform the necessary applied skill sets to fulfill the needs of entry level employment. (Applied Learning)
6. Demonstrate ethical, civic, and work place responsibility as part of professional behavior. (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program's information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Certificate Requirements

The following institutional requirements apply to all CMU or WCCC Technical Certificates. Specific programs may have different requirements that must be met in addition to institutional requirements.

- Consists of 5-59 semester hours.
- Consists of 100-200 level courses.
- At least fifty percent of the credit hours must be taken at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
- A grade lower than “C” will not be counted toward meeting the requirements.
- A course may only be used to fulfill one requirement for each degree/certificate.
- Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and

Mathematics in Water Quality, Water Quality Management (Technical Certificate)

Award: Technical Certificate
Program of Study: Water Quality Management
Specialization: Mathematics in Water Quality
Program Code: 1134

About This Program . . .

Technical Certificate- Mathematics in Water Quality program prepares students for entry-level employment as technicians in the water processing industry. Water quality technicians work in teams to operate drinking water treatment systems and wastewater treatment systems. The program provides an understanding of the regulatory expectations, the science involved in meeting regulatory expectations, the equipment used to process water and the systems management skills necessary to be a successful employee in the water processing industry. The program consists of eight Technical Certifications and an Associates of Applied Science degree. The Mathematics in Water Quality technical certificate focuses on math associated with Water Quality.

For more information on what you can do with this major, visit WCCC’s Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC technical certificate graduates are expected to demonstrate proficiency in communication fluency, quantitative fluency, specialized knowledge/applied learning, and critical thinking. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

Advising and Graduation

Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a certificate. Some courses are critical to complete in specific semesters while others may be moved around. Meeting with an academic advisor is essential in planning courses and discussing the suggested course sequencing. It is ultimately the student’s responsibility to understand and fulfill the requirements for her/his intended certificate.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar’s Office to evaluate progress towards a certificate and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar’s Office.

Graduation Process

Students must complete the following in the first two months of the semester prior to completing their certificate requirements (for one-semester certificates, complete in the first week of class):

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar’s Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at [http://www.coloradomesa.edu/registrar/graduation.html](http://www.coloradomesa.edu/registrar/graduation.html).

If a student’s petition for graduation is denied, it will be her/his responsibility to consult the Registrar’s Office regarding next steps.

Watershed Science

Program Description

The Watershed Science minor is an interdisciplinary program designed to serve the regional need for scientists with a strong background in water-related issues. It is a useful complement to environmental, physical and biological science majors, providing students in these fields with focused coursework. Combined with the relevant bachelor of science degree, plus additional calculus and physics courses, the minor satisfies the federal government’s requirements for qualification as a hydrologist.

The proximity of Colorado Mesa University to the Colorado, Gunnison and Green Rivers, the drainages of the Colorado National Monument and the high arroyos create an ideal location for the study of Watershed Science.

Department of Physical and Environmental Sciences
Wildland Fire Management

Program Description

The Associate of Applied Science (AAS) in Wildland Fire Management program covers the fundamentals of basic wildland firefighting, fire management and safety.

The program prepares students for entry-level positions in the wildland firefighting profession and is designed to provide students who are interested in careers in emergency and natural resource management with the knowledge, communication, and critical thinking skills necessary for success in the field.

Subjects covered are varied and include wildland fire fundamentals, leadership skills, fire behavior, meteorology, basic aviation, pumps and water hydraulics, incident command system, communications, ignition methods, and organizational management related to wildland fire emergency services. Program instructors contribute up-to-date industry expertise, and three credit internships are also available in the summer months with wildland fire agencies to enhance the student’s field knowledge and practical experiences.

Students successfully completing the program are eligible for industry certification. The wildland fire courses presented meet National Wildfire Coordination Group (NWCG) standards and are accepted by federal, state, and local agencies with wildland fire management jurisdictions. This degree provides graduates with a competitive advantage in gaining employment with the wildland fire service and land management career markets. Students with this AAS in Wildland Fire Management combined with industry certification will be highly competitive for employment and future professional opportunities in this field.

Special Requirements

Wildland Fire operations are rigorous in nature and some of the field training is arduous in order to simulate actual fire scene environments. Students are responsible for providing their own boots and gloves that meet NWCG requirements for personal protective equipment.

Programs of Study

Associates

Wildland Fire Management (AAS) (p. 697)

About This Major . . .

This program is designed for students who want the credentials of an Associate Degree combined with the technical training that meets National Wildfire Coordination Group (NWCG) standards. The courses offered align with the NWCG Curriculum.

This degree provides graduates with a competitive advantage in gaining employment in the Wildland fire and land management career markets. Graduates are qualified to apply for jobs with the Bureau of Land Management, U.S. Forest Service, National Park Service, as well as state, county, and contracted wildland firefighting entities.

For more information on what you can do with this major, visit WCCC's Programs of Study (https://www.coloradomesa.edu/wccc/programs/) page.

All CMU/WCCC associate graduates are expected to demonstrate proficiency in specialized knowledge/applied learning, quantitative fluency, communication fluency, critical thinking, personal and social responsibility, and information literacy. In addition to these campus-wide student learning outcomes, graduates of this major will be able to:

1. Demonstrate proficient formal and informal communication and writing skills that are professional in nature (Communication Fluency)
2. Apply mathematical concepts required of entry level wildland firefighters. (Quantitative Fluency)
3. Demonstrate specialized and holistic knowledge of interagency Wildland Fire Management (Specialized Knowledge)
4. Demonstrate proficiency in basic skills required for entry level Wildland Fire Management professionals (Applied Learning)
5. Evaluate leadership and ethical issues specific to Wildland Fire Management (Specialized Knowledge)

Requirements

Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select 'Print Options'. This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Degree Requirements

The following institutional degree requirements apply to all CMU and WCCC Associate of Applied Science (AAS) degrees. Specific programs may have different requirements that must be met in addition to institutional requirements.

- 60 semester hours minimum.
- Students must complete a minimum of 15 of the final 30 semester hours of credit at CMU/WCCC.
- 2.00 cumulative GPA or higher in all CMU/WCCC coursework.
• A course may only be used to fulfill one requirement for each degree/certificate.
• No more than six semester hours of independent study courses can be used toward the degree.
• Non-traditional credit, such as advanced placement, credit by examination, credit for prior learning, cooperative education and internships, cannot exceed 20 semester credit hours for an AAS degree.
• Pre-collegiate courses (usually numbered below 100) cannot be used for graduation.
• Capstone exit assessment/projects (e.g., Major Field Achievement Test) requirements are identified under Program-Specific Degree Requirements.
• The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements you should follow.
• See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Specific to this program:
• 62 semester hours total for the AAS, Wildland Fire Management.

Essential Learning Requirements
(16 semester hours)

See the current catalog for a list of courses that fulfill the requirements below. If a course is an Essential Learning option and a requirement for your major, you must use it to fulfill the major requirement and make a different selection for the Essential Learning requirement.

Other Essential Learning Core Courses

Select one Social and Behavioral Sciences, History, Natural Sciences, Fine Arts or Humanities course
Select one Social and Behavioral Sciences, History, Natural Sciences, Fine Arts or Humanities course

Total Semester Credit Hours 16

1 MATH 108 is a 4 semester credit hour course. 3 credits apply to Essential Learning. A higher course will satisfy the mathematics requirement for this AAS, and MATH 110, MATH 113, or higher may be required for BAS and BS degrees at CMU. See next intended degree for details if continuing to baccalaureate study after completion of AAS. Should a student successfully complete a higher MATH course for 3 semester credit hours, this would fulfill the Mathematics Essential Learning Requirement and reduce the Essential Learning hours to 15. It would also reduce the overall hours for degree to 61, which is sufficient for graduation with this degree only when this hour difference is due to successful completion of a higher level MATH course at 3 semester credit hours.

### Advising and Graduation

#### Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a degree. The suggested course sequencing outlines how students could finish degree requirements. Some courses are critical to complete in specific semesters, while others may be moved around. Meeting with an academic advisor is essential in planning courses and altering the suggested course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended degree(s).

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a degree and determine eligibility for graduation. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head. Discrepancies in requirements should be reported to the Registrar's Office.

#### Graduation Process

Students must complete the following in the first two months of the semester prior to completing their degree requirements:

- Review their DegreeWorks audit and create a plan that outlines how unmet requirements will be met in the final semester.
- Meet with their advisor and modify their plan as needed. The advisor must approve the final plan.
- Submit the “Intent to Graduate” form to the Registrar's Office to officially declare the intended graduation date and commencement ceremony plans.
- Register for all needed courses and complete all requirements for each degree sought.

Submission deadlines and commencement details can be found at [http://www.coloradomesa.edu/registrar/graduation.html](http://www.coloradomesa.edu/registrar/graduation.html). If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.

### Women's and Gender Studies

#### Program Description

The Women's and Gender Studies minor recognizes the centrality of gender to a variety of disciplines, professions and personal experiences and world views. Students will take coursework in disciplines such as Criminal Justice, History, Literature, Psychology, and Sociology with an aim of developing an interdisciplinary understanding of issues related to women and gender in contemporary and historical contexts.

By augmenting students' chosen majors, the Women's and Gender Studies minor prepares students looking for strong interdisciplinary perspectives along their path to careers and/or further studies in social work, counseling, law, education, business, and the arts, among others.

Women's and Gender Studies (Minor)
Minor: Women's and Gender Studies
Program Code: M705

About This Minor . . .
The Women’s and Gender Studies Minor recognizes the centrality of gender to a variety of disciplines, professions, and personal experiences and world views. Students will take coursework in at least three academic disciplines with an aim toward developing an interdisciplinary understanding of issues related to women and gender in both contemporary and historical contexts.

By augmenting students’ chosen majors, the Women’s and Gender Studies minor prepares students looking for strong interdisciplinary perspectives along their path to careers and/or further studies in social work, counseling, law, education, business, and the arts, among others.

Requirements
Each section below contains details about the requirements for this program. Select a header to expand the information/requirements for that particular section of the program’s requirements.

To print or save an overview of this program’s information, including the program description, learning outcomes, requirements, suggested course sequencing (if applicable), and advising and graduation information, scroll to the bottom of the left-hand navigation menu and select ‘Print Options.’ This will give you the options to either ‘Send Page to Printer’ or ‘Download PDF of This Page.’ The ‘Download PDF of This Page’ option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Institutional Minor Requirements
The following institutional requirements apply to all CMU minors. Specific programs may have different requirements that must be met in addition to institutional requirements.

- A minor consists of 15-24 semester hours. There may be prerequisites required for the minor which will increase the total number of credit hours for a student who has not already taken those prerequisites.
- Courses taken to satisfy Essential Learning, major requirements, or electives can be counted toward the minor if applicable.
- At least 33 percent of the credit hours required for the minor must be in courses numbered 300 or above.
- At least 25 percent of the classes must be taken at CMU.
- 2.00 cumulative GPA or higher for the courses used for the minor.
- A minor is not a degree by itself and must be earned at the same time as a baccalaureate degree.

- A student may earn up to five minors with any baccalaureate degree at CMU.
- The Catalog Year determines which program sheet and degree requirements a student must fulfill in order to graduate. Visit with your advisor or academic department to determine which catalog year and program requirements sheet you should follow.
- See “Requirements for Undergraduate Degrees and Certificates” in the catalog for a complete list of graduation requirements.

Program Specific Minor Requirements
(15 semester hours)

- Students must take courses in at least three disciplines within the minor.
- Note that upper-division courses have prerequisites, which can be completed as a part of your Essential Learning courses; prerequisites may be waived solely at the instructor’s discretion. Some upper-division courses are offered in alternate years; students are advised to plan accordingly.

Advising and Graduation
Advising Process and DegreeWorks

Documentation on the pages related to this program is intended for informational purposes to help determine what courses and associated requirements are needed to earn a minor. Meeting with an academic advisor is essential in planning courses and developing a suggested
course sequencing. It is ultimately the student's responsibility to understand and fulfill the requirements for her/his intended minor.

DegreeWorks is an online degree audit tool available in MAVzone. It is the official record used by the Registrar's Office to evaluate progress towards a minor. Students are responsible for reviewing their DegreeWorks audit on a regular basis and should discuss questions or concerns with their advisor or academic department head for the minor. Discrepancies in requirements should be reported to the Registrar's Office.

**Graduation Process**

A minor cannot be awarded by itself. It must be combined with a baccalaureate degree outside the major field of study. Students should follow the graduation process outlined for the baccalaureate degree and list their majors and minors on the "Intent to Graduate" form.

If a student's petition for graduation is denied, it will be her/his responsibility to consult the Registrar's Office regarding next steps.
PROGRAMS A-Z

To view program requirements for a previous year, visit either the archived program sheets page (https://www.coloradomesa.edu/academic-program-sheets/) or the archived catalogs page (https://www.coloradomesa.edu/library/catalogs.html). **Requirements for years 2017-2018 and earlier can be accessed via** the archived program sheets page (https://www.coloradomesa.edu/academic-program-sheets/). **Requirement for years 2018-2019 and later can be accessed via** archived catalogs (https://www.coloradomesa.edu/library/catalogs.html).

Each program page can be printed or saved. To do so:

- Navigate to the desired program page.
- Once on the correct program page, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Certificates

• Activity Assistant, Gerontology (Technical Certificate) (p. 394)
• Addiction Studies (Professional Certificate) (p. 101)
• Administrative Support, Applied Business (Technical Certificate) (p. 117)
• Architectural Drafting, Manufacturing Technology (Technical Certificate) (p. 471)
• Automation and Instrumentation, Mechatronics (Technical Certificate) (p. 514)
• Automotive Service Technician, Transportation Services (Technical Certificate) (p. 667)
• Bakeshop Production (Technical Certificate) (p. 148)
• Basic Welder, Manufacturing Technology (Technical Certificate) (p. 472)
• Behavioral and Cognitive Care, Gerontology (Technical Certificate) (p. 395)
• Business Foundations, Applied Business (Technical Certificate) (p. 119)
• Civil Drafting, Manufacturing Technology (Technical Certificate) (p. 473)
• CNC Machinist, Manufacturing Technology (Technical Certificate) (p. 475)
• Computed Tomography (Professional Certificate) (p. 604)
• Computer Aided Design/Computer Aided Manufacturing (CAD/CAM), Manufacturing Technology (Technical Certificate) (p. 476)
• Construction Electrical (Technical Certificate) (p. 244)
• Control Systems Technician, Process Systems Technology (Technical Certificate) (p. 592)
• Cultural Resource Management (Professional Certificate) (p. 267)
• Cyber Security (Professional Certificate) (p. 269)
• Decision Support Systems (Professional Certificate) (p. 230)
• Diesel Mechanics, Transportation Services (Technical Certificate) (p. 669)
• Digital Filmmaking, Basic Production Design (Technical Certificate) (p. 277)
• Digital Filmmaking, Basic Writing/Directing (Technical Certificate) (p. 278)
• Digital Filmmaking, Intermediate Production Design (Technical Certificate) (p. 279)
• Digital Filmmaking, Intermediate Writing/Directing (Technical Certificate) (p. 280)
• Digital Filmmaking, Production Design Elements (Technical Certificate) (p. 284)
• Digital Filmmaking, Writing/Directing Elements (Technical Certificate) (p. 287)
• Editing and Technical Communication (Professional Certificate) (p. 356)
• Education: Early Childhood Education Director (Technical Certificate) (p. 295)
• Education: Early Childhood Education Entry-Level Teacher (Technical Certificate) (p. 296)
• Education: Early Childhood Education Teacher (Technical Certificate) (p. 298)
• Electric Lineworker (Technical Certificate) (p. 334)
• Electronics Technician, Process Systems Technology (Technical Certificate) (p. 593)
• Emergency Management and Disaster Planning (Professional Certificate) (p. 336)
• EMT - Basic (Technical Certificate) (p. 340)
• EMT - Paramedic (Technical Certificate) (p. 342)
• End of Life Care, Gerontology (Technical Certificate) (p. 397)
• Energy Management/Landman (Professional Certificate) (p. 344)
• Enology, Viticulture and Enology (Technical Certificate) (p. 683)
• Entrepreneurship (Professional Certificate) (p. 207)
• Entry Level Machining, Manufacturing Technology (Technical Certificate) (p. 477)
• Food Preparation (Technical Certificate) (p. 265)
• Geographic Information Science and Technology (Professional Certificate) (p. 375)
• Graphics Technology, Applied Business (Technical Certificate) (p. 120)
• Health Information Technology Systems (Professional Certificate) (p. 404)
• Healthcare Information Networking, Information and Communication Technology (Technical Certificate) (p. 425)
• Help Desk Technician, Information and Communication Technology (Technical Certificate) (p. 427)
• Innovation (PCT) (p. 430)
• Insurance (Professional Certificate) (p. 431)
• Introduction to Wastewater Treatment, Water Quality Management (Technical Certificate) (p. 689)
• Land Surveying and Geomatics (Technical Certificate) (p. 445)
• Light Duty Automotive Technician Foundations I, Transportation Services (Technical Certificate) (p. 671)
• Light Duty Automotive Technician Foundations II, Transportation Services (Technical Certificate) (p. 672)
• Light Duty Automotive Technician, Transportation Services (Technical Certificate) (p. 674)
• Machine and Manufacturing Trades, Manufacturing Technology (Technical Certificate) (p. 478)
• Magnetic Resonance Imaging (Professional Certificate) (p. 605)
• Management Foundations, Applied Business (Technical Certificate) (p. 121)
• Manual Machinist, Manufacturing Technology (Technical Certificate) (p. 480)
• Mathematics in Water Quality, Water Quality Management (Technical Certificate) (p. 690)
• Mechanical Drafting, Manufacturing Technology (Technical Certificate) (p. 481)
• Medical Office Assistant (Technical Certificate) (p. 522)
• Network Technician, Information and Communication Technology (Technical Certificate) (p. 428)
• Nurse Aide (Technical Certificate) (p. 550)
• Office Technology, Applied Business (Technical Certificate) (p. 124)
• Peace Officer Academy - Peace Officer Standards and Training (POST) (Technical Certificate) (p. 576)
• Personal Training (Professional Certificate) (p. 441)
• Pilot Small UAS, Unmanned Aircraft Systems (Technical Certificate) (p. 676)
• Practical Nursing (Technical Certificate) (p. 570)
• Real Estate (Professional Certificate) (p. 612)
• Small Systems, Water Quality Management (Technical Certificate) (p. 691)
• Supervision (Technical Certificate) (p. 209)
• Sustainability Practices (Professional Certificate) (p. 363)
• Viticulture, Viticulture and Enology (Technical Certificate) (p. 684)
• Wastewater Collection and Treatment, Water Quality Management (Technical Certificate) (p. 693)
• Water Distribution and Collection Systems, Water Quality Management (Technical Certificate) (p. 694)
• Water Distribution and Treatment, Water Quality Management (Technical Certificate) (p. 695)
• Web Application Development (Professional Certificate) (p. 240)
• Welding Technology, Manufacturing Technology (Technical Certificate) (p. 482)
• Wine Professional, Viticulture and Enology (Technical Certificate) (p. 685)

Graduate
• Applied Mathematics (Graduate Certificate) (p. 320)
• Athletic Training (MS) (p. 140)
• Business Administration (MBA) (p. 169)
• Doctor of Nursing Practice - Family Nurse Practitioner (DNP-FNP) (p. 555)
• Education: Applied Mathematics (MAEd) (p. 302)
• Education: Educational Leadership (EDLD) (Graduate Certificate) (p. 322)
• Education: Educational Leadership (EDLD) (MAEd) (p. 304)
• Education: Exceptional Learner/Special Education (EDSE) (Graduate Certificate) (p. 324)
• Education: Exceptional Learner/Special Education (EDSE) (MAEd) (p. 306)
• Education: Initial Teacher Licensure - Elementary (Graduate Certificate) (p. 325)
• Education: Initial Teacher Licensure - Elementary (MAEd) (p. 307)
• Education: Initial Teacher Licensure - Secondary (Graduate Certificate) (p. 327)
• Education: Initial Teacher Licensure - Secondary (MAEd) (p. 309)
• Education: Initial Teacher Licensure K-12 Physical Education (Graduate Certificate) (p. 313)
• Education: Initial Teacher Licensure K-12 Physical Education (MAEd) (p. 311)
• Education: Rhetoric and Literary Studies (MAEd) (p. 316)
• Education: Social Science (MAEd) (p. 318)
• Education: Teaching and Leadership (EDTL) (MAEd) (p. 315)
• Family Nurse Practitioner, Nursing (MSN) (p. 558)
• Nurse Educator, Nursing (MSN) (p. 560)
• Physician Assistant (MPAS) (p. 579)
• Rhetoric and Literary Studies (Graduate Certificate) (p. 328)
• Social Science (Graduate Certificate) (p. 330)
• Sport Management (MS) (p. 638)

Programs by Campus

The lists below outline programs offered at each of our three campuses as well as those that are offered in an online-only format. While these lists indicate the campus at which a given program is based, some courses may need to be completed online or at another campus. Additionally, some programs are offered on more than one campus, and students should make sure to enroll in courses on their campus of choice as they may be available at multiple locations. Please reach out to the contact for your Area of Study (p. 92) with questions or for more information.

To view program requirements for a previous year, visit either the archived program sheets page (https://www.coloradomesa.edu/academic-program-sheets/) or the archived catalogs page (https://www.coloradomesa.edu/library/catalogs.html). Requirements for years 2017-2018 and earlier can be accessed via the archived program sheets page (https://www.coloradomesa.edu/academic-program-sheets/). Requirement for years 2018-2019 and later can be accessed via archived catalogs (https://www.coloradomesa.edu/library/catalogs.html).

Each program page can be printed or saved. To do so:

• Navigate to the desired program page.
• Once on the correct program page, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Main CMU Campus

Associates
• Biology, Liberal Arts (AS) (p. 164)
• Business Administration, Liberal Arts (AA) (p. 205)
• Business Computer Information Systems, Liberal Arts (AA) (p. 228)
• Computer Science, Liberal Arts (AS) (p. 236)
• EMT - Paramedic (AAS) (p. 338)
• Geology, Liberal Arts (AS) (p. 389)
• Hospitality Management (AAS) (p. 418)
• Humanities, Liberal Arts (AA) (p. 421)
Bachelors/Minors

- Accounting (Minor) (p. 100)
- Actuarial Science, Mathematics (BS) (p. 489)
- Adapted Physical Education, Kinesiology (BA) (p. 435)
- Applied Anthropology and Geography (BA) (p. 108)
- Applied Mathematics, Mathematics (BS) (p. 492)
- Archaeology (Minor) (p. 125)
- Art History (BA) (p. 133)
- Bachelor of Business Administration in Finance + Master of Business Administration (3+2) (p. 172)
- Bachelor of Science Construction Management + Master of Business Administration (3+2) (p. 246)
- Bachelor of Science in Accounting + Master of Business Administration (3+2) (p. 94)
- Biochemistry, Chemistry (BS) (p. 212)
- Biology (Minor) (p. 166)
- Biology, Biological Sciences (BS) (p. 150)
- Business (Minor) (p. 175)
- Business Administration (BAS) (p. 172)
- Business Analytics (Minor) (p. 231)
- Business Analytics, Business Administration (BBA) (p. 200)
- Business Economics, Business Administration (BBA) (p. 176)
- Cellular, Molecular, and Developmental Biology, Biological Sciences (BS) (p. 153)
- Chemistry (BS) (p. 216)
- Chemistry (Minor) (p. 219)
- Civil Engineering, CMU/CU-Boulder Partnership Program (BSCE) (p. 220)
- Classical Studies (Minor) (p. 221)
- Communication Studies (Minor) (p. 241)
- Computer Information Systems (BAS) (p. 223)
- Computer Information Systems (BS) (p. 225)
- Computer Information Systems (Minor) (p. 232)
- Computer Science (BS) (p. 234)
- Computer Science (Minor) (p. 239)
- Construction Management (BS) (p. 247)
- Counseling Psychology, Psychology (BA) (p. 595)
- Criminal Justice (BA) (p. 252)
- Criminal Justice (Minor) (p. 261)
- Cybersecurity (Minor) (p. 270)
- Dance (BFA) (p. 272)
- Dance (Minor) (p. 275)

- Design/Technology, Theatre Arts (BA) (p. 654)
- Ecology, Evolution, and Organismal Biology, Biological Sciences (BS) (p. 157)
- Economics (Minor) (p. 210)
- Education: Early Childhood Special Education, Early Childhood Education (BA) (p. 289)
- Education: Elementary Education, English, Liberal Arts (BA) (p. 448)
- Education: Elementary Education, Mathematics, Liberal Arts (BA) (p. 452)
- Education: Elementary Education, Social Science, Liberal Arts (BA) (p. 456)
- Education: K-12 Education, Art (BFA) (p. 127)
- Education: K-12 Education, Kinesiology (BA) (p. 437)
- Education: Music Education K-12 (BME) (p. 528)
- Education: Secondary Education, Biological Sciences (BS) (p. 160)
- Education: Secondary Education, English (BA) (p. 348)
- Education: Secondary Education, Geosciences (BS) (p. 386)
- Education: Secondary Education, History (BA) (p. 409)
- Education: Secondary Education, Mathematics (BS) (p. 497)
- Education: Secondary Education, Spanish (BA) (p. 625)
- Electrical/Computer Engineering, CMU/CU-Boulder Partnership Program (BS ECEE) (p. 332)
- Energy Management/Landman, Business Administration (BBA) (p. 179)
- English (Minor) (p. 356)
- Entrepreneurship (Minor) (p. 211)
- Entrepreneurship, Business Administration (BBA) (p. 182)
- Environmental Geology, Geosciences (BS) (p. 379)
- Environmental Science and Technology (BS) (p. 358)
- Environmental Science and Technology (Minor) (p. 363)
- Exercise Science (BS) (p. 365)
- Exercise Science (Minor) (p. 368)
- Film Studies and Digital Production (Minor) (http://catalog.coloradomesa.edu/areas-study/art/film-studies-digital-production/)
- Finance, Business Administration (BBA) (p. 185)
- Fitness and Health Promotion (BS) (p. 369)
- Forensic Anthropology (Minor) (p. 373)
- Forensic Investigation - Criminal Justice (Minor) (p. 262)
- Forensic Investigation - Psychology (Minor) (p. 601)
- Forensic Science (Minor) (p. 374)
- General Accounting, Accounting (BS) (p. 94)
- General Studies, Liberal Arts (BA) (p. 460)
- Geographic Information Science and Technology (Minor) (p. 377)
- Geology (Minor) (p. 391)
- Geology, Geosciences (BS) (p. 382)
- Graphic Design (Minor) (p. 403)
- Hispanic Studies, Spanish (BA) (p. 628)
- History (BA) (p. 406)
- History (Minor) (p. 413)
- Hospitality Management (BAS) (p. 415)
- Hospitality Management (Minor) (p. 420)
- Hospitality Management, Business Administration (BBA) (p. 188)
• Human Resource Management, Business Administration (BBA) (p. 191)
• Interdisciplinary Studies, Liberal Arts (BAS) (p. 461)
• International Business (Minor) (http://catalog.coloradomesa.edu/areas-study/business/international-business-mnr/)
• International Business, Business Administration (BBA) (p. 194)
• International Studies (Minor) (p. 432)
• Jazz Studies (Minor) (p. 547)
• Liberal Arts, Music (BA) (p. 525)
• Literature, English (BA) (p. 345)
• LPN to BSN, Nursing (BSN) (p. 562)
• Management, Business Administration (BBA) (p. 197)
• Marketing, Business Administration (BBA) (p. 203)
• Mass Communication (Minor) (p. 487)
• Mathematics (BS) (p. 494)
• Mathematics (Minor) (p. 506)
• Mechanical Engineering Technology (BS) (p. 511)
• Mechanical Engineering, CMU/CU-Boulder Partnership Program (BSME) (p. 508)
• Media Strategies and Applications, Mass Communication (BA) (p. 484)
• Music - Instrumental (Minor) (p. 548)
• Music - Vocal (Minor) (p. 549)
• Music Performance - Instrumental (BM) (p. 533)
• Music Performance - Keyboard (BM) (p. 537)
• Music Performance - Vocal (BM) (p. 540)
• Music Theatre, Theatre Arts (BFA) (p. 651)
• Music with Elective Studies in Business (BM) (p. 543)
• Nursing (BSN) (p. 565)
• Outdoor Recreation Industry Studies (BS) (p. 573)
• Philosophy (Minor) (p. 578)
• Physics (BS) (p. 581)
• Political Science (BA) (p. 588)
• Political Science (Minor) (p. 591)
• Post Academy, Criminal Justice (BAS) (p. 256)
• Psychology (BA) (p. 598)
• Psychology (Minor) (p. 602)
• Public Accounting, Accounting (BS) (p. 97)
• Public History (Minor) (p. 414)
• Radiologic Sciences (BAS) (p. 606)
• Radiologic Sciences (BSRS) (p. 608)
• Social Work (BSW) (p. 616)
• Social Work (Minor) (p. 619)
• Sociology (BA) (p. 620)
• Sociology (Minor) (p. 623)
• Spanish (Minor) (p. 631)
• Sport Management (BS) (p. 633)
• Sport Management (Minor) (p. 637)
• Statistics (Minor) (p. 507)
• Statistics, Mathematics (BS) (p. 501)
• Studio Art (BA) (p. 136)
• Studio Art (Minor) (p. 139)
• Studio Art, Art (BFA) (p. 130)
• Theatre (Minor) (p. 661)
• Theatre Arts, General (BA) (p. 658)
• Watershed Science (Minor) (p. 393)
• Women's and Gender Studies (Minor) (p. 700)
• Writing, English (BA) (p. 353)

Certificates
• Addiction Studies (Professional Certificate) (p. 101)
• Computed Tomography (Professional Certificate) (p. 604)
• Cultural Resource Management (Professional Certificate) (p. 267)
• Cyber Security (Professional Certificate) (p. 269)
• Decision Support Systems (Professional Certificate) (p. 230)
• Editing and Technical Communication (Professional Certificate) (p. 356)
• Emergency Management and Disaster Planning (Professional Certificate) (p. 336)
• EMT - Basic (Technical Certificate) (p. 340)
• EMT - Paramedic (Technical Certificate) (p. 342)
• Energy Management/Landman (Professional Certificate) (p. 344)
• Entrepreneurship (Professional Certificate) (p. 207)
• Geographic Information Science and Technology (Professional Certificate) (p. 375)
• Health Information Technology Systems (Professional Certificate) (p. 404)
• Innovation (PCT) (p. 430)
• Insurance (Professional Certificate) (p. 431)
• Magnetic Resonance Imaging (Professional Certificate) (p. 605)
• Personal Training (Professional Certificate) (p. 441)
• Practical Nursing (Technical Certificate) (p. 570)
• Real Estate (Professional Certificate) (p. 612)
• Supervision (Technical Certificate) (p. 209)
• Sustainability Practices (Professional Certificate) (p. 363)
• Web Application Development (Professional Certificate) (p. 240)

Graduate
• Applied Mathematics (Graduate Certificate) (p. 320)
• Athletic Training (MS) (p. 140)
• Education: Applied Mathematics (MAEd) (p. 302)
• Education: Educational Leadership (EDLD) (MAEd) (p. 304)
• Education: Exceptional Learner/Special Education (EDSE) (Graduate Certificate) (p. 324)
• Education: Exceptional Learner/Special Education (EDSE) (MAEd) (p. 306)
• Education: Initial Teacher Licensure - Elementary (Graduate Certificate) (p. 325)
• Education: Initial Teacher Licensure - Elementary (MAEd) (p. 307)
• Education: Initial Teacher Licensure - Secondary (Graduate Certificate) (p. 327)
• Education: Initial Teacher Licensure - Secondary (MAEd) (p. 309)
• Education: Initial Teacher Licensure K-12 Physical Education (Graduate Certificate) (p. 313)
• Education: Initial Teacher Licensure K-12 Physical Education (MAEd) (p. 311)
• Education: Rhetoric and Literary Studies (MAEd) (p. 316)
• Education: Social Science (MAEd) (p. 318)
• Education: Teaching and Leadership (EDTL) (MAEd) (p. 315)
• Physician Assistant (MPAS) (p. 579)
• Rhetoric and Literary Studies (Graduate Certificate) (p. 328)
• Social Science (Graduate Certificate) (p. 330)

Montrose Campus

Associates
• Business Administration, Liberal Arts (AA) (p. 205)
• Education: Early Childhood Education, Liberal Arts (AA) (p. 292)
• Humanities, Liberal Arts (AA) (p. 421)
• Nursing (AAS) (p. 553)
• Social Science, Liberal Arts (AA) (p. 613)
• Sports Management, Liberal Arts (AS) (p. 635)

Bachelors
• Education: Elementary Education, English, Liberal Arts (BA) (p. 448)
• Education: Elementary Education, Mathematics, Liberal Arts (BA) (p. 452)
• Education: Elementary Education, Social Science, Liberal Arts (BA) (p. 456)
• LPN to BSN, Nursing (BSN) (p. 562)

Western Colorado Community College/ Bishop Campus

Associates
• Administrative Support, Applied Business (AAS) (p. 112)
• Advanced Automotive Service Technician, Transportation Services (AAS) (p. 663)
• Agriculture Science (AS) (p. 103)
• Baking and Pastry (AAS) (p. 146)
• Construction Electrical (AAS) (p. 242)
• Criminal Justice (AAS) (p. 259)
• Culinary Arts (AAS) (p. 263)
• Diesel Technology, Transportation Services (AAS) (p. 665)
• Digital Filmmaking, Production Design (AAS) (p. 282)
• Digital Filmmaking, Writing/Directing (AAS) (p. 285)
• Early Childhood Education (AAS) (p. 299)
• Education: Early Childhood Education, Liberal Arts (AA) (p. 292)
• Electric Lineworker (AAS) (p. 332)
• Fixed Wing, Aviation Technology (AAS) (p. 144)
• Frontline Supervision, Applied Business (AAS) (p. 114)
• Gerontology Specialist (AAS) (p. 398)
• Information and Communication Technology (AAS) (p. 423)
• Land Surveying and Geomatics (AAS) (p. 443)
• Machining Technology, Manufacturing Technology (AAS) (p. 466)
• Marketing Communications, Applied Business (AAS) (p. 116)
• Mechatronics (AAS) (p. 515)
• Medical Office Assistant (AAS) (p. 521)
• Supervision, Construction Technology (AAS) (p. 250)
• Sustainable Agriculture (AAS) (p. 643)
• Veterinary Technology (AAS) (p. 678)

• Viticulture and Enology (AAS) (p. 680)
• Water Quality Management (AAS) (p. 687)
• Welding Technology, Manufacturing Technology (AAS) (p. 468)
• Wildland Fire Management (AAS) (p. 697)

Certificates
• Activity Assistant, Gerontology (Technical Certificate) (p. 394)
• Administrative Support, Applied Business (Technical Certificate) (p. 117)
• Architectural Drafting, Manufacturing Technology (Technical Certificate) (p. 471)
• Automation and Instrumentation, Mechatronics (Technical Certificate) (p. 514)
• Automotive Service Technician, Transportation Services (Technical Certificate) (p. 667)
• Bakeshop Production (Technical Certificate) (p. 148)
• Basic Welder, Manufacturing Technology (Technical Certificate) (p. 472)
• Behavioral and Cognitive Care, Gerontology (Technical Certificate) (p. 395)
• Business Foundations, Applied Business (Technical Certificate) (p. 119)
• Civil Drafting, Manufacturing Technology (Technical Certificate) (p. 473)
• CNC Machinist, Manufacturing Technology (Technical Certificate) (p. 475)
• Computer Aided Design/Computer Aided Manufacturing (CAD/CAM), Manufacturing Technology (Technical Certificate) (p. 476)
• Construction Electrical (Technical Certificate) (p. 244)
• Control Systems Technician, Process Systems Technology (Technical Certificate) (p. 592)
• Diesel Mechanics, Transportation Services (Technical Certificate) (p. 669)
• Digital Filmmaking, Basic Production Design (Technical Certificate) (p. 277)
• Digital Filmmaking, Basic Writing/Directing (Technical Certificate) (p. 278)
• Digital Filmmaking, Intermediate Production Design (Technical Certificate) (p. 279)
• Digital Filmmaking, Intermediate Writing/Directing (Technical Certificate) (p. 280)
• Digital Filmmaking, Production Design Elements (Technical Certificate) (p. 284)
• Digital Filmmaking, Writing/Directing Elements (Technical Certificate) (p. 287)
• Education: Early Childhood Education Director (Technical Certificate) (p. 295)
• Education: Early Childhood Education Entry-Level Teacher (Technical Certificate) (p. 296)
• Education: Early Childhood Education Teacher (Technical Certificate) (p. 298)
• Electric Lineworker (Technical Certificate) (p. 334)
• Electronics Technician, Process Systems Technology (Technical Certificate) (p. 593)
• End of Life Care, Gerontology (Technical Certificate) (p. 397)
• Enology, Viticulture and Enology (Technical Certificate) (p. 683)
Online

Associates
- Social Science, Liberal Arts (AA) (p. 613)

Bachelors
- Education: Elementary Education, English, Liberal Arts (BA) (p. 448)
- Education: Elementary Education, Mathematics, Liberal Arts (BA) (p. 452)
- Education: Elementary Education, Social Science, Liberal Arts (BA) (p. 456)
- Management, Business Administration (BBA) (p. 197)
- RN to BSN, Nursing (BSN) (p. 568)
- Sport Management (BS) (p. 633)

Certificates
- Computed Tomography (Professional Certificate) (p. 604)
- Magnetic Resonance Imaging (Professional Certificate) (p. 605)

Graduate
- Business Administration (MBA) (p. 169)
- Doctor of Nursing Practice - Family Nurse Practitioner (DNP-FNP) (p. 555)
- Family Nurse Practitioner, Nursing (MSN) (p. 558)
- Nurse Educator, Nursing (MSN) (p. 560)
- Rhetoric and Literary Studies (Graduate Certificate) (p. 328)
- Social Science (Graduate Certificate) (p. 330)
- Sport Management (MS) (p. 638)

Programs by Area of Study

Additional information about each discipline listed below can be found through the Areas of Study page (p. 92).

To view program requirements for a previous year, visit either the archived program sheets page (https://www.coloradomesa.edu/academic-program-sheets/) or the archived catalogs page (https://www.coloradomesa.edu/library/catalogs.html). Requirements for years 2017-2018 and earlier can be accessed via the archived program sheets page (https://www.coloradomesa.edu/academic-program-sheets/), Requirement for years 2018-2019 and later can be accessed via archived catalogs (https://www.coloradomesa.edu/library/catalogs.html).

Each program page can be printed or saved. To do so:
- Navigate to the desired program page.
- Once on the correct program page, scroll to the bottom of the left-hand navigation menu and select 'Print Options.' This will give you the options to either 'Send Page to Printer' or 'Download PDF of This Page.' The 'Download PDF of This Page' option prepares a much more concise presentation of all program information. The PDF is also printable and may be preferable due to its brevity.

Accounting

Bachelors/Minors
- Accounting (Minor) (p. 100)
- Bachelor of Science in Accounting + Master of Business Administration (3+2) (p. 94)
• General Accounting, Accounting (BS) (p. 94)
• Public Accounting, Accounting (BS) (p. 97)

Addiction Studies
Certificates
• Addiction Studies (Professional Certificate) (p. 101)

Agriculture Science
Associates
• Agriculture Science (AS) (p. 103)

Animation, Film, Photography, and Motion Design
Bachelors/Minors
• Animation, Film, Photography and Motion Design (BFA) (p. 105)

Applied Anthropology and Geography
Bachelors/Minors
• Applied Anthropology and Geography (BA) (p. 108)

Applied Business
Associates
• Administrative Support, Applied Business (AAS) (p. 112)
• Frontline Supervision, Applied Business (AAS) (p. 114)
• Marketing Communications, Applied Business (AAS) (p. 116)

Certificates
• Administrative Support, Applied Business (Technical Certificate) (p. 117)
• Business Foundations, Applied Business (Technical Certificate) (p. 119)
• Graphics Technology, Applied Business (Technical Certificate) (p. 120)
• Management Foundations, Applied Business (Technical Certificate) (p. 121)
• Office Technology, Applied Business (Technical Certificate) (p. 124)

Archaeology
Bachelor/Minors
• Archaeology (Minor) (p. 125)

Art
Bachelors/Minors
• Art History (BA) (p. 133)
• Education: K-12 Education, Art (BFA) (p. 127)
• Film Studies and Digital Production (Minor) (http://catalog.coloradomesa.edu/areas-study/art/film-studies-digital-production/)
• Studio Art (BA) (p. 136)

• Studio Art (Minor) (p. 139)
• Studio Art, Art (BFA) (p. 130)

Athletic Training
Graduate
• Athletic Training (MS) (p. 140)

Aviation Technology
Associates
• Fixed Wing, Aviation Technology (AAS) (p. 144)

Baking and Pastry
Associates
• Baking and Pastry (AAS) (p. 146)

Certificates
• Bakeshop Production (Technical Certificate) (p. 148)

Biological Sciences
Associates
• Biology, Liberal Arts (AS) (p. 164)

Bachelors/Minors
• Biology (Minor) (p. 166)
• Biology, Biological Sciences (BS) (p. 150)
• Cellular, Molecular, and Developmental Biology, Biological Sciences (BS) (p. 153)
• Ecology, Evolution, and Organismal Biology, Biological Sciences (BS) (p. 157)
• Education: Secondary Education, Biological Sciences (BS) (p. 160)

Business
Associates
• Business Administration, Liberal Arts (AA) (p. 205)

Bachelors/Minors
• Bachelor of Business Administration in Finance + Master of Business Administration (3+2) (p. 172)
• Business (Minor) (p. 175)
• Business Administration (BAS) (p. 172)
• Business Analytics, Business Administration (BBA) (p. 200)
• Business Economics, Business Administration (BBA) (p. 176)
• Economics (Minor) (p. 210)
• Energy Management/Landman, Business Administration (BBA) (p. 179)
• Entrepreneurship (Minor) (p. 211)
• Entrepreneurship, Business Administration (BBA) (p. 182)
• Finance, Business Administration (BBA) (p. 185)
• Hospitality Management, Business Administration (BBA) (p. 188)
• Human Resource Management, Business Administration (BBA) (p. 191)
• International Business (Minor) (http://catalog.coloradomesa.edu/areas-study/business/international-business-mnr/)
• International Business, Business Administration (BBA) (p. 194)
• Management, Business Administration (BBA) (p. 197)
• Marketing, Business Administration (BBA) (p. 203)
• Business Analytics (Minor) (p. 231)
• Bachelor of Science in Accounting + Master of Business Administration (3+2) (p. 94)
• Bachelor of Science in Construction Management + Master of Business Administration (3+2) (p. 246)

Certificates
• Entrepreneurship (Professional Certificate) (p. 207)
• Supervision (Technical Certificate) (p. 209)

Graduate
• Business Administration (MBA) (p. 169)

Business Analytics
(See Business (p. 167))

Chemistry
Bachelors/Minors
• Biochemistry, Chemistry (BS) (p. 212)
• Chemistry (BS) (p. 216)
• Chemistry (Minor) (p. 219)

Civil Engineering
Bachelors/Minors
• Civil Engineering, CMU/CU-Boulder Partnership Program (BSCE) (p. 220)

Classical Studies
Bachelors/Minors
• Classical Studies (Minor) (p. 221)

Communication Studies
Bachelors/Minors
• Communication Studies (Minor) (p. 241)

Computer Information Systems
Bachelors/Minors
• Business Analytics (Minor) (p. 231)
• Computer Information Systems (BAS) (p. 223)
• Computer Information Systems (BS) (p. 225)
• Computer Information Systems (Minor) (p. 232)

Associates
• Business Computer Information Systems, Liberal Arts (AA) (p. 228)

Certificates
• Decision Support Systems (Professional Certificate) (p. 230)

Computer Science
Associates
• Computer Science, Liberal Arts (AS) (p. 236)

Bachelors/Minors
• Computer Science (BS) (p. 234)
• Computer Science (Minor) (p. 239)

Certificates
• Web Application Development (Professional Certificate) (p. 240)

Construction Electrical
Associates
• Construction Electrical (AAS) (p. 242)

Certificates
• Construction Electrical (Technical Certificate) (p. 244)

Construction Management
Bachelors/Minors
• Bachelor of Science Construction Management + Master of Business Administration (3+2) (p. 246)
• Construction Management (BS) (p. 247)

Construction Technology
Associates
• Supervision, Construction Technology (AAS) (p. 250)

Criminal Justice
Associates
• Criminal Justice (AAS) (p. 259)

Bachelors/Minors
• Criminal Justice (BA) (p. 252)
• Criminal Justice (Minor) (p. 261)
• Forensic Investigation - Criminal Justice (Minor) (p. 262)
• Post Academy, Criminal Justice (BAS) (p. 256)

Culinary Arts
See also Baking and Pastry (p. 146).

Associates
• Culinary Arts (AAS) (p. 263)

Certificates
• Food Preparation (Technical Certificate) (p. 265)

Cultural Resource Management
Certificates
• Cultural Resource Management (Professional Certificate) (p. 267)
Cyber Security
Certificates
• Cyber Security (Professional Certificate) (p. 269)

Minors
• Cybersecurity (Minor) (p. 270)

Dance
Bachelors/Minors
• Dance (BFA) (p. 272)
• Dance (Minor) (p. 275)

Decision Support
(See Computer Information Systems (p. 222))

Digital Filmmaking
Associates
• Digital Filmmaking, Production Design (AAS) (p. 282)
• Digital Filmmaking, Writing/Directing (AAS) (p. 285)

Certificates
• Digital Filmmaking, Basic Production Design (Technical Certificate) (p. 277)
• Digital Filmmaking, Basic Writing/Directing (Technical Certificate) (p. 278)
• Digital Filmmaking, Intermediate Production Design (Technical Certificate) (p. 279)
• Digital Filmmaking, Intermediate Writing/Directing (Technical Certificate) (p. 280)
• Digital Filmmaking, Production Design Elements (Technical Certificate) (p. 284)
• Digital Filmmaking, Writing/Directing Elements (Technical Certificate) (p. 287)

1 Certificates progress in the following order: Elements, Basic, Intermediate.

Economics
(See Business (p. 167))

Education: Early Childhood
Associates
• Early Childhood Education (AAS) (p. 299)
• Education: Early Childhood Education, Liberal Arts (AA) (p. 292)

Bachelors/Minors
• Education: Early Childhood Special Education, Early Childhood Education (BA) (p. 289)

Certificates
• Education: Early Childhood Education Director (Technical Certificate) (p. 295)
• Education: Early Childhood Education Entry-Level Teacher (Technical Certificate) (p. 296)

Education: Early Childhood Education Teacher (Technical Certificate) (p. 298)

Education: Teacher Licensure
Graduate
• Applied Mathematics (Graduate Certificate) (p. 320)
• Education: Applied Mathematics (MAEd) (p. 302)
• Education: Educational Leadership (EDLD) (Graduate Certificate) (p. 322)
• Education: Educational Leadership (EDLD) (MAEd) (p. 304)
• Education: Exceptional Learner/Special Education (EDSE) (Graduate Certificate) (p. 324)
• Education: Exceptional Learner/Special Education (EDSE) (MAEd) (p. 306)
• Education: Initial Teacher Licensure - Elementary (Graduate Certificate) (p. 325)
• Education: Initial Teacher Licensure - Elementary (MAEd) (p. 307)
• Education: Initial Teacher Licensure - Secondary (Graduate Certificate) (p. 327)
• Education: Initial Teacher Licensure - Secondary (MAEd) (p. 309)
• Education: Initial Teacher Licensure K-12 Physical Education (Graduate Certificate) (p. 313)
• Education: Initial Teacher Licensure K-12 Physical Education (MAEd) (p. 311)
• Education: Rhetoric and Literary Studies (MAEd) (p. 316)
• Education: Social Science (MAEd) (p. 318)
• Education: Teaching and Leadership (EDTL) (MAEd) (p. 315)
• Rhetoric and Literary Studies (Graduate Certificate) (p. 328)
• Social Science (Graduate Certificate) (p. 330)

Economics
(See Business (p. 167))

Education: Early Childhood
Associates
• Early Childhood Education (AAS) (p. 299)
• Education: Early Childhood Education, Liberal Arts (AA) (p. 292)

Bachelors/Minors
• Education: Early Childhood Special Education, Early Childhood Education (BA) (p. 289)

Certificates
• Education: Early Childhood Education Director (Technical Certificate) (p. 295)
• Education: Early Childhood Education Entry-Level Teacher (Technical Certificate) (p. 296)

Education: Early Childhood Education Teacher (Technical Certificate) (p. 298)

Education: Teacher Licensure
Graduate
• Applied Mathematics (Graduate Certificate) (p. 320)
• Education: Applied Mathematics (MAEd) (p. 302)
• Education: Educational Leadership (EDLD) (Graduate Certificate) (p. 322)
• Education: Educational Leadership (EDLD) (MAEd) (p. 304)
• Education: Exceptional Learner/Special Education (EDSE) (Graduate Certificate) (p. 324)
• Education: Exceptional Learner/Special Education (EDSE) (MAEd) (p. 306)
• Education: Initial Teacher Licensure - Elementary (Graduate Certificate) (p. 325)
• Education: Initial Teacher Licensure - Elementary (MAEd) (p. 307)
• Education: Initial Teacher Licensure - Secondary (Graduate Certificate) (p. 327)
• Education: Initial Teacher Licensure - Secondary (MAEd) (p. 309)
• Education: Initial Teacher Licensure K-12 Physical Education (Graduate Certificate) (p. 313)
• Education: Initial Teacher Licensure K-12 Physical Education (MAEd) (p. 311)
• Education: Rhetoric and Literary Studies (MAEd) (p. 316)
• Education: Social Science (MAEd) (p. 318)
• Education: Teaching and Leadership (EDTL) (MAEd) (p. 315)
• Rhetoric and Literary Studies (Graduate Certificate) (p. 328)
• Social Science (Graduate Certificate) (p. 330)

Electrical/Computer Engineering
Bachelors/Minors
• Electrical/Computer Engineering, CMU/CU-Boulder Partnership Program (BS ECEE) (p. 332)

Electric Lineworker
Associates
• Electric Lineworker (AAS) (p. 332)

Certificates
• Electric Lineworker (Technical Certificate) (p. 334)

Emergency Management and Disaster Planning
Certificates
• Emergency Management and Disaster Planning (Professional Certificate) (p. 336)
Emergency Medical Services
Associates
• EMT - Paramedic (AAS) (p. 338)

Certificates
• EMT - Basic (Technical Certificate) (p. 340)
• EMT - Paramedic (Technical Certificate) (p. 342)

Energy Management/Landman
Bachelors/Minors
• Energy Management/Landman, Business Administration (BBA) (p. 179)

Certificates
• Energy Management/Landman (Professional Certificate) (p. 344)

Engineering
(See Civil Engineering (p. 220), Electrical/Computer Engineering (p. 331), Mechanical Engineering (p. 508), or Mechanical Engineering Technology (p. 508).)

English
Bachelors/Minors
• Education: Secondary Education, English (BA) (p. 348)
• English (Minor) (p. 356)
• Literature, English (BA) (p. 345)
• Writing, English (BA) (p. 353)

Certificates
• Editing and Technical Communication (Professional Certificate) (p. 356)

Graduate
• Rhetoric and Literary Studies (Graduate Certificate) (p. 328)

Environmental Science and Technology
Bachelors/Minors
• Environmental Science and Technology (BS) (p. 358)
• Environmental Science and Technology (Minor) (p. 363)

Certificates
• Sustainability Practices (Professional Certificate) (p. 363)

Exercise Science
Bachelors/Minors
• Exercise Science (BS) (p. 365)
• Exercise Science (Minor) (p. 368)

Finance
(See Business (p. 167))

Fitness and Health Promotion
Bachelors
• Fitness and Health Promotion (BS) (p. 369)

Forensic Anthropology
Bachelors/Minors
• Forensic Anthropology (Minor) (p. 373)

Forensic Investigation - Criminal Justice
(See Criminal Justice (p. 252))

Forensic Investigation - Psychology
(See Psychology (p. 595))

Forensic Science
Bachelors/Minors
• Forensic Science (Minor) (p. 374)

Geographic Information Science and Technology
Bachelors/Minors
• Geographic Information Science and Technology (Minor) (p. 377)

Certificates
• Geographic Information Science and Technology (Professional Certificate) (p. 375)

Geosciences
Associates
• Geology, Liberal Arts (AS) (p. 389)

Bachelors/Minors
• Education: Secondary Education, Geosciences (BS) (p. 386)
• Environmental Geology, Geosciences (BS) (p. 379)
• Geology (Minor) (p. 391)
• Geology, Geosciences (BS) (p. 382)
• Watershed Science (Minor) (p. 393)

Gerontology
Associates
• Gerontology Specialist (AAS) (p. 398)

Certificates
• Activity Assistant, Gerontology (Technical Certificate) (p. 394)
• Behavioral and Cognitive Care, Gerontology (Technical Certificate) (p. 395)
• End of Life Care, Gerontology (Technical Certificate) (p. 397)
Graphic Design
Bachelors/Minors
• Graphic Design (Minor) (p. 403)
• Visual Design, Graphic Design (BFA) (p. 400)

Health Information Technology Systems
Certificates
• Health Information Technology Systems (Professional Certificate) (p. 404)

History
Bachelors/Minors
• Education: Secondary Education, History (BA) (p. 409)
• History (BA) (p. 406)
• History (Minor) (p. 413)
• Public History (Minor) (p. 414)

Hospitality Management
Associates
• Hospitality Management (AAS) (p. 418)

Bachelors/Minors
• Hospitality Management (BAS) (p. 415)
• Hospitality Management (Minor) (p. 420)
• Hospitality Management, Business Administration (BBA) (p. 188)

Humanities
Associates
• Humanities, Liberal Arts (AA) (p. 421)

Information and Communication Technology
Associates
• Information and Communication Technology (AAS) (p. 423)

Certificates
• Healthcare Information Networking, Information and Communication Technology (Technical Certificate) (p. 425)
• Help Desk Technician, Information and Communication Technology (Technical Certificate) (p. 427)
• Network Technician, Information and Communication Technology (Technical Certificate) (p. 428)

Innovation
Professional Certificate
• Innovation (PCT) (p. 430)

Insurance
Certificates
• Insurance (Professional Certificate) (p. 431)

International Studies
Bachelors/Minors
• International Studies (Minor) (p. 432)

Jazz Studies
(See Music (p. 524))

Kinesiology
Bachelors/Minors
• Adapted Physical Education, Kinesiology (BA) (p. 435)
• Education: K-12 Education, Kinesiology (BA) (p. 437)

Certificates
• Personal Training (Professional Certificate) (p. 441)

Land Surveying and Geomatics
Associates
• Land Surveying and Geomatics (AAS) (p. 443)

Certificates
• Land Surveying and Geomatics (Technical Certificate) (p. 445)

Liberal Arts
Associates
• Biology, Liberal Arts (AS) (p. 164)
• Business Administration, Liberal Arts (AA) (p. 205)
• Business Computer Information Systems, Liberal Arts (AA) (p. 228)
• Computer Science, Liberal Arts (AS) (p. 236)
• Education: Early Childhood Education, Liberal Arts (AA) (p. 292)
• Geology, Liberal Arts (AS) (p. 389)
• Humanities, Liberal Arts (AA) (p. 421)
• Mathematics, Liberal Arts (AS) (p. 503)
• Physics, Liberal Arts (AS) (p. 584)
• Social Science, Liberal Arts (AA) (p. 613)
• Sport Management, Liberal Arts (AS) (p. 635)
• University Studies, Liberal Arts (AA) (p. 463)

Bachelors/Minors
• Education: Elementary Education, English, Liberal Arts (BA) (p. 448)
• Education: Elementary Education, Mathematics, Liberal Arts (BA) (p. 452)
• Education: Elementary Education, Social Science, Liberal Arts (BA) (p. 456)
• General Studies, Liberal Arts (BA) (p. 460)
• Interdisciplinary Studies, Liberal Arts (BAS) (p. 461)

Manufacturing Technology
Associates
• Machining Technology, Manufacturing Technology (AAS) (p. 466)
• Welding Technology, Manufacturing Technology (AAS) (p. 468)
Certificates
• Architectural Drafting, Manufacturing Technology (Technical Certificate) (p. 471)
• Basic Welder, Manufacturing Technology (Technical Certificate) (p. 472)
• Civil Drafting, Manufacturing Technology (Technical Certificate) (p. 473)
• CNC Machinist, Manufacturing Technology (Technical Certificate) (p. 475)
• Computer Aided Design/Computer Aided Manufacturing (CAD/CAM), Manufacturing Technology (Technical Certificate) (p. 476)
• Entry Level Machining, Manufacturing Technology (Technical Certificate) (p. 477)
• Machine and Manufacturing Trades, Manufacturing Technology (Technical Certificate) (p. 478)
• Mechanical Drafting, Manufacturing Technology (Technical Certificate) (p. 481)
• Welding Technology, Manufacturing Technology (Technical Certificate) (p. 482)

Mass Communication
Bachelors/Minors
• Mass Communication (Minor) (p. 487)
• Media Strategies and Applications, Mass Communication (BA) (p. 484)

Mathematics
Associates
• Mathematics, Liberal Arts (AS) (p. 503)

Bachelors/Minors
• Actuarial Science, Mathematics (BS) (p. 489)
• Applied Mathematics, Mathematics (BS) (p. 492)
• Education: Secondary Education, Mathematics (BS) (p. 497)
• Mathematics (BS) (p. 494)
• Mathematics (Minor) (p. 506)
• Statistics (Minor) (p. 507)
• Statistics, Mathematics (BS) (p. 501)

Graduate
• Applied Mathematics (Graduate Certificate) (p. 301)

Mechanical Engineering
Bachelors/Minors
• Mechanical Engineering, CMU/CU-Boulder Partnership Program (BSME) (p. 508)

Mechanical Engineering Technology
Associates
• Mechanical Engineering Technology (AAS) (p. 509)

Bachelors
• Mechanical Engineering Technology (BS) (p. 511)

Mechatronics
Associates
• Mechatronics (AAS) (p. 515)

Certificates
• Automation and Instrumentation, Mechatronics (Technical Certificate) (p. 514)

Medical Laboratory Technician
Associates
• Medical Laboratory Technician (AAS) (p. 518)

Medical Office Assistant
Associates
• Medical Office Assistant (AAS) (p. 521)

Certificates
• Medical Office Assistant (Technical Certificate) (p. 522)

Music
Bachelors/Minors
• Education: Music Education K-12 (BME) (p. 528)
• Jazz Studies (Minor) (p. 547)
• Liberal Arts, Music (BA) (p. 525)
• Music - Instrumental (Minor) (p. 548)
• Music - Vocal (Minor) (p. 549)
• Music Performance - Instrumental (BM) (p. 533)
• Music Performance - Keyboard (BM) (p. 537)
• Music Performance - Vocal (BM) (p. 540)
• Music with Elective Studies in Business (BM) (p. 543)

Nurse Aide
Certificates
• Nurse Aide (Technical Certificate) (p. 550)

Nursing
Associates
• Nursing (AAS) (p. 553)

Bachelors/Minors
• LPN to BSN, Nursing (BSN) (p. 562)
• Nursing (BSN) (p. 565)
• RN to BSN, Nursing (BSN) (p. 568)

Certificates
• Practical Nursing (Technical Certificate) (p. 570)
Graduate
• Doctor of Nursing Practice - Family Nurse Practitioner (DNP-FNP) (p. 555)
• Family Nurse Practitioner, Nursing (MSN) (p. 558)
• Nurse Educator, Nursing (MSN) (p. 560)

Outdoor Recreation Industry Studies
Bachelors/Minors
• Outdoor Recreation Industry Studies (BS) (p. 573)

Paramedic
(See Emergency Medical Services (p. 338))

Peace Officer Standards and Training (POST) Certificates
• Peace Officer Academy - Peace Officer Standards and Training (POST) (Technical Certificate) (p. 576)

Personal Training
(See Kinesiology (p. 434))

Philosophy
Minors
• Philosophy (Minor) (p. 578)

Physician Assistant
Graduate
• Physician Assistant (MPAS) (p. 579)

Physics
Associates
• Physics, Liberal Arts (AS) (p. 584)

Bachelors/Minors
• Physics (BS) (p. 581)
• Physics (Minor) (p. 586)

Political Science
Bachelors/Minors
• Political Science (BA) (p. 588)
• Political Science (Minor) (p. 591)

Process Systems Technology
Certificates
• Control Systems Technician, Process Systems Technology (Technical Certificate) (p. 592)
• Electronics Technician, Process Systems Technology (Technical Certificate) (p. 593)

Psychology
Bachelors/Minors
• Counseling Psychology, Psychology (BA) (p. 595)
• Forensic Investigation - Psychology (Minor) (p. 601)
• Psychology (BA) (p. 598)
• Psychology (Minor) (p. 602)

Public Administration/Public Safety
Bachelors/Minors
The following program is inactive and not accepting applicants:
• Public Administration/Public Safety (BAS)

Public History
(See History (p. 406))

Radiologic Sciences
Bachelors/Minors
• Radiologic Sciences (BAS) (p. 606)
• Radiologic Sciences (BSRS) (p. 608)

Certificates
• Computed Tomography (Professional Certificate) (p. 604)
• Magnetic Resonance Imaging (Professional Certificate) (p. 605)

Real Estate
Certificates
• Real Estate (Professional Certificate) (p. 612)

Social Science
Associates
• Social Science, Liberal Arts (AA) (p. 613)

Graduate
• Social Science (Graduate Certificate) (p. 330)

Social Work
Bachelors/Minors
• Social Work (BSW) (p. 616)
• Social Work (Minor) (p. 619)

Sociology
Bachelors/Minors
• Sociology (BA) (p. 620)
• Sociology (Minor) (p. 623)

Spanish
Bachelors/Minors
• Education: Secondary Education, Spanish (BA) (p. 625)
• Hispanic Studies, Spanish (BA) (p. 628)
• Spanish (Minor) (p. 631)
Inactive Programs
The following programs are inactive and not accepting applicants:

• Applied Professional, Spanish (BA)

Sport Management
Associates
• Sports Management, Liberal Arts (AS) (p. 635)

Bachelors/Minors

COURSE DESCRIPTIONS

The course descriptions in this catalog indicate the content of the course and prerequisites when applicable. Courses are listed in alphabetical order with a four-letter prefix code, followed by number and title. The number in parentheses at the end of the course title indicates the credit granted, in terms of semester hours, for each course. Generally, the number of semester hours is the number of times a class will meet each week. Exceptions are noted in individual course descriptions and, in most cases, prerequisites and/or corequisites stated. The course number after the prefix indicates the college year in which the courses should ordinarily be taken.

Course Number  College Year
100-199  Freshman year
200–299  Sophomore year
300–399  Junior year
400–499  Senior year

Courses numbered 01-099 are developmental in nature, not intended for transfer purposes, and will not usually fulfill degree requirements.

Colorado Mesa University reserves the right to withdraw any program or course which is not justified due to lack of enrollment or availability of instructor. Other courses may be added if there is sufficient demand. Certain courses are only offered during the fall or spring semesters, or may be available only in alternating years. It is the student’s responsibility to meet with their advisor and check the two-year course matrix on the Colorado Mesa University website for course availability. Learn more on the Colorado Mesa University Academics (https://coloradomesa.edu/academics/) page.

- Welding (WELD) (p. 871)
- Wildland Fire Mgmt (FSWM) (p. 871)

Accounting (ACCT)

ACCT 201 Principles of Financial Accounting 3 Credits
A basic course that introduces the concepts of bookkeeping, generally accepted accounting principles, and financial statements.
Terms Typically Offered: Fall, Spring, Summer.

ACCT 202 Principles of Managerial Accounting 3 Credits
A basic course that introduces the use of accounting information in managerial decision making, control, and planning.
Prerequisites: ACCT 201.

ACCT 311 Advanced Managerial Accounting 3 Credits
An advanced course primarily for non-accounting majors that provides in-depth coverage on the applications of accounting information in decision-making, organization, control and planning.
Prerequisites: ACCT 202.
ACCT 321 Intermediate Accounting I
Development of a foundational understanding of Generally Accepted Accounting Principles and their application to external financial statements.
Prerequisites: ACCT 201.

ACCT 322 Intermediate Accounting II
Continuation of ACCT 321.
Prerequisites: ACCT 321.

ACCT 331 Cost Accounting
Costs and their relationship to planning, controlling, inventory valuation, and decision making.
Prerequisites: ACCT 202.

ACCT 350 Ethics for Accounting Professionals
The field of ethics as applied to the accounting and finance professions. Ethical standards of the profession, accounting and finance scandals in recent history, and methods to overcome ethical dilemmas encountered as professionals.
Prerequisites: ACCT 321.

ACCT 360 Professional Preparation I
Professional preparation of resumes and job interviewing skills through mock interviews performed by community professionals using the media studio to videotape and critique the interviewee and review of the resume as it applies to the accounting industry.
Prerequisites: ACCT 201, ACCT 202, and ACCT 321.

ACCT 392 Accounting Information Systems
A study of the concepts and design of the Accounting Information System with emphasis on the internal control structures, requirements, and professional standards.
Prerequisites: ACCT 321.

ACCT 393 Cooperative Education
Cooperative Education provides students an opportunity to put their education to practical use in the workplace under the joint supervision of an employer participating in the Cooperative Education program and a faculty member designated by the institution. (See 'Cooperative Education' in this catalog). Course may be taken multiple times up to maximum of 15 credit hours.

ACCT 395 Independent Study
Course may be taken multiple times up to maximum of 6 credit hours.

ACCT 396 Topics
Course may be taken multiple times up to maximum of 15 credit hours.

ACCT 399 Internship
Course may be taken multiple times up to maximum of 15 credit hours.

ACCT 401 Governmental Accounting
Accounting principles as they apply to governmental and non-profit units.
Prerequisites: ACCT 322.

ACCT 402 Advanced Accounting
Consolidated financial statements, partnership accounting, bankruptcy, and international operations.
Prerequisites: ACCT 322.

ACCT 411 Auditing I
Scope and purposes of the attestation work of a certified public accountant focusing on generally accepted auditing standards (GAAS). Includes theory of auditing, professional ethics, legal liability of the auditor, and internal control.
Prerequisites: ACCT 322 and CISH 241 or STAT 241, and senior standing.

ACCT 412 Auditing II
Continuation of ACCT 411. This course provides coverage of the application of auditing theory to financial statements, including examination of the audit programs, procedures, and work papers used in each phase of an audit.
Prerequisites: ACCT 411.

ACCT 441 Individual Income Tax
Federal Income Tax Law in-depth as it relates to individual taxpayers. Introduction to various tax reference resources.
Prerequisites: ACCT 322, senior standing.

ACCT 442 Advanced Tax and Tax Research
Federal Income Tax Law for corporations, partnerships, estates, trusts, and gifts. In-depth experience with tax research resources, research methods and related projects. Required participation in the Tax Assistance Program to acquire practical experience in communication with taxpayers and preparation of tax returns.
Prerequisites: ACCT 441.

ACCT 460 Professional Preparation II
This course is a concentrated review of accounting subjects in preparation for the CPA exam using self-study techniques and professor-led discussions and review.
Prerequisites: ACCT 201, ACCT 202, ACCT 321, ACCT 322, ACCT 360, ACCT 401, and ACCT 441.

ACCT 470 Fraud and Forensic Accounting
Exploration of investigative techniques, interviewing techniques, and reporting processes at different levels of judicial and prosecutorial environments. Specific skills in detecting and investigating fraud developed and various reporting methodologies explored. Includes presentations and speakers from fraud investigative environments.
Prerequisites: ACCT 201.

ACCT 493 Cooperative Education
See description of ACCT 393.
Course may be taken multiple times up to maximum of 15 credit hours.

ACCT 495 Independent Study
Course may be taken multiple times up to maximum of 6 credit hours.

ACCT 496 Topics
Course may be taken multiple times up to maximum of 15 credit hours.

ACCT 499 Internship
Course may be taken multiple times up to maximum of 15 credit hours.

ACCT 500 Managerial Accounting
Provides students with an understanding of management information systems which are used in the decision-making process. The class is designed with a 'hands-on' approach. It will encourage student participation and interaction through the use of computer projects, case studies, and classroom discussion. Topics covered include basic cost accounting concepts and terminology, product costing and pricing, planning and controlling a business operation through budgets and variance analysis, and managerial decision-making using such techniques as cost-volume-profit analysis and variable costing.
ACCT 505 Advanced Fraud and Forensic Accounting3 Credits
Exploration of investigative techniques, interviewing techniques, and reporting processes at different levels of judicial and prosecutorial environments. Specific skills in detecting and investigating fraud and various reporting methodologies explored. Includes presentations and speakers from fraud investigative environments. Demonstration of mastery of material through graduate level projects, writing, and presentations.
Prerequisites: ACCT 201, ACCT 322, and permission of instructor.

Addictions Counseling (ADAP)

ADAP 301 Foundations of Addictions Counseling1 Credit
Provides a foundation for the theoretical, practical, and applied addictions counseling skills necessary for individuals wanting to work in the addictions field.
Prerequisites: PSYC 233.

ADAP 350 Cultural and Ethical Issues in Addictions Treatment1 Credit
Provides an overview of ethical, cultural, and legal considerations associated with the field of addictions.
Prerequisites: ADAP 301.

ADAP 380 Pharmacology and Addictions1 Credit
Provides an overview of pharmacology and infectious diseases associated with the field of addictions.
Prerequisites: ADAP 301.

ADAP 401 Special Populations and Addictions1 Credit
Outlines the unique treatment needs of special addiction populations and the promising new practices within the addictions field.
Prerequisites: ADAP 301.

ADAP 420 Addiction Counseling Approaches1 Credit
Outlines the different evidence-based treatment approaches in the addictions field.
Prerequisites: ADAP 301 and ADAP 350.

ADAP 450 Addictions Assessment and Group Counseling1 Credit
Exploration of the approaches to addictions clinical assessment, treatment planning, and group counseling skills as outlined by the Colorado Office of Behavioral Health. Meets the educational requirements for becoming a Certified Addictions Counselor Level II.
Prerequisites: ADAP 301.
Terms Typically Offered: Fall, Spring.

ADAP 460 Advanced Addictions Practice1 Credit
Exploration of the clinical addictions practices and advanced motivational interviewing as outlined by the Colorado Office of Behavioral Health (OBH). Meets the educational requirements for becoming a Certified Addictions Counselor Level III.
Terms Typically Offered: Summer.

ADAP 470 Addictions Clinical Supervision1 Credit
Introduction to the core competencies for addictions supervision. Meets the Certified Addictions Counselor Level three (CAC III) requirements as outlined by the Colorado Office of Behavioral Health (OBH) for Clinical Supervision I and II.
Terms Typically Offered: Summer.

ADAP 499 Internship1-3 Credits
Professional practice with individuals, groups, and communities in various sites under professional supervision. Course may be taken multiple times up to maximum of 10 credit hours.

Agricultural Science (AGRS)

AGRS 100 Practical Crop Production3 Credits
Corequisites: AGRS 100L.

AGRS 100L Practical Crop Production Laboratory1 Credit
Laboratory experiences supporting instruction in the production and adaptation of cultivated crops. Emphasis on crops grown in the western region of the United States. Growth, development, production, and use covered.
Corequisites: AGRS 100.

AGRS 101 Fermented Beverages3 Credits
Introduction to the fermented beverage industry, relationships between field produce and finished product, and basic sensory attributes and palate training. Emphasizes the wine industry, but also includes cider and beer.
Fees: Yes.

AGRS 102 Agriculture Economics3 Credits
Focus on economic principles applied to agriculture through price discovery with producer supply and consumer demand, governmental politics, rural development, and resource management.

AGRS 103 Introduction to Entomology2 Credits
Covers insect identification and classification, introduces integrated pest management concepts, and an in-depth study of selected insects of agricultural economic importance.
Corequisites: AGRS 103L.

AGRS 103L Introduction to Entomology Laboratory1 Credit
Lab component required for AGRS 103.
Corequisites: AGRS 103.

AGRS 104 Agriculture Chemistry3 Credits
Introduction to the basic concepts of chemistry. Areas covered are designed to focus on chemical concepts that a student needs for agriculture-related courses.

AGRS 105 Animal Science3 Credits
Fundamentals of livestock production. Principles of breeding, genetics, nutrition, health, and physiology of beef, sheep, swine, dairy, and horses. Focus on the animal science industry in general and each species industry in regard to history, current situation, and future.

AGRS 106 Fermentation Science2 Credits
Examination of fundamentals of microbiology and chemistry as they apply to fermented beverages, with an emphasis on the winemaking industry.
Corequisites: AGRS 106L.

AGRS 106L Fermentation Science Laboratory1 Credit
Application of fundamentals of microbiology and chemistry as they apply to fermented beverages, with an emphasis on the winemaking industry.
Corequisites: AGRS 106.

AGRS 108 Composting3 Credits
Exploration of the microbiology behind composting and procedures for various types of composting. Evaluation of the benefits of using compost in a variety of applications, including soil health and its roles in sustainable and regenerative agriculture. Covers potential hazards and regulations associated with making compost, industrial applications of composting, and employment possibilities in the composting field.
Terms Typically Offered: Fall.
AGRS 110 Integrated Pest Management 3 Credits
Identification and control of economically important weeds, insects, and diseases through systems approach management concepts including cultivation, chemical, and biological control mechanisms.

AGRS 118 Farm Structures and Green Houses 3 Credits
Safety, hand and power tool use, farm building planning and site location, concrete, farm building design and construction, and materials of construction. Greenhouse design, systems, management, and major greenhouse crops and their cultural needs.

AGRS 125 Agricultural Machinery 3 Credits
Emphasizes the safe operation, construction, purpose, maintenance, and adjustment of farm machinery.

AGRS 130 Vineyard Establishment and Management 3 Credits
Exploration of vineyard establishment and winter/spring vineyard management practices. Emphasis on site selection, vineyard layout, vine varieties, soil preparation, planting methods, plant establishment and training/manipulation, and tools and equipment.
Prerequisites: AGRS 100/AGRS 100L.
Corequisites: AGRS 130L.

AGRS 130L Vineyard Establishment and Management Laboratory 1 Credit
Lab component required for AGRS 130.
Corequisites: AGRS 130.

AGRS 131 Water and Irrigation: Principles and Practices 2 Credits
Exploration of water, soil, and plant relationships; water quality assessment; principles of irrigation, methods, and systems.
Prerequisites: AGRS 100/AGRS 100L.
Corequisites: AGRS 131L.

AGRS 131L Water and Irrigation: Principles and Practices Laboratory 1 Credit
Applications in water, soil, and plant relationships; water quality assessment; principles of irrigation, methods, and systems.
Prerequisites: AGRS 100/AGRS 100L.
Corequisites: AGRS 131.

AGRS 165 Winemaking 3 Credits
Exploration of the winemaking process, winemaking principles such as alcoholic and malo-lactic fermentations, juice additions, and winery hygiene and safety. Includes pre-harvest analyses, grape harvest, fruit processing, and filtration.
Prerequisites: AGRS 100/AGRS 100L and AGRS 106/AGRS 106L.
Corequisites: AGRS 165L.

AGRS 165L Winemaking I Laboratory 1 Credit
Applications of the winemaking process, winemaking principles such as alcoholic and malo-lactic fermentations, juice additions, and winery hygiene and safety. Includes pre-harvest analyses, grape harvest, fruit processing, and filtration.
Prerequisites: AGRS 100/AGRS 100L and AGRS 106/AGRS 106L.
Corequisites: AGRS 165.

AGRS 170 Sensory Analysis 3 Credits
Exploration of sensory training specific to wine production with a focus on the details of olfactory and taste transduction mechanisms. The class will focus on specific wine varietals, use of oak in winemaking, secondary fermentation, characteristics, and individual wine component threshold identification.
Prerequisites: AGRS 100/AGRS 100L and AGRS 106/AGRS 106L.
Fees: Yes.

AGRS 189 Viticulture Practicum 3 Credits
Exploration of vineyard maintenance, through a combination of applied learning and work experience facilitated by experienced growers.
Prerequisites: AGRS 130/AGRS 130L.

AGRS 196 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

AGRS 202 Winery Operations and Marketing 3 Credits
Analysis of the annual winery operations cycle (includes equipment, health, safety, and sanitation, regulatory compliance requirements, and management of waste, storage, and distribution systems), and product distribution, sales, and marketing. Includes visitation to existing winemaking businesses.

AGRS 205 Farm and Ranch Management 3 Credits
Provide students with practical experience in applying principles of economics, business, marketing, and finance to the management of a farm/ranch operation.

AGRS 210 Agricultural Marketing 3 Credits
Applied study of the agricultural marketing system. Methods of marketing crops and livestock. Emphasis on hedging with futures and options.

AGRS 224 Integrated Ranch Management 3 Credits
Management pertaining to the economics of a ranching enterprise. Includes principles of system management, resource inventory and management, ranch decision making, nutrition, selection, record keeping, financial management, and marketing.

AGRS 225 Feeds and Feeding 4 Credits
Basic nutrients, common feeds and feed additives, anatomy of digestive systems, and basic feeding practices for beef, sheep, and dairy. Lab devoted to calculating and balancing rations to fulfill nutrient requirement of farm animals for growth, finishing, reproduction, lactation, work, and wool production. Explores least cost ratio balancing.

AGRS 230 Farm Animal Anatomy and Physiology 3 Credits
Introduction to basic concepts of farm animal anatomy and physiology. Emphasizes nutrition, reproduction, immunology, and growth of the basic farm species. Anatomy and physiology is taught in the context of applying basic principles to production practices in the industry including reproductive management, livestock nutrition management, and animal health practices.
Prerequisites: AGRS 105.

AGRS 240 Introduction to Soil Science 3 Credits
Formation, physical properties, chemical properties, and management of soils emphasizing conditions affecting plant growth.
Corequisites: AGRS 240L.

AGRS 240L Introduction to Soil Science Laboratory 1 Credit
Formation, physical properties, chemical properties, and management of soils emphasizing conditions affecting plant growth in the lab environment.
Corequisites: AGRS 240.

ANTH 341 Indigenous Cultures of North America 3 Credits
Examination of the diversity of past and present Native American peoples and cultures through ethnography. Presents the outcomes of culture change due to colonialism and modern efforts towards cultural revitalization.
Prerequisites: ANTH 202.
Terms Typically Offered: Fall.

ANTH 395 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

ANTH 396 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ANTH 495 Independent Study 1-4 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

ANTH 496 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ANTH 499 Internship 1-6 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

Applied Business (ABUS)

ABUS 101 Budget Analysis 3 Credits
Introduction to the basic elements and concepts of accounting, with emphasis on payroll, budgets, statements, and terms and accounting language.

ABUS 102 Business Basics 3 Credits
Introduction to small business management. This course covers the basic principles of marketing, management and finance needed to manage or start a small business. The course assists in the development of a business plan and introduces methods of financing a business launch.

ABUS 106 Marketing Your Image 1 Credit
Exploration of skills students can use to market themselves to prospective employers, clients, professional groups, and audiences of all types. Major emphasis will be placed on skills used to gain employment (resumes, interview, and professional appearance), and to achieve continued personal success (professional behavior and attitude). The course will include at least one simulated interview.

ABUS 114 Digital Layout 3 Credits
Introduction to InDesign, a page layout program which integrates seamlessly with other Adobe design programs. InDesign delivers creative freedom and productivity to DTP. Class discussions and independent projects supplement hands-on classroom work.

ABUS 116 Principles of Supervision 3 Credits
Introduction to the principles and techniques of supervising and motivating personnel. This course is designed for students who are interested in supervising others or for those currently in supervisory roles. Course content focuses on the human interaction in supervision.

ABUS 120 Digital Design Tools 3 Credits
Exploration of the capabilities of digital cameras, raster photo-editing software, vector drawing software, and digital painting software. The course will cover how these image tools can be applied to create digital images, graphics, and videos.

ABUS 128 Workplace Behavior 3 Credits
Exploration of the importance of effective communication in our personal lives, as well as in the world of business. Practical business applications such as employee motivation, handling customer complaints, and effectively resolving conflict in the workplace will be a major part of the curriculum.

ABUS 145 Data Management 3 Credits
Exploration of a complete array of database skills, includes table, query, form, and report creation and modification. Other topics include application integration and automation of database tasks within the database.

ABUS 155 Social Media for Business 3 Credits
Exploration of social media as a business strategy and how to match that strategy with the goals of the business. This course addresses current trends, ethics, regulations, legal challenges, strategy, content development, and change management. Students develop a better understanding of the similarities and differences between social media marketing and traditional marketing.

ABUS 156 Problem Solving in the Business Environment 3 Credits
Exploration of the problem-solving and decision-making processes. Those processes include: identifying decision elements, recognizing characteristics of good and bad decisions, practicing various approaches to decision making, utilizing a 9-step process for organization decision making, exploring the nature of problems, understanding situation factors, identifying problems, considering the human side of problem solving, and utilizing a 6-step problem solving process.

ABUS 160 Introduction to Customer Service 3 Credits
Principles of customer service, including learning the relationship of self to customers, problem solving, and understanding the importance of communicating with customers. Specific emphasis is given to managing customer expectations by building customer rapport and creating positive outcomes.

ABUS 200 Business Rules and Regulations 3 Credits
Introduction to the contemporary issues, theories, and principles used to effectively manage human resources. Topics include recruiting, hiring, compensation and benefits, training and development, employee relations, and legal issues.

ABUS 257 Managing Office Technology 3 Credits
Introduction to basic computer terminology, file management, and PC system components. Provides an overview of office application software including word processing, spreadsheets, and presentation graphics. Includes the use of a web browser to access the internet.

ABUS 258 Managing Office Technology II 3 Credits
Introduction to a wide range of uses of the electronic spreadsheet with special emphasis on using it as a business tool. Includes fundamentals and terms, creating and saving workbooks, entering and using formulas, formatting, printing, multiple-page workbooks, creating charts, entering and using functions, managing lists, and simple macros.

ABUS 289 Applied Business Capstone 3 Credits
Exploration of presentation techniques, regarding both verbal and nonverbal skills. Demonstrate presentation techniques using supporting knowledge gained from current academic program.

ABUS 299 Internship 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.
Archaeology (ARKE)

**ARKE 205 Principles of Archaeology - GTSS33 Credits**
Investigation of modern archaeology as an interdisciplinary anthropological science. Explores the objectives, methodologies, and ethics of reconstructing prehistoric life.

**Essential Learning Categories:** Social and Behavioral Sciences

**Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum**

**ARKE 225 Introduction to North American Archaeology3 Credits**
Survey of archaeology in North America, highlighting the Mississippi Mound builders, eastern cultures, Aztecs, and Maya. Development of archaeological theory and its application to the study of prehistoric sites in North America. Work with archaeological material curated at the Museum of Western Colorado.

**ARKE 320 Colorado Archaeology3 Credits**
Surveys the prehistory of Colorado and adjacent portions of the Great Plains and Intermountain West from the Paleoindian era to the Protohistoric period. The focus will be on regional sequences and the major research questions.

**Prerequisites:** ANTH 202 or ARKE 205.

**ARKE 350 Southwest Archaeology3 Credits**
Prehistory and cultural background of the southwestern United States. Archaeological sites of Colorado, Utah, Arizona, and New Mexico highlighted. Introduction to cultures inhabiting these areas for the last 5,000 years with emphasis on the Anasazi, Fremont, Uto-Aztecan, and Athabaskan groups.

**Prerequisites:** ARKE 205.

**ARKE 352 Paleoindian Archaeology3 Credits**
Multifaceted analysis of the controversies surrounding the colonization of the western hemisphere and the Pleistocene and early Holocene archaeology of North America.

**Prerequisites:** ANTH 202 or ARKE 205.

**ARKE 395 Independent Study1-3 Credits**
Course may be taken multiple times up to maximum of 6 credit hours.

**ARKE 396 Topics:1-3 Credits**
Course may be taken multiple times up to maximum of 15 credit hours.

**ARKE 402 Cultural Resource Management3 Credits**
Introduction to the principles and practice of public archaeology. Topics include cultural resource legislation, project management, the National Register of Historic Places, and the federal and state offices in charge of managing archaeological heritage.

**Prerequisites:** ARKE 205 and ARKE 225.

**ARKE 410 Field Methods in Archaeology3 Credits**
Overview of contemporary methods of archaeological survey, site recordation, and excavation techniques. Artifact collection, interpretation, and analysis presented as is record keeping, artifact conservation, and curation. Topics include maps and mapping, geographic information systems (GIS), Global Positioning System (GPS), field and specimen photography, and recovery and analysis of supplemental materials (macrobotanical, pollen, chronometric, etc.).

**Prerequisites:** ARKE 205 and ARKE 225.

**Corequisites:** ARKE 410L.

**ARKE 410L Field Methods in Archaeology Laboratory2 Credits**
Lab component required for ARKE 410.

**Prerequisites:** ARKE 205 and ARKE 225.

**Corequisites:** ARKE 410.

**ARKE 466 Field Research in Archeology6 Credits**
Exploration of modern archaeological practice. Over six weeks students will take part in archaeological field research including excavation, survey, mapping, and occasionally rock art recording. Field trips to significant western Colorado sites will be taken.

**Prerequisites:** ARKE 205, ARKE 410, and ARKE 410L.

**ARKE 467 Archaeology Lab Methods3 Credits**
Introduction to techniques of laboratory cataloging, artifact analysis, and technical report writing. Photography, special sample preparation and other ancillary topics will also be discussed. Students must have completed ARKE 466 during the previous summer because they will be working with artifacts and other materials recovered during that course.

**Prerequisites:** ARKE 466.

**Corequisites:** ARKE 467L.

**ARKE 467L Archaeology Laboratory1 Credit**
Lab component for ARKE 467.

**Prerequisites:** ARKE 466.

**Corequisites:** ARKE 467.

**ARKE 496 Topics:1-3 Credits**
Course may be taken multiple times up to maximum of 15 credit hours.

**Fees:** Yes.

**ARKE 499 Internship3-12 Credits**
Course may be taken multiple times up to maximum of 15 credit hours.

Art (ARTE)

**ARTE 101 Two-Dimensional Design-GTAH13 Credits**
Introduction to the design process using the elements and principles of art with an emphasis on composition, mark making, color theory, and craftsmanship. Two hours of lecture and two hours of studio per week.

**Essential Learning Categories:** Fine Arts

**Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum**

**ARTE 102 Three-Dimensional Design-GTAH13 Credits**
Introduction to principles of form and function in three-dimensional design with emphasis on materials, process, and craftsmanship.

**Essential Learning Categories:** Fine Arts

**Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum**

**Fees:** Yes.

**ARTE 115 Art Appreciation-GTAH13 Credits**
Some of the hows, whys, and whos of painting, sculpture, and functional design in selected periods and places. This course is intended for non-art majors. Art majors should take ARTE 118 instead.

**Essential Learning Categories:** Fine Arts

**Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum**

**ARTE 118 History of Art, Prehistory to Renaissance-GTAH13 Credits**
Survey of the development of art from Prehistory up to the emergence of the Renaissance. Course focus will be the study of major monuments to gain an understanding of the important factors that defined the artistic production of each civilization and historic period.

**Essential Learning Categories:** Fine Arts

**Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum**
ARTE 119 History of Art, Renaissance to Present-GTAH13 Credits
Survey of the development of art from the Renaissance to the late 20th century. Course focus will be the study of major monuments to gain an understanding of the important factors that defined the artistic production of different historic periods.

Essential Learning Categories: Fine Arts
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

ARTE 196 Topics: 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ARTE 294 Sophomore Seminar: 3 Credits
Development of intended personal direction for creative activity and scholarly work in upper division studio and art history courses. Honing creative critical thinking skills through formal analysis of artwork, art critiques, basic art theory and contemporary art concepts, developing the annual juried student art exhibition, fundamentals of framing, matting, basing, and portfolio development, woodshop safety, exposure to local and regional art scene, and exploring career options in art.
Prerequisites: ARTH 220.

ARTE 296 Topics: 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ARTE 395 Independent Study: 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

ARTE 396 Topics: 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ARTE 494 Studio Art Senior Seminar: 3 Credits
Examination of the current state of the studio arts and various career options through research, discussion, and practical application in the coordination of a required studio art exhibition. Includes development and presentation of a professional portfolio package including artist statement, resume, and web presence. Must enroll in the course during the spring semester in which the senior exhibition is presented. Each student must be working directly with a full time faculty member in their discipline to select work for their senior exhibition.
Prerequisites: ARTE 294 with grade of 'B' or higher.
Terms Typically Offered: Spring.

ARTE 495 Independent Study: 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

ARTE 496 Topics: 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ARTE 498 Studio Assistant and Teaching Aid: 3 Credits
Designed for the senior level artist. Gain experience in teaching by preparing demonstrations and performing in-studio maintenance of studio equipment. Taught in conjunction with 200-level classes.
Prerequisites: Permission of instructor.

ARTE 499 Internship: 3 Credits
Placement in a gallery, art center, or museum setting. The student is expected to complete 135 clock hours.
Prerequisites: Permission of instructor.

ARTE 596 Topics: 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

Art - Animation (ARTA)

ARTA 123 Lights! Camera! Action: 3 Credits
Exploration of fundamental components of animation, digital filmmaking, and motion design. Students explore character design, styles of animation, digital filmmaking, and motion design while focusing on the elements of light, sound, and motion as key time-based design factors. Individual and group projects.
Fees: Yes.

ARTA 222 Principles of Digital Photography: 3 Credits
Exploration of photographic principles through the use of the digital single lens reflex camera.
Fees: Yes.

ARTA 223 Image and Motion: 3 Credits
Introduction to tools, techniques, and practices relating to images and time-based media. Integration of images, typography, digital film, and sound.
Fees: Yes.

ARTA 224 Principles of Film and Motion Design: 3 Credits
Exploration of motion design and time-based visual imagery. Includes history of motion design, application of motion design as visual communication, and the integration of animation, film, images, typography, and sound. Current trends in motion design media and technologies.
Prerequisites: ARTE 101 and ARTE 102.
Fees: Yes.

ARTA 225 Principles of Animation: 3 Credits
Introduction to the creation of animated works. Survey of animation principles, history, tools, and techniques. Additional focus on story development, storyboarding, and stop motion animation.
Fees: Yes.

ARTA 296 Topics: 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ARTA 322 Intermediate Photography: 3 Credits
Discovery of vision and the art of seeing through the lens of a camera.
Prerequisites: ARTE 101 and ARTA 222.
Fees: Yes.

ARTA 323 Character Design and Story Concepts: 3 Credits
Animators, filmmakers, and motion designers tell stories. Stories have scripts, characters, props, and environments. This course is designed to guide students in developing their stories, characters, and the related content. It is also an area of specialization within time-based media.
Prerequisites: ARTA 223, ARTA 224, and ARTA 225.
Fees: Yes.

ARTA 324 Two-Dimensional Animation and Motion Design: 3 Credits
Exploration of the creation of two-dimensional animation and motion design utilizing multilayered time-based compositions, compositing, special effects, puppet animation, and time manipulation. Additional focus on storytelling, storyboards, pre-production, production, and post-production.
Prerequisites: ARTA 223, ARTA 224, and ARTA 225.
Fees: Yes.

ARTA 325 3D Digital Modeling: 3 Credits
Exploration of the basics of 3D animation. Focus on modeling, texturing, lighting, cameras, animation, and rendering. Emphasis will also be on creative expression in these areas.
Prerequisites: ARTA 223, ARTA 224, and ARTA 225.
Fees: Yes.
ARTA 326 Digital Filmmaking3 Credits
Exploration of advanced motion design techniques. Manipulation of related audio, image, animation, typography, and visual effects. Focus on movement, cutting, shot selection, timing, rhythm, matching action, story arc, typography, choreography, light, and color. Historical progression of editing techniques. Production includes output to various web, mobile, or digital devices.
Prerequisites: ARTA 223 and ARTA 225.
Fees: Yes.

ARTA 327 Sound Principles and Production3 Credits
Examination of techniques and applications of sound as a component of time and time-based media. Technical, historical, aesthetic, conceptual, recording, and editing issues will be explored in depth. Designed to introduce the student to some of the major modes of working with sound through projects that explore the relationship of sound to image.
Prerequisites: ARTA 223 and ARTA 225.
Fees: Yes.

ARTA 396 Topics:1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ARTA 421 Advanced Filmmaking3 Credits
Advanced studies in digital filmmaking focusing on each student’s individual creative interests such as experimental filmmaking or the combination of film with additional media.
Prerequisites: ARTA 326.
Terms Typically Offered: Fall, Spring.

ARTA 422 Advanced Photography and Studio Lighting3 Credits
Exploration of light and the development of a studio lighting portfolio.
Prerequisites: ARTE 101, ARTA 222, and ARTA 322.
Fees: Yes.

ARTA 424 Animation, Film, Photography and Motion Design Studio I3 Credits
Exploration of advanced individual projects in animation, film, photography, and motion design. Students are encouraged to focus on advanced individual projects based on perfecting their personal interests and focusing on career goals.
Prerequisites: ARTA 322, ARTA 323, ARTA 324, ARTA 325, ARTA 326, and ARTA 327.
Fees: Yes.

ARTA 425 Animation, Film, Photography and Motion Design Studio II3 Credits
Continuation of ARTA 424. Students submit proposals for individual projects focusing on singular or combined work in animation, film, photography, and motion design. Emphasis is placed on the professional presentation of finished projects.
Prerequisites: ARTA 424.
Fees: Yes.

ARTA 426 Advanced Motion Studio 3 Credits
Development of emerging personal direction. Opportunities for unique, experimental, and personal projects working individually or in collaboration with other students.
Prerequisites: Upper division standing and permission of instructor.
Course may be taken 2 times for credit.
Fees: Yes.

ARTA 427 Portfolio and Demo Reel3 Credits
Preparation of demo reel, resume, and promotional materials for entry into the professional job market.
Prerequisites: ARTA 424.
Fees: Yes.

ARTA 496 Topics:1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ARTA Internship3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

Art - Art Education (ARTD)

ARTD 196 Topics:1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ARTD 296 Topics:1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ARTD 395 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

ARTD 396 Topics:1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ARTD 410 Elementary Art Education Methods3 Credits
Explorations of theory, methods, and materials for teaching art, kindergarten through sixth grade. Required for K-6 elementary teachers and K-12 Art Education majors. Studio applications, aesthetics, creative problem solving, art history, lesson, and unit plans explored.
Prerequisites: EDUC 115, EDUC 215, and EDUC 343, all with a grade of 'B' or higher.
Terms Typically Offered: Fall, Spring.

ARTD 410L Field/Studio Experience in Elementary Art Education Methods1 Credit
Required for K-12 art education majors only. Forty field hours in local public schools.
Prerequisites: EDUC 115, EDUC 215, and EDUC 343, all with a grade of 'B' or higher.
Corequisites: ARTD 410.

ARTD 412 Secondary Art Education Methods4 Credits
Seminar that covers theory, methods, and materials for teaching art in middle and high schools, grades 7-12. Applies options in teaching through embedded field hours. Development of a year-long art curriculum. Required for K-12 Art Education majors.
Prerequisites: EDUC 115, EDUC 215, EDUC 343, all with a grade of 'B' or higher.

ARTD 495 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

ARTD 496 Topics:1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ARTD 596 Topics:0.5-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

Art - Art History (ARTH)

ARTH 196 Topics:1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ARTH 220 History of Modern Art3 Credits
A general survey class of Western and non-Western art from 1750 to the 21st Century. The emphasis of this survey is on the major movements and civilizations, methods of analysis, historical and cultural context.
Prerequisites: ARTE 101, ARTE 102, ARTE 118, and ARTE 119.

ARTH 296 Topics:1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.
ARTH 315 Nineteenth-Century Art
3 Credits
Comprehensive survey of the major art movements of the nineteenth century: Neoclassicism, Romanticism, Academic Art, the invention of photography, Realism, Impressionism, Post-Impressionism, Symbolism, and Art Nouveau.
Prerequisites: ARTE 118 and ARTE 119.

ARTH 316 20th Century Art to 1950
3 Credits
Foundations of modernism from Post-Impressionism through Surrealism. Study of major artists and art works and related manifestations including important theories of modern art, the modernist transformation of design aesthetics, and social and political reactions to modern art.
Prerequisites: ARTE 118 and ARTE 119.

ARTH 317 American Art History
3 Credits
Examination of art and artists of America from colonial times up to the present with attention to the role of the artist and the visual arts in American social experiment.
Prerequisites: ARTE 118 and ARTE 119.

ARTH 318 Development of Contemporary Art
3 Credits
Examination of art produced within the past 40 years with attention to the plurality of successful styles and subjects pursued by artists, the increasingly important role of the art critic and the contemporary art museum in interpreting trends, the impact of the commercial art market on the production and dissemination of contemporary art, and various experimental art forms developed by artists to counteract the influence of critics, institutions and commercial interests.
Prerequisites: ARTE 118 and ARTE 119.

ARTH 319 Art of the American West
3 Credits
Examination of the artist's encounter with the West as both real and imagined experience from the works of expeditionary artists of the early 19th century to recent large scale 'earthworks' that transform the Western landscape. Emphasis on the works of the major 19th century protagonists of the heroic Western image as well as the important role of Santa Fe and other Western locations in the development of a Western art tradition.
Prerequisites: ARTE 118 and ARTE 119.

ARTH 320 Gothic and Northern Renaissance Art and Architecture
3 Credits
Architectural accomplishments of Gothic style and the revival and development of painting and sculpture from the Gothic period through the Renaissance in the North. Includes invention of oil painting, growth of realism and direct observation of the real world in art, and effects of the Protestant Reformation on artistic styles and content.
Prerequisites: ARTE 118 and ARTE 119.

ARTH 321 Italian Renaissance Art History
3 Credits
Explores beginnings of architecture in prehistory and traces development through time and geographic regions through the end of the Italian Renaissance. Emphasizes major works of architecture with discussions of form, function, and relation to other works of architecture.
Prerequisites: ARTE 118 and ARTE 119.

ARTH 322 Expressionism in 20th Century Art
3 Credits
Expressionism in Germany during the early 20th century and its recurrence in the latter half of the 20th century. Visual language of expressionism as a distinctive style and the artistic goals of Expressionism that define a specific role for the artist in society.
Prerequisites: ARTE 118, ARTE 119, and ARTH 316.

ARTH 323 History of Modern Architecture
3 Credits
Modern architecture as a form of applied artistic expression. Examination of major stylistic developments in architecture and applied design from 19th century historically-inspired styles through 20th century innovations that transformed traditions of architectural design and the role of the architect in modern society.
Prerequisites: ARTE 118 and ARTE 119; and ARTH 315 or ARTH 316.

ARTH 324 History of Graphic Design
3 Credits
Exploration of the history of graphic design from the advent of writing through the digital revolution, focusing on development of design techniques and styles.
Prerequisites: ARTE 118 and ARTE 119.

ARTH 325 Italian Renaissance Art History
3 Credits
Explores origins, development, and end of Italian Renaissance. Late thirteenth to mid-sixteenth century. Emphasis on major works of sculpture, painting, architecture, and the artists responsible for their creation.
Prerequisites: ARTE 118 and ARTE 119.

ARTH 326 Medieval Art: Early Christian to the Romanesque
3 Credits
Explorations of Christian art through time and geographic regions. Emphasizes major works including sculpture, manuscripts, and architecture as well as the forces which shaped their creation and determined their meaning and significance.
Prerequisites: ARTE 118 and ARTE 119.

ARTH 327 History of Western Architecture
3 Credits
Explores beginnings of architecture in prehistory and traces development through time and geographic regions through the end of the Italian Renaissance. Emphasizes major works of architecture with discussions of form, function, and relation to other works of architecture.
Prerequisites: ARTE 118 and ARTE 119.

ARTH 331 History of the Moving Image
3 Credits
Exploration of the history of the moving image from the pre-industrial era through the contemporary and digital era, focusing on the history of both technological and artistic development, and the moving image in its varied types.
Prerequisites: ARTE 118 and ARTE 119.

ARTH 395 Independent Study
1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

ARTH 396 Topics
1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

ARTH 400 Criticism and Research: Theory and Method
3 Credits
Introduction to the development of art history as a discipline and how art historians evaluate and interpret complex issues of style, form, content, and theory in visual art. Structured discussion of historical art works studied in other upper division art history courses. Readings of seminal art historical theories and interpretive methodologies. Hands-on practice with library research tools. Completion of a fully researched term paper.
Prerequisites: ARTE 118 and ARTE 119, ARTH 315 or ARTH 316 or permission of instructor.

ARTH 495 Independent Study
1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

ARTH 496 Topics
1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ARTH 499 Internship
1-12 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

Art - Graphic Design (ARTG)

ARTG 122 Design It!
3 Credits
Exploration of design as the foundation of all the visual arts. Approaching design through a broad hands-on tactile experience.
Fees: Yes.
ARTG 196 Topics: 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ARTG 201 Adobe Illustrator2 Credits
Introduction. Techniques for using vector-based drawing program explored through exercises to learn the application and features as used by graphic designers for print and electronic media.

ARTG 202 Adobe Photoshop2 Credits
Introduction. Techniques for using raster-based software for print, video, web, and other multi-media applications.

ARTG 203 Adobe InDesign2 Credits
Techniques for using the program explored. Exercises to learn the application and features as used by graphic designers and professional publishers.

ARTG 215 Graphic Design I3 Credits
Basic use and operation of graphics computer, exclusively Macintosh, with focus on terminology, hardware, peripheral devices, system management, and software (systems and applications). Including establishment of operation files, job information files, information capture and placement, and maintenance.
Fees: Yes.

ARTG 221 Graphic Design III3 Credits
Principles of design and layout techniques, including thumbnail, rough, and comprehensive layouts: work planning and preparation of artwork with focus on computer and hand generated images.
Prerequisites: ARTE 101, ARTE 102, and ARTG 215.
Corequisites: ARTG 222.
Fees: Yes.

ARTG 222 Illustration III3 Credits
Approaches to traditional and contemporary illustration. Materials will be introduced and developed for practical use.
Prerequisites: ARTG 215.
Corequisites: ARTG 221.
Fees: Yes.

ARTG 223 Commercial Typography and Sign Painting3 Credits
Cultivation of skills necessary to create professional level industrial advertisement including pounce patterns, wood working, hand lettering techniques, and gilding.
Prerequisites: ARTG 222.
Terms Typically Offered: Fall, Spring.
Fees: Yes.

ARTG 296 Topics: 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ARTG 301 Digital Illustration3 Credits
Advanced creation of digital imagery focusing on visual content and composition in print and multi-media applications.
Prerequisites: ARTG 215, ARTG 221, and ARTG 222.
Fees: Yes.

ARTG 320 Letterforms and Typography3 Credits
Study of letterforms and typography including terminology, type style identification and design, use of type within a design, composition, copyfitting, and basic principles of pattern and spatial design.
Prerequisites: ARTG 215 and ARTG 221.
Fees: Yes.

ARTG 321 Advanced Typography3 Credits
Explore traditional and contemporary forms of typography and compositions through letterpress and hand rendering approaches.
Prerequisites: ARTG 320.
Fees: Yes.

ARTG 333 Illustration III3 Credits
Illustration techniques in context of contemporary materials and methods. Advanced use of materials.
Prerequisites: ARTG 221 and ARTG 222.
Fees: Yes.

ARTG 337 Illustration III3 Credits
Storytelling through traditional and contemporary illustration medium. Emphasis placed on developing concepts, execution, and professional practices.
Prerequisites: ARTG 333.
Fees: Yes.

ARTG 338 Advertising Design III3 Credits
Exploration of the various graphic communication applications common to the promotion of products and services, including brochures, posters, mailers, package design, and other items designed for print. Emphasis will be placed on design processes, prepress print production, and the history of advertising.
Prerequisites: ARTG 301 and ARTG 320.
Fees: Yes.

ARTG 339 Advertising Design3 Credits
Advanced exploration of the various graphic communication applications common to the promotion of products and services, including brochures, posters, mailers, package design, and other items designed for print. Emphasis will be placed on design processes, prepress print production, and the history of advertising.
Prerequisites: ARTG 301, ARTG 320, and ARTG 338.
Fees: Yes.

ARTG 360 Sketchbook3 Credits
The sketchbook as a primary medium for developing creativity and the artist’s thought processes. This course will include exploratory exercises and field assignments for developing skills in keeping an individual sketchbook as a place for recording ideas and the artist’s visual experience.
Prerequisites: ARTS 151 and ARTG 222.
Course may be taken 2 times for credit.
Fees: Yes.

ARTG 373 Screen Printing for Graphic Design3 Credits
Introduce concepts and techniques of screen printing within Graphic Design and Illustration. Become familiar with industry tools, equipment and processes.
Prerequisites: ARTG 221.
Fees: Yes.

ARTG 395 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

ARTG 396 Topics: 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ARTG 401 Digital Painting3 Credits
Introduction to the language of digital painting. Fundamental skills of proportion, perspective, and color mixing. Translating light and color into a digital space. Perceptual problem solving in the practical application of digital painting.
Prerequisites: ARTG 301.
Fees: Yes.
ARTG 405 Website Design3 Credits
Creation and development of well-designed and functional Web pages/sites to accommodate clients' promotional and business needs. Topics covered include software, creation of graphics, publishing, design theory for the Web, typography, and promotion.
Prerequisites: ARTG 301 and ARTG 320.
Fees: Yes.

ARTG 406 UX Design3 Credits
Investigation, analysis and application of User Experience, and emerging website design trends.
Prerequisites: ARTG 405.
Fees: Yes.

ARTG 421 Contemporary Letterpress3 Credits
Approaches to traditional and contemporary letterpress. Materials will be introduced and technique developed for practical use.
Prerequisites: ARTG 221.
Course may be taken 2 times for credit.
Fees: Yes.

ARTG 427 Lab Assistant1-3 Credits
Practice with technologies used within the Graphic Design labs. Maintain and use equipment.
Prerequisites: ARTG 221.
Terms Typically Offered: Fall.
Course may be taken 3 times for credit.

ARTG 437 Illustration IV 3 Credits
Advanced illustration development focusing on concept, content, materials, and techniques. Emphasis on individual artistic style and personal visual communication perception.
Prerequisites: ARTG 337 or permission of instructor.
Fees: Yes.

ARTG 450 Identity Design3 Credits
Exploration of visual communication designed for public and private business and organization identity. Emphasis will be placed on the process of design and approaches to image generation for identity systems and standards.
Prerequisites: ARTG 301 and ARTG 320.

ARTG 493 Portfolio Development3 Credits
Development of portfolio materials to be used for gaining employment. Emphasis placed on current industry professional practices including presentation formats, resume development, contracts, and salary negotiations.
Prerequisites: ARTG 405 and ARTG 406.
Course may be taken multiple times up to maximum of 15 credit hours.
Fees: Yes.

ARTG 495 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

ARTG 496 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ARTG 499 Internship1-3 Credits
Placement in an agency or corporate department to provide an enhanced transition from the classroom to the work setting through first-hand experience. The student is expected to complete 135 clock hours.
Prerequisites: ARTG 450.

*Art - Sculpture/Studio (ARTT)*

ARTT 270 Sculpture I3 Credits
Introduction of technique and processes practiced in advanced sculpture courses. Basic welding, mold making, bronze casting and fabrication/construction using multimedia explored. Development of aesthetic concepts stressed and their successful applications. Projects conclude with group critiques.
Fees: Yes.

ARTT 371 Sculpture/Construction I3 Credits
Exploration of MIG welding, beginning metal fabrication techniques, woodworking and multimedia. Historical contexts. Aesthetic concepts stressed and projects conclude with group critiques.
Prerequisites: ARTT 270.
Fees: Yes.

ARTT 372 Sculpture/Construction II 3 Credits
Introduction of advanced fabrication techniques and tools in steel, wood and multimedia. Advanced finishes and finishing techniques also introduced. Continued focus on historical contexts.
Prerequisites: ARTT 371.
Fees: Yes.

ARTT 380 Bronze/Casting I3 Credits
Bronze casting using the lost wax process and ceramic shell. Includes history, terminology, equipment, and procedure. Includes working in wax, sprueing the art, ceramic shell investment, technical-pouring procedures, devesting the shelled patina. Studio emphasis on technical and creative process ending in finished bronze sculpture.
Prerequisites: ARTT 270.
Fees: Yes.

ARTT 381 Bronze/Casting II 3 Credits
Creating in wax using various techniques. Explorations in wax using representational and abstract forms. Advanced finishes and patinas introduced.
Prerequisites: ARTT 380.
Fees: Yes.

ARTT 471 Sculpture/Construction III 3 Credits
Sculpting in steel, wood and multimedia. Introduction to forge work. Direction chosen based on interests in materials and processes taught in previous sculpture/construction courses. Independent work via professor contract.
Prerequisites: ARTT 371.
Fees: Yes.

ARTT 472 Sculpture/Construction IV 3 Credits
Thematic concepts for development of a BFA exhibit explored. Independent work via professor contract.
Prerequisites: ARTT 471.
Fees: Yes.

ARTT 475 Sculpture Workshop I3 Credits
Continued focus on a student's individual BFA direction. Independent work via student/professor contract.
Prerequisites: ARTT 472.
Fees: Yes.

ARTT 476 Sculpture Workshop II 3 Credits
Emphasis placed on finishing sculpture representative of BFA direction. Sculpture focused and finished for professional presentation, independent work via student/professor contact.
Prerequisites: ARTT 475.
Fees: Yes.
**ARTT 480 Bronze/Casting III** 3 Credits
Creating in wax using various techniques including advanced mold making. Focus on history and dynamics of furnace building and foundry equipment manufacture.
Prerequisites: ARTT 381.
Fees: Yes.

**ARTT 481 Bronze/Casting IV** 3 Credits
Thematic concepts for development of a BFA exhibit explored. Independent work via professor contract.
Prerequisites: ARTT 480.
Fees: Yes.

**ARTT 483 Bronze Workshop I** 3 Credits
Continued focus on a student's individual BFA direction. Independent work via student/professor contract.
Prerequisites: ARTT 481.
Fees: Yes.

**ARTT 484 Bronze Workshop II** 3 Credits
Emphasis placed on finishing sculpture representative of the student’s BFA direction. Sculpture will be focused and finished for professional presentation. Independent work via student/professor contract.
Prerequisites: ARTT 483.
Course may be taken 2 times for credit.
Fees: Yes.

**ARTT 496 Topics** 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

---

**Art - Studio Art (ARTS)**

**ARTS 151 Foundation Drawing** 3 Credits
Introduction to drawing with an emphasis on perceptual drawing. Perspective, light, shadow, form, volume, and mark-making strategies are explored, as well as an introduction to composition using a variety of media. Preparation for more advanced art classes.

**ARTS 152 Foundation Drawing II: Figure Drawing** 3 Credits
Continuation of ARTS 151. Further development of drawing techniques and an introduction to drawing the human figure. Issues of form, structure, volume, movement, composition, and expressive possibilities are explored and practiced.
Prerequisites: ARTS 151.

**ARTS 196 Topics** 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

**ARTS 221 Metalsmithing** 3 Credits
Prerequisites: ARTE 102 or permission of instructor.
Fees: Yes.

**ARTS 225 Introduction to Photography** 3 Credits
Exploration of digital photography through technical and creative skill development using the digital single lens reflex camera.
Terms Typically Offered: Fall, Spring.

**ARTS 231 Fibers Workshop I** 3 Credits
Introduction to fiber and fabric art forms, including creation of original weaving, felt and fabric collage, batik and other applications.
Prerequisites: ARTE 101 and ARTS 151.

**ARTS 241 Beginning Hand Building** 3 Credits
Introduction to the ceramic process using traditional materials and methods for hand formed ceramics objects. Involvement in clay from raw material through the glazing and firing process. Studio emphasis on technique and creative process.
Fees: Yes.

**ARTS 242 Beginning Wheel Throwing** 3 Credits
Beginning throwing processes. Creating vessels while learning the technique of shaping clay by throwing. Form and function explored. Initial firing process for bisque fire taught. Development of under-glaze and glaze techniques.
Fees: Yes.

**ARTS 251 Life Drawing** 3 Credits
Introduction to drawing the human figure. Issues of form, structure, volume, movement, composition, and expressive possibilities are explored and practiced.
Prerequisites: ARTE 101 and ARTS 152.
Fees: Yes.

**ARTS 252 Mixed Media Drawing** 3 Credits
Artistic exploration of experimental media, dry and wet, and alternative media alone or combined on varied drawing surfaces to give dimension, texture and vitality to a drawing. Figure and still life are main subject matter for observational approach.
Prerequisites: ARTS 251.
Fees: Yes.

**ARTS 274 Printmaking: Intaglio and Relief** 3 Credits
Introduces concepts and techniques of intaglio and relief printmaking processes. Includes non-acid and acid intaglio techniques such as drypoint, hard ground/line etch, soft ground, aquatint, multiple plate printing, la poupée wiping, and chine-collé. Relief processes include linoleum cut and woodcut.
Fees: Yes.

**ARTS 275 Printmaking: Screen Printing and Lithography** 3 Credits
Introduction to the techniques, concepts, and history of screen print and lithography printmaking processes. Screen printing techniques include experimental monoprint, multiple color registration, and photo emulsion. Lithography techniques include black and white and multiple color printing from stone and photo plates. Emphasis will be placed on technical development, concept and idea generation, craftsmanship, and studio participation.
Terms Typically Offered: Spring.

**ARTS 291 Painting I: Intro to Painting** 3 Credits
Introduction to the language of painting through studio practice. Fundamental skills of color mixing and practical applications of painting and how they relate to perceptual problem solving. Focus on light and color and how it translates into pictorial space through observational painting.
Prerequisites: ARTS 151.
Fees: Yes.

**ARTS 296 Topics** 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

**ARTS 321 Metalsmithing** 3 Credits
Prerequisites: ARTS 151 and ARTS 221.
Fees: Yes.

**ARTS 325 Intermediate Photography** 3 Credits
Development and discovery of individual artistic vision through the use of film photography.
Prerequisites: ARTE 101 and ARTS 225.
Terms Typically Offered: Fall, Spring.

**ARTS 331 Fibers Workshop II** 3 Credits
Intermediate examination of several fiber or fabric applications.
Prerequisites: ARTS 231.
ARTS 335 Digital Alternative Processes 3 Credits
Exploration of fine art print making using digital photographic processes that contains a hands on element through continuation of digital photography studies.
Prerequisites: ARTS 325.
Terms Typically Offered: Fall, Spring.

ARTS 336 Photography Workshop I 3 Credits
Advanced development of personal vision and style through the lens of a camera.
Prerequisites: ARTS 335.
Terms Typically Offered: Fall, Spring.

ARTS 342 Throwing Workshop I: Intermediate Throwing 3 Credits
A continuation of the throwing process involving more complex vessels and techniques using lids, spouts, and pedestals. Assignment to firing teams for studio production for high fire clay.
Prerequisites: ARTS 242.
Fees: Yes.

ARTS 344 Throwing Workshop II 3 Credits
Alteration of thrown vessels using several techniques, including wet shaping, leatherhard shaping, marks, incising, and stamping. Creating larger vessels using a two-piece technique. Kiln teams assigned for high firings. Develop and study glazes and empirical formulas. Introduction to basic molecular composition of raw materials.
Prerequisites: ARTS 342.
Fees: Yes.

ARTS 351 Drawing Workshop I 3 Credits
Traditional and contemporary drawing processes and advanced compositional strategies. Perceptual, abstract, and conceptual ideas explored within the context of strengthening the artist’s formal skills and idea development. Individual and group critiques ongoing.
Prerequisites: ARTS 152.
Fees: Yes.

ARTS 352 Drawing Workshop II 3 Credits
Formal mastery of the visual language and development of a personal artistic direction. Critical thinking skills about individual artistic influences explored. Individual and group critiques ongoing.
Prerequisites: ARTS 351.
Fees: Yes.

ARTS 353 Visual/Conceptual Thinking 3 Credits
Learning meaningful questioning. Engaging in creative problem solving. Assumptions about art questioned. Media selection is not limited; problems posed may be solved with 2D or 3D media.
Prerequisites: ARTS 251.

ARTS 354 Intermediate Life Drawing 3 Credits
Continuation of the study of the human figure through an exploration and practice of composition, form, structure, volume, movement, anatomy and drawing processes.
Prerequisites: ARTS 251.
Course may be taken 2 times for credit.
Fees: Yes.

ARTS 362A Artists' Books 1 Credit
Introduction to the art of making visual books, including book structure, binding techniques, and strategies for developing sequential imagery.
Prerequisites: ARTE 101 and ARTS 152, or permission of instructor.

ARTS 362B Artists' Books 1 Credit
Continuation of the art of making visual books, including book structure, binding techniques, and strategies for developing sequential imagery.
Prerequisites: ARTE 101 and ARTS 152, or permission of instructor.

ARTS 362C Artists' Books 1 Credit
Further exploration of the art of making visual books, including book structure, binding techniques, and strategies for developing sequential imagery.
Prerequisites: ARTE 101 and ARTS 152, or permission of instructor.

ARTS 364 Figure Painting I 3 Credits
Exploration of proportion, perspective and volume through painting from a model. Investigation of various techniques and conceptual development encouraged through use of oil or acrylic. Individual and group critiques.
Prerequisites: ARTS 251 and ARTS 291.
Fees: Yes.

ARTS 365 Painting II: Methods and Materials 3 Credits
Exploration and experimentation with various techniques, materials, and alternative processes inherent to contemporary painting. Through this exploration of painting, students will begin to develop a direction of investigation and a conceptual framework for their own personal painting practice.
Prerequisites: ARTS 151.
Fees: Yes.

ARTS 366 Painting 2: Observational Painting 3 Credits
Further exploration of observational painting through various techniques, materials, and processes inherent to contemporary observational painting. This course builds on the foundation of observational painting in ARTS 291 allowing students to further develop their observational painting skills.
Prerequisites: ARTS 291.

ARTS 370 Printmaking: Intermediate Lithography 3 Credits
Introduces advanced concepts and techniques of fine art lithography, including traditional aluminum plate lithography, multiple color, hybrid or combination prints, and chine-colle techniques. Development of creative skills, conceptual direction, craftsmanship, and studio involvement.
Prerequisites: ARTS 275.
Fees: Yes.

ARTS 371 Printmaking Workshop I 3 Credits
Develop skills with intaglio, relief, and lithograph. Exploration of advanced techniques. May include multiple color printing processes, engraving, and collagraph. Work created will be matted.
Prerequisites: ARTS 274 or ARTS 275.
Fees: Yes.

ARTS 372 Printmaking Workshop II 3 Credits
Exploration of printmaking media. Investigation of a printmaker of choice to develop critical thinking about personal artistic skills. Artwork created will be matted, shown in a public space, and documented digitally.
Prerequisites: ARTS 371.
Fees: Yes.

ARTS 375 Printmaking: Advanced Screen Printing 3 Credits
Continued development and refinement of the techniques and concepts of fine art screen printing, including in-depth exploration of color, size, scale, and complexity of multiple layer imagery. Emphasis will be put on the development of creative thinking, developing personal artistic concepts, and portfolio development.
Prerequisites: ARTS 275.
Terms Typically Offered: Fall.
ARTS 376 Printmaking: Advanced Intaglio and Relief 3 Credits
Advanced intaglio and relief techniques, history, and concepts will be explored. These will include monoprinting, mezzotint, and various digital technologies and techniques such as CNC (computer navigated control) routing, and kento registration techniques. Research projects into other printmaking techniques will be done on individual basis. Emphasis will be on demonstration of technical development, conceptual growth, craftsmanship, and studio participation.
Prerequisites: ARTS 274.
Terms Typically Offered: Fall.

ARTS 384 Ceramic Sculpture Workshop I 3 Credits
Creating in clay using various techniques and processes. Explorations with clay includes elements of the figure, representational and abstract, as well as 3D forms as pure sculpture. Artwork based and finished for professional exhibition. Independent work via student/professor contract. Subject matter, form, and content are determined by the student under the guidance of the instructor. Ability to speak and write articulately about created artwork developed.
Prerequisites: ARTS 291 or ARTS 365.
Fees: Yes.

ARTS 385 Summer Institute in Marble, Colorado 3 Credits
Summer symposium at Marble/Carving Symposium. Carve Colorado Yule Marble from the same quarries used in the Lincoln Memorial, the Tomb of the Unknown Soldier and other projects. A fee for the summer institute is in addition to Colorado Mesa University tuition and fees.
Prerequisites: ARTT 270.

ARTS 387 Bronze Commissions: Workshop I 3 Credits
Special bronze commissions and projects as a liaison project with schools or the community. Direct experience at creating art from inception to mounted sculpture. Presentations to respective clients, budgets, armatures, sculpting, molds, wax, investing, and finishing of the bronze. Basing of the sculptures complete the process.
Prerequisites: ARTT 270.

ARTS 388 Ceramic Sculpture Workshop II 3 Credits
Thematic concepts for the development of a BFA exhibition in clay explored. Student / Mentor consultation of utmost importance as the theme is developed. Independent work via student / professor contract. Art work based for professional presentation. Development of glazes including empirical formulas. Introduction to basic chemistry of the molecular composition of raw materials.
Prerequisites: ARTS 384.
Fees: Yes.

ARTS 391 Painting Workshop I 3 Credits
Skills developed in painting media of choice. Exploring advanced techniques to develop individual artistic expression. Discussions of personal influences and historical context ongoing.
Prerequisites: ARTS 291 or ARTS 365.
Fees: Yes.

ARTS 392 Painting Workshop II 3 Credits
Further investigation of techniques and material in individual painting medium. Personal artistic influences identified tools to aid individual artistic direction. Individual and group critiques are ongoing. End of semester artwork presented in public space and documented digitally.
Prerequisites: ARTS 391.
Fees: Yes.

ARTS 395 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

ARTS 396 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ARTS 411 Metalsmithing 3 Credits
Prerequisites: ARTS 321.
Fees: Yes.

ARTS 425 Advanced Studio Photography 3 Credits
Further exploration of light and individual artistic vision through the use of digital photography.
Prerequisites: ARTS 325.
Terms Typically Offered: Fall, Spring.

ARTS 431 Fibers Workshop III 3 Credits
Creating of advanced fiber and fabric artwork; examination of historical precedents.
Prerequisites: ARTS 331.
Fees: Yes.

ARTS 435 Wet Alternative Processes 3 Credits
Exploration of fine art print making using wet alternative photographic processes that contains a hands on element.
Prerequisites: ARTS 335.
Terms Typically Offered: Fall, Spring.

ARTS 442 Kiln Construction 3 Credits
Ceramics majors. Theory and practice of formulation of glazes utilizing minerals and oxides. Development of glazes includes empirical formula to a batch, batch to an empirical formula, and limit formulas. Basic chemistry of the molecular composition of raw materials. Background in ceramics required.
Prerequisites: Permission of instructor.
Fees: Yes.

ARTS 443 Throwing Workshop III 3 Credits
Advanced problems in clay construction and design with an emphasis on the development of personal style. Develop skills to create thrown multiples in clay. Discussion of marketing and establishing a studio to create clay art.
Prerequisites: ARTS 344.
Fees: Yes.

ARTS 444 Throwing Workshop IV 3 Credits
Exploration of thematic concepts for the development of a BFA exhibit in clay continued. Development of personal style on the potter's wheel including advanced alteration techniques. Independent work via student/professor contract to create body of artwork with professional presentation.
Prerequisites: ARTS 443.
Fees: Yes.

ARTS 451 Drawing Workshop III 3 Credits
Senior level drawing. Develop drawings used in senior exhibitions and professional purposes. Exploration and analysis of what historical and contemporary context fits individual's style.
Prerequisites: ARTS 352.
Fees: Yes.

ARTS 452 Drawing Workshop IV 3 Credits
Subject matter, form, and content are determined by the student under the guidance of the instructor. Ability to speak and write articulately about created artwork developed.
Prerequisites: ARTS 451.
Fees: Yes.
ARTS 453 Visual and Conceptual Thinking 3 Credits
Advanced. Continuation of ARTS 353.
Prerequisites: ARTS 353.

ARTS 464 Figure Painting III 3 Credits
Advanced level exploration of the human figure in relation to conceptually based narrative paintings. Variety of media is encouraged. Students will use the model to develop a consistent body of work towards their BFA show. Individual and group critiques ongoing as well as discussion about individual concepts and direction.
Prerequisites: ARTS 364.
Fees: Yes.

ARTS 465 Mixed Media Painting 3 Credits
Advanced level bridge between 2D and 3D mediums. Focus on manipulation of various materials to give textural vitality to a conceptually based body of work leading toward the BFA show. Individual and group critiques ongoing as well as discussion of individual concepts and direction.
Prerequisites: ARTS 365.
Fees: Yes.

ARTS 470 Advanced Lithography 3 Credits
Continued development and refinement of techniques and concepts of fine art lithography including polyester plate lithography, independent technical research, and creative critical thinking as applied to the development of personal conceptual artistic direction.
Prerequisites: ARTS 370.
Terms Typically Offered: Spring.

ARTS 471 Printmaking Workshop III 3 Credits
Research a printmaking technique that has not been introduced. Create a print and present the method. Develop a professional portfolio of artwork for senior exhibition and professional shows. Artwork created will be matted and documented digitally.
Prerequisites: ARTS 372.
Fees: Yes.

ARTS 472 Printmaking Workshop IV 3 Credits
Technical refinement and conceptual development. Refining a personal direction for the artist's imagery. Artwork created will be matted and documented digitally.
Prerequisites: ARTS 471.
Fees: Yes.

ARTS 473 Printmaking Workshop V 3 Credits
Creation of a mature and cohesive series of prints that demonstrate a solution or solutions to a creative problem posed by the individual. Artwork will demonstrate technical mastery and conceptual sophistication; student will provide a mature written artist statement and high-quality photo documentation. Oral critique where the artist verbalizes the context of their artwork within the contemporary art world.
Prerequisites: ARTS 472.
Fees: Yes.

ARTS 474 Throwing Workshop V 3 Credits
Exploration of the potter's wheel to develop personal style in the throwing process. Independent work via student/professor contract. Body of work created for professional presentation.
Prerequisites: ARTS 444.
Fees: Yes.

ARTS 476 Printmaking: Portfolio Development 1 Credit
Development of a professional body of artwork that demonstrates technical, creative, and conceptual maturity. Students will design, implement, and assess their own creative research goals under the tutelage of the professor. Artwork will be photographed and presented in a portfolio with the intention of entering the art profession. The course may be repeated for credit.
Prerequisites: ARTS 371.
Terms Typically Offered: Fall, J-Term, Spring.
Course may be taken 4 times for credit.

ARTS 484 Ceramic Sculpture Workshop III 3 Credits
Thematic concepts for the development of a BFA exhibit in clay continued. Independent work via student/professor contract. Artwork based for professional presentation.
Prerequisites: ARTS 384.
Fees: Yes.

ARTS 487 Bronze Commissions Workshop II 3 Credits
Special bronze commissions and projects as a liaison project with schools or the community. Direct experience at creating art from inception to mounted sculpture. Presentations to respective clients, budgets, armatures, sculpting, molds, wax, investing, and finishing of the bronze. Basing of the sculptures complete the process. Continuation of a year-long project at the 400 level.
Prerequisites: ARTS 387.

ARTS 488 Ceramic Sculpture Workshop IV 3 Credits
General introduction to media, techniques, and history of ceramic art to create a deeper appreciation for the creative ceramics process. Further development of thematic concepts for the development of a BFA exhibit in clay. Independent work via student/professor contract.
Prerequisites: ARTS 484.
Fees: Yes.

ARTS 491 Painting Workshop III 3 Credits
Workshop III continues development of professional portfolios of artwork used for senior exhibitions and other professional shows. Artistic influences explored. Oral and written communication skills developed in preparation for professional interaction. End of semester artwork documented digitally.
Prerequisites: ARTS 392.
Fees: Yes.

ARTS 492 Painting Workshop IV 1-3 Credits
Technical refinement and conceptual development emphasized. Refinement of the artist's imagery. Ability to speak and write about work developed. End of semester artwork documented digitally.
Prerequisites: ARTS 491.
Course may be taken 2 times for credit.
Fees: Yes.

ARTS 495 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

ARTS 496 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ARTS 498 Ceramic Sculpture Workshop V 3 Credits
Further exploration of thematic concepts for the development of a BFA exhibit in clay. Independent work via student/professor contract. Artwork created for professional presentation.
Prerequisites: ARTS 488
Fees: Yes.

ARTS 499 Internship 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.
Athletic Training (ATRN)

ATRN 502 Research Methods II3 Credits
Examination of the methods of research in kinesiology. Topics include epidemiology, public health, and evidence based practice.
Prerequisites: KINE 501.
Terms Typically Offered: Spring.

ATRN 511 Professionalism in Athletic Training/Healthcare Ethics I1 Credit
Introduction to Athletic Training profession. Foundational athletic training skills and programmatic and professional policies, procedures, and standards of practice.
Prerequisites: Admission to the MS Athletic Training program.
Terms Typically Offered: Summer.

ATRN 512 Professionalism in Athletic Training/Healthcare Ethics II3 Credits
Prerequisites: ATRN 511.
Terms Typically Offered: Spring.

ATRN 513 Administration in Athletic Training3 Credits
Exploration of Athletic Training administration. Concentration on human resources, healthcare delivery models, payor systems, facility design and function, and budgets.
Prerequisites: ATRN 511.
Terms Typically Offered: Fall.

ATRN 514 Clinical Education in Athletic Training III3 Credits
Exploration of athletic training clinical experiences. Concentration on patient-centered care, evidence-based practice, and critical thinking.
Prerequisites: ATRN 513.
Terms Typically Offered: Spring.

ATRN 521 Injury and Illness Diagnosis and Management I4 Credits
Evaluation techniques and care of common injuries and illnesses. Integration of anatomical structures, physiology principles, and evaluation techniques to provide a basis for clinical decision making in an injury/illness management environment. Review of the theoretical and scientific basis for, and practical use of, traditional therapeutic interventions utilized in the treatment of acute and chronic injury and illness.
Prerequisites: Admission to the MS Athletic Training program.
Terms Typically Offered: Fall.

ATRN 522 Injury and Illness Diagnosis and Management II4 Credits
Evaluation techniques and care of less common injuries and illnesses. Integration of anatomical structures, physiology principles, and evaluation techniques to provide a basis for clinical decision making in an injury/illness management environment. Review of the theoretical and scientific basis for, and practical use of, traditional therapeutic interventions utilized in the treatment of acute and chronic injury and illness.
Prerequisites: ATRN 521.
Terms Typically Offered: Spring.

ATRN 523 Advanced Therapeutic Interventions I Credit
Exploration of emerging and/or advanced therapeutic interventions. Review of the theoretical and scientific basis for, and practical use of, emerging and/or advanced therapeutic interventions utilized in the treatment of acute and chronic injury and illness.
Prerequisites: ATRN 522.
Terms Typically Offered: Summer.

ATRN 524 Pharmacology and Sport Performance3 Credits
Exploration of pharmacology and sport performance in an athletic patient population. Review of the basics of pharmacology, supplements, and wellness/healthy nutrition, as well as the components of a comprehensive program to maximize sport performance.
Prerequisites: ATRN 523.
Terms Typically Offered: Spring.

ATRN 531 Clinical Education in Athletic Training I2 Credits
Exploration of athletic training clinical experiences. Concentration on development of clinical skills as a novice clinician with focus on patient-centered care, evidence-based practice, and critical thinking.
Prerequisites: Admission to the MS Athletic Training program.
Terms Typically Offered: Fall.

ATRN 532 Clinical Education in Athletic Training II2 Credits
Exploration of athletic training clinical experiences. Concentration on development of clinical skills as an advanced beginner clinician with focus on patient-centered care, evidence-based practice, and critical thinking.
Prerequisites: ATRN 531.
Terms Typically Offered: Spring.

ATRN 533 Clinical Education in Athletic Training III3 Credits
Exploration of athletic training clinical experiences. Concentration on application of clinical skills as a competent clinician with focus on patient-centered care, evidence-based practice, and critical thinking.
Prerequisites: ATRN 532.
Terms Typically Offered: Fall.

ATRN 534 Clinical Education in Athletic Training IV3 Credits
Exploration of athletic training clinical experiences. Concentration on application of clinical skills as an experienced clinician with focus on patient-centered care, evidence-based practice, and critical thinking.
Prerequisites: ATRN 533.
Terms Typically Offered: Spring.

Aviation Technology (AVTN)

AVTN 101 Private Pilot Ground School4 Credits
Fees: Yes.

AVTN 102 Private Pilot Flight4 Credits
Fees: Yes.

AVTN 105 Aviation Meteorology4 Credits
Recognition, interpretation, and evaluation of atmospheric weather as it relates to and affects aviation.

AVTN 111 Instrument Pilot Ground School4 Credits
Preparation for the FAA Instrument Rating Knowledge Exam.
Fees: Yes.

AVTN 112 Instrument Pilot Flight4 Credits
Fees: Yes.

AVTN 140 Aircraft Systems4 Credits
Introduction to the basic mechanical systems and structural components of aircraft to supplement instruction received in flight training.
AVTN 196 Topics: 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

AVTN 201 Commercial Pilot Ground School2 Credits
Fees: Yes.

AVTN 202 Commercial Pilot Flight I4 Credits
Fees: Yes.

AVTN 203 Commercial Pilot Flight II3 Credits
Preparation in flight training for the Commercial Pilot, Airplane Single Engine, Land FAA Practical Test, completing requirements for the Commercial Pilot Certificate.
Fees: Yes.

AVTN 205 Mountain Flying Ground School1 Credit
Preparation of the unique aspects of flying in mountainous terrain and the additional knowledge and proficiency necessary for safe and efficient operation in mountain and high altitude terrain.
Fees: Yes.

AVTN 206 Crew Resource Management1 Credit
Comprehensive classroom instruction coupled with Line Oriented Flight Training (LOFT) in a Flight Training Device. Covers the knowledge, skills, and attitudes necessary to enhance safety and operate effectively as a member of an airplane/helicopter crew.

AVTN 207 Multi-Engine Ground School1 Credit
Preparation for the FAA Practical Test for Private or Commercial Pilot, Airplane Multi-Engine Land.
Fees: Yes.

AVTN 208 Multi-Engine Flight1 Credit
Preparation in flight training for the Airplane, Multi-Engine Rating and completing requirements for this rating.

AVTN 211 Fundamentals of Instruction2 Credits
Preparation for the FAA Fundamentals of Instructing Knowledge Exam.

AVTN 212 Flight Instructor Ground School2 Credits
Preparation for the FAA Flight Instructor Airplane Knowledge Exam.
Fees: Yes.

AVTN 213 Flight Instructor Flight1 Credit
Fees: Yes.

AVTN 218 ATC Procedures4 Credits
Preparation of IFR operations in the Air Traffic Control System, including: general procedures, terminal and IFR procedures, radar and non-radar environments, enroute procedures, and special and emergency procedures.

AVTN 296 Topics: 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

**Biology (BIOL)**

**BIOL 101 General Human Biology-GTSC13 Credits**
Scientific method, ecology, pollution, drugs, reproduction, cancer, heart disease, nutrition, and selected body structure and function relationships. Labs will include required field trips. Can be taken for graduation or essential learning credit by biology majors who have completed no more than 10 hours in BIOL.
Corequisites: BIOL 101L.
Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

**BIOL 101L General Human Biology Laboratory-GTSC11 Credit**
Lab component required for BIOL 101.
Corequisites: BIOL 101.
Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

**BIOL 105 Attributes of Living Systems-GTSC13 Credits**
Cell structure and function, cell energetics, biochemistry and genetics. High school chemistry recommended.
Corequisites: BIOL 105L.
Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

**BIOL 105L Attributes of Living Systems Laboratory-GTSC11 Credit**
Lab component required for BIOL 105.
Corequisites: BIOL 105.
Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

**BIOL 106 Principles of Animal Biology3 Credits**
Broad morphological, physiological, and ecological features of principal phyla of animals and relationships between them.
Prerequisites: BIOL 105 or permission of instructor.
Corequisites: BIOL 106L.

**BIOL 106L Principles of Animal Biology Laboratory1 Credit**
Lab component required for BIOL 106.
Prerequisites: BIOL 105 or permission of instructor.
Corequisites: BIOL 106.
Fees: Yes.

**BIOL 107 Principles of Plant Biology3 Credits**
Reproductive biology, anatomy, physiology, phylogeny and ecology of the major groups of plants.
Prerequisites: BIOL 105 or permission of instructor.
Corequisites: BIOL 107L.

**BIOL 107L Principles of Plant Biology Laboratory1 Credit**
Lab component required for BIOL 107.
Prerequisites: BIOL 105 or permission of instructor.
Corequisites: BIOL 107.
Fees: Yes.
BIOL 108 Diversity of Organisms-GTSC13 Credits
Broadly integrated survey of biological diversity with an emphasis on evolutionary relationships, ecology, and functional anatomical features of major groups.
Corequisites: BIOL 108L.
Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum
BIOL 108L Diversity of Organisms Laboratory-GTSC11 Credit
Lab component required for BIOL 108.
Corequisites: BIOL 108.
Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum
Fees: Yes.
BIOL 113 Outdoor Survival3 Credits
Skills necessary for biologists working in the field, including wilderness survival, wilderness medicine, camping/climbing skills, edible/poisonous plants, and urban survival skills.
Terms Typically Offered: Spring.
BIOL 196 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.
BIOL 208 Fundamentals of Ecology and Evolution3 Credits
Introduction to current theory and experimental work on biology of populations, species interactions, community structure, organismal and molecular evolution, genetic structure of populations, and natural selection. Lab field trips and laboratory-based learning experiences in ecology and evolution.
Prerequisites: BIOL 105/BIOL 105L, and BIOL 106/BIOL 106L or BIOL 107/BIOL 107L or BIOL 108/BIOL 108L (may be taken concurrently).
Corequisites: BIOL 208.
BIOL 208L Fundamentals of Ecology and Evolution Laboratory1 Credit
Lab component required for BIOL 208.
Prerequisites: BIOL 105/BIOL 105L, and BIOL 106/BIOL 106L or BIOL 107/BIOL 107L or BIOL 108/BIOL 108L (may be taken concurrently).
Corequisites: BIOL 208.
Fees: Yes.
BIOL 209 Human Anatomy and Physiology3 Credits
Study of the form and function of several major systems of the human body. For students with an interest in pre-med, nursing, human health, and biology. A background in general biology is recommended. Three lectures and two one and one-half hour laboratories per week.
Corequisites: BIOL 209L.
BIOL 209L Human Anatomy and Physiology Laboratory1 Credit
Lab component required for BIOL 209.
Corequisites: BIOL 209.
Fees: Yes.
BIOL 210 Human Anatomy and Physiology II3 Credits
Continuation of Human Anatomy and Physiology, which covers additional body systems and disease processes. For students with an interest in pre-med, nursing, human health, and biology. Three one-hour lectures and two one and one-half hour laboratories per week.
Prerequisites: BIOL 209 and BIOL 209L.
Corequisites: BIOL 210L.
BIOL 210L Human Anatomy and Physiology II Laboratory1 Credit
Lab component required for BIOL 210.
Prerequisites: BIOL 209 and 209L.
BIOL 211 Ecosystem Biology4 Credits
Ecological studies utilizing the concepts of population biology: energetics, dynamics, distribution, and sociology. Overnight and/or weekend field trips may be required. Four lectures and one three-hour laboratory per week.
Corequisites: BIOL 211L.
BIOL 211L Ecosystem Biology Laboratory1 Credit
Lab component required for BIOL 211.
Corequisites: BIOL 211.
Fees: Yes.
BIOL 217 Forensic Entomology2 Credits
Basic procedure and considerations in using insect evidence in crime scene investigations and the determination of post mortem interval using insects. Two-hour lecture and one two-hour lab per week.
Corequisites: BIOL 217L.
BIOL 217L Forensic Entomology Laboratory1 Credit
Lab component required for BIOL 217.
Corequisites: BIOL 217.
Fees: Yes.
BIOL 241 Pathophysiology4 Credits
Function of the human body with emphasis on interpretation of those functions in relation to disease processes.
Prerequisites: BIOL 209/BIOL 209L or BIOL 341/BIOL 341L.
BIOL 250 Introduction to Microbiology-GTSC13 Credits
Major types of microorganisms with an emphasis on bacteria. Microbial taxonomy, structure, metabolism, genetics, and aspects of infectious disease and the immune host response. Three lecture hours and two two-hour laboratories per week.
Corequisites: BIOL 250L.
Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum
BIOL 250L Introduction to Microbiology Laboratory-GTSC11 Credit
Lab component required for BIOL 250.
Corequisites: BIOL 250.
Fees: Yes.
BIOL 256 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.
BIOL 301 Principles of Genetics3 Credits
Principles of genetics at the organismal, cellular, and molecular level dealing with the genetics of prokaryotic and eukaryotic organisms and viruses. Three lectures and one three-hour laboratory per week.
Prerequisites: BIOL 105/BIOL 105L and MATH 113.
Corequisites: BIOL 301L.
### BIOL 301L Principles of Genetics Laboratory1 Credit
Lab component required for BIOL 301.
**Prerequisites:** BIOL 105/BIOL 105L and MATH 113; BIOL 302 recommended.
**Corequisites:** BIOL 301L.
**Fees:** Yes.

### BIOL 302 Cellular Biology3 Credits
Form, function, and bioenergetics of the cell.
**Prerequisites:** BIOL 301/BIOL 301L and CHEM 132/CHEM 132L.

### BIOL 310 Developmental Biology3 Credits
Embryonic growth and development of plants and animals. Also errors in normal development, cancer, aging, and related topics. Three lectures and two two-hour laboratories per week.
**Prerequisites:** BIOL 301/BIOL 301L or permission of instructor.
**Corequisites:** BIOL 310L.

### BIOL 310L Developmental Biology Laboratory2 Credits
Lab component required for BIOL 310.
**Prerequisites:** BIOL 301/BIOL 301L or permission of instructor.
**Corequisites:** BIOL 310.

### BIOL 315 Epidemiology3 Credits
Characteristic patterns of communicable disease occurrence as related to individuals, geographic location, and time; factors affecting disease occurrence, the nature of vital statistics, sampling procedures, and study design. An independent project is required.

### BIOL 316 Animal Behavior3 Credits
Mechanisms and evolution of animal behavior. Analysis of a variety of social and individual behaviors across the animal kingdom at both proximate and ultimate levels.
**Prerequisites:** BIOL 106/BIOL 106L or BIOL 108/BIOL 108L; and BIOL 208/BIOL 208L.
**Corequisites:** BIOL 316L.
**Terms Typically Offered:** Spring.

### BIOL 316L Animal Behavior Laboratory1 Credit
Mechanisms and evolution of animal behavior. Analysis of a variety of social and individual behaviors across the animal kingdom at both proximate and ultimate levels.
**Prerequisites:** BIOL106/BIOL106L or BIOL108/BIOL108L; and BIOL208/BIOL208L.
**Corequisites:** BIOL 316.
**Terms Typically Offered:** Spring.
**Fees:** Yes.

### BIOL 320 Plant Systematics3 Credits
Systematic botany encompassing principles of classification, nomenclature, and evaluation of current classifications of angiosperms.
**Prerequisites:** BIOL 105/BIOL 105L, BIOL 107/BIOL 107L or BIOL 108/BIOL 108L, and BIOL 208/BIOL 208L.

### BIOL 321 Taxonomy of Grasses2 Credits
A study of the grass family and grass-like plants (sedges and rushes) dealing with the evolution, classification, and identification of these plants. Two lectures and two two-hour laboratories per week.
**Prerequisites:** BIOL 107/BIOL 107L or BIOL 108/BIOL 108L, or permission of instructor.
**Corequisites:** BIOL 321L.

### BIOL 321L Taxonomy of Grasses Laboratory2 Credits
Lab component required for BIOL 321.
**Prerequisites:** BIOL 107/BIOL 107L or BIOL 108/BIOL 108L, or permission of instructor.
**Corequisites:** BIOL 321.
**Fees:** Yes.

### BIOL 322 Plant Identification2 Credits
Identification of the local flora. Basic plant anatomy and morphology. Includes evolutionary relationships of major plant groups as well as environmental, ecological, and historical constraints on plant distribution.
**Prerequisites:** BIOL 107/BIOL 107L or BIOL 108/BIOL 108L.
**Corequisites:** BIOL 322L.

### BIOL 322L Plant Identification Laboratory2 Credits
Lab component required for BIOL 322.
**Prerequisites:** BIOL 107/BIOL 107L or BIOL 108/BIOL 108L.
**Corequisites:** BIOL 322.

### BIOL 331 Insect Biology3 Credits
Insect taxonomy, evolution, ecology, and physiology. Insect collection required. Three lectures and two two-hour laboratories per week.
**Prerequisites:** BIOL 106/BIOL 106L or BIOL 108/BIOL 108L.
**Corequisites:** BIOL 331L.

### BIOL 331L Insect Biology Laboratory2 Credits
Lab component required for BIOL 331.
**Prerequisites:** BIOL 106/BIOL 106L or BIOL 108/BIOL 108L.
**Corequisites:** BIOL 331.
**Fees:** Yes.

### BIOL 333 Marine Biology3 Credits
Study of the principles that govern biological systems in the ocean with an emphasis on the natural history, ecology, and evolution of marine organisms. Three one-hour lectures per week.
**Prerequisites:** BIOL 106/BIOL 106L and BIOL 107/BIOL 107L, or BIOL 108/BIOL 108L, or permission of instructor.

### BIOL 335 Invertebrate Zoology3 Credits
Study of the evolution, morphology, life history, ecology and classification of invertebrates with a focus on non-insect invertebrates. Three one-hour lectures and one two-hour lab per week.
**Prerequisites:** BIOL 106/BIOL 106L, or permission of instructor.
**Corequisites:** BIOL 335L.

### BIOL 335L Invertebrate Zoology Laboratory1 Credit
Lab component required for BIOL 335.
**Prerequisites:** BIOL 106/BIOL 106L, or permission of instructor.
**Corequisites:** BIOL 335.
**Fees:** Yes.

### BIOL 336 Fish Biology3 Credits
Study of the anatomy and physiology of fish. Topics include ecology, fish diseases, and marine and freshwater fishery techniques. Field trips may be offered.
**Prerequisites:** BIOL 106/BIOL 106L or permission of instructor.
**Corequisites:** BIOL 336L.

### BIOL 336L Fish Biology Laboratory1 Credit
Lab component required for BIOL 336.
**Prerequisites:** BIOL 106/BIOL 106L or permission of instructor.
**Corequisites:** BIOL 336.
**Fees:** Yes.
BIOL 338 Small Mammal Biology 3 Credits
Introduction to the life history and taxonomic classification of small mammals. Focus includes the unique constraints and physiological challenges imposed by small body size (less than 5kg).
Prerequisites: Junior or Senior Standing.
Terms Typically Offered: Fall, Summer.

BIOL 341 General Physiology 3 Credits
Diversity of form and function across all vertebrates, including humans. Emphasizes fundamental physiological processes, integration among systems, and addresses physiological mechanisms adapted to environmental challenges. Three lectures and one two-hour laboratory per week.
Prerequisites: BIOL 105/BIOL 105L or BIOL 209/BIOL 209L and junior or senior standing.
Corequisites: BIOL 341.

BIOL 341L General Physiology Laboratory 1 Credit
Lab component required for BIOL 341.
Prerequisites: BIOL 105/BIOL 105L or BIOL 209/BIOL 209L and junior or senior standing.
Corequisites: BIOL 341.
Fees: Yes.

BIOL 343 Immunology 3 Credits
Immune system of animals with emphasis on human immune response. Includes the immune organs and both cellular and humoral responses. An independent research project is required.
Prerequisites: BIOL 302, or BIOL 301 and BIOL 301L.

BIOL 344 Forensic Molecular Biology 3 Credits
Molecular biology and genetics used in forensic investigations, including the genetic basis of diversity and DNA typing techniques.
Prerequisites: BIOL 105/BIOL 105L and CHEM 131/CHEM 131L.
Corequisites: BIOL 344L.

BIOL 344L Forensic Molecular Biology Laboratory 1 Credit
Lab component required for BIOL 344.
Prerequisites: BIOL 105/BIOL 105L and CHEM 131/CHEM 131L.
Corequisites: BIOL 344.
Fees: Yes.

BIOL 350 Microbiology 3 Credits
Growth, morphology, metabolism, genetics and ecology of microorganisms. Includes aspects of industrial microbiology, clinical microbiology, and genetic engineering. Three lectures and one three-hour laboratory per week.
Prerequisites: BIOL 105/BIOL 105L, and CHEM 121/CHEM 121L or CHEM 131/CHEM 131L.
Corequisites: BIOL 350L.

BIOL 350L Microbiology Laboratory 1 Credit
Lab component required for BIOL 350.
Prerequisites: BIOL 105/BIOL 105L, and CHEM 121/CHEM 121L or CHEM 131/CHEM 131L.
Corequisites: BIOL 350.
Fees: Yes.

BIOL 351 Ecological Physiology 3 Credits
Diversity of form and function among vertebrates. Emphasizes the evolution of physiological processes to ecological challenges at the organismal level.
Prerequisites: BIOL 106 or BIOL 108.
Corequisites: BIOL 351L.
Terms Typically Offered: Fall.

BIOL 351L Ecological Physiology Laboratory 1 Credit
Diversity of form and function among vertebrates. Emphasizes the evolution of physiological processes to ecological challenges at the organismal level.
Prerequisites: BIOL 106 or BIOL 108.
Corequisites: BIOL 351.
Terms Typically Offered: Fall.

BIOL 352 Human Physiology 3 Credits
In-depth study of human function. Physiology of major human body systems will be studied at the cellular, tissue, and systemic levels, emphasizing homeostatic mechanisms and integrative function.
Prerequisites: BIOL 105 or BIOL 209.
Corequisites: BIOL 352L.
Terms Typically Offered: Spring.

BIOL 352L Human Physiology Laboratory 1 Credit
In-depth study of human function. Physiology of major human body systems will be studied at the cellular, tissue, and systemic levels, emphasizing homeostatic mechanisms and integrative function.
Prerequisites: BIOL 105 or BIOL 209.
Corequisites: BIOL 352.
Terms Typically Offered: Spring.

BIOL 371L Laboratory Investigations in Cellular and Molecular Biology 3 Credits
Laboratory exercises and experiments that highlight important topics in cellular and molecular biology. The mechanics of laboratory science are introduced with an emphasis on modern techniques, hypothesis development, data analysis and scientific communication. Two three-hour laboratories per week.
Prerequisites: BIOL 301/BIOL 301L and CHEM 132/CHEM 132L or permission of instructor.
Fees: Yes.

BIOL 385 Nature and Philosophy of Science 3 Credits
Central concepts on the nature of scientific knowledge including philosophical tenets that distinguish science from technology as well as distinguish science from pseudoscience. May not be used in the Additional Biology Courses categories for the Biology Concentration.

BIOL 387 Structured Research 1-4 Credits
Independent research beyond the scope of the published curriculum. Designed for advanced sophomore and junior level students to participate in research activities under the direction of a specific faculty member.
Prerequisites: Sophomore or junior standing, or permission of instructor. Course may be taken multiple times up to maximum of 6 credit hours.
Fees: Yes.

BIOL 395 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

BIOL 396 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

BIOL 403 Evolution 3 Credits
Organismal and molecular evolution emphasizing its importance as the unifying theory in biology. Evolution of natural selection on genetic structure of populations.
Prerequisites: BIOL 301/BIOL 301L, with BIOL 208/BIOL 208L strongly recommended.
BIOL 405 Advanced Ecological Methods 3 Credits
Examination of quantitative methods in population, community, and ecosystems ecology. Extensive writing, computer work and field trips are required. Three lectures and two two-hour laboratories per week.
**Prerequisites:** BIOL 105/BIOL 105L; and BIOL 106/BIOL 106L and BIOL 107/BIOL 107L, or BIOL 108/BIOL 108L; STAT 301 is recommended.
**Corequisites:** BIOL 405L.

BIOL 405L Advanced Ecological Methods Laboratory 2 Credits
Lab component required for BIOL 405.
**Prerequisites:** BIOL 105/BIOL 105L; and BIOL 106/BIOL 106L and BIOL 107/BIOL 107L, or BIOL 108/BIOL 108L; STAT 301 is recommended.
**Corequisites:** BIOL 405.

**Credits**

BIOL 406 Plant-Animal Interactions 3 Credits
Ecological, evolutionary, and applied approaches to the studies of herbivory, ant-plant interactions, pollination, and seed dispersal.
**Prerequisites:** BIOL 105/BIOL 105L; BIOL 106/BIOL 106L, BIOL 107/BIOL 107L, or BIOL 108/BIOL 108L; and BIOL 208/BIOL 208L; BIOL 331/BIOL 331L is recommended.

BIOL 407 Tropical Field Biology 3-5 Credits
Field research techniques, ecology and natural history in lowland and montane tropical rainforests of Ecuador. Ten nine-hour labs and fifteen two-hour lectures conducted at biological field stations in Ecuador.
**Prerequisites:** BIOL 105/BIOL 105L; and BIOL 106/BIOL 106L and BIOL 107/BIOL 107L, or BIOL 108/BIOL 108L; and BIOL 208/BIOL 208L; BIOL 331/BIOL 331L is recommended.

BIOL 408 Desert Ecology 3 Credits
Overview of desert ecology in the surrounding area and in the United States. Covers ecology of U.S. deserts including specific plant, animal, and human adaptations. Discussion on world deserts. Field trips may be offered.
**Prerequisites:** BIOL 208/BIOL 208L, and junior or senior standing or permission of instructor.

BIOL 409 Gross and Developmental Human Anatomy 2 Credits
Gross anatomy, embryology, radiological and cross-sectional anatomy of the human body via lectures, demonstrations, and dissections of the human cadaver. Emphasis on thorax, abdomen, and extremities. Two lectures and two 2-hour laboratories per week.
**Prerequisites:** BIOL 209/BIOL 209L, or permission of instructor.
**Corequisites:** BIOL 409L.

BIOL 409L Gross and Developmental Human Anatomy Laboratory 2 Credits
Lab component required for BIOL 409.
**Prerequisites:** BIOL 209/BIOL 209L, or permission of instructor.
**Corequisites:** BIOL 409.

**Credits**

BIOL 410 Human Osteology 3 Credits
Study of the human skeleton, including osteology and bone detail, biological variation, animal skeletal comparisons, pathology, forensics, and proper handling of human skeletal material. Laboratory emphasizes analysis and identification of human skeletal material. Three lectures and one two-hour laboratory per week.
**Prerequisites:** BIOL 209 and BIOL 209L.
**Corequisites:** BIOL 410L.

BIOL 410L Human Osteology Laboratory 1 Credit
Lab component required for BIOL 410.
**Prerequisites:** BIOL 209 and BIOL 209L.
**Corequisites:** BIOL 410.

**Credits**

BIOL 411 Mammalogy 3 Credits
Classification, life histories, and ecology of mammals. Overnight and/or weekend field trips may be required. Two lectures and one two-hour laboratory or three-hour field trip per week.
**Prerequisites:** Upper division standing or permission of instructor.
**Corequisites:** BIOL 411L.

BIOL 411L Mammalogy Laboratory 1 Credit
Lab component required for BIOL 411.
**Prerequisites:** Upper division standing or permission of instructor.
**Corequisites:** BIOL 411.

**Credits**

BIOL 412 Ornithology 3 Credits
Classification and life history of birds, including field identification. Overnight and/or weekend field trips may be required. Three lectures and one two-hour laboratory or three-hour field trip per week.
**Prerequisites:** BIOL 208, BIOL 208L, and upper division standing or permission of instructor.
**Corequisites:** BIOL 412L.

BIOL 412L Ornithology Laboratory 1 Credit
Lab component required for BIOL 412.
**Prerequisites:** BIOL 208, BIOL 208L, and upper division standing or permission of instructor.
**Corequisites:** BIOL 412.

**Credits**

BIOL 413 Herpetology 3 Credits
Classification, evolution, morphology and ecology of amphibians and reptiles. Overnight or weekend field trips may be required. Three lectures and one two-hour laboratory per week.
**Prerequisites:** BIOL 208, BIOL 208L, and upper division standing or permission of instructor.
**Corequisites:** BIOL 413L.

BIOL 413L Herpetology Laboratory 1 Credit
Lab component required for BIOL 413.
**Prerequisites:** BIOL 208, BIOL 208L, and upper division standing or permission of instructor.
**Corequisites:** BIOL 413.

**Credits**

BIOL 414 Freshwater Ecology 3 Credits
Classification, life history, and ecology of aquatic animals. Overnight and/or weekend field trips may be required. Three lectures and one two-hour laboratory or three-hour field trip per week.
**Prerequisites:** BIOL 208, BIOL 208L, and upper division standing or permission of instructor.
**Corequisites:** BIOL 414L.

**Credits**

BIOL 414L Freshwater Ecology Laboratory 1 Credit
Lab component required for BIOL 414.
**Prerequisites:** BIOL 208, BIOL 208L, and upper division standing or permission of instructor.
**Corequisites:** BIOL 414.

**Credits**

BIOL 415 Tropical Ecosystems 3 Credits
Ecology of rainforests, grasslands, and desert ecosystems of the world.
**Prerequisites:** BIOL 105/BIOL 105L; and BIOL 106/BIOL 106L or BIOL 107/BIOL 107L, or BIOL 108/BIOL 108L, and BIOL 208/BIOL 208L, or permission of instructor.
BIOL 418 Wildlife Management 3 Credits
Examination of wildlife biology and management. Topics covered include managing habitat, mammals, birds, fish, and other small animals. Three one-hour lectures per week.
Prerequisites: BIOL 105/BIOL 105L and BIOL 106/BIOL 106L or BIOL 107/BIOL 107L, and BIOL 208/BIOL 208L or permission of instructor.
Corequisites: BIOL 418L.

BIOL 418L Wildlife Field Techniques 2 Credits
Lab component required for BIOL 418.
Prerequisites: BIOL 105/BIOL 105L and BIOL 106/BIOL 106L or BIOL 107/BIOL 107L, and BIOL 208/BIOL 208L or permission of instructor.
Corequisites: BIOL 418.

BIOL 421 Plant Physiology 3 Credits
Plant-water relationships, plant mineral nutrition, photosynthesis, plant growth and development at the molecular and cellular level to account for plant growth at the organismal level. Three lectures and one two-hour laboratory per week.
Prerequisites: BIOL 107/BIOL 107L, CHEM 121/CHEM 121L or CHEM 131/CHEM 131L, or permission of instructor.
Corequisites: BIOL 421L.

BIOL 421L Plant Physiology Laboratory 1 Credit
Lab component required for BIOL 421.
Prerequisites: BIOL 107/BIOL 107L, CHEM 121/CHEM 121L or CHEM 131/CHEM 131L, or permission of instructor.
Corequisites: BIOL 421.

BIOL 423 Plant Anatomy 3 Credits
Form, variability, and structure of the tissues comprising the body of the higher plant. Three lectures and two two-hour laboratories per week.
Prerequisites: BIOL 107 and BIOL 107L or permission of instructor.
Corequisites: BIOL 423L.

BIOL 423L Plant Anatomy Laboratory 2 Credits
Lab component required for BIOL 423.
Prerequisites: BIOL 107 and BIOL 107L or permission of instructor.
Corequisites: BIOL 423.

BIOL 425 Molecular Genetics 3 Credits
Nature and expression of genetic information at the molecular level in prokaryotic and eukaryotic organisms.
Prerequisites: BIOL 301 and BIOL 301L.

BIOL 431 Animal Parasitology 3 Credits
Common and important parasites of domestic animals and man. Ecology, epidemiology, diagnosis, and control are discussed with examples from the Protozoa, Trematoda, Cestoda, Nematoda, and Arthropoda. An independent research project is required. Three lectures and one two-hour laboratory per week.
Corequisites: BIOL 431L.

BIOL 431L Animal Parasitology Laboratory 1 Credit
Lab component required for BIOL 431.
Corequisites: BIOL 431.

BIOL 433 Marine Invertebrate Communities 3 Credits
Techniques of collection and laboratory examination of marine invertebrates from intertidal and subtidal habitats. Seven eight-hour labs and seven two-hour lectures will be conducted at a marine biological research station.
Prerequisites: BIOL 106/BIOL 106L, or permission of instructor.

BIOL 434 Marine Invertebrate Communities Laboratory 1 Credit
Lab component required for BIOL 433.
Corequisites: BIOL 433.

BIOL 439 Ecology 3 Credits
Emphasis on comparative morphology and development, classification, physiology, genetics, and ecological relationships. Importance of fungi in industry, agriculture, and medicine. Three lectures and two two-hour laboratories per week.
Prerequisites: BIOL 107/BIOL 107L or permission of instructor.
Corequisites: BIOL 450L.

BIOL 441 Endocrinology 3 Credits
Anatomy and physiology of the endocrine system of vertebrates.
Prerequisites: BIOL 105/BIOL 105L, CHEM 132/CHEM 132L, and junior or senior standing.

BIOL 442 Pharmacology 3 Credits
Principles underlying absorption, distribution, metabolism, and excretion of drugs with emphasis on mechanisms of action and physiological responses.
Prerequisites: BIOL 209 and BIOL 209L, one year of chemistry, and junior or senior standing.

BIOL 450 Mycology 3 Credits
Fungi, with emphasis on comparative morphology and development, classification, physiology, genetics, and ecological relationships. Importance of fungi in industry, agriculture, and medicine. Three lectures and two two-hour laboratories per week.
Prerequisites: BIOL 107/BIOL 107L or permission of instructor.
Corequisites: BIOL 450L.

BIOL 450L Mycology Laboratory 2 Credits
Lab component required for BIOL 450.
Prerequisites: BIOL 107/BIOL 107L or permission of instructor.
Corequisites: BIOL 450.

BIOL 482 Senior Research 2 Credits
Designed to introduce students to appropriate procedures for conducting literature reviews, designing experiments, collecting and analyzing data, and preparing written and oral presentations of such experiments. Two lectures per week or equivalent.
Prerequisites: Senior standing, 2.80 GPA, and permission of instructor.

BIOL 483 Senior Thesis 2 Credits
Students prepare an in-depth thesis elaborating on a major conceptual issue(s) in biology. The purpose of the thesis is to ascertain the student's ability to collect a broad array of information and integrate this into a logical conceptual framework that traverses organizational levels of living systems. The thesis topic must be approved by the instructor.
Prerequisites: Senior standing and permission of instructor.

BIOL 487 Advanced Research 1-3 Credits
Provides students with an individualized research experience on a topic approved and directed by a specific faculty member. A detailed report in the form of a scientific journal article must be provided to the instructor. Prerequisites: BIOL 482 or permission of instructor; BIOL 387 is highly recommended.
Course may be taken multiple times up to maximum of 6 credit hours.

BIOL 493 Lab Teaching Practicum 1 Credit
Assist in laboratory teaching to support instruction and enhance student learning.
Prerequisites: Junior or senior standing or permission of instructor. Must have taken the course to be supported or have sufficient experience in other related courses.
Course may be taken multiple times up to maximum of 3 credit hours.

BIOL 494 Seminar 1 Credit
Current problems, topics, and research procedures in biological sciences and medicine. Topics announced each semester.
Prerequisites: Sophomore standing and permission of instructor.
Course may be taken 5 times for credit.

BIOL 495 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.
Introduction to business communications, planning and writing messages and reports.

Requirements:
- Graduate student status.
- Corequisites: ENGL 111.

Terms Typically Offered: Spring.

BIOL 507 Tropical Field Biology
Field research techniques, ecology and natural history in lowland and montane tropical rainforests of Ecuador. Ten nine-hour labs and fifteen two-hour lectures conducted at biological field stations in Ecuador.

Requirements:
- Undergraduate degree in biology or undergraduate degree in another field with primary or secondary teaching experience in science, and permission of instructor.

BIOL 533 Marine Invertebrate Communities
Techniques of collection and laboratory examination of marine invertebrates from intertidal and subtidal habitats. Design and execution of a research project and a written paper are required. Seven eight-hour labs and seven two-hour lectures will be conducted at a marine biological research station.

Requirements:
- Undergraduate degree in biology or a related field and permission of instructor.

BIOL 596 Topics
Course may be taken multiple times up to maximum of 15 credit hours.

Business (BUGB)

BUGB 101 Introduction to Business
American business system operations in the economy, business functions, and interrelations between the businessman and his environment.

Requirements:
- Can be taken for credit only by students who have completed fewer than 15 credit hours of BUGB, ACCT, HMGT, MANG, MARK, OFAD, CISB, or FINA courses.

BUGB 101A Introduction to Business: Part 1 of 3
Introduction to management, supervision, motivation, supervision and the processes of recruiting personnel in the workplace.

BUGB 101B Introduction to Business: Part 2 of 3
Introduction to marketing, pricing, quality customer service, social responsibility and ethics in the workplace.

BUGB 101C Introduction to Business: Part 3 of 3
Introduction to financial statements, financial management, and budgeting in the workplace.

BUGB 105 Freshman Business Seminar
Overview of the Colorado Mesa University Business Department for prospective majors. Operational strategies and teamwork are developed via cases and projects. Students will gain exposure to all functional business areas through readings, discussions, and presentations. Cannot be taken for credit by students who have completed more than 15 credit hours of business courses.

BUGB 141 Business Mathematics
Fundamental review of whole numbers, decimals, and fractions. Emphasis is placed on percentage applications to solving various business problems in the areas of buying and selling merchandise, inventory computations, interest computations on notes and savings, consumer credit and installment computation, home mortgage loans, and business depreciation computations.

BUGB 211 Business Communications
Development of a non-defensive, supportive, communication system effectively applied to interpersonal and written transactions within the business organization.

Requirements:
- Graduate student status.
- Corequisites: ENGL 111.

Terms Typically Offered: Spring.

BUGB 211A Business Communications: Part 1 of 3
Introduction to business communications, planning and writing messages and reports.

BUGB 211B Business Communications: Part 2 of 3
Introduction to effective communications in business, including presentations and routine, negative and persuasive messages.

BUGB 211C Business Communications: Part 3 of 3
Introduction to the roles of personal styles, cultures and teams in business communications.

BUGB 221 Insurance
Common types of protection offered by insurance, including fire, theft, comprehensive, life, automobile, accident, and health. Emphasis on application of insurance to individuals and small business firms.

BUGB 231 Survey of Business Law
Application of law as it applies to individuals and businesses including foundations of the American legal system, legal entities and government regulations, property law, contracts and sales, negotiable instruments, agency and employment law, torts, labor law, international business law and the social environment of business. No credit allowed for degrees from Department of Business if credit already established in BUGB 351.

BUGB 249 Personal Finance: The Business of Life
Development of financial and economic literacy to improve personal decision making in the areas of: personal budgeting; developing a personal financial plan including consumer credit, taxes and purchasing a home; money and interest rates; the market economy; free enterprise and competition; and the consequences of externalities, public goods and increasing costs in the service sector.

BUGB 293 Cooperative Education
Practical workplace experience under the joint supervision of the employer and the internship coordinator. Designed for non-business majors working in the business environment.

Course may be taken multiple times up to maximum of 15 credit hours.
BUGB 349 Legal Environment of Business 3 Credits
Legal framework of business including foundations of the American legal system, anti-trust law, property law, contracts and sales, negotiable instruments, agency relationships, torts, labor law, international business law and the social environment of business.
Prerequisites: Junior or senior standing or permission of instructor.

BUGB 351 Business Law I 3 Credits
Law and legal reasoning. Court systems, constitutional law, business ethics, torts, criminal law, intellectual property, privacy, internet and cyber law. Contracts, sales, product liability, and agency and employment law.

BUGB 352 Business Law II 3 Credits
Business entities (formation, financing and regulation). Securities law and corporate governance, negotiable instruments; creditors’ rights and bankruptcy; administrative, consumer and environmental law. Real and personal property; insurance; wills and trusts, and professional liability.
Prerequisites: BUGB 351 or permission of instructor.

BUGB 393 Cooperative Education 3-9 Credits
Cooperative Education internships provide non-business students an opportunity to put their education to practical use in the workplace under the joint supervision of an organization-based supervisor and a Colorado Mesa University faculty coordinator. Written consent of coordinator required prior to registration.
Course may be taken multiple times up to maximum of 15 credit hours.

BUGB 401 International Business 3 Credits
Current international topics in the disciplines of finance, management, and marketing. Concepts, analytical tools, and models are introduced to help explain the diversity and complexity of the international business environment.
Prerequisites: Senior standing.

BUGB 405 Big Questions in Business 3 Credits
Application of the requisite business skill of critical thinking as it pertains to major issues in business.
Prerequisites: Senior standing.

BUGB 435 Emerging Markets 3 Credits
Traditional challenges to global product development and marketing in the world’s emerging economies. Commonalities of differing regions and economic systems. Cultural and economic differences. A macro look at emerging economies. Micro applications of new emerging world markets.
Prerequisites: Business Foundation Courses.

BUGB 440 Business Ethics 3 Credits
Examination of the nature and role of ethics in the business environment.

BUGB 493 Cooperative Education 3-12 Credits
See description of BUGB 393.
Course may be taken multiple times up to maximum of 15 credit hours.

BUGB 495 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

BUGB 496 Topics 1-6 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

BUGB 500 Advanced Business Law and Ethics 3 Credits
Emphasizes the regulations, statutes and cases that impact business on a daily basis. Topics covered include contract law, negotiations, labor law, the Uniform Commercial Code, and the law of business organizations to include limited liability companies.

BUGB 510 Global Business 3 Credits
Explores international management concepts and procedures and their importance to modern managers. Operating in multi-national, multi-cultural managerial environment, the modern manager must understand business and management from a global perspective. Emphasis is placed on comparing and contrasting management practices in different nation-states and how this might affect decisions concerning risk, investment, human resources, finances, operations, manufacturing and production in a multi-national business.

BUGB 520 Seminar in Current Business Topics 1-6 Credits
Develops topics of current interest in the business world. Areas included are effective communication strategies, ethics, and the global dimension of business.
Course may be taken 4 times for credit.

BUGB 530 Research Design 3 Credits
Examines the design of research projects. Topics will include selection of the problem, secondary data, historical research, descriptive research, experimental research, the tools of research, and interpretation of data.
Prerequisites: Permission of instructor and permission of MBA Director.

BUGB 590 MBA Thesis I 3 Credits
Prerequisites: Completion of approved research design and methods course and permission of MBA Director.

BUGB 592 MBA Thesis II 3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

BUGB 593 Internship 3-9 Credits
Intern within an organization engaged in various strategic management functions.
Prerequisites: MBA major; written permission of MBA advisor and MBA Coordinator prior to registration.
Terms Typically Offered: Fall, Spring, Summer.

Chemistry (CHEM)

CHEM 100 Chemistry and Society-GTSC23 Credits
Introduction to selected topics in chemistry with particular attention to chemistry in society. Minimal use of elementary mathematics is required.
Essential Learning Categories: Natural Sciences

CHEM 121 Principles of Chemistry-GTSC14 Credits
Introduction to fundamental principles of chemistry. Designed for students planning a major in science as well as students with a non-science major. Topics include atomic structure, bonding, periodic table, gas laws, mass relationships, solution theory, oxidation-reduction, electrochemistry, and ionic equilibrium. Four lectures and one three-hour lab per week.
Prerequisites: Mastery of high school algebra.
Corequisites: CHEM 121L
Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum
CHEM 121 Principles of Chemistry Laboratory-GTSC11 Credit  
Lab component required for CHEM 121.  
Prerequisites: Mastery of high school algebra.  
Corequisites: CHEM 121  
Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed  
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum  

CHEM 122 Principles of Organic Chemistry-GTSC14 Credits  
Introduction to the chemical and physical properties of selected classes of organic compounds. Four lectures and one three-hour laboratory per week.  
Prerequisites: CHEM 121/CHEM 121L or CHEM 131/CHEM 131L or one year of high school chemistry and permission of instructor.  
Corequisites: CHEM 122L.  
Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed  
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum  

CHEM 124 Introduction to Environmental Chemistry4 Credits  
Application of basic chemistry principles to the environment. Topics include aquatic and atmospheric chemistry, biogeochemical cycling of the elements required for life and structural organic chemistry as it applies to the physical and biological properties of persistent organic pollutants. Four lectures per week.  
Prerequisites: CHEM 121 and CHEM 121L.  
CHEM 131 General Chemistry I-GTSC14 Credits  
Fundamental principles of chemistry. Designed for students planning a major in science. Topics include dimensional analysis, atomic and molecular structure, stoichiometry, simple chemical reactions, thermochemistry, and gases. Four lectures and one three-hour laboratory per week.  
Prerequisites: One year of high school chemistry, mastery of algebra, and a passing score on the chemistry assessment exam.  
Corequisites: CHEM 131L.  
Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed  
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum  

CHEM 131 General Chemistry Laboratory I-GTSC11 Credit  
Laboratory course to accompany CHEM 131. Designed for students planning a major in science. Basic chemistry laboratory techniques will be introduced. Experimental topics include: basic measurements and significant figures, determining the electronic structure of atoms, chromatography basics, determining empirical formulas, and calorimetry.  
Prerequisites: One year of high school chemistry, mastery of algebra, and a passing score on the chemistry assessment exam.  
Corequisites: CHEM 131.  
Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed  
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum  

CHEM 132 General Chemistry II-GTSC14 Credits  
Continuation of the material in CHEM 131. Topics include states of matter, solutions, kinetics, equilibrium, thermodynamics, and electrochemistry.  
Prerequisites: CHEM 131/CHEM 131L or CHEM 151/CHEM 151L.  
Corequisites: CHEM 132L.  
Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed  
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum  

CHEM 132 General Chemistry Laboratory II-GTSC11 Credit  
Laboratory course to accompany CHEM 132. Designed for students planning a major in science. Freshman-level chemistry laboratory techniques will continue to be introduced. Experimental topics include: identification of chemical unknowns by qualitative analysis, colligative properties, acid-base titration, reaction kinetics, equilibrium constant determinations, and electrochemistry. Four lectures and one three-hour laboratory per week.  
Prerequisites: CHEM 131/CHEM 131L or CHEM 151/CHEM 151L.  
Corequisites: CHEM 132.  
Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed  
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum  

CHEM 131 Engineering Chemistry4 Credits  
General chemistry for engineering majors. Topics include stoichiometry, thermodynamics, states of matter, acids and bases, oxidation-reduction, equilibrium, and kinetics. Examples and problems chosen to illustrate the application of chemistry to engineering.  
Prerequisites: MATH 113 or higher or concurrently enrolled in MATH 119, MATH 135, or MATH 151; CHEM 121/CHEM 121L or a passing score on the chemistry placement exam.  
Corequisites: CHEM 151L.  
CHEM 151 Engineering Chemistry Laboratory1 Credit  
Laboratory course to accompany CHEM 151. Freshman-level chemistry laboratory techniques will be introduced. Experimental topics include basic measurement techniques, stoichiometry, chemical reaction observation, titrations, and reaction kinetics.  
Prerequisites: MATH 113 or concurrently enrolled in MATH 119, MATH 135, or MATH 151; CHEM 121/CHEM 121L or passing score on the chemistry assessment exam.  
Corequisites: CHEM 151.  
CHEM 196 Topics1-3 Credits  
Course may be taken multiple times up to maximum of 15 credit hours.  
CHEM 296 Topics1-3 Credits  
Course may be taken multiple times up to maximum of 15 credit hours.
CHEM 300 Environmental Chemistry 4 Credits
Aquatic and atmospheric chemistry. Basic chemical, physical and biological properties of organic pollutants. Topics include smog formation, stratospheric ozone depletion, greenhouse gases, acid mine waste formation, biogeochemistry, and bioaccumulation of halogenated organics.
Prerequisites: CHEM 122/CHEM 122L or CHEM 132/CHEM 132L.

CHEM 301 Analytical Chemistry 3 Credits
Classical and instrumental methods of quantitative chemical analysis. Includes statistical treatment of experimental data, method characterization and validation, equilibrium, titrations, electrochemistry, spectroscopy, mass spectrometry, and chromatography.
Prerequisites: CHEM 32 and CHEM 132L.
Corequisites: CHEM 301L.

CHEM 301L Analytical Chemistry Laboratory 1 Credit
Lab component required for CHEM 301.
Prerequisites: CHEM 132 and CHEM 132L.
Corequisites: CHEM 301.

CHEM 311 Organic Chemistry 4 Credits
This course is the first semester of a two-semester introduction to basic organic chemistry. The nomenclature, structure, properties, and reactions of important classes of organic compounds are examined. The relationship of structure and bonding in organic compounds to reactivity is emphasized. Reactions are examined from mechanistic and synthetic perspectives.
Prerequisites: CHEM 132 and CHEM 132L.
Corequisites: CHEM 311L.

CHEM 311L Organic Chemistry I Laboratory 1 Credit
This lab is the first semester of a two-semester sequence. It introduces common organic lab techniques (including chromatography, extraction, recrystallization, and distillation) used for separating and analyzing organic compounds.
Prerequisites: CHEM 132 and CHEM 132L.
Corequisites: CHEM 311.

CHEM 312 Organic Chemistry 4 Credits
This course is the second semester of a two-semester introduction to basic organic chemistry. The nomenclature, structure, properties, and reactions of important classes of organic compounds are examined. The relationship of structure and bonding in organic compounds to reactivity is emphasized. Reactions are examined from mechanistic and synthetic perspectives. Spectroscopic analysis of organic compounds is also introduced.
Prerequisites: CHEM 132 and CHEM 132L or permission of instructor.
Corequisites: CHEM 312L.

CHEM 312L Organic Chemistry II Laboratory 1 Credit
This lab is the second semester of a two-semester sequence. Common organic lab techniques, including spectroscopy, are used to carry out and analyze organic reactions.
Prerequisites: CHEM 132 and CHEM 132L or permission of instructor.
Corequisites: CHEM 312.

CHEM 315 Biochemistry 3 Credits
Classical biochemistry concerned with the control of metabolism, the production of energy, the relationship of structure to function, carbohydrates, lipids, proteins, and nucleic acids. Three lectures and one three-hour laboratory per week.
Prerequisites: CHEM 312 and CHEM 132L.
Corequisites: CHEM 315L.

CHEM 315L Biochemistry Laboratory 1 Credit
Lab component required for CHEM 315.
Prerequisites: CHEM 312 and CHEM 312L.
Corequisites: CHEM 315.

CHEM 316 Biochemistry II 3 Credits
In-depth examination of fundamental biological processes including DNA replication, transcription, and protein synthesis. Skills for comparative genomics, protein visualization and sequence alignment developed.
Prerequisites: CHEM 312/CHEM 312L and CHEM 315/CHEM 315L.

CHEM 321 Physical Chemistry I 3 Credits
Principles of chemical thermodynamics and kinetics. Includes study of the kinetic theory of matter, first and second laws of thermodynamics, state functions, thermochemistry, entropy, free energy, chemic potential, phase transitions, chemical equilibria, and the rates and mechanisms of chemical reactions.
Prerequisites: CHEM 132/CHEM 132L or CHEM 151/CHEM 151L; and MATH 152; and PHYS 111/PHYS 111L or PHYS 131/PHYS 131L.

CHEM 322 Physical Chemistry II 3 Credits
An introduction to the quantum theory of atoms, molecules, and chemical bonding for chemists. Includes principles of quantum mechanics and their application to atomic structure, molecular spectroscopy, symmetry properties, and the determination of molecular structure. Also introduces the principles of statistical mechanics with application to molecules.
Prerequisites: CHEM 132/CHEM 132L or CHEM 151/CHEM 151L; and MATH 253 (may be taken concurrently); and PHYS 111/PHYS 111L or PHYS 131/PHYS 131L.

CHEM 341 Advanced Laboratory I 2 Credits
Experiments from analytical, inorganic, organic, physical, and biological chemistry designed to show the application of theory to chemical problems. In addition to a list of possible core experiments, each student chooses other experiments according to individual interests. Two three-hour laboratories per week.
Prerequisites: CHEM 301/CHEM 301L; CHEM 312/CHEM 312L; and CHEM 321.
Corequisites: CHEM 442.

CHEM 351 Inorganic Chemistry 3 Credits
Study of periodic trends and bonding throughout the periodic table. Includes periodic properties, advanced electron-dot diagrams, VSEPR, symmetry, group theory, molecular orbital diagrams, electron counting, and basic nomenclature.
Prerequisites: CHEM 312 (may be taken concurrently).

CHEM 352 Inorganic Chemistry II 3 Credits
Application of periodic trends and high level bonding concepts to main group, solid state, organometallic, and advanced coordination chemistries. Includes acid-base chemistry, donor-acceptor chemistry, crystalline solids, ligand field stabilization energy, Jahn-Teller Effects, pi-bonding ligands, reaction pathways at transition metal centers, and catalysts.
Prerequisites: CHEM 351.

CHEM 395 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

CHEM 396 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

CHEM 397 Structured Research 1-3 Credits
Chemical research guided by a faculty member. Sophomore through senior levels.
Prerequisites: Permission of instructor.
Course may be taken multiple times up to maximum of 4 credit hours.
CHEM 421 Advanced Organic Chemistry I 3 Credits
Selected topics in organic chemistry are discussed in detail.
Prerequisites: CHEM 312 and CHEM 322.

CHEM 422 Advanced Organic Chemistry II 3 Credits
Similar in content to CHEM 421, but without overlap in topics. CHEM 421 is not a prerequisite for CHEM 422.
Prerequisites: CHEM 312 and CHEM 322.

CHEM 431 Instrumental Analysis 3 Credits
Modern instrumental methods of analysis. Topics include signals and noise, atomic spectroscopy, molecular spectroscopy, electroanalytical chemistry and chromatographic separation methods. Three lectures and one 3-hour laboratory per week.
Prerequisites: CHEM 301/ CHEM 301L.
Corequisites: CHEM 431L.

CHEM 431L Instrumental Analysis Laboratory 1 Credit
Lab component required for CHEM 431.
Prerequisites: CHEM 301/ CHEM 301L.
Corequisites: CHEM 431.

CHEM 442 Communicating in the World of Chemistry 1 Credit
Study and application of communication skills necessary for careers in chemistry-related fields. Includes laboratory notebooks, chemical publications, cover letters, resumes, and formal oral presentations.
Corequisites: CHEM 341.

CHEM 487 Formal Research 1-3 Credits
Chemical research guided by a faculty member. Results presented as a formal scientific paper in a format suitable for publication. Topics include laboratory notebooks, independent research, and formal reporting of research.
Course may be taken multiple times up to maximum of 4 credit hours.

CHEM 494 Seminar 1 Credit
Student, faculty, and other speakers present a variety of topics in chemistry and related fields.
Prerequisites: Chemistry major with senior standing or permission of instructor.

CHEM 495 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

CHEM 496 Topics 3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

CHEM 497 Structured Research 1-3 Credits
Chemical research guided by a faculty member. Senior level.
Prerequisites: Permission of instructor.
Course may be taken multiple times up to maximum of 4 credit hours.

CHEM 596 Topics  1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

Civil Engineering (CIVE)

CIVE 127 Engineering Drawing for Civil Engineering 3 Credits
Exploration of linetypes, symbols, and drawing and dimensioning standards by generating drawings using drafting instruments and computer-aided-drafting (CAD). Drawings start with basic sketching on the board and continue through 3-D solid modeling on CAD. Print reading includes interpretation of site, foundation, floor, and roof plans, as well as elevations and sections.

CIVE 212 Introduction to Geomatics 3 Credits
Introduction to basic linear, angular, area, and volume field measurements common to civil engineering endeavors with application of GPS and GIS technology.
Prerequisites: MATH 151 or MATH 135.

CIVE 313 Theoretical Fluid Mechanics 3 Credits
Basic principles of fluid mechanics. Covers fluid properties, hydrostatics, fluid flow concepts, including continuity, energy, momentum, dimensional analysis and similitude, and flow in closed conduits.
Prerequisites: ENGR 261.

CIVE 397 Structured Research 1-3 Credits

Computer Aided Drafting (CADT)

CADT 101 Introduction to Computers 1 Credit
Introduction to hardware and software including operating systems, word processing, spreadsheets, desktop publishing and presentation software.

CADT 105 Print Reading - Residential, Commercial, Industrial 3 Credits
Reading and interpreting blueprints for residential, commercial, and industrial construction, including site plans. How to do a project take-off and project site layout.

CADT 106 Computer Aided Design 3 Credits
Basic principles of computer aided design through the development of practical drawing problems using a computer. One one-hour lecture and two one and one-half laboratories per week.

CADT 107 Advanced Computer Aided Design 3 Credits
Advanced work in computer aided drafting principles including 2-D, 3-D, shading, etc. One one-hour lecture and two one and one-half hour laboratories per week.
Prerequisites: CADT 106, or permission of instructor.

CADT 108 CAD - Mechanical 3 Credits
Offers the student basic principles of computer aided drafting through the development of practical drawing problems using CAD software on the computer. One one-hour lecture and two one and one-half laboratories per week.

CADT 109 CAD-Mechanical Engineering 3 Credits
Advanced work in computer aided drafting principles including 2-D and 3-D shading, solid based modeling and parametric modeling. One one-hour lecture and two one and one-half hour laboratories per week.

CADT 110 CAD Application 4 Credits
This course offers the student an opportunity to apply skills and knowledge gained in earlier courses. The student will work on computer aided drawings relating to their career field of interest and advice of faculty. Internship or cooperative education may be substituted with approval of advisor. Two one-hour lectures and two one and one-half hour laboratories per week.
Prerequisites: CADT 107 and CADT 109.

CADT 130 CAD-Civil 3 Credits
Civil drafting will explore the aspects of current day mapping and topography, instruments, conventions and practices, contours, traverses, profiles, surveying, and photogrammetry through CAD drawings. Students will be introduced to GIS, graphical interface systems. One one-hour lecture and two one and one-half hour laboratories per week.

CADT 135 CAD Civil III 3 Credits
Exploration of advanced aspects of current day mapping and topography. An in-depth instruction on road plan and profiles, cut and fill techniques and further instruction using skills from CADT 130.
Prerequisites: CADT 130.
CADT 140 Architectural Theory and Structural Materials3 Credits
Elementary design strategies, theories and methods for architectural documents. Students will use appropriate computer software to meet professional standards, apply properties of architectural components and materials to develop buildable assemblies, and analyze an architectural process drawing for compliance. Codes, standards, and testing will be emphasized, including an introduction to mechanical, electrical, plumbing and systems requirements.

CADT 141 Structural Materials3 Credits
This course will identify the properties and applications of the materials of industry. Codes, standards and testing will be emphasized in the fields of architecture. There will be an introduction to mechanical, electrical, plumbing and systems requirement.
Corequisites: CADT 140 and CADT 142.

CADT 142 CAD - Residential Architecture3 Credits
Residential Architectural CAD will provide the student with a realistic residential project that will begin with schematic design and take him/her through to construction documents. Construction documents will include: site plan, floor plan, exterior elevations, foundation plan, floor framing plan, roof framing plan, building section, and a variety of construction details. One one-hour lecture and two one and one-half hour laboratories per week.

CADT 143 CAD-Commercial Architecture3 Credits
Commercial Architectural CAD will emphasize the creation of commercial project plans that will begin with schematic design and continue through to construction documents. Construction documents will include site plan, foundation floor slabs plan, roof framing plan, building section and a variety of construction details. One one-hour lecture and two one and one-half hour laboratories per week.

CADT 150 Advanced Images - Introduction to Animation4 Credits
Advanced work in computer aided drafting principles including 3-D renderings and animation techniques. One one-hour lecture and two one and one-half hour laboratories per week.

CADT 195 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

CADT 196 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

CADT 210 Project3 Credits
Exploration of computer aided drawings relating to Building Information Modeling. Teaches the concepts and principles of creating 3D parametric models of mechanical, electrical and plumbing systems from engineering design through construction documentation.

CADT 296 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

Computer Information Systems (CISB)

CISB 101 Business Information Technology3 Credits
Introduction to computing and software, including computing systems in a business environment and applicable software.

CISB 205 Advanced Business Software3 Credits
Use of electronic spreadsheets and database management software. Lectures, demonstrations, and hands-on projects. Developing customized applications with macros in spreadsheets. Creating tables, reports, forms, and queries to creating appropriate relationships and developing customized database software applications.

CISB 206 Introduction to Business Application Programming3 Credits
Beginning programming with emphasis on solving problems in the context of business applications.

CISB 210 Fundamentals of Information Systems3 Credits
Exploration of information systems in a business environment. Use of information systems to improve business processes and organizational goals. Introduction to hardware, software, ethical issues, career opportunities, and organizational uses of information systems.

CISB 211 Introduction to Cybersecurity3 Credits
Introduction to cybersecurity in a business environment. Topics include policy and governance, frameworks, risk and asset management, data loss prevention, access control management, and cybersecurity incident response.
Terms Typically Offered: Fall.

CISB 212 Introduction to Digital Forensics3 Credits
Introduction to computer and digital forensics. Topics include network, hardware, and operating principles of computers and mobile devices, as they pertain to digital forensics and cybersecurity investigations. Special application on applying digital forensics principles to real world case studies.
Terms Typically Offered: Spring.

CISB 240 Fundamentals of Information Systems3 Credits
Introduction to descriptive, predictive and inferential analysis techniques, data interpretation, business research skills, and techniques for analysis and modeling of business problems in the workplace, using appropriate software.
Prerequisites: MATH 113 or higher.
Equivalent Course(s): STAT 241

CISB 260 Information System Architecture3 Credits
Principles and applications of information systems hardware and systems software. Theoretical underpinnings, installation, configuration, and operation emphasized.
Prerequisites: CISB 210.

CISB 295 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

CISB 305 Solving Problems Using Spreadsheets3 Credits

CISB 306 Solving Problems Using Databases3 Credits
For students who have minimal background in databases. Assists in understanding the importance of data management in organizations through hands-on experience in solving business problems using relational database management software.

CISB 307 Enterprise Systems3 Credits
Theoretical and practical issues of enterprise systems within organizations. Demonstrates how enterprise systems integrate information and organizational processes across functional areas with a unified system comprised of a single database and shared reporting tools.
Prerequisites: CISB 210.

CISB 309 Enterprise Architecture3 Credits
Enterprise IT solutions, applications, infrastructure and fit within business organizations.
Prerequisites: CISB 309.
CISB 311 Fundamentals of Cloud Security3 Credits
Introduction to cloud-based cybersecurity and related concepts. Topics include architectural concepts and design requirements, cloud data security, cloud platform and infrastructure security, cloud application security, and cloud computing legal compliance. Special application on applying learned principles to real world case studies.
Prerequisites: CISB 211.
Terms Typically Offered: Fall.

CISB 315 Information Systems Infrastructure3 Credits
Information systems infrastructure, computer architecture and communications networks in an organizational context.
Prerequisites: CISB 210.

CISB 331 Advanced Business Programming3 Credits
Procedural and object-oriented software engineering methodologies using modern business languages. Emphasis on data definition and measurement, record and file processing, report generation and other traditional business information systems applications using modern methods of top-down, structured design. Other concepts include developing screen editors, abstract data types, and data structures including sequential, random and indexed files.
Prerequisites: CISB 206 or CSCI 110.

CISB 341 Quantitative Decision Making3 Credits
Application of inferential statistics to realistic business situations; use of quantitative tools to enhance business decision-making ability. Descriptive statistics for data summarization, probability theory, distributions, estimation, and index numbers with emphasis on hypothesis testing, analysis of variance, regression/correlation, time series, and introduction to operations research and linear programming.
Prerequisites: MATH 113 or higher, and CISB 241 or STAT 241.

CISB 342 Data Mining and Visualization3 Credits
Application of data mining and visualization tools to business related data sets. Using a blend of data mining and visualization techniques, hands-on experience will be gained in discovering how data can inform the business decision-making process.
Prerequisites: CISB 205, CISB 241 or STAT 241, and CISB 341.
Terms Typically Offered: Fall.

CISB 343 Big Data Analytics3 Credits
Analysis of large data sets for emergent patterns using modern software tools. Topics can include: NoSQL, cloud computing, and text mining tools.
Prerequisites: CISB 205, CISB 241 or STAT 241, and CISB 341.
Terms Typically Offered: Fall.

CISB 349 Information Systems Theory and Practice3 Credits
Exploration and application of Information System theory for organizational success. Examination of managerial, user, and IS professional roles within information systems.
Prerequisites: CISB 210.

CISB 393 Cooperative Education3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

CISB 395 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

CISB 396 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

CISB 410 Project Management3 Credits
Processes, techniques and tools of project management. Evaluating, initiating, planning, staffing, executing, controlling, and closing projects using project management software.
Prerequisites: CISB 210 is a prerequisite or corequisite if the student has reached junior status.

CISB 442 Systems Analysis and Design3 Credits
Analysis and logical design of information systems. Practice in project management during team-oriented analysis and design of a departmental system.
Prerequisites: CISB 210, CISB 309, CISB 315 (may be taken concurrently), CISB 410, and CISB 206 or CSCI 110 or CSCI 111, or permission of instructor.

CISB 451 Database Administration3 Credits
Continuation of CISB 442 Systems Analysis and Design. Covers development and implementation of conceptual and detailed physical system design using proper database tools and methods.
Prerequisites: CISB 205, CISB 442, and ACCT 202.

CISB 460 Electronic Commerce Systems3 Credits
Comprehensive examination of electronic commerce, how it is conducted and managed, and its opportunities, limitations, issues and risks. Coverage of technological infrastructure that supports e-commerce systems, plus the implications of such systems in the business environment. Exercises include exploration of e-commerce web sites and features, plus discussion and demonstration of state-of-the-art e-commerce tools.
Prerequisites: CISB 210 or permission of instructor.

CISB 470 Management of Information Systems3 Credits
Reviews the development of analyzing information use by organizations with different types of information systems. The conceptual foundations of information systems and the development, operation, management, uses, parties, control, structure, and impact of these systems will be addressed. Analysis and design of information systems is stressed through case study projects, emphasizing the role of computing in information systems and design of computer-based systems, expert systems, decision support systems and executive information systems.
Prerequisites: Junior or senior status.

CISB 471 Advanced Information Systems3 Credits
Capstone course for the BS in CIS, the BAS in CIS, and the BBA IS concentration. Integrates management information needs, decision-making criteria, and design of interactive user interfaces. Design and development of computerized management control systems for major functional modules of an organization investigated, utilizing database management systems, distributed processing and structured systems development.
Prerequisites: CISB 210, CISB 310, CISB 315, CISB 331, CISB 410, CISB 442, CISB 451, and CISB 470; or permission of instructor.

CISB 491 Directed Readings in Computer Information Systems1-3 Credits
Study of a leading edge topic within Computer Information Systems under direction of CIS faculty. Prior to registering, the student must meet with the CIS instructor to determine a topic and a method for reporting. For each credit hour registered, the student will read and report on at least 200 pages of scholarly readings.
Prerequisites: CIS major, junior or senior status, and permission of instructor.

CISB 493 Cooperative Education3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

CISB 495 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

CISB 496 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.
CISB 500 Management of Information Systems 3 Credits
Reviews the development of an overall framework for analyzing the use of information by organizations along with examples of different types of information systems. The conceptual foundations of information systems and the development, operation, management, uses, parties, control, structure, and impact of these systems will be addressed. The analysis and design of information systems is stressed through case study and projects, emphasizing the role of computing in information systems and design of computer-based systems, expert systems, decision support systems and executive information systems.

CISB 505 Advanced Project Management 3 Credits
Processes, techniques and tools of project management. Evaluating, initiating, planning, staffing, executing, controlling, and closing projects using project management software. Projects, writing, and presentation to demonstrate mastery at the graduate level.
Prerequisites: CISB 210 and permission of instructor.

CISB 560 Electronic Commerce Systems 3 Credits
A comprehensive examination of the modern paradigm of electronic commerce, how it is conducted and managed, and its major opportunities, limitations, issues, and risks. Coverage of technological infrastructures that support e-commerce systems, plus the implications of such systems in the business environment. Exercises will include exploration of e-commerce web sites and features, plus discussion and demonstration of state-of-the-art e-commerce tools.
Prerequisites: Graduate status at Colorado Mesa University.

Computer Science (CSCI)

CSCI 100 Computers In Our Society 3 Credits
The impact of computers on society and individuals; purpose and use of software integrated systems. Intended for students in disciplines outside the natural sciences and mathematics.
Essential Learning Categories: Social and Behavioral Sciences

CSCI 104 Intro to Computer Hardware 1 Credit
Computer hardware introduction. Includes purchase, maintenance and repair of computer hardware (desktops, laptops, servers and mobile devices, wired and wireless network hardware) in individual and corporate settings.

CSCI 106 Web Page Design 3 Credits
Aspects of Web page design such as HTML, Web servers, Web graphics/sound/video, and programs that automate the design of Web sites and scripts. Students will progressively develop their own sites throughout the term using software tools and concepts presented in the class.
Prerequisites: Familiarity with Windows.

CSCI 110 Beginning Programming 3 Credits
Introduction to computer programming. Includes syntax and semantics for sequential, selection, and repetition structures, program design and modularization simple and structured data types, and file I/O. Designed for majors outside the scientific disciplines. ‘Subtitle’ indicates language of implementation.
Prerequisites: MATH 110 or MATH 113 (either may be taken concurrently) or permission of instructor.

CSCI 110L Beginning Programming Laboratory 1 Credit
An optional laboratory course to be taken as a co-requisite to CSCI 110. This lab is intended for those students currently enrolled in CSCI 110 who have little or no previous programming/computer experience. The student taking this course will complete several computer assignments designed to increase the student’s knowledge of programming, debugging, and program design. ‘Subtitle’ indicates language of implementation.
Prerequisites: MATH 113 or permission of instructor.
Corequisites: CSCI 110.

CSCI 111 CS1: Foundations of Computer Science 4 Credits
Introduction to problem solving techniques with emphasis on modularity, abstraction, analysis, and correctness of algorithm design. Using C/C++ language as a tool, topics covered include data types, control structures, I/O, and functions.
Prerequisites: CSCI 110 or MATH 113.

CSCI 112 CS2: Data Structures 4 Credits
Continuation of CSCI 111 with emphasis on algorithm design and analysis, procedural abstraction, data abstraction, and quality programming style. Topics covered include distinction between dynamic and static variables; various implementations of elementary stacks, queues, trees and lists; comparison of recursive and iterative algorithms; program correctness; and hierarchical design principles. Programming exercises will focus on modularity of design and data abstraction.
Prerequisites: CSCI 111 or CSCI 130.

CSCI 130 Introduction to Engineering Computer Science 4 Credits
Introduction to fundamental programming concepts for engineers using a systems language and a scripting language. Programming concepts include flow control, data types and pointers. Applications include signal processing and numerical methods.
Prerequisites: MATH 135 (may be taken concurrently) or MATH 151 (may be taken concurrently).

CSCI 196 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

CSCI 206 Web Page Design II 3 Credits
A continuation of CSCI 106. Students will learn a scripting language and how to incorporate scripts in web page design.
Prerequisites: CSCI 106 or permission of instructor.

CSCI 241 Computer Architecture and Assembly Language 4 Credits
Architecture of a representative processor and its assembly language, introduction to hardware description language, register transfers and sequence control, realization of fetch, address, branch and execute cycles, start, stop and reset the computer, interrupt and memory mapped input-output, peripherals and interfacing.
Prerequisites: CSCI 112.

CSCI 250 CS3: Introduction to Algorithms 3 Credits
Complexity analysis and program performance; abstract data types such as lists, trees, stacks and queues; sorting; searching and hashing.
Prerequisites: CSCI 112.

CSCI 260 Introduction to Database 3 Credits
Introduction to using databases. The focus of this course will be on the creation, retrieval, update, and deletion of data from databases using a variety of database management systems and programming languages.
Prerequisites: CSCI 110, CSCI 111, or CSCI 130.
Terms Typically Offered: Fall, Spring.

CSCI 296 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.
CSCI 305 Technology for Mathematics Educators 3 Credits
Project- and activity-based introduction to technology resources appropriate for use by elementary mathematics educators. Focus will be on spreadsheets–programming, modeling, and data manipulation–supplemented with topics chosen from interactive geometry software, interactive applets, simple webpage design, educational simulations and games, and other mathematical technology tools.
Prerequisites: MATH 113 and MATH 301.

CSCI 306 Web Page Design III 3 Credits
Continuation of CSCI 206. Students will consider web site management issues, server-side scripting, security, and database interactions.
Prerequisites: CSCI 206 or permission of instructor.

CSCI 310 Advanced Programming: 1-3 Credits
Exploration of a higher level programming language for CSCI/CISB majors. Specifics will vary with the language covered.
Prerequisites: CSCI 111 or CSCI 110 or CSCI 130.
Course may be taken 4 times for credit.

CSCI 321 Assembly Language Programming 3 Credits
Introduction to assembler, creating and executing assembly language program, organization of machine under study, data definition, addressing techniques, data movement instruction, branching instructions, flag and PSW registers, arithmetic instructions, macros and their implementation, hardware and software interrupts, storing instructions, typical applications.
Prerequisites: CSCI 241.

CSCI 322 Embedded Systems 3 Credits
Introduction to design of embedded systems. Topics include: basic computer electronics, embedded digital communications, and embedded software design.
Prerequisites: CSCI 321.

CSCI 330 Programming Languages 3 Credits
Principles and concepts which characterize various classes of high-level, computer programming languages are covered. Topics will include syntax and semantic issues, data types/classes, control structures, binding, and storage allocation.
Prerequisites: CSCI 250.

CSCI 333 UNIX Operating Systems 3 Credits
Introduction to systems programming with UNIX. Topics covered include elementary and advanced user commands, file handling, process control, library routines, device drivers, shell programming, and UNIX utilities.
Prerequisites: CSCI 112 or knowledge of C++/C.

CSCI 337 User Interface Design 3 Credits
Examination of user interface design (UID) principles. They include rules of perception, systems analysis, user analysis, good design principles, and testing and evaluation of designs. Using an appropriate Rapid Application Development tool, students will design a major project emphasizing UID concepts.
Prerequisites: CSCI 250 or CSCI 260.

CSCI 345 Video Game Design 3 Credits
Exploration of game engine and development theory. Emphasis is on rendering, physics simulation, artificial intelligence, and optimization techniques used in the modern game construction. Students will develop at least three games during the semester.
Prerequisites: CSCI 112.

CSCI 370 Computer Security 3 Credits
Networked-computer security, suitable for both CS and CIS majors. Topics include security framework, access control and site security, firewalls, attack methods, elements of cryptography and cryptographic systems, incidence response, security in e-commerce and e-mail, management and policy decisions for security.
Prerequisites: CSCI 250 or CISB 311.
Terms Typically Offered: Fall.

CSCI 375 Object Oriented Programming 3 Credits
Advanced programming techniques using the object-oriented paradigm, with emphasis on abstractness of design, encapsulation, inheritance, and polymorphism. Additional topics include design tools and methodologies for determining classes, responsibilities, collaborations, and hierarchies.
Prerequisites: CSCI 250.

CSCI 380 Operations Research 3 Credits
Methods of linear and dynamic programming, inventory and replacement models, queueing theory, game theory, PERT, CPM, and simulation.
Prerequisites: MATH 152, STAT 200, and CSCI 111.

CSCI 393 Internship 1-3 Credits
The internship course provides the student with the opportunity to apply classroom theory to on-the-job experiences. During the internship course, the student will work at approved professional positions related to the computer science field. The student will be required to write and fulfill course objectives with the approval of the internship coordinator.
Prerequisites: Junior standing, written permission of internship coordinator.
Course may be taken multiple times up to maximum of 15 credit hours.

CSCI 395 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

CSCI 396 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

CSCI 405 Mobile Application Development 3 Credits
Application development on mobile platforms, such as smartphones and tablets. Topics include understanding hardware, application API's, marketplaces, and programming languages for these platforms.
Prerequisites: CSCI 250, CSCI 337 or CSCI 206, or permission of instructor.

CSCI 420 Cyber Security 3 Credits
Exploration of various common security flaws in programs and systems written in C and C++ programming languages. Topics include Linux commands, shell scripting, C, Buffer overflow, exploits, Man in the Middle attacks, and red and blue team exercises. Students will learn how to find various vulnerabilities such as buffer overflow and write simple exploits to take advantages of the vulnerabilities.
Prerequisites: CSCI 241 and CSCI 370.

CSCI 445 Computer Graphics 3 Credits
Introduction to the use of the computer to produce images: two and three dimensional graphics, algorithms and data structures for hidden lines and surfaces, shading, and reflections.
Prerequisites: MATH 152 and CSCI 250.

CSCI 450 Compiler Structure 3 Credits
Structures and techniques used in compiler writing are discussed with emphasis on scanners, symbol tables, parsers and code generation. The front end of a recursive descent parser is written for the semester project. Error analysis and code optimization are discussed as time permits.
Prerequisites: CSCI 241.
Corequisites: CSCI 330.
CSCI 460 Database Design 3 Credits
Design and implementation of relational databases. Approaches and methods of design and normalization, SQL, integrity, and security will be discussed.
Prerequisites: CSCI 250.

CSCI 465 Network/Application Security 3 Credits
Exploration of advanced topics in network and web-based application security such as network vulnerability management, network monitoring, intrusion detection and prevention, government and industry security compliances, wireless security, most common web application security flaws, browser and database security principles, and authentication and authorization in web applications.
Prerequisites: CSCI 250.

CSCI 470 Operating Systems Design 3 Credits
Aspects of computer operating system design and implementation including memory management, processor management, device management, information management and performance evaluation methods. Some knowledge of C is required.
Prerequisites: CSCI 250 and CSCI 241.

CSCI 480 Theory of Algorithms 3 Credits
Techniques for analyzing time and space requirements of computer algorithms. Models are set up for analysis and techniques are applied to algorithms related to sorting and searching, pattern-matching, graph problems and other selected problems. The notion of NP-hard problems is introduced and related problems are discussed.
Prerequisites: MATH 152 and CSCI 250.

CSCI 482 Theory of Computation 3 Credits
Computability and automata theory introduced. Regular expressions, finite and pushdown automata, Turing machines, grammars and their relationship to automata, Church-Turing hypothesis, incomputable and undecidable functions and equivalence of computability models are covered.
Prerequisites: MATH 369 and CSCI 250.

CSCI 484 Computer Networks 3 Credits
Topics include: hardware technology for local and long haul networks, circuit and packet switching, interface between computer and network hardware, network architectures and protocols, routing, congestion and flow problems, queuing theory, and reliability issues. Instructors may choose to implement a sample network in which case the contents may be particularized to that network.
Prerequisites: STAT 200.

CSCI 486 Artificial Intelligence 3 Credits
Introduction to artificial intelligence programming with study of topics such as knowledge representation, expert systems, solution space search, non-deterministic algorithms (neural nets, genetic algorithms), etc. Programs will be written in a selected AI programming language such as Lisp or Prolog.
Prerequisites: CSCI 250; and MATH 151 or MATH 135.

CSCI 490 Software Engineering 3 Credits
Exploration of the philosophy of software engineering. Software project planning, requirement analysis, software system design and strategies, software design tools, program and system testing, system maintenance, and economics are examined.
Prerequisites: CSCI 250 and CSCI 330.

CSCI 494 Seminar 1-3 Credits
Discussions of specialized topics by students, faculty, or visiting professors. One or two one-hour meetings per week.
Course may be taken 10 times for credit.

CSCI 495 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

CSCI 496 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

Construction Management (CONM)

CONM 181 Principles of Construction Management 3 Credits
Construction industry practice emphasizing business organization and management techniques. Includes principles of management, organizational environments, decision-making, design, technology, leadership, and basic construction management with terminology, estimating and scheduling. This course replaces MANG 201 requirements for Construction Management majors only. It does not substitute for MANG 201 in any other way.

CONM 234 Graphic Communication for Construction Management 3 Credits
Integrated approaches for developing plan reading skills and creation of visual communications, including 3D digital model and pictorial development using current industry software.

CONM 264 Mechanical/Industrial Systems 3 Credits
Analysis and design understanding of specialty mechanical and industrial processes. Includes fundamentals of thermodynamics, fluids, control interface issues, system testing and commissioning. Emphasis on fundamental theory followed by proof of concepts through practicum. Lecture, lab and field exercises.
Prerequisites: MATH 113, CONC 101, and CONM 181.

CONM 316 Construction Materials and Methods 3 Credits
Materials and methods utilized in design and construction of vertical and horizontal projects. Course addresses proper construction methods and governing trade association standards. Sustainability and ethics relating to specification, ordering, and installation of construction materials incorporated.
Prerequisites: CONC 101 and CONC 208.

CONM 340 Construction Estimating and Bidding 3 Credits
Application of industry-recognized methods of construction estimating to compile conceptual systems and detailed estimates. Emphasis on students’ ability to communicate estimate results in written and oral presentations.
Prerequisites: CONC 228.

CONM 361 Advanced MEP Systems 3 Credits
Electrical, heating, ventilation, air conditioning, plumbing, and fire suppression. Emphasis on design, operation, and interaction. Principles of codes, design, methods and materials as applicable to the construction industry included. Building system controls for smart buildings integrated in each component.
Prerequisites: CONC 161.

CONM 362 Structure Analysis - Statics/Materials Strength 3 Credits
Behavior of structural components and systems plus a broad overview of structural engineering analysis/design process. Principles of statics and strength of materials including properties of materials, forces, equilibrium, stresses and strains studied. Emphasis on understanding behavior of structural components associated with construction processes.
Prerequisites: MATH 130 and PHYS 111/PHYS 111L.
CONM 370 Managing Safety and the Regulatory Environment3 Credits
Impact of safety on the construction industry, in-depth discussions concerning application of O.S.H.A. Safety and Health Standards for the Construction Industry. Course emphasis on safety management training for jobsite supervisory personnel. Additionally, various regulatory requirements encountered in construction addressed.
Prerequisites: CONM 101 and junior status.

CONM 380 Construction Project Management3 Credits
Exploration of the professional practices performed by the project team for successful job site management, including the relationship of project participants and methods of communication, evaluation of project objectives in decision making, relationship of different project contract delivery methods, and how to develop, understand, and use contracts for job site management.
Prerequisites: CONM 340.

CONM 395 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

CONM 462 Soil and Foundation Construction3 Credits
Properties of subsurface materials and principles of subsurface construction. Topics include soil classification and testing, soil mechanics, earthmoving operations and foundation systems from a contractor's perspective. Techniques of subsurface investigations and subsequent interpretation of soil reports studied to understand foundation construction methods and related field problems.
Prerequisites: CONM 362.
Corequisites: CONM 462L.

CONM 462L Soil and Foundation Construction Laboratory1 Credit
Properties of subsurface materials and principles of subsurface construction. Topics include soil classification and testing, soil mechanics, earthmoving operations and foundation systems from a contractor's perspective. Techniques of subsurface investigations and subsequent interpretation of soil reports studied to understand foundation construction methods and related field problems.
Prerequisites: CONM 362.
Corequisites: CONM 462.

Terms Typically Offered: Spring.

CONM 472 Construction Planning and Scheduling3 Credits
Planning, scheduling and controlling construction operations. Emphasis on the planning phase of construction projects, logic diagrams, network-based scheduling techniques, and computer-assisted scheduling. Application of industry-recognized scheduling methodology to construction projects. Emphasis on communicating project schedules in written and oral presentations.
Prerequisites: CONC 228.

CONM 475 Construction Company and Financial Management3 Credits
Exploration of concepts in starting, owning, and operating a construction company. The student engages in identifying the purpose, vision, values, short-term and long-term objectives, and execution plans of company. Accounting methods and systems are studied. Analysis of financial statements in developing budgets, projecting cash needs, and forecasting impacts of business decisions on profit.
Prerequisites: CONM 380 and FINA 301.

CONM 485 Construction Management Issues3 Credits
Issues facing the professional constructor. Integration of project management includes field study, research, case readings, problem solving, and project deliverables.
Prerequisites: Senior status and permission of instructor.

CONM 495 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

CONM 496 Topics:1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

CONM 499 Construction Internship1-6 Credits
University/construction industry partnership to provide real-life working experiences. The internship program's primary purpose is to prepare the construction management student with leadership responsibilities in a technologically oriented, diverse, dynamic and global construction environment.
Prerequisites: CONM 380, and permission of instructor.
Course may be taken multiple times up to maximum of 15 credit hours.

Construction Technology (CONC)

CONC 101 Construction Safety and Regulations3 Credits
Construction safety and its effect on productivity and employee morale. Application of basic principles of accident prevention. Complying with the various federal, state, and local laws governing safety (OSHA), hazardous chemicals, and drugs in the work place.

CONC 104 Architectural/Civil Print Reading2 Credits
Reading and hand-drafting prints as used in industry, application of that information to various architectural and civil industries.

CONC 116 Building Materials3 Credits
Introduction to building materials and methods commonly used today. Includes interior and exterior materials from foundations to roof systems.

CONC 117 Building Materials Testing3 Credits
Introduction to the properties and testing of materials used in today's construction projects. This includes wood products, metal, soil, aggregates, concrete, and asphalt.
Prerequisites: CONC 116 or permission of instructor.

CONC 161 Building Mechanical/Electrical3 Credits
Introduction to basic electrical, plumbing, heating, ventilation, and air conditioning systems found in residential and commercial building. Basic theory and design concepts included.
Prerequisites: Permission of instructor.

CONC 196 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

CONC 208 Construction Equipment3 Credits
Basic understanding of general equipment and methods employed in different sectors of the construction industry. Areas covered are factors affecting the selection of equipment, rental versus ownership of equipment, estimating earthwork quantities, figuring equipment production, equipment management, and quality control of projects.

CONC 218 Surveying3 Credits
The fundamentals of modern plane surveying techniques and basic surveying instruments. Emphasis on construction-related aspects of surveying and the development of skills in using surveying field information.
Prerequisites: MATH 107 or MATH 113.

CONC 228 Estimating and Cost Control3 Credits
The estimation process, the role of the estimator, types of estimation, CSI Divisions, bid/contract documents, change order pricing, value engineering, design build projects, and estimate compilation and cost controls.
Prerequisites: CADT 105, CONC 116, CONC 161, CONC 208 or permission of instructor.
CONC 234 Commercial/Industrial Plans2 Credits
Introduction to the commercial/industrial construction industry. Processes, practices, and materials typically used in commercial/industrial construction will be studied.

CONC 245 Project Management3 Credits
Principles of project planning, scheduling, estimation and management. Emphasis on the basic skills required to supervise personnel including oral communication, problem identification, problem solving and decision-making. The course will also cover how to control productivity on the project.
Prerequisites: CONC 228 or permission of instructor.

CONC 251 Construction Prep: Codes, Permits3 Credits
Legal aspects including liens, contracts, bids, specifications, building permits and licensing, inspections and the Uniform Building Code. Introduces intra-trade coordination, remodeling and additions, construction practices, construction management and supervision.

CONC 265 Planning and Scheduling for the Construction Supervisor3 Credits
Planning the sequence, duration and relationship of activities for a construction process. Communicate the plan to contractual parties and to use the plan as reference point for examining project changes. Includes planning for safety, organization, manpower, problem solving, and site layout.
Prerequisites: Permission of instructor.

CONC 270 Practical Applications4 Credits
Supplemental coursework with practical work experience related to educational program. Students will work under the immediate supervision of experienced personnel at the business location. Students will work on construction sites or projects related to their career field of interest with advice of faculty.
Prerequisites: Permission of Instructor.

CONC 296 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

Criminal Justice (CRMJ)

CRMJ 110 Orientation to Criminal Justice Inquiry1 Credit
Prerequisites: Must be a declared criminal justice pre-major.

CRMJ 196 Topics:1 Credit
Course may be taken multiple times up to maximum of 15 credit hours.

CRMJ 201 Introduction to Criminal Justice3 Credits
Philosophy, history and development of the American criminal justice system. Survey of the role of law enforcement agencies, the courts, jails, prisons, probation and parole in both juvenile and adult systems.
Prerequisite or Corequisites: CRMJ 110.

CRMJ 210 Emergency Dispatching4 Credits
Fundamentals of emergency dispatching. Includes basic principles of emergency communications operations and technology, call management and classification, legal aspects of dispatching, and stress management. Extensive practical training in police and fire emergency dispatching scenarios.
Prerequisites: ENGL 111, CRMJ 201, and MATH 107 or higher.

CRMJ 280 Crime Scene Processing2 Credits
Hands-on experience in the documentation, recognition, collection and preservation of evidence. Evidence development techniques used in the field will also be discussed. The course includes an introduction to crime scene photography. Students will be oriented in professional values, concepts, and ethics as well as exposed to current trends in the forensic science community.
Prerequisites: ENGL 111 or higher and MATH 110 or higher.
Corequisites: CRMJ 280L.
Terms Typically Offered: Fall.

CRMJ 280L Crime Scene Processing Laboratory1 Credit
Hands-on experience in the documentation, recognition, collection and preservation of evidence. Evidence development techniques used in the field will also be discussed. An introduction to crime scene photography. Students will be oriented in professional values, concepts, and ethics as well as exposed to current trends in the forensic science community.
Prerequisites: ENGL 111 or higher and MATH 110 or higher.
Corequisites: CRMJ 280.
Terms Typically Offered: Fall.

CRMJ 296 Topics1-4 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

CRMJ 301 Criminal Procedure3 Credits
Analysis of landmark U.S. Supreme Court cases and their impact on operating procedures of law enforcement and the courts. Focuses on Fourth, Fifth, and Sixth Amendments to the U.S. Constitution.
Prerequisites: CRMJ 110, CRMJ 201, CRMJ 310, CRMJ 320, and CRMJ 328.

CRMJ 302 Ethics in Criminal Justice3 Credits
Examination of ethics in the criminal justice system from investigation, arrest, prosecution, defense, and corrections.
Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

CRMJ 310 The Police Process3 Credits
Basic features of policing in the United States. Police work, police organizations, police officers, and the critical problems facing policing today are examined in social and political context.
Prerequisites: CRMJ 201.

CRMJ 311 Victimology3 Credits
Study of crime victims, their numbers, common characteristics, and roles they play in their own victimization. Legal, psychological, and social perspectives explored. Various theoretical explanations regarding both first-time and repeat victimizations discussed.
Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

CRMJ 315 Research Methods in Criminal Justice3 Credits
Research methods and their application to Criminal Justice.
Prerequisites: CRMJ 310, CRMJ 320, CRMJ 328, MATH 110 or higher, and STAT 215.

CRMJ 320 Corrections3 Credits
The role of corrections in the criminal justice system: history, guiding philosophies and theories, treatment approaches, custody issues, and supervision of offenders on probation and parole.
Prerequisites: CRMJ 201 or permission of instructor.

CRMJ 325 Juvenile Justice and Delinquency3 Credits
Juvenile delinquency and juvenile justice in the United States. Comparative component involved. Focus on the nature and extent of delinquency, causes of delinquency, theoretical explanations, patterns of delinquency, and social reaction to delinquency.
Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.
CRMJ 328 American Court Systems3 Credits
The American court system; local, state, and national, including
consideration of the impact of prosecutors, defense personnel, judges,
and other factors on court decisions and the criminal justice system.
Prerequisites: CRMJ 201 or POLS 101.
Equivalent Course(s): POLS 328

CRMJ 330 Intimate Partner Violence3 Credits
Exploration of intimate partner violence including contributing individual,
structural, and cultural factors, as well as various offender patterns
and typologies. Examines why victims stay in abusive relationships,
the consequences of intimate partner violence, and various system
responses.
Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.
Terms Typically Offered: Spring.

CRMJ 335 Community Policing3 Credits
Contemporary policing philosophy used and accepted by most policing
organizations, domestic and foreign. Concept of community policing,
history of the movement as well as the various issues in its adoption
and implementation. Philosophy of community policing affecting both
policing organizations and the community. Impact of community policing
on crime, fear of crime, and the community in which utilized.
Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

CRMJ 340 Community Corrections3 Credits
Applied and practical approach to community corrections. Assessment,
supervision, reintegration, and community partnerships emphasized.
Special needs populations, unique issues and challenges, and insights
into day-to-day experiences of various community corrections
practitioners examined.
Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

CRMJ 360 Crime and Deviance3 Credits
Relationship between crime, deviance, and social control. Differences
in definitions of criminal and deviant behaviors explored. Various
criminological and sociological theories of deviance analyzed. Focus
on relation to crime and social control. Societal response to deviance
critically examined.
Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

CRMJ 370 Criminology3 Credits
Major paradigms in the field of criminology and major contributions
to the field in the U.S. and abroad. Emphasis on socio-historical
development and philosophical movements that shaped criminological
theory and its implications for criminal justice.
Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

CRMJ 375 Women and Crime3 Credits
Nature of criminality pertaining to women. How and why women are
treated differently than males in the criminal justice system. Analysis of
why women make up a small but growing portion of criminal offenders.
Explores the ramifications of criminal activity on women. Possible
solutions and alternatives to the unique issues of female offenders.
Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

CRMJ 380 Crisis Intervention in Criminal Justice3 Credits
Examination of crisis typologies encountered throughout the criminal
justice system. The methods and techniques employed by criminal
justice professionals to respond to, contain, and de-escalate various
forms of chaos, mayhem, and disorder are also examined.
Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.
Terms Typically Offered: Spring, Summer.
CRMJ 435 White-Collar Crimes3 Credits
Examination of white-collar crime in the United States. Topics include crimes against consumers, corporate and securities fraud, environmental crime, medical crime, computer fraud, and public corruption are discussed. Individual, corporate, and governmental crimes and their societal impacts are explored. Investigative, prosecutorial, and preventative measures are also examined.
Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.
Terms Typically Offered: Fall, Summer.

CRMJ 440 Capital Punishment3 Credits
Examination of the issues related to the death penalty in the United States, including the history of capital punishment, important Supreme Court decisions, the process of capital punishment, the comparative costs of incarceration and execution, miscarriages of justice in capital cases, and how the criminal justice system responds to these issues.
Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328, or permission of instructor.

CRMJ 456 Contemporary Issues in Criminal Justice3 Credits
Focused analysis of specific contemporary issues in criminal justice. Topics vary according to current events and instructor expertise.
Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

CRMJ 470 Restorative Justice3 Credits
Examination of the realm of restorative justice, which aims to repair the harm caused by crime. Fundamental principles and practices, as well as the roles of key stakeholders will be covered.
Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.
Terms Typically Offered: Spring, Summer.

CRMJ 480 Inside-Out Prison Exchange3 Credits
Examination of issues involving crime and justice, the criminal justice system, corrections, and imprisonment through facilitated dialogue between students and current prisonners.
Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328, and permission of instructor.

CRMJ 490 Comparative Criminal Justice3 Credits
Capstone course. Includes survey of selected international criminal justice systems, including police, courts, and correctional components. International perspectives of policing, courts, and corrections examined to determine variations across countries. Topics of transnational crime, terrorism, and juvenile justice explored from a global perspective to determine if the United States significantly differs in methodology, intensity, and focus of public policy. Special emphasis placed on geographical, historical, and cultural perspectives that make the systems unique and/or similar to those in the United States.
Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.

CRMJ 495 Independent Study1-3 Credits
Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.
Course may be taken multiple times up to maximum of 6 credit hours.

CRMJ 496 Topics1-3 Credits
Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.
Course may be taken multiple times up to maximum of 15 credit hours.

CRMJ 499 Internship1-15 Credits
Opportunities to apply theoretical principles in a structured organizational or work environment. Prior instructor and site approval required at least one semester in advance. Required clock hours dependent upon credit hours.
Prerequisites: CRMJ 310, CRMJ 320, and CRMJ 328.
Course may be taken multiple times up to maximum of 15 credit hours.

CRMJ 511 Foundational Seminar3 Credits
Introduction to graduate level studies, program expectations, and ethical considerations for research in criminal justice.
Terms Typically Offered: Fall, Spring.

CRMJ 512 Public Policy Analysis3 Credits
Overview of public policy theories, formulation, and administration in the context of applied federal, state, and local criminal justice governance and policy decision-making. The relationship between politics and administration is examined with reference to the classical policy/administration dichotomy, stages of the policy process, and citizen engagement.
Terms Typically Offered: Fall, Spring, Summer.

CRMJ 513 Ethics in Criminal Justice Leadership3 Credits
Exploration of ethical leadership as a process of influence within and across criminal justice organizations. Examines how leaders can effectively address conflicts when formulating and implementing policies and programs.
Terms Typically Offered: Fall, Spring, Summer.

CRMJ 514 Research Methods and Data Analysis3 Credits
Methods of scientific inquiry applied to criminal justice issues. Includes formulation of research questions, logic of inquiry, research design, measurement, and introduction to social statistics and applications to criminal justice data analysis.
Terms Typically Offered: Fall, Spring, Summer.

CRMJ 515 Advanced Criminological Theory3 Credits
Major paradigms in the field of Criminology. Emphasis on biosocial roots of crime, control theories, labeling theories, and conflict theories and their implications for Criminal Justice.
Terms Typically Offered: Fall, Spring.

CRMJ 516 Leadership in Criminal Justice3 Credits
Examination of leadership theories from classic to contemporary. The concepts of leadership, power, authority, and management will be contrasted. The leader-follower dynamic is explored. Students will build the confidence and skills needed to become leaders in the field through the development and defense of a model of leadership.
Terms Typically Offered: Fall, Spring, Summer.

CRMJ 520 Budgeting and Finance in Criminal Justice3 Credits
Introduction to the theory and practice of budgeting at all levels of government. Budget terminology, methodologies, preparation, implementation, evaluation, accounting and financial reporting systems, revenue sources, and capital improvement budgeting are examined.
Terms Typically Offered: Fall, Spring, Summer.

CRMJ 521 Program Development and Evaluation3 Credits
Examination of program development and evaluation using evidence-based practices in a criminal justice context.
Terms Typically Offered: Fall, Spring, Summer.

CRMJ 522 Strategic Planning for Criminal Justice Agencies3 Credits
Examination and analysis of the strategic planning process, goal setting, and strategic management in criminal justice organizations and how external environments and internal dynamics impact planning procedures.
Terms Typically Offered: Fall, Spring, Summer.

CRMJ 523 Police Management and Administration3 Credits
Examination of law enforcement management, administration, and organizational behavior. Topics examined include power dynamics, human motivation, teamwork, conflict management, interpersonal communication, decision-making, and managing organizational change.
Terms Typically Offered: Fall, Spring, Summer.
CRJW 524 Legal Issues in Criminal Justice3 Credits
Examination of legal issues as they impact Criminal Justice. Emphasis on how policy is derived and affected by legal decisions. Topics vary based upon contemporary concerns and expertise of instructor.
Terms Typically Offered: Fall, Spring, Summer.
CRJW 525 Critical Issues in Corrections3 Credits
Historical development of institutions for confinement and analysis of present trends in correctional practice. Reviews characteristics of various correctional policies and prison life. Special emphasis on current trends and controversies.
Terms Typically Offered: Fall, Spring, Summer.
CRJW 526 Contemporary Issues in Criminal Justice3 Credits
Focused analysis of contemporary issues in Criminal Justice. Topics vary according to current events and instructor expertise.
Terms Typically Offered: Fall, Spring, Summer.
CRJW 610 Master's Capstone3 Credits
Comprehensive and synthesized final project. Students complete final project under the supervision of a faculty mentor.
Prerequisites: CRJW 511, CRJW 512, CRJW 513, CRJW 514, CRJW 515, and CRJW 516.
Terms Typically Offered: Fall, Spring, Summer.
Course may be taken 5 times for credit.

Criminal Justice-POST (CRJW)

CRJW 101 Basic Police Academy6 Credits
Conforms to POST standards and state certification requirements as well as the basic skills and knowledge necessary to perform the entry level duties of a peace officer. Emphasis will be on simulating actual situations utilizing a lecture and laboratory mode of learning.
Prerequisites: Permission of Academy Director.
Fees: Yes.
CRJW 102 Basic Police Academy II10 Credits
Conforms to POST standards and state certification requirements as well as the basic skills and knowledge to perform the entry level duties of a peace officer. Emphasis will be on simulating actual situations utilizing a lecture and laboratory mode of learning.
Prerequisites: Permission of Academy Director.
Fees: Yes.
CRJW 105 Basic Law6 Credits
Conforms to POST standards and state certification requirements as well as the basic skills and knowledge necessary to perform the entry level duties of a peace officer. Emphasis will be on United States Constitution, arrest, search and seizure, interrogation and confessions, rules of evidence, Colorado Criminal Code, Colorado Traffic Code, Colorado Children’s Code, Liquor Code and controlled substances.
Prerequisites: Permission of Academy Director.
Fees: Yes.
CRJW 106 Arrest Control3 Credits
Covers the skills, knowledge and abilities necessary to effectively maintain control of a suspect when making an arrest. Emphasizes the continuum of force and de-escalation of force.
Prerequisites: Permission of Academy Director.
Fees: Yes.
CRJW 107 Law Enforcement Driving2 Credits
Covers the skills, knowledge and abilities required for operation of a law enforcement vehicle. Emphasizes defensive driving. Enables students to demonstrate skills by driving a vehicle under simulated conditions.
Prerequisites: Permission of Academy Director.
Fees: Yes.
CRJW 108 Firearms3 Credits
Discusses the skills, knowledge and abilities necessary to safely use police firearms. Students will demonstrate skills by firing weapons on a firing range. The student will demonstrate basic safety techniques and will explain the firearms role within the continuum of force.
Prerequisites: Permission of Academy Director.
Fees: Yes.
CRJW 210 Emergency Dispatching4 Credits
Introduction to the basic fundamentals of emergency dispatching, to include basic principles of emergency communications operations and technology, call management and classification, legal aspects of dispatching, and stress management. Extensive practical training in police and fire emergency dispatching scenarios.
Prerequisites: ENGL 111, MATH 107 or higher, CRMJ 201, and permission of instructor.
CRJW 296 Topics1-4 Credits
Course may be taken multiple times up to a maximum of 15 credit hours.

Culinary Arts (CUAR)

CUAR 100 Culinary Program Fundamentals3 Credits
Introduction to the fundamentals of the culinary arts industry. Training will include: program overviews, culinary math skills, culinary vocabulary, lab requirements, basic knife skills, equipment identification and proper usage, professionalism, food service history, kitchen organization, basic principles of cooking, food science, study skills, proper food storage techniques, recipes, and cost management.
Terms Typically Offered: Fall, Spring.
CUAR 101 Food Safety & Sanitation2 Credits
Exploration of the basic rules of sanitation, food-borne illnesses, safe food temperatures, and safe food handling techniques.
CUAR 115 Introduction to Sustainable Cuisine3 Credits
Impact of human food production systems on environment and society. Focus on meeting present food needs without compromising future generations. Topics include connections among agriculture, food production, ecology, ethics, nutrition, health, cuisine and foodservice operations.
CUAR 120 Wine and Spirits2 Credits
Examination of types of beverages and equipment including wines, beers, and spirits. Profitability, marketing, federal and local laws, and service will be discussed. The history of making and processing wines, spirits and beers will be studied.
CUAR 121 Introduction to Food Production1 Credit
Fundamental principles of commercial kitchen operations.
CUAR 122 Introduction to Hot Foods1 Credit
Fundamental principles of stocks, soups, sauces, gravies, and products in the kitchen.
CUAR 123 Introduction to Garde Manger1 Credit
Fundamental principles of cold foods and non-alcoholic beverage preparation.
CUAR 124 Food Production Applications 1 Credit
Basic cooking principles and practices in the production of stocks, soups, sauces and gravies, and vegetables, starches, fruits, salads, and dressing.

CUAR 125 Introduction to Foods 4 Credits
Exploration of fundamental principles and practices of a commercial kitchen, including the organization of work, and basic cooking methods.
Corequisites: CUAR 101 or permission of instructor.
Fees: Yes.

CUAR 129 Center of the Plate 4 Credits
Provides the basic methods for preparation and cooking of a variety of complete meals in a commercial kitchen.
Corequisites: CUAR 125 and CUAR 101 or permission of instructor.
Fees: Yes.

CUAR 131 Vegetables, Starches, Pastas, Breakfast and Short Order Cookery 1 Credit
Preparation of vegetables, starches, breakfast and grilled items.

CUAR 132 Center of the Plate: Meat 1 Credit
Preparation of a variety of meat dishes.

CUAR 133 Center of the Plate: Poultry, Fish 1 Credit
Preparation of a variety of seafood and poultry dishes.

CUAR 134 Food Production Applications 1 Credit
Practical application of food production techniques related to courses CUAR 121, CUAR 122, CUAR 123, CUAR 134, CUAR 131, CUAR 132, and CUAR 133.
Prerequisites: CUAR 124.

CUAR 141 Basic Baking Principles and Ingredients 1 Credit
Fundamentals of baking terminology, principles of baking, and the characteristics and functions of the main ingredients used in bakery production.

CUAR 142 Basic Yeast-Raised Products and Quick Breads 1 Credit
Application of basic yeast-raised baking principles.

CUAR 143 Cakes, Pies and Pastry, Cookies 1 Credit
Application of basic cake, pie, pastry, and cookie production.

CUAR 144 Baking Applications 1 Credit
Application of basic baking principles and production.

CUAR 145 Introduction to Baking 4 Credits
Exploration of basic baking principles, the characteristics and functions of ingredients, and production techniques for a variety of baked goods in a commercial kitchen.
Corequisites: CUAR 125 and CUAR 129.
Fees: Yes.

CUAR 150 Baking: Decorating and Presentation 3 Credits
Introduction to techniques and equipment used in the modern bakery to produce, decorate and present pastries and desserts using a variety of products.
Prerequisites: CUAR 145.
Fees: Yes.

CUAR 151 Intermediate Bread Preparation 3 Credits
Examines techniques and equipment used in the modern bakery to craft traditional and artisanal yeast breads using a variety of commercial and pre-ferment/wild yeast leavening methods and production techniques.
Prerequisites: CUAR 145.
Fees: Yes.

CUAR 152 Individual Fancy Desserts Production 3 Credits
Preparation and decoration of individual dessert items using production techniques and equipment used in commercial bakeries to craft traditional and modern pastries, tarts, petite fours and cookies.
Prerequisites: CUAR 145.
Fees: Yes.

CUAR 153 Confectionaries and Petit Fours 3 Credits
Introduces the art of advanced pastry skills utilized to craft specialty items such as chocolates, candies and confections, marzipan and pastillage sculpture, and petit fours.
Prerequisites: CUAR 145.
Fees: Yes.

CUAR 156 Nutrition for the Hospitality Professional 3 Credits
Fundamentals of nutrition as they apply to the food service industry.

CUAR 159 Wine, Spirits and Beers 3 Credits
Explores production, marketing and service of wines, spirits and beers from around the world. Includes local and regional craft wine, spirit and beer production. Covers profitability, marketing, federal and local laws, identification of equipment, glassware, and staffing. Service Safe Alcohol certification exam administered.
Fees: Yes.

CUAR 160 Cake Decorating 5 Credits
Application of theory and production techniques required to prepare and serve foods that emphasize the importance of a healthy diet, promote beneficial eating habits, and encourage the personal enjoyment of cooking and eating.

CUAR 179 Wines, Spirits and Beers 3 Credits
Explores service related skills common to the ‘front of the house’ through hands-on training in a restaurant dining room.
Prerequisites: Permission of instructor.
Corequisites: CUAR 233.

CUAR 179 Wines, Spirits and Beers 3 Credits
Explores production, marketing and service of wines, spirits and beers from around the world. Includes local and regional craft wine, spirit and beer production. Covers profitability, marketing, federal and local laws, identification of equipment, glassware, and staffing. Service Safe Alcohol certification exam administered.
Fees: Yes.

CUAR 180 Fundamentals of Healthy Cooking 3 Credits
Application of theory and production techniques required to prepare and serve foods that emphasize the importance of a healthy diet, promote beneficial eating habits, and encourage the personal enjoyment of cooking and eating.
Fees: Yes.

CUAR 190 Dining Room Management 4 Credits
Prepares students in the production of complete meals to order. Emphasizes cooking ‘center of the plate’ items such as meat, fish, seafood, and poultry in a commercial kitchen.
Prerequisites: CUAR 125, CUAR 129, and CUAR 145, or permission of instructor.
Corequisites: CUAR 190.
Fees: Yes.

CUAR 215 Fundamentals of Health and Wellness 3 Credits
Provides an introduction to the science of nutrition, focusing on energy balance, macronutrients, water, vitamins and minerals.
Prerequisites: CUAR 145.
Fees: Yes.

CUAR 233 Advanced Line Prep and Cookery 4 Credits
Preparation of complete meals to order. Emphasizes cooking ‘center of the plate’ items such as meat, fish, seafood, and poultry in a commercial kitchen.
Prerequisites: CUAR 125, CUAR 129, and CUAR 145, or permission of instructor.
Corequisites: CUAR 190.
Fees: Yes.

CUAR 220 Fundamentals of Healthy Cooking 3 Credits
Application of theory and production techniques required to prepare and serve foods that emphasize the importance of a healthy diet, promote beneficial eating habits, and encourage the personal enjoyment of cooking and eating.
Fees: Yes.

CUAR 260 Advanced Line Prep and Cookery 5 Credits
Prepares students in the production of complete meals to order. Emphasizes cooking ‘center of the plate’ items such as meat, fish, seafood, and poultry in a commercial kitchen.
Prerequisites: CUAR 125, CUAR 129, and CUAR 145, or permission of instructor.
Corequisites: CUAR 190.
Fees: Yes.

CUAR 236 Advanced Baking 3 Credits
Prepares students in the production of breads and pastries, dessert garnishes and accompanying sauces, and specialty dessert products.
Prerequisites: CUAR 145.
Fees: Yes.
CUAR 245 International Cuisine 3 Credits
Introduces full meal preparation of a variety of international cuisines. Ethnic ingredients and meals from the Mediterranean, Latin America, Southeast Asia, India, China, and Japan will be introduced.
Prerequisites: CUAR 101, CUAR 125, and CUAR 129.
Fees: Yes.

CUAR 251 Advanced Garde Manger and Hors D'Oeuvres 3 Credits
Introduces the student to a broad array of both hot and cold hors d’oeuvres and appetizers. Students learn to prepare various ethnic hors d’oeuvres including tapas, antipasta, sushi, classical and contemporary canapes as well as show mirrors and platters.
Prerequisites: CUAR 101 and CUAR 125.
Fees: Yes.

CUAR 255 Supervision in the Hospitality Industry 3 Credits
Skills necessary for creating a goal-oriented environment utilizing management principles in the hospitality industry.

CUAR 256 Cost Controls 3 Credits
Explores the costs usually found in the food service industry and the techniques used to control them.

CUAR 265 Purchasing for the Hospitality Industry 3 Credits
Explores the purchasing, selection, and procurement of food and supplies in the hospitality industry.
Fees: Yes.

CUAR 269 Dietary Baking 3 Credits
Examines techniques and equipment used to produce high quality bakery products that address the issue of common food allergens and intolerances.
Prerequisites: CUAR 145 and CUAR 156.
Fees: Yes.

CUAR 271 Techniques of Culinary Competition - Hot Food 3 Credits
Fundamental principles and technical skills, required to engage in hot food culinary competition. Precision in the areas of knife skills, mise en place, recipe development, perfect execution of culinary technique, and exploration of in-depth organizational processes.

CUAR 271A Advanced Techniques of Culinary Competition - Hot Food 3 Credits
Fundamental principles and technical skills required to engage in hot food culinary competition. Precision in knife skills, mise en place, recipe development, perfect execution of culinary technique, and exploration of in-depth organizational processes. Advanced technique of culinary competition designed for culinary teams advancing to the next level of competition.

Prerequisites: CUAR 271.

CUAR 272 Techniques of Culinary Competition - Cold Food 3 Credits
Fundamental principles and technical skills required to engage in cold food culinary competition. Expose students to theories and principles of cold food show platters, elementary glazing techniques, hot food shown cold and other cold food competition concepts.

CUAR 272A Advanced Techniques of Culinary Competition - Cold Food 3 Credits
Fundamental principles and technical skills required to engage in cold food culinary competition. Precision in knife skills, mise en place, recipe development, perfect execution of culinary techniques, and exploration of in-depth organizational processes. Advanced techniques of culinary competition for culinary teams advancing to the next level of competition.

Prerequisites: CUAR 272.

CUAR 278 Internship 1-6 Credits
Places students in an actual work situation where they participate in the operation of a foodservice establishment. Course may be taken multiple times up to maximum of 10 credit hours.

CUAR 296 Topics 1-5 Credits
Course may be taken multiple times up to maximum of 15 credit hours.
Fees: Yes.

Dance (DANC)

DANC 115 Dance Appreciation-GTAH 13 Credits
Exploration of the roots and trends of the art of dance from the primitive to the contemporary. Introduction of esthetic guidelines for looking at dance as it relates to America and the world.

Essential Learning Categories: Fine Arts
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

DANC 154 Dance Team 1 Credit
Participation on the Mavettes Dance Team at the freshman standing level. Audition or permission of instructor required. Only one credit hour of DANC 154 counts as a KINA activity credit.

DANC 156 Dance Performance 1 Credit
Student participation in the production of a dance supervised by faculty or guest artist. Students must audition.
Corequisites: one technique class.
Course may be taken 2 times for credit.

DANC 160 Beginning Ballet 1 Credit
Includes alignment, balance, endurance, flexibility, and strength in elementary technical proficiency.

DANC 169 Beginning Modern Dance 1 Credit
Includes alignment, balance, endurance, flexibility, and strength in elementary technical proficiency.

DANC 174 Beginning Jazz Dance 1 Credit
Including terminology, theory, history & critical analysis of the Art Form.

DANC 177 Beginning Tap Dance 1 Credit
Including terminology, theory, history & critical analysis of the Art Form.

DANC 180 Beginning Hip Hop Dance 1 Credit
Fundamentals of Hip Hop, including alignment, balance, endurance, flexibility, and strength, in elementary technical proficiency.
Course may be taken 2 times for credit.

DANC 181 Ballet I 2 Credits
Beginning ballet technique for students intending to progress to an intermediate level.
Course may be taken 2 times for credit.

DANC 182 Jazz I 2 Credits
Beginning jazz technique for students intending to progress to an intermediate level.
Course may be taken 2 times for credit.

DANC 183 Modern I 2 Credits
Beginning modern technique for students intending to progress to an intermediate level.
Course may be taken 2 times for credit.

DANC 184 Tap I 2 Credits
Beginning tap technique for students intending to progress to an intermediate level.
Course may be taken 2 times for credit.
DANC 196 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

DANC 219 Ballroom Dance 2 Credits

DANC 225 The Healthy Dancer 3 Credits
Exploration into conditioning, nutrition, injury prevention, basic anatomy and motivational techniques unique to the dance student.

DANC 230 Modern IIA2 Credits
Intermediate modern dance technique.
Prerequisites: DANC 169 or permission of instructor.
Course may be taken 2 times for credit.

DANC 231 Modern IIB2 Credits
Intermediate modern dance technique.
Prerequisites: DANC 230 or permission of instructor.
Course may be taken 2 times for credit.

DANC 232 Jazz IIA2 Credits
Intermediate jazz dance technique.
Prerequisites: DANC 174, or permission of instructor.
Course may be taken 2 times for credit.

DANC 233 Jazz IIB2 Credits
Intermediate jazz dance technique.
Prerequisites: DANC 232 or permission of instructor.
Course may be taken 2 times for credit.

DANC 234 Ballet IIA2 Credits
Intermediate ballet technique.
Prerequisites: DANC 160, or permission of instructor.
Course may be taken 2 times for credit.

DANC 235 Ballet IIB2 Credits
Intermediate ballet technique.
Prerequisites: DANC 234 or permission of instructor.
Course may be taken 2 times for credit.

DANC 236 Tap IIA2 Credits
Intermediate tap dance technique.
Prerequisites: DANC 177 or permission of instructor.
Course may be taken 2 times for credit.

DANC 237 Tap IIB2 Credits
Intermediate tap dance technique.
Prerequisites: DANC 236 or permission of instructor.
Course may be taken 2 times for credit.

DANC 250 Dance Improvisation 2 Credits
Introduction to and application of basic theories of dance improvisation.

DANC 254 Dance Team 1 Credit
Participation on the Mavettes Dance Team at the sophomore standing level.

DANC 255 Choreography 3 Credits
Introduction to and application of basic theories of choreography, including principles of critical analysis.
Prerequisites: DANC 250 or permission of instructor.

DANC 256 Dance Performance 1 Credit
Student participation in the production of a dance supervised by faculty or guest artist. Students must audition.
Corequisites: one technique class.
Course may be taken 2 times for credit.

DANC 280 Hip Hop II 1 Credit
Intermediate theory and practice of Hip Hop.
Prerequisites: DANC 180 or permission of instructor.

DANC 290 Choreography Practicum I 1 Credit
Student practice in choreography and producing an original dancework. May be repeated once for credit.
Course may be taken 2 times for credit.

DANC 296 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

DANC 310 Dance Pedagogy 3 Credits
Theory and application of methods of teaching techniques.
Prerequisites: 4 semester hours of dance technique (ballet, jazz, modern and/or tap).

DANC 315 History and Philosophy of Dance I 3 Credits
Cultural and historical exploration of dance, from its primitive roots to the 20th Century.
Prerequisites: ENGL 112.

DANC 316 History and Philosophy of Dance II 3 Credits
Cultural, historic, and aesthetic exploration of dance in the 20th Century.
Prerequisites: DANC 315.

DANC 328 Music Analysis for Dance 3 Credits
Exploration of rhythmic structure inherent in dance, including music notation, rhythmic coordination as it relates to dance and musicality of the body.
Prerequisites: Permission of instructor.

DANC 330 Modern IIA2 Credits
Intermediate to advanced modern dance technique.
Prerequisites: Permission of instructor.
Course may be taken 2 times for credit.

DANC 331 Modern IIB2 Credits
Intermediate to advanced modern dance technique.
Prerequisites: DANC 330 or permission of instructor.
Course may be taken 2 times for credit.

DANC 332 Jazz IIA2 Credits
Intermediate to advanced jazz dance technique.
Prerequisites: Permission of instructor.
Course may be taken 2 times for credit.

DANC 333 Jazz IIB2 Credits
Intermediate to advanced jazz dance technique.
Prerequisites: Permission of instructor.
Course may be taken 2 times for credit.

DANC 334 Ballet IIA2 Credits
Intermediate to advanced ballet technique.
Prerequisites: Permission of instructor.
Course may be taken 2 times for credit.

DANC 335 Ballet IIB2 Credits
Intermediate to advanced ballet technique.
Prerequisites: Permission of instructor.
Course may be taken 2 times for credit.

DANC 336 Tap IIIA2 Credits
Intermediate to advanced tap dance technique.
Prerequisites: Permission of instructor.
Course may be taken 2 times for credit.

DANC 337 Tap IIIIB2 Credits
Intermediate to advanced tap dance technique.
Prerequisites: Permission of instructor.
Course may be taken 2 times for credit.

DANC 354 Dance Team 1 Credit
Participation on the Mavettes Dance Team at the junior standing level.
DANC 355 Advanced Choreography 3 Credits
Advanced investigation and application of theories of choreography, including critical analysis of the art form.
Prerequisites: DANC 255 or permission of instructor.

DANC 356 Dance Performance 1 Credit
Student participation in the production of a dance work supervised by faculty or guest artist.
Prerequisites: by audition, DANC 256, or permission of instructor.
Corequisites: one technique class.
Course may be taken 2 times for credit.

DANC 390 Choreography Practicum II 1 Credit
Student practice in choreography and producing an original dance work. May be repeated once for credit.
Prerequisites: DANC 290 or permission of instructor.
Course may be taken 2 times for credit.

DANC 395 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

DANC 396 Topics: 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

DANC 430 Modern IVA2 Credits
Intermediate/advanced modern dance technique.
Prerequisites: Permission of instructor.
Course may be taken 2 times for credit.

DANC 431 Modern IVB2 Credits
Advanced modern dance technique.
Prerequisites: Permission of instructor.
Course may be taken 2 times for credit.

DANC 432 Jazz IVA2 Credits
Advanced jazz dance technique.
Prerequisites: Permission of instructor.
Course may be taken 2 times for credit.

DANC 433 Jazz IVB2 Credits
Intermediate to advanced jazz dance technique.
Prerequisites: Permission of instructor.
Course may be taken 2 times for credit.

DANC 434 Ballet IVA2 Credits
Intermediate to advanced ballet technique.
Prerequisites: Permission of instructor.
Course may be taken 2 times for credit.

DANC 435 Ballet IVB2 Credits
Advanced ballet technique.
Prerequisites: Permission of instructor.
Course may be taken 2 times for credit.

DANC 436 Tap IVA2 Credits
Intermediate to advanced tap dance technique.
Prerequisites: Permission of instructor.
Course may be taken 2 times for credit.

DANC 437 Tap IVB2 Credits
Advanced tap dance technique.
Prerequisites: Permission of instructor.
Course may be taken 2 times for credit.

DANC 454 Dance Team 1 Credit
Participation on the Mavettes Dance Team at the senior standing level.

DANC 456 Dance Performance 1 Credit
Student participation in the production of a dance work supervised by faculty or guest artist.
Prerequisites: by audition, DANC 356, or permission of instructor.
Corequisites: one technique class.
Course may be taken 2 times for credit.

DANC 490 Choreography Practicum III 1 Credit
Student participation in choreography and producing an original dance work. May be repeated once for credit.
Prerequisites: DANC 390 or permission of instructor.
Course may be taken 2 times for credit.

DANC 494 Senior Dance Capstone 3 Credits
Exploration of and preparation for dance professions/careers for upper division dance students.

DANC 495 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

DANC 496 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

Digital Filmmaking (FILM)

FILM 110 Film Expression 3 Credits
Critical examination of the nature and structure of motion picture expression. Concentrates on directors’, editors’, and cinematographers’ use of various storytelling and visual techniques.

FILM 115 Cinema Design Tools 3 Credits
Exploration of Digital SLR camera use, raster photo-editing software, and vector drawing software for narrative video production.

FILM 120 Film Script Analysis 3 Credits
Study of film scripts by critically focusing on story techniques and analytical methods of summarizing, describing, interpreting, discussing and evaluating story narrative.

FILM 125 Production Drawing & Design 3 Credits
Foundational methods of digital drawing to create characters and scenery for filmmaking concept art and previsualization.

FILM 130 Short-Form Screenwriting 3 Credits

FILM 135 Cinema Editing Aesthetics 3 Credits
Foundations of video editing theory. Find a personal editorial voice by uncovering the building blocks, personal decisions, and practices that make up the craft of narrative editing.

FILM 140 Commercial & Corporate Production 3 Credits
Introduction to basic digital single-lens reflex camera cinematography theory and techniques through commercial and corporate collaborative production.

FILM 143 Cinema Lighting 3 Credits
Theoretical examination of cinematic lighting techniques for interior, exterior, and location settings. Analyze cinematic lighting examples to plan, design, and implement their re-creation.
Terms Typically Offered: Spring.

FILM 145 Commercial & Corporate Video Editing 3 Credits
Basic editing, manipulating and delivery of narrative video. Explore nonlinear editing techniques including media management, editing tools, titles, motion control, and transitions.
FILM 150 Episodic Screenwriting3 Credits
Practical experience of writing realizable television and web series scripts. Emphasis on workshopping a pilot episode and creating the ancillary materials required to produce and market it.
Terms Typically Offered: Spring.

FILM 155 Commercial Audio Design3 Credits
Principles and application of basic audio recording and mixing principles by enhancing soundtracks for media productions.
Terms Typically Offered: Spring.

FILM 160 Cinema Previsualization3 Credits
Preproduction development in a digital environment. Includes traditional storyboarding and modern techniques using 3D or photo manipulation software.

FILM 165 Cinema Production Design3 Credits
Determination of emotional content of artistic choices in set design, locations, props, wardrobe and makeup through script and character analysis techniques, the research and previsualization process, and color theory.
Terms Typically Offered: Spring.

FILM 170 Short-Form Production4 Credits
Basic techniques and tools of short-form video production. Use narrative visual storytelling components and expressive visual elements.
Terms Typically Offered: Spring.

FILM 175 Short-Form Video Editing3 Credits
Intermediate short-form video editing. Refine workflows and production pipelines, advanced audio integration, transitions, and motion graphics.
Terms Typically Offered: Spring.

FILM 210 Cinema Production Management3 Credits
Processes and techniques of film and television producing. Predict, calculate, and estimate for insurance requirements, unions and guilds. Use basic accounting practices to complete a budget and schedule.
Terms Typically Offered: Fall.

FILM 220 Cinema Audio Design3 Credits
Advanced cinematic audio recording techniques. Practice location recording, Foley, looping/ADR, sound effects layering, synchronization techniques, and surround sound mixing.
Terms Typically Offered: Fall.

FILM 225 Cinema Capstone I3 Credits
First part of a two-semester sequence for the Cinema Capstone. Collaborate with Production Design students during a production's preproduction. Create a production's marketing plan.
Terms Typically Offered: Fall.

FILM 226 Technical Capstone I3 Credits
First part of a two-semester sequence for the Technical Capstone. Collaborate with Writing/Directing students in the preproduction process. Help create a production marketing plan.
Terms Typically Offered: Fall.

FILM 230 Episodic Production4 Credits
Continued collaborative development of advanced learn-by-doing productions. Develop and demonstrate the skills necessary to make effective and successful TV or web series.
Terms Typically Offered: Fall.

FILM 240 Digital Cinematic Effects3 Credits
Digital cinematic effects development in the post-production environment. Analyze style and emotional aesthetic and learn to support story by synthesizing video elements.
Terms Typically Offered: Fall.

FILM 245 Digital Cinematic Effects4 Credits
Further exploration of advanced digital editing techniques. Edit a final episodic narrative production. Master collaborative workflows, advanced audio production, and special effects.
Terms Typically Offered: Fall.

FILM 250 Episodic Video Editing3 Credits
Second part of a two-semester sequence for the Technical Capstone. Collaborate with Writing/Directing students on either a short-form narrative, corporate, or series production.
Prerequisites: FILM 225.
Terms Typically Offered: Spring.

FILM 260 Freelancing for Creatives3 Credits
Examination of self-employment. Explore networking, financing, basic business law, insurance, intellectual property rights, government regulations, time management, record keeping, taxes, and work-life balance.
Terms Typically Offered: Spring.

FILM 270 Cinema Capstone II4 Credits
First part of a two-semester sequence for the Cinema Capstone. Collaborate with Production Design students during shooting, post, and presentation of either a narrative, corporate, or series production.
Prerequisites: FILM 226.
Terms Typically Offered: Spring.

FILM 271 Technical Capstone II3 Credits
Second part of a two-semester sequence for the Technical Capstone. Collaborate with Writing/Directing students on either a short-form narrative, corporate, or series production.
Prerequisites: FILM 225.
Terms Typically Offered: Spring.

Early Childhood Teaching -Special Ed (ECSE)

ECSE 320 Learner Development and Individual Differences3 Credits
Explore child development and individual differences to respond to the unique and individualized needs of young children with exceptionalities. Field experience required.
Prerequisites: Admission to the Teacher Education Program.

ECSE 410 Building Family and Community Partnerships1 Credit
Introduction to the concept of family systems, the impact of children with diverse needs upon the family system, and the role of the educator in partnering with families and the community.
Prerequisites: Admission into the Teacher Education program.

ECSE 430 Instructional Strategies for Inclusion and Intervention, Birth-8 Years3 Credits
Exploration of evidence-based instructional strategies, focused on communication and sensory processing, to advance learning of young children with exceptionalities.
Prerequisites: EDUC 340, EDUC 374, and ECSE 320.

ECSE 435 Assessment and Evaluation of the Young Child, Birth-8 Years3 Credits
Exploration and application of technically sound formal and informal assessments that minimize bias, and measurement principles and practices to evaluate and guide educational decisions through collaboration with colleagues and families.
Prerequisites: EDUC 340 and ECSE 320.

ECSE 450 Individual Behavior Support and Guidance with Young Learners3 Credits
Exploration of behavioral theories and their application to individual and classroom management of young learners with an emphasis on the principles of applied behavior analysis.
Prerequisites: EDUC 340, EDUC 374, and ECSE 320.
ECON 201 Principles of Macroeconomics—GTSS13 Credits
Basic concepts of economics. Courses must be taken in sequence and are not open to freshmen.

ECON 202 Principles of Microeconomics—GTSS13 Credits
Basic concepts of economics. Courses must be taken in sequence and are not open to freshmen.

ECON 301 Labor Economics3 Credits
Survey of market wage and employment determination, wage differentials and discrimination, the value of human capital, and the role of government and unions in the labor market. Counts as management course for BBA candidates.

ECON 310 Money and Banking3 Credits
Monetary, credit, and banking systems in the United States. Counts as management course for BBA candidates.

ECON 312 Economic History of the United States3 Credits
Economic development of the United States and the nation’s economic institutions from the colonial period to the present.

ECON 320 History of Economic Ideas3 Credits
Development of economic analysis, thought, theories, and doctrines from the ancient world to recent times.

ECON 342 Intermediate Macroeconomic Theory3 Credits
Factors determining the level and rate of growth of GDP, the inflation rate, and the employment rate. Policies that have been (or may be) used to influence these variables, and empirical evidences on the relationships among variables are also studied.

ECON 343 Intermediate Microeconomic Theory3 Credits

ECON 395 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

ECON 396 Topics1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

ECON 401 Economic Organization and Public Policy3 Credits
Political economy of economic organization and public policy including analysis of the structure/conduct dimensions of industry and government institutions and their effects on resource allocation, income distribution, and economic performance. Antitrust, regulation, and other policies are treated concurrently. Counts as a management course for BBA candidates.

ECON 410 Public Sector Economics3 Credits
Political economy of government finance including analysis of the effects of government revenue and expenditure policies on resource allocation, income distribution, and economic performance. Counts as a management course for BBA candidates.

ECON 415 Econometrics3 Credits
Application of advanced statistical methods to economic and business problems. Includes multiple regression analysis. Sophisticated cross sectional models such as instrumental variable, probit, and tobit. Time series topics such as forecasting, autoregressive models, vector autoregressions, cointegration, and some panel methods.

ECON 420 International Economics3 Credits
International trade theory and policy such as balance of payments analysis, international investment flows, and the position of the dollar in foreign exchange transactions.

ECON 495 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

ECON 496 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ECON 505 Advanced Econometrics3 Credits
Application of advanced statistical methods to economic and business problems. Includes multiple regression analysis. Sophisticated cross sectional models such as instrumental variable, probit, and tobit. Time series topics such as forecasting, autoregressive models, vector autoregressions, cointegration, and some panel methods. Demonstration of mastery of material through graduate level projects, writing, and presentations.

ECON 530 Managerial Economics3 Credits
The focus of this course is the application of economic theory and its tools to everyday business activities. Topics to be covered include the analytical tools of economics, macro and micro economic theory, and factors that influence demand.

Education (EDUC)

EDUC 100 Introduction to Libraries3 Credits
Provides a general overview of libraries and their roles in schools and the community. The evolving role of libraries will be explored in the context of professional/school settings, different types of libraries, and the evolution of information, access, and distribution in a digital age.
EDUC 101 Information Literacy3 Credits
A theoretical approach to the flow of information and a practical introduction to the skills necessary to navigate information systems. Print and electronic resources; legal, economic, social and public aspects of information resources; strategies for critical evaluation of information resources; library services and resources.

EDUC 115 What It Means To Be An Educator1 Credit
Overview of the teacher education program, profession and what it means to be an educator. Introduction to social, legal, historical, political, theoretical, and philosophical foundations of education. Course time will include school and educational services visitations. Please note: Students must earn a grade of A or B in this class if they desire to be admitted to the Teacher Education program.
Prerequisites: ENGL 111.

EDUC 150 American Education: Past, Present, and Future3 Credits
An honors course that includes an historical view of public and private education; current challenges; demographic, sociological, technological, and economic trends and their effects on education; educational reform; comparative education systems; and future directions for public and private schooling in America.

EDUC 196 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

EDUC 215 Teaching as a Profession1 Credit
Overview of the teacher education program and profession. Introduction to schools, curriculum and instruction, accountability, learning environments, developing professionalism, and theoretical and philosophical foundations of education. Course time will include school and educational services visitations. This is an on-campus course that is web-enhanced, meaning we meet face-to-face each week AND we have a web-based course site (D2L) to support the classroom environment. Please note: Students must earn a grade of A or B in this class if they desire to be admitted to the Teacher Education program.
Prerequisites: EDUC 115.

EDUC 301 Emergent Literacy for Early Childhood3 Credits
Exploration of principles, methods, and materials for teaching young children language and literacy through a play-based integrated curriculum from birth to kindergarten. Survey of current research in emergent language and literacy including language development and acquisition, family and community roles, teaching and learning strategies, literature in the curriculum and ongoing assessment. Includes a minimum of 20 hours of field experience.
Prerequisites: EDUC 340 and Admission to Teacher Education Program.

EDUC 311 Creative and Physical Expressions for Children3 Credits
Facilitation of children's creative and physical expression and problem solving in music, art, drama, games, movement, and dance.
Prerequisites: Admission to the Teacher Education Program.

EDUC 340 Pedagogical and Assessment Knowledge for Teachers: Early Childhood, Birth - 8 years3 Credits
Exploration of age/grade level teaching strategies, motivation principles, informal and formal assessments, planning strategies, and classroom management techniques. Includes a minimum of 20 hours of field experience.
Prerequisites: Admission to the Teacher Education Program or permission of instructor.

EDUC 341 Pedagogy and Assessment: K-6/Elementary3 Credits
Exploration of age/grade level teaching strategies, motivation principles, informal and formal assessments, planning strategies, and classroom management techniques. Includes a minimum of 20 hours of field experience.
Prerequisites: Admission to the Teacher Education Program. Corequisites: EDUC 343.

EDUC 342 Pedagogy and Assessment: Secondary and K-123 Credits
Exploration of age/grade level teaching strategies, motivation principles, informal and formal assessments, planning strategies, and classroom management techniques. Includes a minimum of 20 hours of field experience.
Prerequisites: Admission to the Teacher Education Program. Corequisites: EDUC 343.

EDUC 343 Teaching to Diversity3 Credits
Study of differences in student development and approaches to learning. Addresses ethnic, linguistic, gender, sexuality, socioeconomic, ability/disability, and community diversity. Includes a minimum of 20 hours of field experience.
Prerequisites: Admission to the Teacher Education Program. Corequisites: EDUC 340 or EDUC 341 or EDUC 342.

EDUC 374 Exceptional and English Language Learners in the Inclusive Classroom3 Credits
Study of exceptionalities and English Language Learner (ELL) characteristics. The use of strategies for identifying, adapting, accommodating, and/or modifying the learning environment to meet the various needs. Includes intellectually challenged, learning disabled, social/emotional disorders, physically disabled, gifted, and English language learners.
Prerequisites: EDUC 341 or EDUC 342, and EDUC 343. May be taken concurrently with EDUC 340.

EDUC 378 Technology for K-12 Educators1 Credit
Digital technology's role in the teaching/learning process. Engaging technology in the classroom. Topics include New Literacies, Web 2.0 tools, e-books, interactive presentation tools, et al.
Prerequisites: Admission to Teacher Education Program.

EDUC 395 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.
EDUC 396 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

EDUC 440 Methods of Teaching Language and Literacy: EC3 Credits
Survey of current research in early/emergent language and literacy, including language development and acquisition, family and community roles, teaching and learning strategies, literature in the curriculum, and ongoing assessment in instruction. Includes a minimum of 40 hours of field experience.
Prerequisites: Admission to the Teacher Education Program; EDUC 340 or EDUC 341.
Terms Typically Offered: Fall, Spring.
EDUC 441 Methods of Teaching Language and Literacy: Elementary3 Credits
Exploration of student literacy development in multiple literacies, with a focus on fluency and comprehension. Study and application of instructional strategies for the reading/writing processes, vocabulary development, spelling development, comprehension strategies, reading and writing workshops, literacy assessment, and integration across the content areas. Field placements will be in a lab school environment for two mornings of school per week. Includes a minimum of 60 hours field experience.
Prerequisites: Admission to the Teacher Education Program, EDUC 340 and/or EDUC 341 and EDUC 343.

EDUC 442 Integrating Literacy Across the Curriculum: Secondary and K-12 Art3 Credits
Exploration of multiple forms of student literacies. Study and application of instructional strategies for various literary genres across the middle school and high school curriculum with a focus in philosophical and theoretical perspectives from multicultural texts. Candidates develop a fully integrated unit to implement in field study. Includes a minimum of 60 hours field experience.
Prerequisites: Admission to the Teacher Education Program, EDUC 342, and EDUC 343.
Terms Typically Offered: Fall, Spring.

EDUC 451 Methods of Teaching Mathematics: Early Childhood/Elementary3 Credits
Prepares students to teach mathematics to elementary age students. Focus on major concepts, procedures, and reasoning processes that define number systems and number sense, geometry, measurement, statistics and probability, and algebra. Theoretical and practical approaches support learning about standards, content, delivery, and assessment. Field placements will be in a lab school environment for three afternoons of school per week. Includes a minimum of 60 hours field experience.
Prerequisites: Admission to the Teacher Education Program, EDUC 340 and/or EDUC 341, EDUC 343, MATH 105, MATH 205, and MATH 301.
Corequisites: EDUC 471.

EDUC 461 Methods of Teaching Science and Social Studies: Early Childhood/Elementary3 Credits
Study and application of content standards in science, health, civics, geography, history, and economics for elementary age students. Develops teaching proficiency and an understanding of integration of these subjects across the content areas. Field experiences are incorporated into the math/literacy block during three school days per week.
Prerequisites: Admission to the Teacher Education Program, EDUC 340 and/or EDUC 341, EDUC 343.
Corequisites: EDUC 461.

EDUC 471 Educational Assessment for the K-12 Educator1 Credit
Current principles of assessment in the K-12 classroom. Includes selecting, developing, and evaluating a variety of assessment methods/types in the various content areas. Discuss how to analyze, interpret, and communicate assessment results with administrators, families, and students for the purposes of making instruction/curricular decisions.
Prerequisites: EDUC 341 or EDUC 342, and EDUC 343.
Corequisites: EDUC 441, EDUC 451, EDUC 461, or permission of instructor.

EDUC 475 Classroom Management for K-12 Educators1 Credit
Effective classroom management. Establish productive classroom climate. Applications of management techniques to help students become responsible for their behaviors and choices. Student motivation, positive student-teacher relationships, effective partnerships between parents and school. Includes strategies to minimize and prevent classroom and behavior management problems as well as time management techniques.
Prerequisites: EDUC 342 or EDUC 440.
Terms Typically Offered: Fall, Spring.

EDUC 495 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

EDUC 496 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

EDUC 497A Methods of Teaching Secondary English2 Credits
Theory and practice of teaching English language arts in middle and high schools. Current strategies, programs, materials, and media for the development of curriculum in reading comprehension, language, linguistics, comprehension, and rhetoric. Lesson preparation and presentation required.
Prerequisites: Admission to Teacher Education Program.
Corequisites: EDUC 442 and EDUC 497 or EDUC 497/EDUC 497D/or EDUC 497E as required by degree.
Course may be taken multiple times up to maximum of 15 credit hours.

EDUC 497B Methods of Teaching Secondary Social Sciences2 Credits
Theory and practice of teaching history and the social sciences in middle and high schools. Current strategies, programs, materials, and media for the development of curriculum in reading comprehension, language, linguistics, comprehension, and rhetoric. Lesson preparation and presentation required.
Prerequisites: Admission to Teacher Education Program.
Corequisites: EDUC 442 and EDUC 497, or EDUC 342 and EDUC 343.
Terms Typically Offered: Fall.

EDUC 497C Methods of Teaching Secondary Mathematics2 Credits
Theory and practice of teaching mathematics in middle and high schools. Current strategies, programs, materials, and media for the development of curriculum in arithmetic, basic algebra, functions, graphing, probability, statistics, and integrated math. Lesson preparation and presentation required.
Prerequisites: Admission to the Teacher Education Program.
Corequisites: EDUC 442 and EDUC 497, or EDUC 342 and EDUC 343.
Terms Typically Offered: Fall.
EDUC 497D Methods of Teaching Secondary Science 2 Credits
Theory and practice of teaching science in middle and high schools. Current strategies, programs, materials, and media for the development of curriculum in: scientific methodology, techniques, and history; physical, life, and earth sciences; and science and technology. Lesson preparation and presentation required.
Prerequisites: Admission to Teacher Education Program.
Corequisites: EDUC 442 and EDUC 497, or EDUC 342 and EDUC 343.
Terms Typically Offered: Fall.

EDUC 497E Methods of Teaching Secondary Spanish 2 Credits
Prerequisites: Admission to Teacher Education Program.
Corequisites: EDUC 442 and EDUC 497, or EDUC 342 and EDUC 343.
Terms Typically Offered: Fall.

EDUC 499A Teaching Internship and Colloquia: K-2 Credits
Full-time supervised teaching experience for eight weeks in an inclusive classroom designed to allow the intern the opportunity to apply standards-based education and theories and philosophies acquired in professional education coursework. Provides support in teaching and learning of K-2 students.
Prerequisites: All program and degree requirements must be successfully completed.

EDUC 499B Teaching Internship and Colloquia: 3-6 Credits
Available for students who are pursuing ECE/ELED licensure and standards-based education: an eight-week experience. Colloquiums are included and required.
Prerequisites: Formal admission to the Teacher Education Program; EDUC 340 and/or EDUC 341, EDUC 343, EDUC 440 and/or EDUC 441, EDUC 451; all other course work for bachelor’s degree completed; 2.75 cumulative GPA as well as 2.75 GPA in major and 2.75 GPA in EDUC classes.

EDUC 499C Teaching Internship and Colloquia: Elementary 12 Credits
Full-time (40 hrs min/week) supervised teaching experience designed to allow the intern the opportunity to apply standards-based education and theories and philosophies acquired in professional education coursework. Three required colloquia on Thursday evenings are included during this 15-week experience. Students must begin internship a minimum of one week prior to the beginning of the district school semester, regardless of the Colorado Mesa University start date.
Prerequisites: Formal admission to the Teacher Education Program; EDUC 341, EDUC 343, EDUC 441, EDUC 451, EDUC 461 and all other course work for bachelor’s degree completed; as well as 2.8 GPA in major and 2.8 GPA in EDUC classes.

EDUC 499D Teaching Internship and Colloquia: Elementary for K-126 Credits
Full-time (40 hrs min/week) supervised teaching experience designed to allow the intern the opportunity to apply standards-based education and theories and philosophies acquired in professional education coursework. Three required colloquia on Thursday evenings are included during this 15-week experience. Students must begin internship a minimum of one week prior to the beginning of the district school semester, regardless of the Colorado Mesa University start date.
Prerequisites: Formal admission to the Teacher Education Program; EDUC 342, EDUC 343, EDUC 442, EDUC 497, and EDUC 497A, EDUC 497B, EDUC 497C, EDUC 497D, or EDUC 497E as appropriate for content major; all other course work for bachelor’s degree completed; 2.8 cumulative GPA as well as 2.8 GPA in major and 2.8 GPA in EDUC classes.

EDUC 499H Teaching Internship and Colloquia: Secondary for K-126 Credits
Supervised teaching experience at the secondary level for students who are pursuing K-12 licensure and standards-based education. Several colloquia are included in the eight-week experience.
Prerequisites: Formal admission to the Teacher Education Program; EDUC 342, EDUC 343, EDUC 442 (except Music and Kinesiology majors); appropriate content area methods course/s; all other course work for bachelor’s degree completed; 2.8 cumulative GPA as well as 2.8 GPA in major and 2.8 GPA in EDUC classes.

EDUC 500 Culture and Pedagogy 3 Credits
This course centers on Pedagogy that explores the relationships between culture and learning as well as teacher ideology and belief systems. Examines critical pedagogy, pedagogies of resistance, and teaching for social justice.
Prerequisites: Current teaching certificate, acceptance into M.A. program, GRE.

EDUC 501 Educational Technology 2 Credits
Historical and conceptual analyses of ways to design, organize, and integrate curricula across subject areas. Review of various instructional design models and fundamental design principles that guide the development of instructional materials. Students will create multimedia materials for incorporation into a final product. Critique of curriculum discourse, process, and product. Teachers’ roles in site-based curriculum and staff development.

EDUC 502 Theory, Design & Assessment of Curriculum 3 Credits
Introduction to instructional design; production and evaluation of computer-based instructional materials and software; selection, evaluation, and use of instructional media.

EDUC 503 Introduction to Educational Research and Design 3 Credits
An analysis of differing orientations to evaluation and research. Emphasis on assumptions, attitudes, and expectation of what constitutes scientific knowledge and explanation; relationship of research orientation, methods of inquiry theory, and practice in both qualitative and quantitative research strategies.
Prerequisites: Current teaching certificate, acceptance into M.A. program, GRE.

EDUC 504 Methods of Teaching English as a Second Language 3 Credits
Theory and practice of teaching English as a second language; techniques for teaching pronunciation, reading and writing in the context of communicative competence; analysis of resources available for ESL.

EDUC 510 ESL Strategies/Content Areas 3 Credits
Strategies for assessing and teaching linguistically-diverse students in the content areas. Topics include role-playing, language dynamics, measurement, relevant research, and classroom practice.
EDUC 535 Internship in ESOL: K-63 Credits
This practicum applies theory and research to the analysis and synthesis of field experiences in ESOL. The practicum will be integrated into a concluding research project that structures students' reflections about their growth and vision as a leader. Through exploration of research and practicum methodology students will frame their capstone project proposals leading to final analysis and presentation following.
Prerequisites: Current teaching certificate, acceptance into M.A. program, GRE.

EDUC 541 Exceptional Learners3 Credits
Study of exceptionality and special education, legislation, individualized education programs (IEP), planning and delivering services, multicultural and bilingual aspects of special education, classifications (impairments), exceptionality and the family. 20-hour field experience required.

EDUC 543 Inclusion Methods/Strategies3 Credits
Collaboration, community and families, legal aspects of placement, classroom management, and methods and strategies used in inclusive classrooms. Each student is required to complete a minimum of 20 field experience hours.

EDUC 545 Internship in ESOL: 7-123 Credits
This practicum applies theory and research to the analysis and synthesis of field experiences in ESOL. The practicum will be integrated into a concluding research project that structures students' reflections about their growth and vision as a leader. Through exploration of research and practicum methodology students will frame their capstone project proposals leading to final analysis and presentation following.
Prerequisites: Current teaching certificate, acceptance into M.A. program, GRE.

EDUC 554 Theories of Second Language Acquisition3 Credits
Research on second language acquisition, differences between first and second language acquisition, application of theories to classroom practice.

EDUC 555 Multicultural Narratives/K-123 Credits

EDUC 556 Assessment in English as a Second Language3 Credits
Assessment of linguistically-diverse students, developing instructional plans for linguistically-diverse students, measurement, relevant research, classroom practice, legal and social responsibilities.

EDUC 570 Classroom Management1 Credit
Applications of advanced classroom management techniques to help students become responsible for their behaviors and choices. Includes student motivation, positive student-teacher relationships, and effective partnerships between parents and school. Includes strategies to minimize and prevent classroom and behavior management problems, as well as time management techniques.
Prerequisites: EDUC 591 and EDUC 586B.

EDUC 580 Secondary Instructional Methods across the Curriculum3 Credits
Advanced theory and practice of differentiated instruction, lesson study design and implementation. Advanced curriculum design, teaching methodology across the curriculum.
Prerequisites: EDUC 591 and EDUC 586B.

EDUC 580A Secondary Instructional Methods for English Language Arts2 Credits
Advanced theory and practice of teaching English language arts in middle and high schools. Current strategies programs, materials, and media for the development of curriculum in reading comprehension, language, linguistics, and rhetoric. Lesson preparation and presentation required.
Prerequisites: EDUC 591 and EDUC 586B.

EDUC 580B Secondary Instructional Methods for Social Studies2 Credits
Advanced theory and practice of teaching history and the social sciences in middle and high schools. Current strategies, programs, materials, and media for the development of curriculum in United States history, world history, government, civics, political science, geography, economics, and behavioral science. Lesson preparation and presentation required.
Prerequisites: EDUC 591 and EDUC 586B.

EDUC 580C Secondary Instructional Methods for Mathematics2 Credits
Advanced theory and practice of teaching mathematics in middle and high schools. Current strategies, programs, materials, and media for the development of curriculum in arithmetic, basic algebra, functions, graphing, probability, statistics, and integrated math. Lesson preparation and presentation required.
Prerequisites: EDUC 591 and EDUC 586B.

EDUC 580D Secondary Instructional Methods for Science2 Credits
Advanced theory and practice of teaching science in middle and high schools. Current strategies, programs, materials, and media for the development of curriculum in scientific methodology, techniques, and history; physical, life, and earth sciences; and science and technology. Lesson preparation and presentation required.
Prerequisites: EDUC 591 and EDUC 586B.

EDUC 580E Secondary Instructional Methods for Spanish2 Credits
Prerequisites: EDUC 591 and EDUC 586B.

EDUC 580F Secondary Instructional Methods for Physical Education3 Credits
Advanced theory and practice of instructional strategies on a practical application level for prospective secondary physical education teachers preparing for entry into student teaching. Current strategies, programs, materials, and media for the development of curriculum in physical education in secondary classrooms. Lesson preparation and presentation required.
Prerequisites: EDUC 591 and EDUC 586A.
Terms Typically Offered: Fall.

EDUC 584 Secondary Literacy Methods Across the Curriculum3 Credits
Advanced exploration of multiple forms of student literacies. Study and application of reading and comprehension strategies for literacy instruction in middle school and high school content areas. Candidates develop a fully integrated unit to implement in field study.
Prerequisites: EDUC 586B and EDUC 591.

EDUC 585 Elementary Integrated Science, Social Studies, and Art Theory and Methodology K-63 Credits
Advanced exploration in the study and application of content standards in science, art, civics, geography, history, and economics for elementary age students. Develops teaching proficiency and an understanding of integration of these subjects across the content areas. Field based with online and classroom components.
Prerequisites: EDUC 591 and EDUC 586A.
EDUC 586A Accommodating Diverse and Exceptional Needs K-63 Credits
Designing, developing, implementing and assessing the effectiveness of instruction differentiated for relevant student diversity and exceptionalities; teaming with specialists; current state and federal guidelines and mandates. This course involves a minimum of twelve hours preparation/online interaction per week.
Prerequisites: Admission to ITL program.
Corequisites: EDUC 591.

EDUC 586B Accommodating Diverse and Exceptional Needs 6-123 Credits
Designing, developing, implementing and assessing the effectiveness of instruction differentiated for relevant student diversity and exceptionalities; teaming with specialists; current state and federal guidelines. This course involves a minimum of twelve hours preparation/online interaction per week.
Prerequisites: Admission to ITL Program.
Corequisites: EDUC 591.

EDUC 587 Elementary Reading and Language Arts Theory and Methodology K-63 Credits
Advanced exploration in designing, developing, implementing and assessing well-aligned, well-differentiated, discipline specific curricula, instruction, assessments and accommodations related to developmental, gender, bilingual, special education unique to K-6 Literacy Education. Field based with online and classroom components.
Prerequisites: EDUC 591 and EDUC 586A.

EDUC 588 Elementary Mathematics Theory and Methodology K-63 Credits
Advanced exploration in designing, developing, implementing, and assessing well-aligned, well-differentiated, discipline-specific curriculum, instruction, assessments and accommodations unique to K-6 Math Education. Field based with online and classroom components.
Prerequisites: EDUC 591 and EDUC 586A.

EDUC 591 ITL 1:Foundations of Curriculum, Instruction, and Assessment 9 Credits
Designing cycles of instruction that are well-aligned (with standards and assessments); well-differentiated (for content, the learner and the situation): and support the development of self-directed learning. Course has online and classroom components. This May/June/July course involves a minimum of six hours of preparation/online interaction per day and participation in twelve ten-hour classroom seminars.
Prerequisites: Admission to the ITL program.
Corequisites: EDUC 586A or EDUC 586B.

EDUC 592A ITL Elementary Pre-Internship 4 Credits
Part-time mentored August-December pre-internship placement to develop accuracy, fluency and complexity in the design, implementation and assessment of instruction through observing, assisting, teaming (90%) and lead teaching (10%).
Prerequisites: EDUC 591 and EDUC 586A.

EDUC 592B ITL Secondary Pre-Internship 4 Credits
Part-time mentored August-December pre-internship placement to develop accuracy, fluency and complexity in the design, implementation and assessment of instruction through observing, assisting, teaming (90%) and lead teaching (10%).
Prerequisites: EDUC 591 and EDUC 586B.

EDUC 592C ITL K-12 Physical Education Pre-Internship 4 Credits
Part-time mentored August-December pre-internship placement to develop accuracy, fluency and complexity in the design, implementation and assessment of instruction through observing, assisting, teaming (90%) and lead teaching (10%) in the Physical Education content area.
Prerequisites: EDUC 591 and EDUC 586A.
Terms Typically Offered: Fall.

EDUC 595 Topics in Teaching 0.5-3 Credits
Course may be taken multiple times up to a maximum of 6 credit hours.

EDUC 596 Topics in the Content Areas 0.5-4 Credits
Course may be taken multiple times up to a maximum of 15 credit hours.

EDUC 599A ITL 3: Directed Teaching: Elementary Education 12 Credits
Continued full-time mentored January-May placement to develop independent professional competence in instructional design, implementation and assessment, and document having had a positive effect on student learning, across fifteen weeks of full-time independent teaching. Two colloquia are an integral part of the experience requirement.
Prerequisites: EDUC 586A, EDUC 585, EDUC 587, EDUC 588, EDUC 591, and EDUC 592A.

EDUC 599B ITL 3: Directed Teaching: Secondary Education 12 Credits
Continued full-time mentored January-May placement to develop independent professional competence in instructional design, implementation and assessment, and document having had a positive effect on student learning, across fifteen weeks of full-time independent teaching. Two colloquia are an integral part of the experience requirement.
Prerequisites: EDUC 570, EDUC 580, EDUC 584, EDUC 586B, EDUC 591, EDUC 592B, and one of the following: EDUC 580A, EDUC 580B, EDUC 580C, EDUC 580D, or EDUC 580E.

EDUC 599C ITL 3: Directed Teaching, Physical Education 12 Credits
Continued full-time mentored January-May Physical Education placement to develop independent professional competence in instructional design, implementation and assessment, and document having had a positive effect on student learning, across sixteen weeks of full-time independent teaching consisting of one eight-week elementary placement and one eight-week secondary placement. One colloquium is an integral part of the experience requirement.
Prerequisites: EDUC 580, EDUC 580F, EDUC 584, EDUC 586A, EDUC 592C, and EDUC 591.
Terms Typically Offered: Spring.

EDUC 600 Master’s in Education Capstone 1 Credit
Synthesis of graduate work that demonstrates a critical connection between theory and practice. Students take a scholarly approach to researching a topic, reviewing literature, and making connections to educational practice. The Capstone project culminates in formal written work and an oral presentation.
Prerequisites: EDUC 503.
Terms Typically Offered: Fall, Spring, Summer.
Education - Career/Tech (EDUT)

EDUT 250 Career and Technical Education in Colorado1 Credit
Explores common elements of Career and Technical Education philosophy and current practices. It details the philosophy of Career and Technical Education (CTE), the federal Carl D. Perkins legislation and related guidelines for CTE, the Colorado Technical Act, national and state regulatory agencies, the CCCS program approval process, enrollment management and advising strategies, relevant local and national issues, and quality assurance principles.

EDUT 251 Secondary CTE Capstone3 Credits
This capstone course in the secondary CTE credentialing sequence offers an in-depth analysis of secondary career and technical student organizations and competitions, the Colorado Technical Act, working with exceptional students, creating and effectively deploying program advisory committees, and an overview of educational and political systems in Colorado. The final project is an analysis of the efficiency with which one's employing school district funds, operates and assesses CTE programs.

EDUT 260 Adult Learning and Teaching3 Credits
Examines the philosophy of community colleges and/or secondary schools and the roles and responsibilities of the faculty member within the college/school community. Introduces basic instructional theories and applications, with particular emphasis on adult learners. Includes syllabus development, learning goals and outcomes, and lesson plans. Emphasizes teaching to a diverse student body, classroom management, assessment and instructional technology.

EDUT 288 Practicum I1 Credit
Provides students with the opportunity to supplement coursework with practical work experience related to their educational program. Students work under the immediate supervision of experienced personnel at the education facility and with the direct guidance of the instructor.

EDUT 289 Capstone1 Credit
Focuses on a demonstrated culmination of learning within a given program of study.

Education - Leadership (EDTL)

EDTL 510 Teacher Leadership I2 Credits
Development of an understanding of the role of instructional leader and change agent in today's PK-12 schools. Development of instructional leader skills and effective instructional knowledge base outlined in the Teacher Leader Model Content Standards. Includes mentoring, coaching, frameworks for effective teaching, engaging students, collegial conversations, constructive feedback systems, Professional Learning Communities.

EDTL 511 Teacher Leadership II2 Credits
Analysis of typical teaching problems. Examines best practices, action research, and facilitation skills.
Prerequisites: EDTL 510.
Corequisites: EDTL 526.

EDTL 512 Facilitation and Presentation2 Credits
Teacher Leaders working with teachers to improve student achievement. Explores facilitation of groups, from small teacher teams to the entire school community. Emphasis on equipping leaders with a variety of presentation skills to lead school change.

EDTL 513 Information Based Educational Practice and Statistics3 Credits
Exploration of standards-based educational practice. Analysis and interpretation of data as they inform educational practice. Data Driven Dialogues implemented as catalysts for educational change. Development of skills necessary to observe, analyze, and evaluate data from a multiple measures perspective. Foundational uses of educational statistics applied.

EDTL 517 Assessment Literacy1 Credit
Construction, administration and interpretation of formative and summative educational assessments for the systematic analysis of student learning and teaching practice. Validity, reliability and basic statistical analysis, as well as design of rubrics and other scoring approaches included.
Corequisites: EDTL 526.

EDTL 518 Diversity and Differentiated Instruction2 Credits
Differentiated curriculum, assessment, and instruction, the latest brain research, and a mindset of diversity as a strength. Focuses on different learning populations including, but not limited to, Special Education, ESL, Gifted and Talented, Children of Poverty.

EDTL 525 Internship I1 Credit
Application of theory and research to the analysis and synthesis of field experiences in leadership. Structured on building and district level initiatives. Includes experiences that increasingly require full management of a project.
Prerequisites: EDTL 510 and EDTL 512.

EDTL 526 Internship II2 Credits
Application of theory and research to the analysis and synthesis of field experiences in leadership. Structured on building and district level initiatives. Includes experiences that increasingly require full management of a project.
Prerequisites: EDTL 510, EDTL 512, EDTL 513, and EDTL 525.

Education - Special Ed (EDSE)

EDSE 496 Topics:1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

EDSE 500 Foundation of Special Education Including Law3 Credits
Knowledge and skills needed in special education. An evolving discipline based on philosophies, evidence-based principles and theories, relevant laws and policies, diverse and historical viewpoints, and societal influences on the education and treatment of individuals with exceptional needs.

EDSE 501 Instructional Strategies in Special Education3 Credits
Overview of methodologies used in the instruction of students with special learning needs. Explores the purpose of an Individualized Education Program and its use as a guide in the development of a learning plan based on the student's learning characteristics including strengths, needs, and the impact of disability on his/her learning in the general education classroom.

EDSE 502 Behavioral Interventions for the Learner with Special Needs3 Credits
Focuses on research-based assessment and intervention strategies for working with students who present challenging behavior in the classroom.
EDSE 503 Methods of Teaching Students with Mild Disabilities Reading and Math3 Credits
Provides an understanding of the nature of reading and arithmetic and of challenges faced by children and adolescents with a wide array of exceptionalities. Major approaches to teaching and learning in reading and math. Development of diagnostic-prescriptive approaches.

EDSE 506 Educating Students with Low Incidence Disabilities in Inclusive Environments3 Credits
Examines types of low-incidence disabilities, including mental retardation, autism, physical disabilities, traumatic brain injury, deafness, blindness, multiple disabilities, and other health impairments, that affect academic and job performance. Current methods for teaching individuals with low-incidence disabilities.

EDSE 510 The Learner Who is Twice Exceptional, Including Gifted and Talented3 Credits
Provides tools to identify twice exceptional students and selection appropriate strategies so that gifted students with disabilities can learn at appropriate levels.

EDSE 515 Internship K-6 Elementary Practicum in Special Education3 Credits
Provides support in teaching and learning of elementary students. Integrated field supervision to achieve professional competencies.

EDSE 520 Internship 6-12 Secondary Practicum in Special Education3 Credits
Provides support in teaching and learning of secondary students. Integrated field supervision to achieve professional competencies.

EDSE 596 Topics:1-3 Credits
Course may be taken multiple times up to a maximum of 15 credit hours.

Education-Early Child (EDEC)

EDEC 100A Parent Education and Infants1 Credit
Parenting skills in a child care setting. Introduction to stages of child development, best practices in parenting, and resources for children 1 to 18 months old. Emphasis on development, effective communication, discipline, age appropriate learning activities, and school readiness. Requirement: Enrollment of child in campus early childhood program. Parents spend 30 minutes a week in their child's classroom. Terms Typically Offered: Fall, Spring, Summer. Course may be taken 2 times for credit.

EDEC 100B Parent Education and Toddlers1 Credit
Parenting skills in a child care setting. Introduction to stages of child development, best practices in parenting, and resources for children 18 to 36 months old. Emphasis on development, effective communication, discipline, age appropriate learning activities, and school readiness. Requirement: Enrollment of child in campus early childhood program. Parents spend 30 minutes a week in their child's classroom. Terms Typically Offered: Fall, Spring, Summer. Course may be taken 2 times for credit.

EDEC 100C Parent Education and Early Preschool1 Credit
Parenting skills in a child care setting. Introduction to stages of child development, best practices in parenting, and resources for children 3 to 4 years old. Emphasis on development, effective communication, discipline, age appropriate learning activities, and school readiness. Requirement: Enrollment of child in campus early childhood program. Parents spend 30 minutes a week in their child's classroom. Terms Typically Offered: Fall, Spring, Summer. Course may be taken 2 times for credit.

EDEC 100D Parent Education and School Readiness1 Credit
Parenting skills in a child care setting. Introduction to stages of child development, best practices in parenting, and resources for children entering Kindergarten. Emphasis on development, effective communication, discipline, age appropriate learning activities, and school readiness. Requirement: Enrollment of child in campus early childhood program. Parents spend 30 minutes a week in their child's classroom. Terms Typically Offered: Fall, Spring, Summer. Course may be taken 2 times for credit.

EDEC 101 Introduction to Early Childhood3 Credits
Includes the eight key areas of professional knowledge: Child Growth and Development; Health, Nutrition, and Safety; Developmentally Appropriate Practices; Guidance; Family and Community Relationships; Diversity; Professionalism; Administration and Supervision. Overview of history and philosophy. Focuses on ages birth through age 8. Assignments require 3 hours of field experience and may include observation/participation in an early childhood setting. Fees: Yes.

EDEC 102 Introduction to Early Childhood Professions Lab Experiences3 Credits
Field experience. Demonstrate knowledge of child growth and development, guidance techniques, planning and implementation of curriculum, assessment techniques and application of laws and standards. Supervised placement provides opportunity to observe, to practice appropriate interactions and to develop effective guidance and nurturing techniques. Addresses ages birth through age 8. Assignments require 3 hours of field experience and may include observation/participation in an early childhood setting. Prerequisites: EDEC 101.

EDEC 103 Guidance Strategies3 Credits
Explores guidance theories and techniques, real world applications, goals, and factors influencing expectations, classroom management issues. Techniques for prosocial skills, violence prevention, anger management and providing families with community resources discussed. Focus on birth through age 8. Assignments require 3 hours of field experience and may include observation/participation in an early childhood setting.

EDEC 113 Infant and Toddler Theory and Practice3 Credits
Introduction to children from birth through age 3. Includes the eight key areas of professional knowledge: Child Growth and Development; Health, Nutrition and Safety; Developmentally Appropriate Practices; Guidance; Family and Community Relationships; Diversity; Professionalism; Administration and Supervision. Overview of history and philosophy of early childhood education. Assignments require 3 hours of field experience and may include observation/participation in an early childhood setting.

EDEC 114 Introduction to Infant/Toddler Lab Techniques3 Credits
Field experience. Demonstrate knowledge of child growth and development, guidance techniques, planning and implementation of curriculum, assessment techniques, and application of laws and standards. Supervised placement provides opportunity to observe, to practice appropriate interactions and to develop effective guidance and nurturing techniques. Addresses ages birth through age 3 years. Assignments include a required field experience of 60 hours. Prerequisites: EDEC 101 or EDEC 113.

EDSE 506 Educating Students with Low Incidence Disabilities in Inclusive Environments3 Credits
Examines types of low-incidence disabilities, including mental retardation, autism, physical disabilities, traumatic brain injury, deafness, blindness, multiple disabilities, and other health impairments, that affect academic and job performance. Current methods for teaching individuals with low-incidence disabilities.

EDSE 510 The Learner Who is Twice Exceptional, Including Gifted and Talented3 Credits
Provides tools to identify twice exceptional students and selection appropriate strategies so that gifted students with disabilities can learn at appropriate levels.
EDEC 122 Ethics in Early Childhood Education 1 Credit
Practical approach to recognizing, understanding, and resolving issues confronting professionals in education and business. Emphasizes historical development of ethics. Application of critical thinking and decision-making skills to ethical dilemmas in classroom, business, community and governmental settings. Exploration of methods of resolution through ethical reasoning and the National Association for the Education of Young Children (NAEYC) professional codes. Emphasizes logical analysis, critical thinking, and responsible ethical decision making.

EDEC 125 Science/Math and the Young Child 3 Credits
Examination of theories of cognitive development as a framework for conceptualizing the way young children acquire scientific and mathematical skills, concepts, and abilities. Enables students to research and develop appropriate individual and group scientific/mathematical activities for young children. Assignments require 3 hours of field experience and may include observation/participation in an early childhood setting.

Terms Typically Offered: Fall, Spring, Summer.

EDEC 126 Art and the Young Child 2 Credits
Preparation to plan and implement a comprehensive and developmentally-appropriate art program for young children. Investigates the development of self-taught art techniques in young children. Assignments require 2 hours of field experience and may include observation/participation in an early childhood setting.

Terms Typically Offered: Fall, Spring, Summer.

EDEC 127 Music/Movement for the Young Children 1 Credit
Focus on incorporating music and movement into the early childhood curriculum. Through active participation with hands-on experiences, students work with the concepts of age and developmental appropriateness when designing fun activities with both subjects. Assignments require 1 hour of field experience and may include observation/participation in an early childhood setting.

Terms Typically Offered: Fall, Spring, Summer.

EDEC 195 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

EDEC 196 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

EDEC 205 Nutrition, Health, Safety 3 Credits
Focus on nutrition, health, and safety as key factors for optimal growth and development of young children. Includes nutrient knowledge, menu planning, food program participation, health practices, management and safety, appropriate activities, and communication with families. Addresses birth through age 8. Assignments require 3 hours of field experience and may include observation/participation in an early childhood setting.

EDEC 230 Curriculum and Development: Infant/Toddler 3 Credits
Curriculum for the age group birth to 3 years. Emphasis on maintaining healthy, safe environmental activities developmentally appropriate to stimulate language, social emotional, cognitive, and physical development. Assignments require 3 hours of field experience and may include observation/participation in an early childhood setting.

EDEC 237 Theories and Techniques of Social and Emotional Growth 3 Credits
Incorporates student specific techniques and strategies for guiding and enhancing social and emotional growth in children 0-8 years. Introduces and compares the theories underlying quality interactions and patterns of social and emotional progression.

EDEC 238 Early Childhood Development 0-8 Years 3 Credits
Theories, current research and developmental ages and stages of children, conception to 8 years. Emphasizes physical, cognitive, language, social and emotional domains, concept of the whole child and how adults can provide a supportive environment. Assignments require 3 hours of field experience and may include observation/participation in an early childhood setting.

EDEC 240 Curriculum and Development: Early Childhood 3 Credits
Methods of creating and implementing curriculum based on understanding of developmentally appropriate practice for children, birth to age 8. Application of the teaching/learning process, and the managing of the learning environment, will draw from research and practical application. Assignments require 3 hours of field experience and may include observation/participation in an early childhood setting.

Prerequisites: EDEC 101 or permission of instructor.

EDEC 241 Early Childhood Administration: Human Relations 3 Credits
Roles and relationships among children, families, early childhood professionals, and community resources. Exploration of family structures, communication skills, roles of support organizations, team building, evaluation tools, self-reflection, and advocacy. Assignments require 3 hours of field experience and may include observation/participation in an early childhood setting.

EDEC 250 Exceptionalities in Early Education 3 Credits
Presents an overview of critical elements related to educating young children who may have learning challenges and/or be advanced in the early childhood setting. Topics include the following: typical and atypical development, legal requirements, research based practices related to inclusion, teaming and collaboration, and accommodations and adaptations. Student will learn how different cognitive/social/physical abilities impact a young child’s learning process. Includes conception to age 8. Assignments require 3 hours of field experience and may include observation/participation in an early childhood setting.

Prerequisites: EDEC 101 or permission of instructor.

EDEC 256 Working with Parents, Families, and Community Systems 3 Credits
Exploration of personal attitudes regarding families, family values systems, and how personal attitudes affect parent-professional partnerships in the early childhood education program. This course covers communication, problem-solving, and conflict resolution strategies with respect to children ages birth through 8 years. Effective activities and resources to support family involvement in the classroom will be created.

EDEC 264 Administration in Early Education 3 Credits
Overview of management concepts applicable in a variety of early education settings. Focuses on management of programs and personnel, program and staff development, fiscal administration, and evaluation. Assignments require 3 hours field experience and may include observation/participation in an early childhood setting.

EDEC 290 Early Literacy for the Young Child 2 Credits
In-depth view of early literacy development in a changing, diverse society. Intended for the prospective early childhood teacher. Includes research about the language and literacy of young children. Explores how learners develop the ability to communicate and interact from birth to age 8. Assignments require 3 hours field experience and may include observation/participation in an early childhood setting.

EDEC 296 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.
EDLD 520B Principalship II2 Credits
This introductory course will engage students in developing a comprehensive understanding of the role of the principal as instructional leader and change agent in today's PK-12 schools. Students will be introduced to the skill set needed to be an effective instructional leader and the knowledge base outlined in the Colorado Standards for the licensure of school principals. The historical role of the school principal will be compared and contrasted with the current demands of the modern school principal.
Prerequisites: EDLD 520A, current teaching certificate, and acceptance into EDLD program.

EDLD 532 School Finance and Legal Aspects of School Administration3 Credits
Study of the relationship between politics, policy and governance of schools, including political systems, inter-governmental relations, power and conflict, and policy development regarding equity, quality and efficiency. While statutory and case law serve as reference points for discussion, the primary objective is to examine the relationship between the legal issues of education and the implications for administrative leadership.
Prerequisites: EDLD 520A, current teaching certificate, and acceptance into graduate program.

EDLD 540 School Improvement and Accountability2 Credits
Construction, administration and interpretation of educational assessments for the systematic analysis of student learning and teaching practice. Emphasis on the use and understanding of data analysis to improve teaching and learning in the classroom. Statistical analysis relating to education leadership decision-making applications.
Prerequisites: Current teaching certificate, acceptance into the EDLD program.

EDLD 542 Instructional Supervision and Management/HR3 Credits
Study of effective human resources management, including recruitment, selection, induction, staff development, employee assistance, evaluation, contract negotiation and personnel management. The skills of conflict resolution and collaboration will be explored as well as ways to assess the learning organization needs.
Prerequisites: Current teaching certificate, acceptance into M.A. program, GRE.

EDLD 544 Strategies in School Improvement2 Credits
This course focuses on strategies that lead to school improvement, and ultimately continuous student success. High Performing Schools use strategies that are intentional and well designed. They operate in a learning culture that is dedicated to learning for all. This course will enable the student to analyze the culture of high performing schools and engage in problem solving protocols related to improvement in their own settings.
Prerequisites: Current teaching certificate, acceptance into EDLD program.
EDLD 545 Internship in Educational Leadership I 1 Credit
Gain knowledge and experience in varied aspects of school administration. Engagement in activities designed to develop and demonstrate leadership competencies essential for solving school problems, improving curriculum and instructional practices, and increasing student achievement. Leadership competencies align to state and national standards.
Prerequisites: EDLD 520A, current teaching certificate, and acceptance into graduate program.

EDLD 595 Independent Study 1-3 Credits
Course may be taken multiple times up to a maximum of 6 credit hours.

Electric Lineworker (ELCL)

ELCL 120 Fundamentals of Electricity 4 Credits
Generation, transmission, and distribution of electricity beginning with the electron and its function of transporting electric power to homes and industry.

ELCL 125 Job Training and Safety 2 Credits
Covers first aid, CDL, basic use and care of personal protective equipment use and care of climbing equipment, daily inspection and basic use of motorized equipment.

ELCL 131 Electrical Distribution Theory I 4 Credits
Pole setting techniques, framing methods and specifications, climbing, sagging and splicing of conductors, energizing and de-energizing of lines, and installation of protective grounds.

ELCL 131L Electric Distribution Lab 4 Credits
Examination of the National Electric Safety Code, equipment operation, material records, knot tying, installation of protective grounds, pole climbing, replace insulators, replacing crossarms, conductor ties, and overhead line construction.

ELCL 132 Electrical Distribution Theory II 4 Credits
Installation and operation of protective equipment, transformer hookups, voltage regulation, hotstick maintenance, troubleshooting, and gloving from the pole. Four hours lecture, three hours laboratory per week.
Prerequisites: ELCL 131.
Corequisites: ELCL 132L.

ELCL 132L Electrical Distribution Theory II Laboratory 2 Credits
Lab component required for ELCL 132.
Prerequisites: ELCL 131.
Corequisites: ELCL 132.

ELCL 137 Advanced Electrical Distribution 2 Credits
Meter safety, connector installation, street lighting, rubber cover up, and public relations. Two hours lecture, eight hours laboratory per week.
Corequisites: ELCL 137L.

ELCL 137L Advanced Electrical Distribution Laboratory 2 Credits
Lab component required for ELCL 137.
Corequisites: ELCL 137.

ELCL 140 Underground Procedures 4 Credits
Safety practices, terminology, fault finding, cable locating, switching procedure, installation of terminal devices, splicing, and transformer application. Five hours lecture, four hours laboratory per week.
Corequisites: ELCL 140L.

ELCL 140L Underground Procedures Laboratory 2 Credits
Lab component required for ELCL 140.
Corequisites: ELCL 140.

ELCL 145 Hot Line Procedures 1 Credit
Two weeks of training by outside specialists covering current hotline maintenance and underground installation methods. Eight hours lecture, twenty-four hours laboratory per week.
Corequisites: ELCL 145L.

ELCL 145L Hot Line Procedures Laboratory 2 Credits
Lab component required for ELCL 145.
Corequisites: ELCL 145.

ELCL 195 Independent Study 1 or 2 Credits
Course may be taken multiple times up to a maximum of 6 credit hours.

ELCL 196 Topics 1 or 2 Credits
Course may be taken multiple times up to a maximum of 15 credit hours.

ELCL 199 Internship 6 Credits
Opportunity for an individual to be employed for training by a utility company while maintaining his/her status as a Colorado Mesa University student. Provides excellent on-the-job training benefits. Students usually selected for this course by formal interview.
Prerequisites: Permission of instructor. Eighteen hours per week, two semesters after completion of regular program. Course may be taken multiple times up to a maximum of 6 credit hours.

Electrical/Computer Engineering (EECE)

EECE 225 Introduction to Circuits and Electronics 3 Credits
Analysis of electric circuits by use of Ohm’s law, network reduction, node and loop analysis, Thévenin’s and Norton’s theorems, DC and AC signals, transient response of simple circuits, transfer functions, basic diode and transistor circuits, and operational amplifiers.
Prerequisites: PHYS 132 and PHYS 132L; MATH 236 (can be taken concurrently).
Terms Typically Offered: Fall.

EECE 226 Circuits as Systems 3 Credits
Continued analysis of basic circuits, Laplace transform techniques, transfer functions, frequency response, Bode diagrams, resonant circuits, Fourier series expansions, and convolution.
Prerequisites: EECE 225 and MATH 236.
Terms Typically Offered: Spring.

EECE 227 Electronics Design Laboratory 3 Credits
Introduction to analysis, modeling, design, and testing of analog electronic circuits in a practical laboratory setting. The laboratory is centered around a robot platform and includes design, SPICE simulations, prototyping and testing of circuits necessary to drive and remotely control the robot.
Prerequisites: EECE 225 and EECE 226 (may be taken concurrently).
Terms Typically Offered: Spring.

EECE 235 Digital Logic 3 Credits
Design and applications of digital logic circuits, including both combinational and sequential logic circuits. Introduces hardware descriptive language, simulating and synthesis software, and programming of field programmable arrays (FPGAs).
Prerequisites: CSCI 130.
Terms Typically Offered: Spring.

EECE 396 Topics 1-3 Credits
Course may be taken multiple times up to a maximum of 15 credit hours.

EECE 496 Topics 1-3 Credits
Course may be taken multiple times up to a maximum of 15 credit hours.
Electrical Construction (ELCE)

ELCE 102 Electrical Blueprint Reading 4 Credits
Development of skills needed to interpret electrical drawings properly. Critical for anyone involved in the design, construction, or maintenance of electrical systems.

ELCE 110 House Wiring 4 Credits
Approaches to residential building wiring in conformance with the current National Electrical Code and local codes using non-metallic cable.

ELCE 120 Commercial Wiring 4 Credits
Approaches to commercial and industrial building wiring in conformance with the current National Electrical Code and local codes using electric metallic tubing and other raceways.

ELCE 124 Electrical Safety 1 Credit
Exploration of OSHA's electrical safety-related work practices, and how they are applied to the work environment.

ELCE 130 National Electrical Code I 4 Credits
Exploration of the National Electrical Code and local code requirements for electrical installations. Chapters one through four of the National Electrical Code are covered.

ELCE 135 National Electrical Code II 4 Credits
Further development of material from ELCE 130 and covering chapters five through nine of the National Electrical Code, including hazardous locations, special occupancies, conditions, and equipment.

ELCE 144 Grounding and Bonding 1 Credit
Exploration of technology and techniques available for code and standards-compliant grounding and bonding systems, focusing on grounding and bonding requirements as they relate to Article 250 and other articles of the NEC code.

ELCE 150 DC Circuit Fundamentals 4 Credits
Introduction to the principles of DC electricity and magnetism with emphasis on Ohm's, Kirchoff's, and Watt's laws to analyze circuit voltage, current, and power. Addresses common measuring instruments and safety.

ELCE 155 AC Circuit Fundamentals 4 Credits
Exploration of AC circuits including: resistance, current, voltage, computations of series and parallel circuits, circuit analysis, magnetism, inductive and capacitive circuits and troubleshooting with basic test equipment.

ELCE 167 Electrical Maintenance 4 Credits
Introduction to common electrical repairs, electrical systems, tools and test equipment. Includes replacing or repairing devices, such as receptacles, light fixtures and ballasts, circuit breakers, fuses, and switches. Addresses electrical safety and code applications.

ELCE 220 Industrial Controls 4 Credits
Application of electrical and electromechanical sensing/control devices including heating, ventilating, and air conditioning applications, motor control, conveyor drives, and other industrial applications. Students design control systems to meet assigned conditions, use principles of relay logic to prepare correct ladder diagrams and wire up, test, and troubleshoot their systems. Course stresses accuracy, safety, and National Electric Code requirements.

ELCE 222 Instrumentation and Process 4 Credits
Investigation of theory of industrial instrumentation measurement through process control. Includes theory and measurement methods for temperature, pressure, level, and flow. Incorporates hands-on training equipment to measure temperature and pressure, and perform calibration of a pressure differential transmitter. Test equipment is used to simulate a two-wire transmitter and source a current signal for calibration of an I/P transducer.

ELCE 225 Introduction to PLCs 4 Credits
Development of the ability to read, interpret, and analyze electrical ladder drawings. Acquaints the student with the basic electromechanical components commonly used in electrical control circuits, as well as solid-state relays and the role of programmable controllers.

ELCE 229 AC/DC Variable Speed Drive 2 Credits
Introduction to variable speed drive technology that offers a cost-effective method to match driver speed to load demands. Represents a state-of-the-art opportunity to reduce operating costs and improve overall productivity. Focuses on variable speed drive technology including operation, set-up, troubleshooting, maintenance, proper selection, and application for drives, as well as basic drive overview and comparison.

ELCE 263 Specific Wiring for Structured Cabling Systems 2 Credits
Development of ability to wire for specifications and for structured cabling systems. Examines the job layout, products used, and execution of the project.

Emergency Management (EMDP)

EMDP 211 Introduction to Emergency Management 3 Credits
Introduction to the complex and evolving field of emergency management. Understanding of key stakeholders, principles, and activities involved in an all-hazards, all-phases approach to dealing with disasters developed.

Prerequisites: Permission of instructor.

EMDP 295 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

EMDP 321 Hazard Preparedness and Mitigation 3 Credits
Examination of methods and application of practices in preparing for and mitigating against hazards. Includes developing an understanding of risk and vulnerability, and their relationship with public policy and implementation actions relevant to hazard preparedness and mitigation.

Prerequisites: EMDP 211.

EMDP 331 Disaster Response and Recovery 3 Credits
Examination of practices and principles that promote effective disaster response and recovery operations. Review of popular myths and realities regarding human behavior in catastrophic events in addition to divergent approaches for disaster management. Includes developing an understanding of the Incident Command System, National Incident Management System, and emergency operations centers.

Prerequisites: EMDP 211.

EMDP 395 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

Emergency Medical Tech (EMTS)

EMTS 101 Emergency Medical Technician - Basic 13 Credits
Policies, rules and regulations of emergency medical services. Basic anatomy and physiology. Initial and focused assessment of patient in the field.

Corequisites: EMTS 102 and EMTS 103.
EMTS 102 Emergency Medical Technician - Basic II 3 Credits
Management of respiratory, cardiac, CNS, endocrine, behavioral, drug, alcohol, allergy and anaphylaxis emergencies. Airway management, CPR, AED and basic pharmacology.
Corequisites: EMTS 101 and EMTS 103.

EMTS 103 Emergency Medical Technician - Basic III 4 Credits
Management of MOI, head, spinal, abdominal, chest and extremity trauma. Basic management of pediatric, gynecologic, and geriatric emergencies. EMT safety, environmental emergencies, hazmat, triage, and incident command. Preparation for national registry written and practical examination.
Corequisites: EMTS 101 and EMTS 102.

EMTS 115 Emergency Medical Responder 3 Credits
This course covers the knowledge and skills to provide emergency care for most medical emergencies. Emergency Medical Responders provide immediate care as part of the EMS system while awaiting additional EMS response and transportation. This course meets the requirements to become nationally certified as an NREMR - National Registered Emergency Medical Responder.

EMTS 130 Emergency Medical Technician - Basic IV Therapy 2 Credits
Focuses on cognitive and skill practice as required by Colorado Prehospital Care program for EMT-Basic level IV approval. Examines criteria, procedures and techniques for IV therapy, discusses fluid and electrolyte balance and principles and treatment for shock.

EMTS 190 Emergency Medical Technician - Basic EKG Interpretation 2 Credits
Interpretation of EKG strips, anatomy and physiology of the heart, using three-lead monitoring as a guide. Introduction to twelve-lead EKG.

EMTS 196 Topics: 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

EMTS 225 Fundamentals of Paramedic Practice 3 Credits
First course of the National Standard Paramedic Curriculum as approved by the Colorado State Department of Health and Environment.
Corequisites: EMTS 225L.

EMTS 225L Fundamentals of Paramedic Practice Laboratory 2 Credits
Hands-on application of patient assessment, IV therapy and EKG interpretation. Practical application and mastery of anatomy and physiology principles within a pre-hospital setting will be developed.
Prerequisites: Permission of instructor.
Corequisites: EMTS 225.

EMTS 227 Paramedic Special Considerations 3 Credits
Focuses on a comprehensive study of Advanced Life Support Practice.
Corequisites: EMTS 227L.

EMTS 227L Paramedic Special Considerations Laboratory 2 Credits
Hands-on application of skills in pediatric assessment, delivery and management of the newborn, the mother, and geriatric patients. Management of live scenarios simulating patients with special considerations and needs will enhance the development of practical patient care skills and improve patient outcomes. Certification in PEPP and PALS will be completed.
Prerequisites: EMTS 225/EMTS 225L and Permission of instructor.
Corequisites: EMTS 227.

EMTS 229 Paramedic Pharmacology 3 Credits
Focuses on a comprehensive study of emergency pharmacology and medications used to treat common illnesses.
Corequisites: EMTS 229L.

EMTS 229L Paramedic Pharmacology Laboratory 2 Credits
Hands-on administration of medications with an advanced level of understanding of their effects to the human body. The principles of pharmacokinetics and pharmacodynamics are investigated.
Prerequisites: EMTS 225/EMTS 225L and Permission of instructor.
Corequisites: EMTS 229.

EMTS 231 Paramedic Cardiology 5 Credits
Cardiology topics as presented in the National Standard Curriculum for paramedics.
Corequisites: EMTS 231L.

EMTS 231L Paramedic Cardiology Laboratory 1 Credit
Hands-on application of principles of cardiac care for the pre-hospital and in-hospital environment. Students will earn their ACLS certification.
Prerequisites: EMTS 225/EMTS 225L and Permission of instructor.
Corequisites: EMTS 231.

EMTS 233 Paramedic Emergencies 4 Credits
A comprehensive study of adult medical emergencies.
Corequisites: EMTS 233L.

EMTS 233L Paramedic Medical Emergencies Laboratory 1 Credit
Hands-on application of the principles of endocrine emergencies, BG analysis, respiratory emergencies, and other medical emergencies for the pre-hospital and in-hospital environment. Students will receive AMLS certification.
Prerequisites: EMTS 225/EMTS 225L and Permission of instructor.
Corequisites: EMTS 233.

EMTS 235 Paramedic Trauma Emergencies 4 Credits
A comprehensive study of adult and pediatric trauma emergencies.
Prerequisites: EMTS 225/EMTS 225L and Permission of instructor.
Corequisites: EMTS 235L.

EMTS 235L Paramedic Trauma Emergencies Laboratory 1 Credit
Hands-on application of the principles to manage and assess the trauma patient in pre-hospital emergencies. Approaches on how to handle the patient with blast injuries and disaster management of multiple patients will be developed. Specific scenarios with various acute trauma emergencies will be developed to assist the student with patient assessment skills.
Prerequisites: EMTS 225/EMTS 225L and Permission of instructor.
Corequisites: EMTS 235.

EMTS 237 Paramedic Internship Preparation 2 Credits
Reviews concepts and techniques used in the prehospital setting.
Prerequisites: EMTS 225/EMTS 225L, EMTS 227/EMTS 227L, EMTS 229/EMTS 229L, EMTS 231L, EMTS 231L, EMTS 233/EMTS 233L, and EMTS 235/EMTS 235L.

EMTS 280 Paramedic Internship 6 Credits
The preceptor/internship program for paramedic students.
Prerequisites: EMTS 237.

EMTS 281 Paramedic Internship 6 Credits
Continuation of EMTS 280, preceptor program for paramedic students.
Prerequisites: EMTS 280.

Energy Management (EMGT)

EMGT 101 Energy Management Fundamentals 3 Credits
Introduction to basic concepts of energy management.

EMGT 196 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.
EMGT 201 Land Management Fundamentals 3 Credits
Introduction to basic concepts of land management and practices.

EMGT 296 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

EMGT 340 Energy Industry Fundamentals 3 Credits
Provides energy literacy through a survey of the sources, distribution and uses of energy, including the evolution of energy from wood fires to coal to oil to the current mix of coal, oil, natural gas, nuclear, hydroelectric, wind, geothermal, biomass, solar and ocean currents and tides. Future energy policy, sources, uses and case studies will be discussed as well as alternative energy sources.
Prerequisites: GEOL 111/111L and CHEM 121/121L.

EMGT 350 Energy Development, Transportation, and Markets 3 Credits
Overview of the energy industry domestic and worldwide. Basic energy industry drilling and production terminology, concepts and terms introduced and utilized throughout the course. Issues surrounding business models, upstream, midstream and downstream discussed in detail.
Prerequisites: GEOL 111/111L and FINA 301.

EMGT 355 Landman Geo-Petro-Engineering 3 Credits
Petroleum engineering fundamentals. Properties of reservoir rock, single phase fluid flow through porous media, surface forces, fluid saturation, and completion technology. Evaluation of petroleum reservoir field data.
Prerequisites: EMGT 101 and EMGT 201.

EMGT 360 Real Property, Oil and Gas Law 3 Credits
The body of case law surrounding oil and gas leases and leasehold interests, mineral titles, concurrent ownership and split estates, and governmental regulation of mineral development, including pooling and unitization of oil and gas leases.
Prerequisites: EMGT 340.

EMGT 395 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

EMGT 410 Energy Regulation and Compliance 3 Credits
The body of law surrounding governmental regulation of mineral development, including environmental liability, diligent and prudent operations, contractual risk allocation, and regulatory case studies.
Prerequisites: EMGT 340.

EMGT 440 Energy Land Practices 13 Credits
Overview of the supply and demand for energy. The physical path of energy from source to user, transportation issues pertaining to energy, energy pricing methodologies, energy markets, and risk control through the use of derivatives in the energy industry.
Prerequisites: EMGT 340 and FINA 301.

EMGT 450 Energy Land Practices II 3 Credits
Imparts mastery of the fundamental concepts and terminology related to real property law. Application of concepts to situations occurring in the energy environment as land is found, purchased and developed for use.
Prerequisites: EMGT 340.

EMGT 494 Energy Senior Seminar 3 Credits
Legal, economic, environmental, and national security issues surrounding the energy industry. Alternative energy sources and other current issues in energy management.
Prerequisites: EMGT 340.

EMGT 495 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

EMGT 496 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

EMGT 499 Internship 1-9 Credits
Course may be taken multiple times up to maximum of 15 credit hours.
ENGR 263 Mechanics of Solids
3 Credits
Covers shear force and bending moment, torsion, stresses in beams, deflection of beams, matrix analysis of frame structures, analysis of stress and strain in 2-D and 3-D (field equations, transformations), energy methods, stress concentrations, and columns. Lectures and homework assignments involve computer work and hands-on laboratory work documented by written reports.
Prerequisites: ENGR 261.

ENGR 305 Engineering Economics & Ethics
2 Credits
Applications of economics, statistics, and ethics for mechanical engineers. Topics include cost concepts and design economics, money-time relationships, and comparison of alternatives. Engineering ethics includes personal vs. professional ethics, ethical problem-solving techniques, rights and responsibilities of engineers, and whistle-blowing.
Prerequisites: ENGR 101; ENGR 140; and MATH 135 or MATH 151.

ENGR 312 Engineering Thermodynamics
3 Credits
An introductory course in thermodynamics, the science of heat energy conversion. Develops understanding of energy, heat, work, efficiency, and ideal thermodynamic cycles. Teaches first and second laws of thermodynamics and perfect gas law.
Prerequisites: MATH 136 or MATH 152, and PHYS 131/PHYS 131L.

ENGR 317 Fundamentals of Circuits and Electronics
2 Credits
Introduction to resistive circuits, capacitors, inductors, transient analysis, sine waves, AC circuit analysis, resonance, and transformers.
Prerequisites: MATH 136 or MATH 152, and PHYS 131/PHYS 131L.
Corequisites: ENGR 317L.

ENGR 317L Fundamentals of Circuits and Electronics Laboratory
1 Credit
Lab component required for ENGR 317.
Prerequisites: MATH 136 or MATH 152, and PHYS 131/PHYS 131L.
Corequisites: ENGR 317.

ENGR 321 Fluid Mechanics
3 Credits
Covers fluid properties, laws of fluid statics and fluid dynamics, measurement of flow, viscous flow, laminar and turbulent flow, flow in ducts, forces due to fluid motion, and fluid machinery.
Prerequisites: MATH 132 or MATH 152; PHYS 131, PHYS 131L, and ENGR 261.
Terms Typically Offered: Fall.

ENGR 325 Component Design
3 Credits
Knowledge and skills developed in preceding courses are extended and applied to design and selection of machine elements and machines. Attention is given to functional requirements, methods of manufacture, choice of materials and economic factors.
Prerequisites: ENGR 224 and ENGR 263.

ENGR 329 Bicycle Design and Frame-Building
3 Credits
Engineering and artistic execution of designing and building a bicycle frame. Fundamentals of bicycle dynamics, handling, and sizing. Material properties and selection. Discussion of relevant standards covering bicycle frame and fork testing. Fabrication skills necessary to construct a custom bicycle frame will be developed.
Prerequisites: ENGR 125 and ENGR 263.
Terms Typically Offered: Spring.

ENGR 336 Heat and Power
3 Credits
Discussion of major modes of heat transfer. Includes steady and transient conduction, internal and external convection, and radiation with emphasis on industrial applications. Heat exchanger and boiler analysis and related codes and standards discussed.
Prerequisites: ENGR 312 and ENGR 321.

ENGR 343 Dynamics
3 Credits
Kinematics of particles and rigid bodies. Kinetics of particles and rigid bodies in plane motion, including Newton's second law, work and energy, impulse and momentum.

ENGR 345 Engineering Integration I
3 Credits
First course in a design sequence integrating concepts from the mechanical engineering technology curriculum. Emphasis on laboratory experience and the design, analysis, and testing of mechanical systems. Team project work on 'design-and-build' projects will require manufacture of mechanical systems and/or electronic circuits.
Prerequisites: ENGR 224, ENGR 263, MAMT 106, and CSCI 130.

ENGR 353 Exploring Entrepreneur Opportunities
3 Credits
Introduction to innovation and opportunity recognition, including development of business ideas, business model validation and business feasibility analysis.
Equivalent Course(s): ENTR 343

ENGR 385 Manufacturing Processes and Systems
3 Credits
A senior level course that examines widely used manufacturing processes for metals, polymers, microelectronics and also exposes students to principles and practices of world class manufacturing. Lecture topics include material properties; engineering materials; casting, molding and related processes; metal forming and sheet metal working; material removal processes; joining and assembly processes; electronics manufacturing technology; and principles and practices of world class manufacturing. Manufacturing economic considerations. Influence of product design on process selection.
Prerequisites: ENGR 225 and STAT 200.
ENGR 427 Engineering Measurements 2 Credits
Methods of experimentation and data analysis. Specific skills used in planning an experiment, applying sound procedures, keeping proper records, and communicating results orally, with posters and in written reports developed.
Prerequisites: ENGR 263, ENGR 317, STAT 305, and ENGL 325.

ENGR 435 Industrial Controls 3 Credits
Fundamentals of control of manufacturing processes. Applications of relay logic, input/output devices, and programmable logic controllers (PLC). Design of complete control circuits, selection of components, and cost estimation. PLC programming for discrete event control and for analog applications.
Prerequisites: ENGR 317.

ENGR 436 Fluid & Electric Power Systems 3 Credits
A mechanical approach to industrial power systems. Applications emphasize the selection and function of hardware and interfacing of hydraulic, pneumatic and electric systems with mechanical, fluidic and electrical/electronic controls. Topics covered include transformers, motors, generators, motor controls, and protective devices.
Prerequisites: ENGR 321 and ENGR 435.

ENGR 445 MET Design Project I 3 Credits
The first of a two-course comprehensive group capstone design experience, focusing on the design proposal. This sequence applies material from prior course work, along with concepts of project management, problem definition, determining design requirements, design optimization, engineering analysis, proof-of-concept prototype, CAD drawings. Students make several oral design reviews, a final design presentation, and prepare a written report.
Prerequisites: ENGR 140, ENGR 225, ENGR 312, ENGR 325, ENGR 385, MAMT 102, and ENGL 325.

ENGR 446 Writing for Design Projects 1 Credit
Communication of professional writing to the technical and non-technical audience. Skills are developed to analyze rhetorical situations and compose documents that achieve a specific purpose and meet the needs of a particular audience. Writing with clarity, conciseness and correctness will be emphasized.
Corequisites: ENGR 485.

ENGR 455 Fluid Power Systems 3 Credits
Coverage of the fundamentals of hydraulic and pneumatic systems and their components, fluid power circuit design, analysis, and troubleshooting for industrial applications, introduction to electro-pneumatics.
Prerequisites: ENGR 321.

ENGR 460 Energy Systems 3 Credits
Discussion of conventional, alternative and renewable energy systems, such as wind, solar, clean coal, and geothermal. Challenging energy problems relevant to the industry presented and analyzed.
Prerequisites: ENGR 312 and ENGR 321.

ENGR 465 Electric Power Systems 3 Credits
Basic understanding of electric power systems; generation, transmission, distribution and consumption. Review of AC circuit analysis in single and three phase systems using time domain and phasor representation. Includes magnetic circuits, transformers and renewable energy generation from photovoltaic cells. Introduces electromechanical energy conversion from experiments with induction and synchronous motors/generators, and includes photovoltaic panels.
Prerequisites: ENGR 317.

ENGR 481 Thermal-Fluid Systems Analysis Using CFD 3 Credits
Presentation of advanced computer simulation tools for analysis of thermal-fluid problems (fluid mechanics, thermodynamics, and heat transfer). Fundamentals of CFD (computational fluid dynamics) such as grid generation, solution techniques and convergence, modeling and simulation, and analysis of results for representative industrial problems discussed.
Prerequisites: CSCI 130 and ENGR 336.

ENGR 485 MET Design Project II 3 Credits
Second part of a two-course capstone design experience. Refinement of prototype, design optimization, fabrication, testing and evaluation. Students orally present the final design, prepare a written report and operation manual for the product.
Prerequisites: ENGR 445.

ENGR 495 Independent Study 1-4 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

ENGR 496 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ENGR 497 Structured Research 1-3 Credits
Engineering research under the direct guidance of a faculty member. Designed for junior and senior level students.
Prerequisites: Permission of instructor.

English (ENGL)

ENGL 111 English Composition I 3 Credits
Introduction to writing as a process with an emphasis on achieving rhetorical purpose.
Prerequisites: Students who do not meet placement criteria will be assigned to ENGL 090 and must pass that class with a ‘C’ or higher to enroll in ENGL 111.
Essential Learning Categories: English
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

ENGL 112 English Composition II 3 Credits
The practice of academic writing that extends one's own thinking in response to the ideas of others.
Prerequisites: ENGL 111 with a grade of 'C' or higher to fulfill English Competency requirement under Essential Learning.
Essential Learning Categories: English
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

ENGL 131 Western World Literature I 3 Credits
Works from the Classical, Medieval, and Renaissance periods.
Essential Learning Categories: Humanities
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

ENGL 132 Western World Literature II 3 Credits
Works from the late Renaissance, Neoclassic, Romantic, and Modern periods.
Essential Learning Categories: Humanities
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

ENGL 150 Introduction to Literature 3 Credits
Study of major genres of literature.
Essential Learning Categories: Humanities
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum
ENGL 196 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ENGL 210 Introduction to Literary Studies 3 Credits
Introduction to the theory and practice of studying literature.
Prerequisites: ENGL 111.

ENGL 219 Introduction to Professional Writing-GTCO33 Credits
Study of technical writing, public information and public relations writing, and free-lance nonfiction writing.
Prerequisites: ENGL 112.
Essential Learning Categories: English
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

ENGL 222 Mythology-GTAH23 Credits
Basic myths of the Greeks and Romans, the cultures that produced them and/or the Northern and Medieval myths of Europe, their backgrounds in classical culture and native folklore.
Essential Learning Categories: Humanities
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

ENGL 231 Non-Western World Literature I-GTAH23 Credits
Literature from cultures outside the Western tradition, from antiquity to approximately 1800. Texts, chosen by instructor, may include works from China, Japan, India, the Middle East, etc.
Essential Learning Categories: Humanities
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

ENGL 232 Non-Western World Literature II-GTAH23 Credits
Nineteenth and twentieth century literature from Eastern, Indian, African, Asian and Latin American tradition.
Essential Learning Categories: Humanities
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

ENGL 240 Children's Literature 3 Credits
Survey of literature for children from birth to age 12, focusing on ways of reading texts.

ENGL 245 Imaginative Writing 3 Credits
Introduction to the theory and practice of imaginative writing for young people.
Prerequisites: ENGL 111.

ENGL 250 Introduction to Creative Writing 3 Credits
An introduction to the theory and practice of producing original works of poetry, fiction, and non-fiction prose.
Prerequisites: ENGL 111.

ENGL 254 Survey of English Literature I-GTAH23 Credits
English literature from its beginnings through the Enlightenment.
Essential Learning Categories: Humanities
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

ENGL 255 Survey of English Literature II-GTAH23 Credits
English literature from the Romantics to the present day.
Essential Learning Categories: Humanities
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

ENGL 261 Survey of American Literature I-GTAH23 Credits
American literature from the beginnings to the late 19th Century.
Essential Learning Categories: Humanities
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

ENGL 262 Survey of American Literature II-GTAH23 Credits
American literature from the late 19th Century to the present.
Essential Learning Categories: Humanities
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

ENGL 296 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ENGL 301 Classical Greek and Latin Literature 3 Credits
Readings in English of Greek and Roman authors and major classical genres.
Prerequisites: ENGL 112.

ENGL 311 English Medieval Literature 3 Credits
Major works of Old and Middle English literature.
Prerequisites: ENGL 112.

ENGL 313 English Renaissance Literature 3 Credits
Major works of the 16th and 17th Centuries, including the Metaphysical and Caroline poets and John Milton.
Prerequisites: ENGL 112.

ENGL 314 American Literature to 1830 3 Credits
An in-depth study of various significant texts of the period, as well as other relevant texts. Texts and authors are chosen by the instructor to provide a thorough study of selected important historical, philosophical and literary aspects of the period.
Prerequisites: ENGL 112.

ENGL 315 American Literature 1830-1870 3 Credits
An in-depth study of various significant texts of the period, as well as other relevant texts. Texts and authors are chosen by the instructor to provide a thorough study of selected important historical, philosophical and literary aspects of the period.
Prerequisites: ENGL 112.

ENGL 316 American Literature 1870-1900 3 Credits
An in-depth study of various significant texts of the period, as well as other relevant texts. Texts and authors are chosen by the instructor to provide a thorough study of selected important historical, philosophical and literary aspects of the period.
Prerequisites: ENGL 112.

ENGL 320 Report and Proposal Writing 3 Credits
Introduction to the theory and practice of preparing and analyzing reports and proposals intended for businesses, governmental agencies, private and corporate foundations.
Prerequisites: ENGL 112.

ENGL 325 Writing for Engineers 3 Credits
Development of a set of communication tools by learning how to compose, design, and edit technical documents for the engineering professions. Topics include technical documentation (lab reports, designing of reports, proposals), professional correspondence (emails, memo reports, and team meetings), and verbal and graphical communication of technical data.

ENGL 330 Women in World Thought and Literature 3 Credits
Readings in world literature by and about women; interdisciplinary study of feminist theories and women's contributions to world thought.
Prerequisites: ENGL 112.
ENGL 335 The Bible as Literature3 Credits
Prerequisites: ENGL 112.

ENGL 343 Language Systems and Linguistic Diversity3 Credits
Introduction to the nature of language, first and second language acquisition, and issues relevant to linguistic diversity and multicultural literacies.
Prerequisites: ENGL 112.

ENGL 355 Shakespeare3 Credits
Early and mature plays, including genres of comedy, history, tragedy, and romance, emphasizing close textual reading in conjunction with cultural and intellectual contexts.
Prerequisites: ENGL 112.

ENGL 365 Literature for Young Adults3 Credits
Advanced study of major works for youth and adolescents throughout history, with an emphasis on contemporary authors.
Prerequisites: ENGL 112.

ENGL 370 Major Author3 Credits
In-depth study of one or two important writers, with attention to the writer's distinctive style and subject matter, the range of the writer's career, and the influence of the writer's work.
Prerequisites: ENGL 112.
Course may be taken 10 times for credit.

ENGL 380 Memoir and Creative Non-Fiction3 Credits
Theory and practice of the memoir and the personal essay. Emphasis on narrative craft, experiential expression, research, and interviewing.
Prerequisites: ENGL 250.

ENGL 381 Creative Writing: Fiction3 Credits
Theory and practice of producing original works of fiction.
Prerequisites: ENGL 250 or permission of instructor.

ENGL 382 Creative Writing: Crafting Fiction3 Credits
In-depth focus on a specialized aspect of fiction writing.
Prerequisites: ENGL 250 or permission of instructor.

ENGL 383 Creative Writing: Poetry3 Credits
Theory and practice of producing original works of poetry.
Prerequisites: ENGL 250 or permission of instructor.

ENGL 384 The Art of the Essay3 Credits
Theory and practice of objective non-fiction, including expository and persuasive writing. Emphasis on style, structure, and audience.
Prerequisites: ENGL 250 or permission of instructor.

ENGL 385 Technical and Professional Writing3 Credits
Practice in writing and editing of workplace documents, including correspondence, reports and proposals.
Prerequisites: ENGL 112.

ENGL 386 Roots of Modern Rhetoric3 Credits
A survey of the history of rhetoric from classical Greece to the present with emphasis on the Greco-Roman tradition.
Prerequisites: ENGL 112.

ENGL 387 Literary Editing and Publishing3 Credits
Practical experience in literary editing and publishing one of Colorado Mesa University's journals.
Prerequisites: ENGL 250 or permission of instructor.

ENGL 388 Creative Writing: Crafting Poetry3 Credits
In-depth focus on a specialized aspect of poetry writing.
Prerequisites: ENGL 250 or permission of instructor.

ENGL 389 Screenwriting3 Credits
Theory and practice of producing original screenplays.
Prerequisites: ENGL 250 or ENGL 390.
Terms Typically Offered: Fall.

ENGL 390 Introduction to Film Studies3 Credits
Introduction to film narrative, cinematography, and theory.
Prerequisites: ENGL 112.

ENGL 392 Introduction to Copy Editing3 Credits
Approaches to editing principles in a variety of genres and settings. Exploration of information associated with editing, including an emphasis on technical terms, levels of editing, and ethical issues.
Prerequisites: ENGL 112.
Terms Typically Offered: Spring.

ENGL 394 Technical and Professional Writing Topics3 Credits
Topics at the discretion of the instructor, or to meet the needs of the department. Topics may include: grant writing for industry; professional editing; desktop publishing for professional writing; writing for online presentation; individual and team writing.
Prerequisites: ENGL 112.

ENGL 395 Independent Study1-4 Credits
Prerequisites: ENGL 112.
Course may be taken multiple times up to maximum of 6 credit hours.

ENGL 396 Topics1-3 Credits
Prerequisites: ENGL 112.
Course may be taken multiple times up to maximum of 15 credit hours.

ENGL 397 Practicum3 Credits
Experience in a Basic Writing classroom helping the instructor with all phases of writing instruction.
Prerequisites: ENGL 250 or permission of instructor.

ENGL 398 Practicum in Editing and Publishing1-3 Credits
Experience in editing and publishing one of Colorado Mesa University's journals. Credit hours contracted through advising instructor.
Prerequisites: ENGL 112.
Course may be taken multiple times up to maximum of 9 credit hours.

ENGL 415 American Folklore3 Credits
Explores folk expressions of values, beliefs, traditions, attitudes, and worldviews.
Prerequisites: ENGL 112.

ENGL 421 Introduction to Literary Theory and Criticism3 Credits
Development and theory of literary criticism.
Prerequisites: ENGL 210.

ENGL 423 Genre Studies3 Credits
History and development of an individual literary genre.
Prerequisites: ENGL 112.

ENGL 425 Scientific Writing3 Credits
Theoretical and practical studies of writing in the sciences (science, medicine, and environmental writing). Addresses writing for both popular and professional audiences. Coverage of both print and online instructional materials. Safety, ethical and liability issues.
Prerequisites: ENGL 112 or 45 credit hours.

ENGL 427 Writing for Industry3 Credits
Theoretical and practical studies of writing for industrial fields. Addresses writing for both popular and professional audiences. Covers both print and online instructional materials. Safety, ethical, and liability issues.
Prerequisites: ENGL 112 or 45 credit hours.
ENGL 435 American Literature 1900-1945 Credits
An in-depth study of various significant texts of the period, as well as other relevant texts. Texts and authors are chosen by the instructor to provide a thorough study of selected important historical, philosophical and literary aspects of the period.
Prerequisites: ENGL 112.

ENGL 436 American Literature 1945-Present Credits
An in-depth study of various significant texts of the period, as well as other relevant texts. Texts and authors are chosen by the instructor to provide a thorough study of selected important historical, philosophical and literary aspects of the period.
Prerequisites: ENGL 112.

ENGL 438 Ethnic Experiences in U.S. Literature Credits
Survey of literary works written throughout United States history by African-American, Hispanic-American, Native American and Asian American authors, as well as by authors from other under represented cultural communities.
Prerequisites: ENGL 112.

ENGL 440 History of the English Language Credits
Historical development of the English language; its internal formation as shaped by external political, social, and intellectual forces.
Prerequisites: ENGL 112 and junior standing, or permission of instructor.

ENGL 451 Understanding and Using English Grammar Credits
The art of using English grammar effectively for written and spoken communication.
Prerequisites: ENGL 112 and junior standing, or permission of the instructor.

ENGL 470 18th Century British Literature Credits
Conceptual framework of the Enlightenment in England’s representative writers.
Prerequisites: ENGL 112.

ENGL 471 British Romanticism Credits
Exploration of the poetry, prose, and drama of the Romantic period in Britain. Text and authors are chosen by the instructor to provide a thorough study of selected historical, philosophical and literary aspects of the period.
Prerequisites: ENGL 112.

ENGL 475 Victorian Literature Credits
Representative works of post-Romantic British literature.
Prerequisites: ENGL 112.

ENGL 478 20th Century British Literature Credits
Major works from 20th Century British writers.
Prerequisites: ENGL 112.

ENGL 491 Composition Theory and Practice Credits
Theory and practice of composing as it applies to teaching English in the junior and senior high schools; historical context, contemporary theory, and current pedagogy in the field of composition studies.
Prerequisites: Senior standing in teacher certification program or permission of instructor.

ENGL 492 Seminar in Writing Credits
Capstone course focusing on genre choice (novel, short story, poetry, memoir, creative non-fiction, screenplay, playwriting). Research into professional and publishing considerations. Development of a creative portfolio.
Prerequisites: ENGL 210, ENGL 250, and junior standing, or permission of instructor.

ENGL 494 Seminar in Literature Credits
Analysis of an important literary work or works, requiring students to interpret, criticize, and present research.
Prerequisites: ENGL 210 and senior standing, or permission of instructor. Course may be taken 4 times for credit.

ENGL 495 Independent Study Credits
Prerequisites: ENGL 112.
Course may be taken multiple times up to a maximum of 6 credit hours.

ENGL 496 Topics Credits
Prerequisites: ENGL 112.
Course may be taken multiple times up to a maximum of 15 credit hours.

ENGL 497 Internship in Business, Technical, and Professional Communication Credits
An opportunity to write, edit, and design business and technical documents in a professional setting. Projects may include reports, proposals, grants, manuals, brochures and newsletters.
Prerequisites: Senior standing or permission of instructor.

ENGL 499 Internship Credits
Course may be taken multiple times up to a maximum of 15 credit hours.

ENGL 521 Seminar in Literary Theory Credits
Study of the content and application of literary theoretical frameworks.

ENGL 543 Language Systems and Linguistic Diversity Credits
Advanced study in the nature of language, first and second language acquisition, and issues relevant to linguistic diversity and multicultural literacies. Discussions will focus on education within and across home, community, and school contexts, including a focus on home-school-community relationships.
Prerequisites: Bachelor's degree.

ENGL 550 Studies in Creative Writing Credits
Studies in the history, development, theory, and practice of creative writing with an emphasis on understanding genre.

ENGL 554 Topics in British and Commonwealth Literature Credits
Analysis of an important British or Commonwealth literary work or works requiring students to interpret, criticize, and present research.

ENGL 561 Topics in American Literature Credits
Analysis of an important American literary work or works requiring students to interpret, criticize, and present research.

ENGL 586 Seminar in Rhetoric and Composition Credits
Theory and practice of rhetoric and composition including historical contexts, contemporary theories and current pedagogy.

ENGL 596 Topics Credits
Course may be taken multiple times up to a maximum of 6 credit hours.

ENGL 599 Internship Credits
Course may be taken multiple times up to a maximum of 15 credit hours.

ENGL 599 Internship Credits
Course may be taken multiple times up to a maximum of 15 credit hours.

ENGL 596 Topics Credits
Course may be taken multiple times up to a maximum of 15 credit hours.

English-Basic Writing (ENGC)

ENGC 090 College Preparatory Reading and Composition Credits
Development of proficiency in reading and writing for college. Emphasis on applying analytic and critical reading skills in a variety of texts and an introduction to the writing process. Prepares students for college-level essential learning courses.

ENGC 092 Writing Studio Credits
This course is designed to offer supplemental support for students in ENGL 111 and writing intensive courses across the disciplines. This is a corequisite with ENGL 111 or social science 100 discipline strands for students with Accuplacer scores requiring enrollment.
Entrepreneurship (ENTR)

ENTR 196 Topics: 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ENTR 296 Topics: 2-4 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ENTR 300 Small Business and Entrepreneurship 3 Credits
Aspects of management uniquely important to small business firms; the economic and social environment in which they function.

ENTR 340 Applied Financial Management for Emerging Businesses 3 Credits
Overview of basic accounting and finance concepts for non-business majors owning or employed by small business/entrepreneurial ventures.

ENTR 343 Exploring Entrepreneur Opportunities 3 Credits
Introduction to innovation and opportunity recognition, including development of business ideas, business model validation and business feasibility analysis.

Equivalent Course(s): ENGR 353

ENTR 350 The Entrepreneurial Mindset 3 Credits

Prerequisites: ENTR 300 or permission of instructor.

ENTR 395 Independent Studies 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

ENTR 396 Topics: 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ENTR 401 Entrepreneurial Finance 3 Credits
Overview of financial management for the entrepreneurial venture, freelancer, or small business. Exposure to financial options from bootstrapping to venture capital. Development of skills using Quickbooks and Excel as tools for personal finance, business startup, and small business management.

Prerequisites: FINA 301.

ENTR 450 Entrepreneurship 3 Credits
Analysis of managerial problems of small business, preparing a business plan, case studies, and individual reports of local small business enterprises. Understanding of elementary accounting, finance, and business law required.

Prerequisites: ACCT 201, MANG 201, MARK 231, FINA 301, and students choose either MARK 350 or CISB 341.

ENTR 496 Topics: 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ENTR 499 Internship 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ENTR 550 Entrepreneurship 3 Credits
Takes the student through activities that an entrepreneur would encounter in the small business start-up process. Topics will center around marketing, managerial, legal, financial and informational needs of the new venture. The use of cases, real life projects and Internet resources will be used extensively during the course.

Environmental Science (ENVS)

ENVS 101 Introduction to Environmental Science 3 Credits
Impact of resource use and pollution on the earth's environment and biota. Scientific approach to solving environmental problems and the impacts of values upon global environmental decisions examined. General environmental awareness and literacy emphasized. Students may take either ENVS 101 or ENVS 103/ENVS 103L for essential learning natural science credit, but not both.

Essential Learning Categories: Natural Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

ENVS 103 Field-Based Introduction to Environmental Science 3 Credits
Examination of the effects of resource use and pollution on the earth's environment and biota. Integration of lecture with field and lab exercises to demonstrate scientific approach to solving environmental problems. Emphasis on environmental awareness and critical thinking. Students may take either ENVS 101 or ENVS 103/ENVS 103L for essential learning natural science credit, but not both.

Corequisites: ENVS 103L.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

ENVS 103L Field-Based Introduction to Environmental Science Laboratory 1 Credit
Lab component required for ENVS 103.

Corequisites: ENVS 103.

Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

Fees: Yes.

ENVS 104 Environmental Science: Global Sustainability 3 Credits
Examination of local to global environmental issues. Includes human population dynamics and impact of agriculture on the environment, ecosystem function, energy use and sustainable development, air, water and soil pollution, climate change and environmental policy. Critical evaluation of readings from historical and modern environmental topics supplement lectures.

Prerequisites: Declared ENVS major or minor or permission of instructor. Will not count as credit to the major if credit has already been received for ENVS 101 or ENVS 103.

ENVS 105 Readings in Environmental Science 1 Credit
Critical readings in environmental science. Majors in Environmental Science and Technology only. ENVS 101 and 105 together are a substitute for ENVS 104.

Prerequisites: ENVS 101.
ENVS 150 Introduction to Environmental Field Studies 1-3 Credits
Techniques for common field measurements in environmental science. Basic interpretation and statistical analysis of data. Human effects on natural systems.

ENVS 196 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ENVS 204 Introduction to Ecosystem Management 3 Credits
Scientific management of natural resources in a changing environment. Problem solving emphasized in a case study approach to ecosystem management. Theories of ecology, economics, fisheries and wildlife management, biology, and sociology to solve problems using realistic and complex landscape scenarios.
Prerequisites: ENVS 104 or permission of instructor.
Corequisites: ENVS 204L.

ENVS 204L Introduction to Ecosystem Management Laboratory 1 Credit
Lab component required for ENVS 204.
Prerequisites: ENVS 104 or permission of instructor.
Corequisites: ENVS 204.
Fees: Yes.

ENVS 212 Environmental Health and Safety 2 Credits
Examination of environmental health and safety issues associated with hazardous materials. Includes basic toxicology, threat assessment, and control strategies. Meets 40-hour OSHA training requirement for hazardous waste operations.
Prerequisites: ENVS 221.

ENVS 221 Science and Technology of Pollution Control 3 Credits
Introduction to scientific, engineering, and technical elements of pollution control. Includes pollutant characteristics, investigation and cleanup of contaminated sites, waste treatment (air emissions, wastewater discharges, hazardous waste), waste minimization, life cycle analysis, and industrial ecology. Lab focuses on site investigation skills, design and operation of selected treatment technologies, and waste minimization audits.
Prerequisites: ENVS 104; mastery of high school algebra; CHEM 121 or CHEM 131 recommended.
Corequisites: ENVS 221L.

ENVS 221L Science and Technology of Pollution Control Laboratory 1 Credit
Lab component for ENVS 221.
Prerequisites: ENVS 101 or ENVS 104; mastery of high school algebra; CHEM 121 or CHEM 131 recommended.
Corequisites: ENVS 221.
Fees: Yes.

ENVS 296 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ENVS 301 Environmental Project Management 2 Credits
Basic practices of effective project management, including proposal preparation, planning, scheduling, cost estimating, cost and progress tracking, and team building.
Prerequisites: Any one of the following: ENVS 204, ENVS 221, ENVS 331, ENVS 340.

ENVS 312 Soil Science and Sustainability 3 Credits
Prerequisites: CHEM 121 or higher and ENVS 204/ENVS 204L, or permission of instructor.
Corequisites: ENVS 312L.

ENVS 312L Soil Science and Sustainability Laboratory 1 Credit
Lab component required for ENVS 312.
Prerequisites: CHEM 121 or higher and ENVS 204/ENVS 204L, or permission of instructor.
Corequisites: ENVS 312.
Fees: Yes.

ENVS 315 Mined Land Rehabilitation 2 Credits
Principles and practices of mined land reclamation. Topics include mining techniques, disturbances caused by mining, regulations, closure of mine features, soil preparation, revegetation, and monitoring.
Prerequisites: ENVS 455 or ENVS 312/ENVS 312L (may be taken concurrently).
Fees: Yes.

ENVS 321 Environmental Risk Analysis 3 Credits
Assessment, management, and control of risk from toxic substances in the environment. Topics include basic elements of toxicity testing and epidemiology, chemical fate in the environment, exposure assessment, uncertainty in risk estimates, approaches to risk management, and risk communication.
Prerequisites: ENVS 221, ENVS 221L, and MATH 113.

ENVS 331 Water Quality 3 Credits
Physical, chemical, and biological properties of aquatic systems. Includes movement of water in the watershed, stream classification and stability, lake circulation, aquatic ecology, chemistry and biology of natural and polluted waters, water quality monitoring, regulation and protection of surface water, and watershed assessment and management. Lab focuses on practical skills and field measurements culminating in an assessment of a local watershed.
Prerequisites: CHEM 121 or CHEM 132, and STAT 200.
Corequisites: ENVS 331L.

ENVS 331L Water Quality Laboratory 1 Credit
Lab component required for ENVS 331.
Prerequisites: CHEM 121 or CHEM 132, and STAT 200.
Corequisites: ENVS 331.
Fees: Yes.

ENVS 337 Stream Biomonitoring 2 Credits
Examination of the structure and organization of macroinvertebrate assemblages in streams and rivers. Topics include sample collection, sample preservation, sample identification, and analysis using the State of Colorado multimetric index for assessing water quality.
Prerequisites: ENVS 331 and ENVS 331L.

ENVS 340 Applied Atmospheric Science 3 Credits
Examination of the atmosphere and air pollution. Includes physical and chemical properties of the atmosphere, meteorology, air pollutant sources and effects, monitoring, pollutant dispersion, emission inventory, management of emissions, and regulation of air quality.
Prerequisites: CHEM 121 or CHEM 131.

ENVS 350 Ecology and Management of Shrublands and Grasslands 3 Credits
Examination of ecological principles in determining the structure, function, and management of North American grasslands and shrublands. Three one-hour lectures and one three-hour lab per week. Two Saturday labs may be required.
Prerequisites: STAT 200 and ENVS 204/ENVS 204L.
Corequisites: ENVS 350L.
ENVS 350L Ecology and Management of Shrublands and Grasslands Laboratory1 Credit
Lab component required for ENVS 350.
Prerequisites: STAT 200 and ENVS 204/ENVS 204L.
Corequisites: ENVS 350.
Fees: Yes.

ENVS 354 Forest Ecology and Management3 Credits
Examination of the structure and function of trees and forests. Topics include forest stand development, carbon cycling, nutrient cycling, forest disturbances, and basic practices of sustainable forest management.
Prerequisites: ENVS 204 and ENVS 204L.

ENVS 360 Fire Ecology3 Credits
Examination of the ecological effects of fire on forests, shrublands, and grasslands. Includes fire effects on plants, animals, soil, and water, as well as using fire as a restoration tool.
Prerequisites: STAT 200 and ENVS 204/ENVS 204L.
Corequisites: ENVS 360L.

ENVS 360L Fire Ecology Laboratory1 Credit
Field experience examining the ecological effects of fire on forests, shrublands, and grasslands of the Colorado Plateau. Includes field and lab studies that test the effects of fire on plants, animals, soil, and water. One 3-hour lab per week. May require 2 Saturday labs.
Prerequisites: STAT 200 and ENVS 204/ENVS 204L.
Corequisites: ENVS 360.
Fees: Yes.

ENVS 370 Renewable Energy3 Credits
Introduction to renewable energy resources from a technical perspective with an emphasis on sustainability. Includes concepts of energy and power, units of measure, sources and forms of energy, uses of energy, energy efficiency, electricity, solar thermal and photovoltaics, bioenergy, hydropower, tidal power, wave power, wind power, geothermal, hydrogen, efficient building design, and integration of renewables with current energy supplies.
Prerequisites: MATH 113 or higher.
Equivalent Course(s): GEOL 370
Terms Typically Offered: Fall.

ENVS 373 Climate Change Adaptation3 Credits
Climate change vulnerability and adaptation strategies in natural resource management. Includes the scientific basis of climate change and assessing the exposure, sensitivity, and adaptive capacity of species and ecosystems to climate change.
Prerequisites: ENVS 204.
Terms Typically Offered: Spring.

ENVS 374 Sustainable Building3 Credits
Principles and practices of 'green' building. Topics include philosophy of sustainable design, site development, passive heating and cooling, innovative structural systems and materials, energy supply and conservation, water and waste water management, indoor air quality, and case studies.

ENVS 376 Ecological Design and Technology3 Credits
Examination of ecosystem-based technology to benefit both humans and the environment. Topics covered include the philosophy of ecological design and technology, relevant ecological principles, and ecological technologies including treatment wetlands, anaerobic digesters, algal flow ways, ecological treatment systems, rain gardens, green walls, and green roofs.
Prerequisites: CHEM 121 or CHEM 121L, ENVS 204, and MATH 113.
Terms Typically Offered: Fall.

ENVS 377 Systems Thinking in Environmental Science3 Credits
Exploration of systems thinking as an approach to environmental issues. Topics covered include the meaning of systems and systems thinking, examining systems using the "triple P" framework (people, planet, profit), drawing system diagrams, conducting life cycle assessment and eMergy analysis to quantify environmental impacts, and modeling systems.
Prerequisites: ENVS 204 and MATH 113.
Terms Typically Offered: Spring.

ENVS 378 Permaculture Design3 Credits
Practical application of ecology to design of sustainable human and agricultural systems. Topics include permaculture principles, design strategies, sustainable agriculture, natural building, cooperative economics, and neighborhood design. Students work in teams to complete a design project for a local site.
Corequisites: ENVS 378L.
Terms Typically Offered: Fall, Summer.

ENVS 394 Natural Resources of the West1 Credit
Seminars covering topics related to natural resources including water, soil, land, mineral and energy resources in the western United States. Guest speakers are invited from the academic community, industry or government agencies to give formal oral presentations following by informal discussion with students and faculty.
Equivalent Course(s): GEOL 394
Course may be taken multiple times up to maximum of 4 credit hours.

ENVS 395 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

ENVS 396 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

ENVS 410 Environmental Regulatory Compliance3 Credits
Examination of regulatory requirements pertaining to air pollution, water pollution, hazardous materials, and radioactive materials. Additional topics include enforcement, compliance management systems, compliance auditing, and innovative approaches to regulation.
Prerequisites: ENVS 221, and junior or senior standing.

ENVS 413 Environmental Fate and Transport of Contaminants3 Credits
Physical, chemical, and biological factors influencing the persistence and migration of chemicals in the environment. Includes consideration of air, surface water, soil, and ground water. Emphasis on quantitative problem solving.
Prerequisites: CHEM 121 or CHEM 132; and MATH 119, MATH 146, or MATH 151.
ENVS 420 Pollution Investigation & Monitoring
Survey of field sampling and analytical methods for study of environmental systems. Topics include sampling design, regulatory issues, quality assurance, quality control, data interpretation, and reporting. Three one-hour lectures and one three-hour laboratory per week.
Prerequisites: CHEM 121 or CHEM 131, and STAT 200; ENVS 221/ENVS 221L recommended.
Corequisites: ENVS 420L.

ENVS 420L Pollution Investigation & Monitoring Laboratory
Examination of strategies and techniques for investigating contaminated sites and monitoring environmental pollutants. Topics include Phase I assessments, development and implementation of sampling and monitoring plans, quality assurance, methods of analysis, and data interpretation and presentation.
Prerequisites: CHEM 121 or CHEM 131, and STAT 200; ENVS 221/ENVS 221L recommended.
Corequisites: ENVS 420.
Fees: Yes.

ENVS 431 Water and Wastewater Treatment
Examination of water and wastewater treatment processes including physical, chemical, and biological treatment technologies. Emphasis on unit process design and modeling.
Prerequisites: ENVS 331.

ENVS 433 Restoration of Aquatic Systems
Principles and practices of restoring the functions and values of streams, ponds, and wetlands. Addresses physical, chemical, and biological aspects of these aquatic systems.
Prerequisites: ENVS 331 and ENVS 331L.

ENVS 455 Restoration Ecology
Examination of principles and techniques for restoration of community characteristics and ecosystem functions to disturbed lands. Lecture and lab emphasize practical application of ecological principles to restoration culminating in an independent project of designing a restoration project for a local area.
Prerequisites: ENVS 204 and ENVS 312, or permission of instructor.
Corequisites: ENVS 455L.

ENVS 455L Restoration Ecology Laboratory
Lab component required for ENVS 455.
Prerequisites: ENVS 204 and ENVS 312, or permission of instructor.
Corequisites: ENVS 455.
Fees: Yes.

ENVS 460 Fire Management
Examination of principles and current topics in fire management, including fire behavior, prescribed fire/smoke management, fuels/fuels management, wildfire control, fire in the wildland-urban interface, and fire policy.
Prerequisites: ENVS 360/ENVS 360L, STAT 200, one semester of biology.
Corequisites: ENVS 460L.

ENVS 460L Fire Management Laboratory
Field, lab, and computer modeling experience in predicting fire behavior, planning prescribed burns, managing hazardous fuels, and assessing wildfire risk in the wildland-urban interface.
Prerequisites: ENVS 360/ENVS 360L, STAT 200, one semester of biology.
Corequisites: ENVS 460.
Fees: Yes.

ENVS 475 Experimental Design and Statistical Analysis in Environmental Science
Examination of principles and techniques for designing experiments and analyzing data in environmental sciences. Emphasis on practical application of analysis techniques using environmental data with computer applications.
Prerequisites: ENVS 204 or ENVS 221, STAT 200, and 6 upper division credits; or permission of instructor.

ENVS 492 Capstone in Environmental Science and Technology
Small-group environmental projects for outside organizations. Prepare project proposals, plan and implement projects, write project reports, and give oral presentations to clients. Exit exams for the Environmental Science and Technology major are administered as part of this course.
Prerequisites: Senior standing or permission of instructor.

ENVS 495 Independent Study
Course may be taken multiple times up to maximum of 6 credit hours.

ENVS 496 Topics
Course may be taken multiple times up to maximum of 15 credit hours.

ENVS 497 Structured Research
Research in environmental science under the direct guidance of a faculty member. Designed for junior and senior level students.
Prerequisites: Permission of instructor.
Course may be taken multiple times up to maximum of 6 credit hours.

ENVS 499 Internship
Work experience for a non-academic organization on environmental projects. Requires 45 contact hours per credit hour, a final report, and oral presentation. Available as an elective for Environmental Science & Technology majors.
Prerequisites: Junior or senior standing in the Environmental Science & Technology program or permission of instructor.
Course may be taken multiple times up to maximum of 15 credit hours.

ENVS 596 Topics
Course may be taken multiple times up to maximum of 15 credit hours.

Essential Learning (ESSL)

ESL 200 Essential Speech
Development of confidence and competence in speaking through cross-curricular topics generated from individual Maverick Milestone coursework.
Prerequisites: ENGL 112, MATH 110 or higher, at least 45 credit hours completed.
Corequisites: ESSL 290.

ESL 290 Maverick Milestone
Interdisciplinary, thematically-oriented transition from the Essential Learning program to specialized programs. Develop the ability to solve problems and approach ideas using more than one set of intellectual tools. Taken before the student completes 75 credit hours.
Prerequisites: ENGL 112, MATH 110 or higher, at least 45 credit hours completed.
Corequisites: ESSL 200.

Finance (FINA)

FINA 301 Managerial Finance
Acquisition, allocation, and management of funds within the business enterprise. Financial goals, funds flow, valuation, capital budgeting, and financing strategies.
Prerequisites: ACCT 201, and CISB 241 or STAT 241.
FINA 310 Risk Management3 Credits
Identification of risk, risk analysis, risk evaluation and methods of resolving risk issues in a business environment. Insurance as a risk management tool discussed.
Prerequisites: Permission of instructor.

FINA 320 Fundamentals of Investments3 Credits
Introduction to the theory and practices of investment valuation and management. Topics include risk and return, investor objectives and strategies, the types and characteristics of investment instruments, the process of buying and selling securities, investment valuation and yields, and portfolio management.
Prerequisites: FINA 301.

FINA 395 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

FINA 396 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

FINA 412 Life and Health Insurance Licensure and Financial Planning3 Credits
Analysis of personal and business life and health insurance policies. Focus includes coverage need determination, underwriting, marketing, financial, ratemaking, reserving and other insurance considerations.
Prerequisites: Permission of instructor.

FINA 415 Property and Liability Insurance Licensure3 Credits
Analysis of personal and business property and liability insurance policies. Focus includes coverage need determination, underwriting, marketing, financial, ratemaking, reserving, and other insurance considerations.
Prerequisites: Permission of instructor.

FINA 420 Security Analysis and Portfolio Management3 Credits
Extension of the theory and practices of investment valuation and management. Topics include risk and return, market efficiency, economic and industry analysis, fundamental and technical analysis, bond analysis and management strategies, portfolio management and performance evaluation, and the characteristics and uses of options, rights, warrants, convertibles, and futures.
Prerequisites: FINA 301 and FINA 320.

FINA 431 International Financial Management3 Credits
The theory and practices of financial management in an international product and capital marketplace. Topics include the international flow of funds, exchange rate determinants and risk hedging, international arbitrage and interest rate parity, purchasing power parity and the international Fisher effect, instruments of international trade financing, multinational capital budgeting, multinational costs of capital, and multinational capital structure.
Prerequisites: FINA 301.

FINA 451 Financial Management: Theory and Applications3 Credits
Extension of the theory and practices of financial management using a case analysis approach. Topics include financial statement analysis, financial planning and forecasting, risk and return, capital budgeting, lease financing, cost of capital, capital structure, dividend policy, and risk management.
Prerequisites: FINA 301; senior standing or permission of instructor.

FINA 495 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

FINA 496 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

FINA 500 Financial Strategy3 Credits
Introduction and development of analysis of the financial aspects of a corporation using both theory and application. Topics include capital markets, global economic factors that affect the corporation, capital asset pricing model, portfolio analysis, and capital structure policy.

**Fine Arts (FINE)**

FINE 101 The Living Arts-GTAH13 Credits
An interdisciplinary survey of human creative efforts as they relate to each other. Art, drama, and music are compared with similarities stressed.

Essential Learning Categories: Fine Arts

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

FINE 395 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

FINE 396 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

FINE 495 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

FINE 496 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

FINE 499 Internship8 or 15 Credits
Part or full-time work in various aspects of arts management. Sites may include galleries, musical, theatrical or other performing organizations, arts centers, or other situations that meet the instructor’s approval. Half-time equals eight semester hours credit; full-time equals 15 semester hours credit.

Prerequisites: Junior standing in visual or performing arts. May also require selected courses in business, social science, etc. as appropriate to the internship sought.

Course may be taken multiple times up to maximum of 15 credit hours.

**Foreign Language-American Sign Language (FLSL)**

FLSL 111 American Sign Language I3 Credits
Basic receptive and expressive skill acquisition in American Sign Language (ASL) and other signing modes. Includes approximately 400 vocabulary items; the manual alphanumeric system; interrogatives; subject, object, possessive pronouns; simple present, past, and future verb tense formation.

FLSL 112 American Sign Language II3 Credits
Receptive and expressive skill practice in American Sign Language (ASL) and other signing modes. Includes approximately 800 vocabulary terms; classifiers; numeral incorporation; fingerspelling, loan signs, directional verbs; body and facial language.

Prerequisites: FLSL 111.

FLSL 296 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

**Foreign Language-French (FLAF)**

FLAF 111 First-Year French I3 Credits
Introduction to the French language and culture.

FLAF 112 First-Year French II3 Credits
Introduction to the French language and culture.
FLAF 211 Second-Year French I 3 Credits
Grammar review, vocabulary distinction, and readings in the French language.
Prerequisites: Two years of high school French, FLAF 111 and FLAF 112, or permission of instructor.

FLAF 212 Second-Year French II 3 Credits
Grammar review, vocabulary distinction, and readings in the French language.
Prerequisites: Two years of high school French, FLAF 111 and FLAF 112, or permission of instructor.

FLAF 290 Special Studies In French 1-3 Credits
Study beyond the scope of the existing curriculum.

FLAF 295 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

Foreign Language-German (FLAG)

FLAG 111 First-Year German I 3 Credits
Introduction to the German language.

FLAG 112 First-Year German II 3 Credits
Introduction to the German language.

FLAG 211 Second-Year German I 3 Credits
Grammar review, vocabulary distinction, and readings in the German language.
Prerequisites: Two years of high school German, FLAG 111 and FLAG 112, or permission of instructor.

FLAG 212 Second-Year German II 3 Credits
Grammar review, vocabulary distinction, and readings in the German language.
Prerequisites: Two years of high school German, FLAG 111 and FLAG 112, or permission of instructor.

FLAG 290 Special Studies In German 1-3 Credits
Study beyond the scope of the existing curriculum.

Foreign Language-Greek (FLGK)

FLGK 111 Introductory Greek I 3 Credits

FLGK 112 Introductory Greek II 3 Credits
Introduction to the fundamentals of reading ancient Greek. Emphasizes basic vocabulary and grammar. Explores aspects of Greek literature and culture. Provides a foundation for the study of ancient Greece. Develops a practical understanding of English.

FLGK 395 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

Foreign Language-Italian (FLAI)

FLAI 111 First-Year Italian I 3 Credits
Introduction to Italian. Basic competency in understanding, speaking, reading, and writing Italian.
Terms Typically Offered: Fall.

FLAI 112 First-Year Italian II 3 Credits
Continued work on basic competency in Italian. Increasing familiarity with Italian culture.
Prerequisites: FLAI 111.
Terms Typically Offered: Spring.

Foreign Language-Japanese (FLAJ)

FLAJ 111 Beginning Japanese I 3 Credits

FLAJ 112 Beginning Japanese II 3 Credits
Continued work on basic competency in understanding, speaking, reading, and writing Japanese. Increasing familiarity with Japanese culture.
Prerequisites: FLAJ 111.

Foreign Language-Latin (FLLT)

FLLT 111 Introductory Latin I 3 Credits

FLLT 112 Introductory Latin II 3 Credits

FLLT 395 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

Foreign Language-Mandarin Chinese (FLAM)

FLAM 111 First-Year Mandarin Chinese I 3 Credits
Introduction to Mandarin Chinese. Basic competency in understanding, speaking, reading, and writing Mandarin Chinese.
Terms Typically Offered: Fall.

FLAM 112 First-Year Mandarin Chinese II 3 Credits
Continued work on basic competency in Mandarin Chinese. Increasing familiarity with Chinese culture.
Prerequisites: FLAM 111.
Terms Typically Offered: Spring.

Foreign Language-Other (FLAV)

FLAV 196 Topics: 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

FLAV 290 Special Studies in Foreign Languages 1-6 Credits
These courses are currently offered through Outreach: Ancient Greek, Latin, Advanced French, German, Spanish and other Classical and Modern Languages as permitted by interest and instructor availability.
FLAR 290A Ancient Greek Begin I I3 Credits
FLAR 290B Ancient Greek Begin I I3 Credits
FLAR 290C Mandarin Beginning I I3 Credits
FLAR 290D Mandarin Beginning I I3 Credits
FLAR 290E Japanese Beginning I I3 Credits
FLAR 290F Beginning Japanese I I3 Credits
FLAR 290G Intermediate Japanese I I3 Credits
FLAR 290H Intermediate Japanese I I3 Credits
FLAR 290I Hebrew Beginning I I3 Credits
FLAR 290J Hebrew Beginning II I3 Credits
FLAR 290K Italian Beginning I I3 Credits
FLAR 290M Italian Beginning I I3 Credits
FLAR 290N Latin Beginning I I3 Credits
FLAR 290P Latin Beginning II I3 Credits
FLAR 290S Russian Beginning I I3 Credits
FLAR 290T Russian Beginning II I3 Credits
FLAR 295 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.
FLAR 296 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.
FLAR 390 Special Studies in Foreign Languages1-3 Credits
These courses are currently offered through Outreach: Ancient Greek, Latin, Advanced French, German, Spanish and other Classical and Modern Languages as permitted by interest and instructor availability.
FLAR 390G French Intermediate I I3 Credits
FLAR 390H French Intermediate II I3 Credits
FLAR 390S Russian Intermediate II I3 Credits
FLAR 390T Russian Intermediate II I3 Credits
FLAR 390U French Advanced3 Credits
FLAR 390V German Advanced3 Credits
FLAR 390W Spanish Advanced3 Credits
FLAR 395 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.
FLAR 396 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.
FLAV 495 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.
FLAV 496 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

Foreign Language-Russian (FLAR)

FLAR 111 First-Year Russian I I3 Credits
Introduction to Russian. Basic competency in understanding, speaking, reading, and writing Russian.
Terms Typically Offered: Fall.
FLAR 112 First-Year Russian II I3 Credits
Continued work on basic competency in Russian. Increasing familiarity with Russian culture.
Prerequisites: FLAR 111.
Terms Typically Offered: Spring.

Foreign Language-Spanish (FLAS)

FLAS 111 First-Year Spanish I I3 Credits
Basic Spanish language skills. Introduction to greetings, classroom and family vocabularies in the present and present progressive tenses. Hispanic cultural and social interactions.
FLAS 112 First-Year Spanish II I3 Credits
Continuation of basic Spanish language skills. Introduction of specialized vocabularies and past tenses (preterit vs. imperfect). Continuation of Hispanic cultural and social interactions.
Prerequisites: FLAS 111 or permission of instructor.
FLAS 114 Conversational Spanish I I3 Credits
A beginning level class for adult students who wish to develop a basic vocabulary for speaking and understanding Spanish socially, on the job or south of the border.
FLAS 115 Conversational Spanish II I3 Credits
A beginning level class for adult students who wish to develop a basic vocabulary for speaking and understanding Spanish socially, on the job or south of the border.
FLAS 118 Career Spanish3 Credits
For students with a background in FLAS 111 and FLAS 112 [First Year Spanish I & II] or their equivalent who wish to perfect command of the language in a variety of workplaces and professional areas of interest.
Prerequisites: FLAS 111 and FLAS 112 [or their equivalent].
FLAS 211 Second-Year Spanish I I3 Credits
End of basic Spanish language skills. Introduces subjunctive mood, future and conditionals and other language constructions.
Prerequisites: FLAS 112 or permission of instructor.
Essential Learning Categories: Humanities
FLAS 212 Second-Year Spanish II I3 Credits
Review of Spanish grammar. Practice in writing, speaking, listening comprehension and reading.
Prerequisites: FLAS 211, or permission of instructor.
FLAS 213 Spanish Conversation and Grammar3 Credits
Conversational practice in Spanish over a wide range of topics, with focus on conversational skills at the intermediate level. Review of Spanish grammar.
Prerequisites: FLAS 211 (can be taken concurrently with FLAS 300).
Essential Learning Categories: Humanities
FLAS 290 Special Studies in Spanish1-3 Credits
FLAS 295 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.
FLAS 300 Spanish Composition and Grammar3 Credits
Writing practice in Spanish over a wide range of topics (including written accents and other spelling conventions), with focus on writing skills at the intermediate level. Review of Spanish grammar.
Prerequisites: FLAS 213 (can be taken concurrently).
FLAS 301 Advanced Spanish Grammar3 Credits
Level of instruction that assumes a previous formal contact with Spanish. It is not only devoted to increase awareness of grammatical accuracy but also develops the form and structure of language, always oriented towards a practical use of Spanish.
Prerequisites: FLAS 212 or permission of instructor.

FLAS 302 Advanced Spanish Composition3 Credits
Writing of well-structured and clearly-planned compositions of varying lengths and styles. Provides the opportunity for students to do research and prepares them for the writing of regular term papers in Spanish.
Prerequisites: FLAS 301 or permission of instructor.

FLAS 303 Advanced Spanish Conversation3 Credits
Conversational practice in Spanish over a wide range of topics. Strategies in organization of oral discourse, and improvisation with special attention to advanced expression, grammaticality, and specific characteristics of spoken language.
Prerequisites: FLAS 301 and FLAS 302.

FLAS 304 Advanced Oral Production and Composition3 Credits
Introduction to writing well-structured and clearly planned compositions of varying lengths and styles. Preparation, organization, and delivery of a speech in Spanish. Provides the opportunity for students to conduct research and prepares them for the writing of term papers and oral presentations in Spanish. Special attention given to advanced expression and grammar.
Prerequisites: FLAS 300.

FLAS 305 Advanced Spanish Grammar and Spanish English Contrasts3 Credits
Development of grammatical awareness and accuracy, oriented towards a practical use of Spanish. Includes comparison and contrast of English and Spanish grammar.
Prerequisites: FLAS 300.

FLAS 310 History and Culture of Spain3 Credits
History and culture of Spain. Early inhabitants through the twenty-first century. Written and oral reports in Spanish. Emphasizes development of cultural awareness and language skills.
Prerequisites: FLAS 304.

FLAS 311 History and Culture of Latin America3 Credits
History and culture of Latin America from early inhabitants through the twenty-first century. Written and oral reports in Spanish. Emphasizes development of cultural awareness and language skills.
Prerequisites: FLAS 304.

FLAS 312 Introduction to the Literature of Spain3 Credits
Introduction to the literature of Spain from the Middle Ages through the twenty-first century. Includes excerpts from major works in poetry, narrative, and theater.
Prerequisites: FLAS 301, FLAS 302, and FLAS 303, or permission of instructor.

FLAS 320 Introduction to the Literature of Latin America3 Credits
Introduction to the literature of Latin America from Columbus through the twenty-first century. Includes indigenous traditions and excerpts from major works in poetry, narrative, and theater.
Prerequisites: FLAS 301, FLAS 302, and FLAS 303, or permission of instructor.

FLAS 323 Introduction to Hispanic Literature I3 Credits
Exploration of Peninsular and Latin-American literature from their earliest manifestations through the 18th century. Introduction to literary analysis and criticism.
Prerequisites: FLAS 305.
FLAS 441 Applied Phonetics and Phonology3 Credits
Prerequisites: FLAS 341.

FLAS 442 Methodology of Teaching Foreign Languages3 Credits
Examination of current trends, methods, and techniques in foreign language pedagogy.
Prerequisites: FLAS 301, FLAS 302, FLAS 303, FLAS 341, and FLAS 441, or permission of instructor.

FLAS 444 Using Technology, Literature and Culture in the Spanish Language Classroom3 Credits
Examination of current trends and techniques in the use of literature, technology and culture for teaching Spanish.
Prerequisites: FLAS 311, FLAS 312, FLAS 321, FLAS 322, and FLAS 341, or permission of instructor.

FLAS 446 Spanish Language Variation3 Credits
Exploration of variation and change in the Spanish-speaking world. A special look at language contact phenomena, with particular focus on Spanish/English contact situations.
Prerequisites: FLAS 341.

FLAS 495 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

FLAS 498 Spanish Senior Practicum3 Credits
Faculty-coordinated internship consisting of work-oriented instruction in Spanish involving classroom or laboratory experiences and/or research.
Prerequisites: Completion of six credit hours of FLAS at the 400-level.

Forensic Anthropology (FOAN)

FOAN 232 Survey of Forensic Science2 Credits
Exploration of the relationship between science and society by noting the history and nature of the forensic scientist in aiding to resolve various legal issues and the role of the expert witness. Includes an overview of death investigation, scene investigation, and current forensic techniques.
Prerequisites: ENGL 111 and MATH 110.
Corequisites: FOAN 232L.

FOAN 232L Survey of Forensic Science Laboratory1 Credit
Exploration of basic forensic science techniques and laboratory practices. Topics include basic evidence handling, fingerprint development and comparison, blood spatter, anthropology, entomology, and ballistics.
Prerequisites: ENGL 111 and MATH 110.
Corequisites: FOAN 232.

FOAN 296 Topics:1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

FOAN 396 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

FOAN 475 Human Remains Detection and Recovery for Medico-Legal Investigations3 Credits
Archaeological techniques applied to detection and recovery of recent human remains. Includes practical experience of approximately 6 hours on an announced date.
Prerequisites: BIOL 410, or experience in law enforcement or a coroner’s office and permission of instructor.

FOAN 480 Professional Issues in Forensic Science3 Credits
Exploration of professional issues specific for forensic science practitioners. Topics include problems seen with forensic practitioners and in forensic science facilities, the organizations of scientific area committees (OSACs), admissibility of forensic evidence, courtroom testimony, and report writing. Ethical dilemmas are presented and discussion centers on their resolution. Standards of ethics codified by professional forensic organizations are presented.
Prerequisites: CRMJ 280/CRMJ 280L or FOAN 232/FOAN 232L; and junior or senior standing.
Terms Typically Offered: Spring.

FOAN 499 Internship1-6 Credits
Opportunities to apply theoretical principles in a structured research or organizational environment. Required clock hours dependent upon credit hours.
Prerequisites: Junior or senior status, BIOL 410, permission of instructor, Hepatitis B vaccinations, and a TB skin test before and after class.
Course may be taken multiple times up to maximum of 15 credit hours.

Geographic Information Systems Technology (GIST)

GIST 305 Cartography for GIS1 Credit
Introduction to maps as tools for communication and analysis of locationaly-related information.

GIST 321 Introduction to Remote Sensing2 Credits
Fundamentals of remotely sensed data, with emphasis on processing and interpretation of Landsat satellite imagery. Two one-hour lectures and one two-hour laboratory per week.
Prerequisites: GIST 332/GIST 332L.
Corequisites: GIST 321L.

GIST 321L Introduction to Remote Sensing Laboratory1 Credit
Lab component required for GIST 321.
Prerequisites: GIST 332/GIST 332L.
Corequisites: GIST 321.
Fees: Yes.

GIST 332 Introduction to Geographic Information Systems2 Credits
Fundamentals of GIS and digital mapping, including basic GIS skills and an introduction to geospatial databases and analyses. Two one-hour lectures and one two-hour laboratory per week.
Prerequisites: GIST 305 or GEOG 131.
Corequisites: GIST 332L.

GIST 332L Introduction to Geographic Information Systems Laboratory1 Credit
Lab component required for GIST 332.
Prerequisites: GIST 305 or GEOG 131.
Corequisites: GIST 332.
Fees: Yes.

GIST 375 Global Positioning Systems for GIS2 Credits
GPS techniques and applications as they relate to GIS data collection.
Prerequisites: GIST 332/GIST 332L.
Corequisites: GIST 375L.

GIST 375L Global Positioning Systems for GIS Laboratory1 Credit
Lab component required for GIST 375.
Prerequisites: GIST 332/GIST 332L.
Corequisites: GIST 375.
Fees: Yes.
GIST 396 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

GIST 396L Topics Lab 1-2 Credits
Course may be taken 10 times for credit.

GIST 422 GIS Data Management and Editing 2 Credits
Further exploration of GIS, involving creating, editing, and managing geospatial data and working with different types of GIS software. Two one-hour lectures and one two-hour laboratory per week.
Prerequisites: GIST 332/GIST 332L.
Corequisites: GIST 422L.

GIST 422L GIS Data Management and Editing Laboratory 1 Credit
Lab component required for GIST 422.
Prerequisites: GIST 332/GIST 332L.
Corequisites: GIST 422.

GIST 432 Spatial Analysis and Modeling in GIS 2 Credits
Exploration of GIS techniques and analysis with emphasis on raster-based GIS technology, processing, and geospatial analysis. Two one-hour lectures and one two-hour laboratory per week.
Prerequisites: GIST 332/GIST 332L.
Corequisites: GIST 432L.

GIST 432L Spatial Analysis and Modeling in GIS Laboratory 1 Credit
Lab component required for GIST 432.
Prerequisites: GIST 332/GIST 332L.
Corequisites: GIST 432.
Fees: Yes.

Geography (GEOG)

GEOG 102 Human Geography-GTSS23 Credits
Introduction to spatial dimensions of the human world. Demography, human settlements and land use, political and economic systems, ethnicity, religion, and language examined from a spatial perspective.
Essential Learning Categories: Social and Behavioral Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

GEOG 103 World Regional Geography-GTSS23 Credits
Survey of world geography by major world regions including an analysis of the physical elements, the inhabitants, and human occupancy patterns and an evaluation of the potential of each region for sustaining human populations.
Essential Learning Categories: Social and Behavioral Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

GEOG 131 Introduction to Cartography 3 Credits
Introduction to maps as tools for communication and analysis of locationally related information, including an introduction to concepts in Geographic Information Systems (GIS) and Global Positioning Systems (GPS).

GEOG 196 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

GEOG 296 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

GEOG 341 GIS for Social Scientists 2 Credits
Applications of GIS for social science analyses, including use of open-source data (such as US Census data); collecting new data, creating and converting data to GIS formats, and the practical use of physical and/or environmental GIS data in social science applications.
Prerequisites: GEOG 131, GIST 332, and GIST 332L.
Corequisites: GEOG 341L.
Terms Typically Offered: Spring.

GEOG 341L GIS for Social Scientists Lab 1 Credit
Applications of GIS for social science analyses, including use of open-source data (such as US Census data); collecting new data, creating and converting data to GIS formats, and the practical use of physical and/or environmental GIS data in social science applications.
Prerequisites: GEOG 131, GIST 332, and GIST 332L.
Corequisites: GEOG 341.
Terms Typically Offered: Spring.

GEOG 499 Internship 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

Geology (GEOL)

GEOL 100 Survey of Earth Science-GTSC23 Credits
Physical makeup of the earth, its history, and geology. One field trip is required. Intended for students with majors other than one of the sciences.
Essential Learning Categories: Natural Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum
Fees: Yes.

GEOL 103 Weather and Climate-GTSC23 Credits
Non-mathematical introduction to elements of local and global weather: the atmosphere, cloud formation, precipitation, seasons, optical phenomena and violent storms. Students practice making 24-hour weather forecasts.
Essential Learning Categories: Natural Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

GEOL 104 Oceanography-GT-SC23 Credits
Non-mathematical introduction to the scientific study of the ocean. While the course focuses on the hydrosphere subsystem of the Earth System, the atmosphere, cryosphere, lithosphere and biosphere interrelationship with the hydrosphere are also examined.
Essential Learning Categories: Natural Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

GEOL 105 Geology of Colorado-GTSC23 Credits
Introduction to minerals, rocks, geologic time scale and basic geologic terms, followed by geology of Colorado taught with the aid of movies and slides. A one-day field trip is required.
Essential Learning Categories: Natural Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum
Fees: Yes.
GEOL 106 Introduction to Dinosaurs-GT-SC23 Credits
Introduction to the study of dinosaurs, from geological, biological and historical perspectives. Intended for students interested in how different areas of science can be applied to a subject of strong human interest. Includes two full-day field trips to local dinosaur quarries and museums.
Essential Learning Categories: Natural Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum
Fees: Yes.

GEOL 107 Natural Hazards and Environmental Geology-GTSC23 Credits
Introduction to geologic aspects of our environment. Includes studies of natural hazards, global climate change, geological resources and emphasizes human interactions with the environment.
Essential Learning Categories: Natural Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum
GEOL 108 Water, People, and Environment - GTSC23 Credits
General introduction to the essential nature of water on Earth. Provides students with a comprehensive foundation in the water cycle, human use of water, water and the environment, the politics of water, and the critical issues surrounding water as a resource. Overview of global water issues as well as a focus on water in the American West, including the sources and uses of water, its importance as a resource, the critical issues of water conservation and scarcity, and the legal, political, economic and physical infrastructure that controls water in the American West.
Essential Learning Categories: Natural Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum
GEOL 111 Principles of Physical Geology-GTSC13 Credits
Materials that make up the earth and surface and interior processes that interact to produce the present features of the earth. Laboratory: minerals, rocks, topographic maps, earth quakes, and landforms. Three lectures and one two-hour laboratory per week.
Corequisites: GEOL 111L.
Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum
GEOL 111L Principles of Physical Geology Laboratory-GTSC11 Credit
Lab component required for GEOL 111.
Corequisites: GEOL 111.
Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum
GEOL 112 Principles of Historical Geology-GTSC13 Credits
Origin of the earth and life, changes recorded in rocks and fossils using the geologic time scale and techniques of dating to place events in sequence. Laboratory: topographic and geologic maps, hand samples of rocks, reconstruction exercises, and fossils to interpret regional and geologic history. One all-day field trip is required. Four lectures and one two-hour laboratory per week.
Prerequisites: GEOL 111/GEOL 111L or GEOL 113/GEOL 113L or permission of instructor.
Corequisites: GEOL 112L.
Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum
GEOL 112L Principles of Historical Geology Laboratory-GTSC11 Credit
Lab component required for GEOL 112.
Prerequisites: GEOL 111/GEOL 111L or GEOL 113/GEOL 113L or permission of instructor.
Corequisites: GEOL 112.
Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum
GEOL 113 Field-Based Introduction to Physical Geology-GTSC13 Credits
Introduction to minerals, rocks, Earth structures, mountain building processes, and other elements of physical geology for science and non-science majors. A majority of class time will be spent in the field (including one Saturday) observing and mapping geological features of Western Colorado. There will be some indoor lectures and laboratory work. This course is recommended for prospective K-12 teachers.
Corequisites: GEOL 113L.
Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum
GEOL 113L Field-Based Introduction to Physical Geology Laboratory-GTSC11 Credit
Lab component required for GEOL 113.
Corequisites: GEOL 113.
Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum
GEOL 196 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

GEOL 202 Introduction to Field Studies3 Credits
Mapping of several small areas using GPS, aerial photographs, and pace and compass methods. Profiles, cross-sections, and maps are prepared. Some unscheduled time is required to do mapping projects.
Prerequisites: GEOL 111 and GEOL 111L or GEOL 113 and GEOL 113L; and GEOL 112 and GEOL 112L (may be taken concurrently).
Fees: Yes.

GEOL 204 Computer Applications in Geology3 Credits
Quantitative methods of geologic data analysis with the data manipulated on the computer. Methodical approach with limited theoretical emphasis; statistical concepts; special programs for graphical presentation and analysis. Three lectures per week and computer laboratory time to complete exercises are required.
Prerequisites: GEOL 111/GEOL 111L or GEOL 113/GEOL 113L, and GEOL 112/GEOL 112L, and STAT 200 (recommended but not required) or permission of instructor.
Fees: Yes.

GEOL 250 Environmental Geology3 Credits
Geologic aspects of environmental problems involving natural processes and anthropogenic activities. Studies include landslides, earthquakes, flooding, coastal erosion, and land subsidence as well as environmental impacts of mineral resource extraction, soil erosion, fossil fuel consumption, and climate change.
Prerequisites: GEOL 100 or GEOL 104 or GEOL 105 or GEOL 111 or GEOL 113.
Fees: Yes.
GEOL 296 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

GEOL 301 Structural Geology 3 Credits
Stress and strain in rock bodies. Description and occurrence of both brittle and ductile rock structures. Laboratory: stereographic and graphical solution of structural problems, the study of maps and cross sections, and some field problems. Three lectures and one two-hour laboratory per week. Four one-day field trips are taken.
Prerequisites: GEOL 202, GEOL 204, and MATH 130.
Corequisites: GEOL 301L.

GEOL 301L Structural Geology Laboratory 1 Credit
Lab component required for GEOL 301.

Prerequisites: GEOL 202, GEOL 204, and MATH 130.
Corequisites: GEOL 301.

Fees: Yes.

GEOL 325 Introduction to Engineering Geology 3 Credits
Geologic principles applied to construction problems; case histories of major projects. Field trips and term project required.
Prerequisites: GEOL 111/GEOL 111L or GEOL 113/GEOL 113L or permission of instructor.

Fees: Yes.

GEOL 331 Crystallography and Mineralogy 3 Credits
Morphology and classification of crystals; chemistry and genesis of minerals. Laboratory: identification of crystal systems and class, hand specimen identification of minerals, some X-ray diffraction work. Three lectures and one two-hour laboratory per week.
Prerequisites: GEOL 202, GEOL 204, and CHEM 131 or permission of instructor.
Corequisites: GEOL 331L.

GEOL 331L Crystallography and Mineralogy Laboratory 1 Credit
Lab component required for GEOL 331.

Prerequisites: GEOL 202, GEOL 204, and CHEM 131 or permission of instructor.
Corequisites: GEOL 331.

Fees: Yes.

GEOL 333 Geology of the Canyon Country 1 Credit
Three two-hour evening lectures with films and slides used to preview geology of the Colorado Plateau. A five-day field trip to the selected sites is conducted during spring break.
Prerequisites: GEOL 100, GEOL 105 or GEOL 112.

Fees: Yes.

GEOL 340 Igneous and Metamorphic Petrology 3 Credits
Origin, composition and classification of igneous and metamorphic rocks. Laboratory: identification of igneous and metamorphic rocks in hand specimens. Three lectures and one two-hour laboratory per week.
Prerequisites: GEOL 331.
Corequisites: GEOL 340L.

GEOL 340L Igneous and Metamorphic Petrology Laboratory 1 Credit
Lab component required for GEOL 340.

Prerequisites: GEOL 331.
Corequisites: GEOL 340.

Fees: Yes.

GEOL 351 Applied Geochemistry 3 Credits
Geochemistry and its relationship to weathering and soils, geochemical surveys and prospecting techniques, reactions of contaminants with earth materials, and methods of reducing environmental degradation.
Prerequisites: CHEM 121/CHEM 121L, CHEM 122/CHEM 122L, and GEOL 111/GEOL 111L or GEOL 113/GEOL 113L.

GEOL 355 Basic Hydrology 3 Credits
Introduction to physical hydrologic processes including precipitation, evapotranspiration, infiltration, runoff and subsurface flow. Examination of hydrologic modeling, problem solving, and monitoring techniques as well as water resource management issues at both local and global scales.
Prerequisites: MATH 113, or MATH 151 or permission of instructor.

GEOL 359 Survey of Energy-Related Natural Resources 3 Credits
Origin, location, and economics of non-metallic geologic commodities, including phosphates, evaporites, oil, gas, coal, and sedimentary uranium deposits. Students give oral and written reports on two localities.
Prerequisites: GEOL 111/GEOL 111L or GEOL 113/GEOL 113L; CHEM 131/CHEM 131L, or permission of instructor.

GEOL 361 Survey of Mineral-Related Natural Resources 3 Credits
The genesis, description, and exploitation of metallic and non-metallic natural resources consumed by modern society, such as base-metals, precious metals and gems, aggregates and construction materials, fertilizers, and chemical-industrial commodities. Environmental, economic, and socio-political issues associated with utilization of these resources will also be addressed. At least one field trip to a local resource area will be arranged. Three lectures per week.
Prerequisites: GEOL 111/GEOL 111L or GEOL 113/GEOL 113L, and CHEM 131/CHEM 131L, or permission of instructor.

GEOL 370 Renewable Energy 3 Credits
Introduction to renewable energy resources from a technical perspective with an emphasis on sustainability. Includes concepts of energy and power, units of measure, sources and forms of energy, uses of energy, energy efficiency, electricity, solar thermal and photovoltaics, bioenergy, hydropower, tidal power, wave power, wind power, geothermal, hydrogen, efficient building design, and integration of renewables with current energy supplies.
Prerequisites: MATH 113 or higher.
Equivalent Course(s): ENVS 370
Terms Typically Offered: Fall.

GEOL 393 Co-operative Education 3-12 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

GEOL 394 Natural Resources of the West 1 Credit
Seminars covering topics related to natural resources including water, soil, land, mineral and energy resources in the western United States. Guest speakers are invited from the academic community, industry or government agencies to give formal oral presentations followed by informal discussion with students and faculty.
Equivalent Course(s): ENVS 394
Course may be taken multiple times up to maximum of 4 credit hours.

GEOL 395 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

GEOL 396 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

Fees: Yes.
GEOL 402 Applications of Geomorphology3 Credits
Knowledge of landform genesis and shaping processes is applied to solve modern problems with emphasis on local soils, slopes, rivers, erosional surfaces, and structural framework. Laboratory and field studies used to explore frost, running water, slope movement, ground water, wind, and glaciers which have affected the local environment. Practical techniques of measurement and interpretation, including statistical and computer techniques, used to produce models of landscape development. A term project must be completed. Two major field trips are required. Four lectures and one two-hour laboratory per week.
Prerequisites: GEOL 202 and GEOL 204 and permission of instructor.
Corequisites: GEOL 402L.

GEOL 402L Applications of Geomorphology Laboratory1 Credit
Lab component required for GEOL 402.
Prerequisites: GEOL 202 and GEOL 204 and permission of instructor.
Corequisites: GEOL 402.
Fees: Yes.

GEOL 404 Geophysics3 Credits
Exploration for mineral and petroleum and preliminary investigation of sites for engineering and environmental projects with emphasis on refraction and reflection seismic, gravity, magnetic, electrical, electromagnetic ground-penetrating radar, and radioactive methods.
Prerequisites: GEOL 202; GEOL 204; GEOL 112/GEOL 112L; and either PHYS 111/PHYS 111L or PHYS 131/PHYS 131L; PHYS 112/PHYS 112L and MATH 151 are recommended but not required.
Corequisites: GEOL 404L.
Terms Typically Offered: Spring.

GEOL 404L Geophysics Laboratory1 Credit
Exploration for mineral and petroleum and preliminary investigation of sites for engineering and environmental projects with emphasis on refraction and reflection seismic, gravity, magnetic, electrical, electromagnetic ground-penetrating radar and radioactive methods.
Prerequisites: GEOL 202; GEOL 204; GEOL 112/GEOL 112L; and either PHYS 111/PHYS 111L or PHYS 131/PHYS 131L; PHYS 112/PHYS 112L and MATH 151 are recommended but not required.
Corequisites: GEOL 404.
Terms Typically Offered: Spring.
Fees: Yes.

GEOL 405 Solid Earth Geophysics3 Credits
Classical physics applied to the study of the earth with emphasis on the origin of the earth, its gravitational, geomagnetic, and geothermal characteristics, seismicity, the dynamics of the earth's crust, plate tectonics, and continental drift. One field trip required.
Prerequisites: GEOL 404 or permission of instructor.

GEOL 411 Paleontology3 Credits
Taxonomy, morphology, ecology, and geologic range of most groups of invertebrate fossils. Laboratory: field identifications of guide fossils. A one-day field trip is required. Two lectures and one two-hour laboratory per week.
Prerequisites: Beginning Biology course or permission of instructor.
Corequisites: GEOL 411L.

GEOL 411L Paleontology Laboratory1 Credit
Lab component required for GEOL 411.
Prerequisites: Beginning Biology course or permission of instructor.
Corequisites: GEOL 411.
Fees: Yes.

GEOL 415 Introduction to Ground Water3 Credits
Relationships of ground water to other water sources, hydrologic cycle, water balance, hydrologic characteristics of rocks, hydraulics and equations defining flow, ground water quality, and contamination, exploration and measurement techniques (including geophysical procedures), state and federal regulations, and computer modeling. Laboratory: Acquisition, analysis, and interpretation of ground water data. Three lectures and one two-hour laboratory per week.
Prerequisites: GEOL 111/GEOL 111L or GEOL 113/GEOL 113L, and MATH 151, and at least high school level biology, chemistry and physics.
Corequisites: GEOL 415L.

GEOL 415L Introduction to Ground Water Laboratory1 Credit
Lab component required for GEOL 415. Three lectures and one two-hour laboratory per week.
Prerequisites: GEOL 111/GEOL 111L or GEOL 113/GEOL 113L, and MATH 151, and at least high school level biology, chemistry and physics.
Corequisites: GEOL 415.
Fees: Yes.

GEOL 443 Field-Based Depositional Systems3 Credits
Analysis of depositional systems with a strong field component. Lectures followed by weekly field trips will show students local examples of all common depositional systems.
Prerequisites: GEOL 202.
Corequisites: GEOL 443L.

GEOL 443L Field-Based Depositional Systems Laboratory1 Credit
Lab component required for GEOL 443.
Prerequisites: GEOL 202.
Corequisites: GEOL 443.

GEOL 444 Sedimentology and Stratigraphy3 Credits
Physical, chemical, and biological characteristics of sedimentary rocks, with emphasis on depositional processes and environments, diagenesis, stratigraphic sequences, and correlation. Laboratory emphasis is on description and classification of sedimentary rocks, analysis of depositional environments, and stratigraphic problems. One weekend field trip is required.
Prerequisites: GEOL 202, GEOL 204, GEOL 331, GEOL 331L, CHEM 131, and CHEM 131L.
Corequisites: GEOL 444L.

GEOL 444L Sedimentology and Stratigraphy Laboratory1 Credit
Lab component required for GEOL 444.
Prerequisites: GEOL 202, GEOL 204, GEOL 331, GEOL 331L, CHEM 131, and CHEM 131L.
Corequisites: GEOL 444.
Fees: Yes.

GEOL 445 Geospatial Database and Design2 Credits
Creating, editing, and managing geodatabases and working with topology for implementation with GIS. Term project is required. Two lectures and one two-hour lab per week.
Prerequisites: GIST 432 and GIST 432L.

GEOL 455 River Dynamics3 Credits
Introduction to river forms and processes, including basic open-channel hydraulics, sediment transport, fluvial geomorphology and human interactions with river systems. Lab covers field, lab, and computer techniques to understand and model river forms and processes, including human interactions with river systems.
Prerequisites: GEOL 355 or permission of instructor.
Corequisites: GEOL 455L.
GEOL 455L River Dynamics Laboratory1 Credit
Lab component required for GEOL 455.
Prerequisites: GEOL 355 or permission of instructor.
Corequisites: GEOL 455.

GEOL 480 Summer Field Camp6 Credits
This course involves basic training in field geology. Students will perform a variety of geologic mapping exercises using topographic maps and air photos. Students will gain an appreciation of geologic maps - how they are made, the uncertainties and unknowns in mapping, and how mappers deal with them. Most mapping exercises are in deformed sedimentary strata and Quaternary surficial deposits. Some field exercises will involve collection and interpretation of hydrological data. The course is a six full weeks in duration, beginning immediately after conclusion of Spring Semester. Students should not expect to have weekends or holidays off. Students will also be camping out at least half the time or more during this course.
Prerequisites: GEOL 202, GEOL 301, and GEOL 301L. GEOL 402, GEOL 402L, GEOL 444, and GEOL 444L are recommended.
Fees: Yes.

GEOL 490 Seminar3 Credits
Design, implementation, and completion of independent research project including proposal and report writing, and oral presentations. Critiques of geologic literature, data compilation, and periodic oral presentations are also required.
Prerequisites: Upper division standing.

GEOL 493 Co-operative Education3-12 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

GEOL 495 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

GEOL 496 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

GEOL 496L Topics Lab1-3 Credits

GEOL 497 Structured Research1-3 Credits
Geological research under the direct guidance of a faculty member. Designed for junior and senior level students.
Prerequisites: Permission of instructor.
Course may be taken multiple times up to maximum of 9 credit hours.

GEOL 499 Internship1-4 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

Gerontology (GRNT)

GRNT 110 Introduction to Gerontology3 Credits
Introduction to the field of gerontology - the multidisciplinary study of the biological, psychological, and social aspects of aging. Explores human aging with a focus on replacing myths with facts and understanding what happens to older adults’ bodies, minds, status in society, and social lives as they age. Attention is also given to programs and services for the elderly.
Terms Typically Offered: Fall, Spring.

GRNT 125 Community Resources for Older Adults3 Credits
Introduction to therapeutic activities for older adults in a wide variety of service settings.
Terms Typically Offered: Fall, Spring.

GRNT 131 Hospice Care1 Credit
Introduction to hospice and hospice care, including the hospice philosophy, palliative care, pain and symptom management, death and the dying process, grief and bereavement. Also addresses hospice eligibility, ethics and confidentiality, interdisciplinary team roles, communication, advanced directives, care-giving issues, self-care, and alternative therapies.
Terms Typically Offered: Fall, Spring, Summer.

GRNT 165 Activity Director Training2 Credits
Preparation to manage an activity department; do assessments and documentation; design, schedule, and implement appropriate activity programs; foster healthy resident and family dynamics; facilitate resident council meetings; manage personnel and resources.
Terms Typically Offered: Fall, Spring, Summer.

GRNT 175 The Aging Mind2 Credits
Exploration of the convergence of gerontology and recent brain science. Presents novel and combinatorial interventions based on recent research on aging brains. Introduces the emerging array of sustainable approaches to engage, stimulate, and enhance older minds.
Terms Typically Offered: Fall, Spring, Summer.

GRNT 176 Cognitive Activity Design2 Credits
Exploration of the challenges of applying emerging, evidence-based research in memory and aging to address real-life cognitive challenges. Includes design and demonstration of innovative cognitive activities that are supported by recent brain science findings.
Terms Typically Offered: Fall, Spring, Summer.

GRNT 177 Arts and Cognitive Activity Design1 Credit
Connection between the arts and brain health research to create art-related cognitive activities for older persons. Includes design and demonstration of creative arts as a sustainable cognitive activity for older persons. Explores why creative arts activities have a positive impact on an older person’s brain and how their design is supported by recent brain science findings.
Terms Typically Offered: Fall, Spring, Summer.

GRNT 181 Exploring the Field of Aging2 Credits
Introduction to the range of emerging professional opportunities in the field of aging. Explores and prioritizes potential career pathways. Includes career and labor market research; assessment of passions, interests, experiences and transferable skills; informational interviews, site visits, and networking; career and educational/training goal setting and planning.
Terms Typically Offered: Fall, Spring, Summer.

GRNT 196 Topics1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

GRNT 207 Ethics and Aging3 Credits
Investigation of central ethical issues pertaining to the care of elderly patients. Explores various ethical principles and frameworks and their application to various ethical issues and dilemmas that arise in caring for the elderly. Identifies ethical issues in caring for the elderly and helps develop more proficiency in ethical decision making.
Terms Typically Offered: Fall, Spring, Summer.

GRNT 220 Law and Ethics for Health Professions2 Credits
Introduction to the study and application medical-legal concepts in medical careers. This course seeks to establish a foundation for ethical behavior and decision making in health professions.
Terms Typically Offered: Fall, Spring.
GRNT 233 Supporting End of Life3 Credits
Knowledge and skills for health care workers, caregivers, religious and spiritual counselors, social workers, fiduciaries, and family members to support the end of life process with dying persons and their families. Explores the physical, emotional, spiritual, legal, and financial aspects of dying, as well as grief and bereavement.
Terms Typically Offered: Fall, Spring, Summer.

GRNT 235 Introduction to Dementia Care3 Credits
Issues related to the care of older adults presenting behavioral and cognitive challenges, using a person-centered, person-directed approach. Introduces students to assessment, treatment and care of persons experiencing dementia, problematic mental health conditions, and the dying process.
Terms Typically Offered: Fall, Spring, Summer.

GRNT 236 Dementia Care Practices1 Credit
Approaches to advanced behavioral and cognitive care issues, based on realistic case studies in a variety of settings. Includes assessing appropriate long term care options for memory care, problem solving, functional levels and other challenges, managing surveys, responding to deficiencies, problem solving repetitive incident reports, implementing fall prevention programs, and developing family education and support programs.
Terms Typically Offered: Fall, Spring, Summer.

GRNT 237 End of Life Therapies/Practices1 Credit
Focus on a specific therapeutic approach appropriate for end of life care and exploration of a variety of strategies and activities designed to augment end of life through reaching palliative care goals and enhancing the quality of life for the dying person and their caregivers.
Terms Typically Offered: Fall, Spring, Summer.

GRNT 240 Care and Service Coordination3 Credits
Overview of professional standards, responsibilities, and skills required for care managers, information and resource specialists, advocates, and service coordinators working with older adults, persons with disabilities, and their families. Includes the assessment process, care planning, resource management, service provider and financial coordination, documentation and accountability, ethics and confidentiality, advocacy, and evaluation. Introduces strength-based, person-centered, and empowerment models.
Terms Typically Offered: Fall, Spring, Summer.

GRNT 245 Health and Aging3 Credits
Investigation of the major issues and concepts that deal with the study of the aging process. It will explore the demographic, social, and economic factors in aging as well as the effects of physical change and psychological behavior upon later life.
Terms Typically Offered: Fall, Spring.

GRNT 247 Applied Legal and Policy Issues in Aging3 Credits
Introduction to legal and policy issues affecting older adults and their families, as well as care providers. Focuses on how Medicare, Medicaid mental health, veteran's services and abuse protective services contribute and protect older adults as well as areas where services may be lacking.
Terms Typically Offered: Fall, Spring.

GRNT 250 Death: Cross-Cultural Perspectives3 Credits
Interdisciplinary study of the cross-cultural variations regarding human responses to death and the differing cosmological implications these suggest. Death, a cultural universal, is addressed in its diversity from both anthropological and sociological perspective.
Terms Typically Offered: Fall, Spring, Summer.
HSCI 506 Advanced Health Informatics II: Project Design and Implementation 2 Credits
Explores application of knowledge and skills to selected health informatics projects at the graduate level.
Prerequisites: Permission of instructor.

History (HIST)

HIST 101 Western Civilization I-GTHI13 Credits
Political, social, economic, and cultural history of western cultures from ancient times through the Reformation.
Essential Learning Categories: History, Humanities
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

HIST 102 Western Civilization II-GTHI13 Credits
Political, social, economic, and cultural history of western cultures from Reformation through modern times.
Essential Learning Categories: History, Humanities
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

HIST 131 United States History I-GTHI13 Credits
History of the United States from Colonial period through the Civil War.
Essential Learning Categories: History, Humanities
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

HIST 132 United States History II-GTHI13 Credits
History of the United States from the Civil War through modern times.
Essential Learning Categories: History, Humanities
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

HIST 202 Introduction to Historical Research 3 Credits
An introduction to the methods and areas of historical research, with the intent of preparing students for research requirements of upper-division history courses.
Prerequisites: 6 hours selected from HIST 101, HIST 102, HIST 131, and HIST 132.

HIST 225 History of Colorado 3 Credits
History of the state from pre-historic to modern times.

HIST 296 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

HIST 300 History of England to 1660 3 Credits
Examines the political, social, and cultural developments of England from the ancient period to the end of the English Civil Wars, with particular attention to England’s contributions to the Western heritage.
Prerequisites: HIST 101.

HIST 301 History of Modern Britain 3 Credits
Examines the political, social, and cultural history of Great Britain from the Restoration of the monarchy in 1660 to the modern era.
Prerequisites: HIST 102.

HIST 302 History of Modern France 3 Credits
France from the Revolution of 1789 to the present.
Prerequisites: HIST 102 or permission of instructor.

HIST 303 History of Modern Germany 3 Credits
Origins and development of the modern Germany nation-state from 1860 to the present.
Prerequisites: HIST 102 or permission of instructor.

HIST 305 The Old South 3 Credits
The uniqueness of the Antebellum South, the growth of Southern nationalism, and the politics of the Late National period.
Prerequisites: HIST 131.

HIST 310 Latin American Civilization 3 Credits
Historical development of Latin America from pre-Columbian times to the present.
Prerequisites: HIST 102 or permission of the instructor.

HIST 315 American Indian History 3 Credits
American Indian history from pre-Columbian America to the present with an emphasis on federal Indian policy. Case studies will also address the adaptation of Indian people to changing social and economic conditions.
Prerequisites: HIST 131 and HIST 132.

HIST 316 American Slavery 3 Credits
Exploration of the development of race slavery and an examination of slave life in colonial North America and the United States from Colonization through reconstruction.
Prerequisites: HIST 131.

HIST 320 The American West 3 Credits
The American West from pre-Columbian times through the Twentieth Century with special emphasis on the diverse cultures and ecological factors that have defined the region.
Prerequisites: HIST 131, HIST 132, or permission of instructor.

HIST 330 History of 19th Century Europe 3 Credits
Political, social, intellectual, and diplomatic forces operating in Europe between the French Revolution and World War I.
Prerequisites: HIST 101 and HIST 102.

HIST 331 The 20th Century 3 Credits
Investigation of the development of our modern world since World War I with emphasis on Europe and its role in that process.
Prerequisites: HIST 101, HIST 102 or permission of instructor.

HIST 332 History of Modern Warfare 3 Credits
War, its causes, consequences, and impact on history from the 18th century to the present.
Prerequisites: HIST 101 and HIST 102.

HIST 333 The International History of the Cold War 3 Credits
Exploration of the international ramifications of the Cold War, from the end of World War II to the collapse of the Soviet Union.
Prerequisites: HIST 102 and HIST 132.

HIST 334 History of the British Empire 3 Credits
Explores the origins, development, and decline of the British Empire from 1550 to 2000, with particular attention on the effects of empire on native peoples and the consequences of empire for Great Britain.
Prerequisites: HIST 102.

HIST 340 History Of The Middle East 3 Credits
History of the Middle East and North Africa from the period of pre-Islamic Arabia through modern times, including the Umayyad, Abbasid, and Ottoman empires.
Prerequisites: HIST 101 and HIST 102.

HIST 342 The Early American Republic 3 Credits
The social, cultural, intellectual and political developments in America from 1783-1850.
Prerequisites: HIST 131.

HIST 344 The Age Of Industry In America 3 Credits
The social, intellectual, and political events in the United States from the end of the Civil War to the beginning of the Great Depression.
Prerequisites: HIST 131, HIST 132, or permission of instructor.
HIST 345 History of Immigration, Race, and Ethnicity in America3 Credits
Exploration of the historical study of immigration, race, and ethnicity in the United States. Various approaches and unique methodologies in the study of these topics from early American history to the present. Investigation of the ways in which economic and racial considerations shaped Americans' debates about 'fitness' for citizenship, freedom, and independence.
**Prerequisites:** HIST 131 or HIST 132.

HIST 346 The United States in the 1950's and 1960's3 Credits
The social, intellectual, and political Events in the U.S. form the end of WWII through the 1960s.
**Prerequisites:** HIST 131, HIST 132, or permission of instructor.

HIST 347 Global America: 1970-20003 Credits
The political and social implications of America as the dominant global power, from 1970 to the present.
**Prerequisites:** HIST 132.

HIST 350 Renaissance and Reformation3 Credits
Examines the political and social context of the Renaissance and Reformation.
**Prerequisites:** HIST 101.

HIST 355 Ancient and Medieval Cities3 Credits
The development (physical, social, political) of cities in the ancient and medieval periods and their role in early western civilization.
**Prerequisites:** HIST 101.

HIST 360 Medieval Europe3 Credits
Examines the political, social, and religious institutions of Medieval Europe (300-1475).
**Prerequisites:** HIST 101.

HIST 370 Early United States Women's History3 Credits
Historical survey of cultural, economic, and political contributions of American women from colonization to Reconstruction.
**Prerequisites:** HIST 131.

HIST 371 20th Century United States Women's History3 Credits
Historical survey of cultural, economic, and political contributions of American women from Reconstruction to the present.
**Prerequisites:** HIST 131 and HIST 132.

HIST 375 American Sport History3 Credits
An examination of American society from the Colonial era to the present through the lens of sport.
**Prerequisites:** HIST 131 or HIST 132. Both courses are recommended.

HIST 394 Junior Seminar in Historiography3 Credits
Examines the role of historiography in the historical discipline, with the intent of preparing students to undertake an historical research project. Topic varies by semester, depending upon specialty of instructor.
**Prerequisites:** HIST 101, HIST 102, HIST 132, and HIST 202.

HIST 395 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

HIST 396 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

HIST 399 Internship1-3 Credits

HIST 400 The Soviet Union and Eastern Europe3 Credits
Imperial Russia, the Soviet Union, and Eastern Europe from 1900 to the present.
**Prerequisites:** HIST 101, HIST 102 or permission of instructor.

HIST 403 East Asia and the Modern World3 Credits
China, Japan, Korea, and Vietnam since 1840.
**Prerequisites:** HIST 101 and HIST 102, or permission of instructor.

HIST 404 Senior Seminar in Historical Research3 Credits
History-specific research with emphasis on utilization of primary documents and practice in conducting research and reporting results.
**Prerequisites:** HIST 202 and twelve hours of upper division History or permission of instructor.

HIST 405 Introduction to Public History3 Credits
Exploration of non-academic historical skills employed in museum work, archival management, and positions with historical societies and historic preservation agencies. Career opportunities will be examined.
**Prerequisites:** HIST 131, HIST 132, or permission of instructor.

HIST 406 History of the African Continent3 Credits
The development of African cultures from the ancient to modern periods, with particular attention to interaction with non-African cultures.
**Prerequisites:** HIST 101 and HIST 102, or permission of instructor.

HIST 409 Material Culture Studies3 Credits
Introduction to the field of material culture studies and engagement in hands-on work with a variety of historical artifacts.
**Prerequisites:** HIST 131 and HIST 132, or permission of the instructor.

HIST 410 Environmental History of the United States3 Credits
The evolution of public attitudes and governmental policies and practices relative to the wilderness, natural resource development, and the natural environment from colonial times to the present.
**Prerequisites:** HIST 131, HIST 132, or permission of instructor.

HIST 415 Colonial America3 Credits
Examines the development of colonial society in North America and the tensions that arose between Native American, European, and African people and cultures.
**Prerequisites:** HIST 131.

HIST 416 The American Revolution3 Credits
An overview of and perspectives on the causes and outcomes of the American Revolution.
**Prerequisites:** HIST 131.

HIST 420 Civil War3 Credits
The causes and outcomes of the American Civil War.
**Prerequisites:** HIST 131, or permission of instructor.

HIST 425 History of Sexuality3 Credits
Historical discussions on sexuality from the New World to present. Analysis of gender, race, ethnicity, class, and region in historical context.
**Prerequisites:** HIST 132.

HIST 430 The Ancient Mediterranean World3 Credits
The Mediterranean world from pre-classical times to the fall of the Roman Empire.
**Prerequisites:** HIST 101.

HIST 435 Classical Archaeology3 Credits
Examines the archaeological evidence for some of the ancient Mediterranean civilizations and how the historian uses archaeology to better understand the ancient world.
**Prerequisites:** HIST 101.

HIST 440 Early and Medieval Christianity3 Credits
Examines the historical development of Christianity through the middle ages, focusing on the social (marriage and family) and political (kingship) consequences of Christianity.
**Prerequisites:** HIST 101.
HIST 445 The Holocaust 3 Credits
Exploration of the origins, implementation, and cultural representations of Nazi Germany’s ‘Final Solution.’
Prerequisites: HIST 102.

HIST 450 European History and Film 3 Credits
Examines the medium of film and how it shapes perceptions of European history. Focuses on the treatment of film as historical text. Postulates whether filmmakers are historians.
Prerequisites: HIST 101 and HIST 102.

HIST 495 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

HIST 496 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

HIST 499 History Internship 1-3 Credits
Experience with historical work in settings outside the university community, including museums, archives, and local, state, and federal agencies. Internship must be arranged during the semester prior to the field experience.
Prerequisites: Nine upper division hours in history, junior status, and permission of instructor.

HIST 501 Early American History: Foundation - Civil War 3 Credits
Graduate level seminar covering the first half of American history. This course will provide graduate level instruction to prepare students to teach a collegiate level introductory course in early American history.
Prerequisites: Admission into Social Sciences Graduate Certificate Program.

HIST 502 Late American History: Civil War - Modern U.S. 3 Credits
Graduate level seminar covering the second half of American history. This course will provide graduate level instruction to prepare students to teach a collegiate level introductory course in modern American history.
Prerequisites: Admission into Social Sciences Graduate Certificate Program.

HIST 510 Early European History: Ancient - Reformation 3 Credits
Graduate level seminar covering the first half of European history. This course will provide graduate level instruction to prepare students to teach a collegiate level introductory course in early European history.
Prerequisites: Admission into Social Sciences Graduate Certificate Program.

HIST 511 Modern European History: Reformation - 20th Century 3 Credits
Graduate level seminar covering the second half of European history. This course will provide graduate level instruction to prepare students to teach a collegiate level introductory course in modern European history.
Prerequisites: Admission into Social Sciences Graduate Certificate Program.

Honors (HNRS)

HNRS 196 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

HNRS 396 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

HNRS 496 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

HNRS 498 Honors Thesis 3 Credits
Course may be taken multiple times up to maximum of 9 credit hours.

Hospitality Management (HMGT)

HMGT 101 Travel Industry 3 Credits
Introduction to tourism and its relationship to the business world, an overview of all sectors of business and the components of the travel, tourism, and hospitality industry. Travel methods, destination resorts, and other businesses which serve the traveler are evaluated. A requirement for all Hospitality Management students.

HMGT 102 Travel Industry II 3 Credits
Evaluation of job opportunities in the travel, recreation, and hospitality fields. Travel trends, feasibility studies, and marketing techniques are analyzed. Students are provided an opportunity to make preparations and acquire skill instructions for work in the student's career objective. Field trips and visiting lecturers are included.
Prerequisites: HMGT 101 or permission of instructor.

HMGT 103 Travel and Tourism Marketing Techniques 3 Credits
Interpretation of marketing problems, strategies, and techniques of industries engaged in serving the traveler, methods of identifying potential markets, preferences, and likely responses to promotional programs of private and governmental travel entities. Required of all Hospitality Management students. MARK 231 recommended for baccalaureate students.
Prerequisites: HMGT 101 or permission of instructor.

HMGT 199 Employment Concepts 1 Credit
Introduction of the concepts of employment in conjunction with the internship experience. It will provide students with an opportunity to share their concerns with the instructor and other students, allow employers to discuss the internship with students and assist the student in developing his or her career goals. The student will enroll in this course the spring semester immediately preceding the summer they intend to do their HMGT 299 Internship.
Prerequisites: HMGT 101.
Course may be taken multiple times up to maximum of 6 credit hours.

HMGT 200 Management and Supervisory Skills for the Hospitality Industry 3 Credits
Evaluates the supervisory and management processes through a comprehensive overview of how these processes relate to specific hospitality industry applications.
Prerequisites: HMGT 101 or permission of instructor.

HMGT 201 Management in the Travel Industry I 3 Credits
An opportunity to explore operating techniques and problems of the major industries involved in tourism, travel, and hospitality through the eyes of the operating manager. Specific skills used within various industries are developed.
Prerequisites: HMGT 200 or permission of instructor.

HMGT 211 Travel Destinations 3 Credits
For the individual who plans to work, study, or travel internationally including the professional who is, or plans to be, part of the travel industry. Life styles and current local aspects in foreign destinations are considered and guest lecturers are included. Open to all students but strongly recommended for Hospitality Management students.

HMGT 215 Computerized Reservations 3 Credits
An introductory course providing an overview of operation of a computerized reservations system.
Prerequisites: HMGT 101 and HMGT 200.
HMGT 217 Hotel Operations3 Credits
Introductory course providing an overview of the operation of a hotel front office. This will include the use of the personal computer and state-of-the-art software for reservations, check-in, check-out, and creating the daily report.
Prerequisites: HMGT 101.

HMGT 218 Housekeeping Operations3 Credits
Comprehensive overview of managing housekeeping operations in the lodging industry including practical applications to industry segments and impact on capital expenditures.
Prerequisites: HMGT 101 or permission of instructor.

HMGT 241 Food and Beverage Operations3 Credits
Comprehensive overview of management processes in food and beverage operations including site visits and industry guest lecturers.
Prerequisites: HMGT 101 or permission of instructor.

HMGT 295 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

HMGT 296 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

HMGT 299 Internship1-12 Credits
Classroom studies combined with salaried work in an experience which relates to the student's career goal. Only for, and required of, Hospitality Management students. Credit not available through competency or challenge.
Prerequisites: HMGT 200, GPA of 2.00 or higher, or permission of instructor.
Course may be taken multiple times up to maximum of 6 credit hours.

HMGT 310 Travel and Tourism Marketing Techniques3 Credits
Interpretation of marketing problems, strategies, and techniques of industries engaged in serving the traveler. Study will include advanced methods of identifying potential markets, preferences and likely responses to promotional programs of private and public travel entities. Required of all Hospitality Management majors.
Prerequisites: HMGT 101, MARK 231 or permission of instructor.

HMGT 311 Experiential Travel3 Credits
Intensive course structured around faculty-led, short-term travel to selected destinations. Topics include economic, socio-cultural, environmental, legal-political, and technological influences on travel and tourism in business sectors.
Prerequisites: Junior standing.
Terms Typically Offered: Spring, Summer.

HMGT 350 Private and Commercial Recreation Systems3 Credits
Profit-based recreation industry, including managing the recreation enterprise, economic feasibility studies, small business entrepreneurship, market characteristics, professional opportunities, and trade association research and publications.
Prerequisites: HMGT 101 and MANG 201.

HMGT 351 Community Tourism Systems3 Credits
Community as a tourist destination area with concentration on identification of linkages between tourism industries and local economies, and the process of developing and managing park and recreation resources to serve the tourist.
Prerequisites: HMGT 101, HMGT 200, and MANG 201.

HMGT 352 Public Recreation Systems3 Credits
National and state outdoor recreation resources management systems including a variety of administrative tools applicable to operation and maintenance as well as comprehensive discussion of legislation, land use policy, forest recreation planning, and governmental designation programs.
Prerequisites: HMGT 101, HMGT 200, and MANG 201.

HMGT 370 Managing Quality Service3 Credits
Introduction of quality service management necessary for the overall management process to be successful. This course emphasizes a sound set of principles for service management with application to operations, marketing, and human resources. Practical applications, case studies and a service audit project are included.
Prerequisites: Junior standing.
Terms Typically Offered: Spring.

HMGT 371 Events Management3 Credits
Overview of the meetings and events industry including career opportunities. An applied approach is utilized in the planning, proposal and execution phases of event planning to support the academic course materials.
Prerequisites: HMGT 101 and HMGT 200.
Terms Typically Offered: Fall.

HMGT 396 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

HMGT 400 Hospitality Security and Safety3 Credits
Individualized security programs. Security and safety equipment and procedures. Guest protection, asset protection, risk management, loss prevention, and OSHA regulations for lodging properties.
Prerequisites: BUGB 349.

HMGT 410 Hospitality Facilities Management3 Credits
Hotel or restaurant physical plant management. Interface with engineering and maintenance departments.
Prerequisites: HMGT 101 and HMGT 200, or permission of instructor.

HMGT 450 Strategic Hospitality Sales and Marketing3 Credits
Strategic and operating sales and marketing plans for hospitality properties. Includes development of a sales and marketing plan as a semester project.
Prerequisites: MARK 231 or permission of instructor.

HMGT 470 Hospitality Management Strategies3 Credits
Comprehensive overview of major hospitality industry management segments. Includes management strategies adapting to the rapidly changing hospitality industry environment.
Prerequisites: HMGT 101, HMGT 200, HMGT 410, HMGT 450, or permission of instructor.

HMGT 495 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

HMGT 496 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

HMGT 499 Internship1-12 Credits
Course may be taken multiple times up to maximum of 15 credit hours.
Human Resource Management (HRMA)

HRMA 371 Human Resource Management3 Credits
Principles and applications of basic human resource management (HRM). Survey of the HRM functions in organizations. Topics include staffing, training and development, compensation, safety and health, employee and labor relations, and employee performance management. 
Prerequisites: MANG 201, junior or senior standing, or permission of instructor.

HRMA 372 Employee Recruitment and Selection3 Credits
Knowledge and skills necessary to effectively analyze and forecast organizational staffing requirements, assess, recruit and select candidates, and effectively retain employees in today’s complex organizations. Legal aspects of staffing process emphasized. 
Prerequisites: HRMA 371.
Terms Typically Offered: Fall, Summer.

HRMA 373 Human Resource Management, Leadership, Ethics, and Social Responsibility3 Credits
Review of literature related to Human Resource Management (HRM) and leadership, ethics, and corporate social responsibility. Review articles and books related to the responsibility of HRM leaders and their significant influence on organizational practices, leadership, ethical behavior, and corporate social responsibility. 
Prerequisites: HRMA 371 or permission of instructor.
Equivalent Course(s): MANG 370

HRMA 474 Training and Development3 Credits
Functions of training and development as applied in both large and small business environments. The role of training and development in the current business environment is considered with regard to learning theory, learning objectives, instructional methods, and needs assessment. Focus will be placed on evaluation of training effectiveness and emerging concepts in workplace education. 
Prerequisites: HRMA 371.
Terms Typically Offered: Fall, Spring.

HRMA 475 Compensation and Reward Systems3 Credits
Prerequisites: HRMA 371.
Terms Typically Offered: Fall, Spring.

HRMA 478 Advanced Human Resource Management3 Credits
Prerequisites: HRMA 371, HRMA 372, HRMA 474, HRMA 475, and senior standing.
Terms Typically Offered: Fall, Spring.

HRMA 495 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours. 

HRMA 520 Human Resource Management3 Credits
Provides an in-depth study of the effective use and adaptation to the human resources of an organization through the management of people-related activities. The focus is on the core responsibilities and activities of the HR manager. Also included is a detailed review of current statutes and regulations affecting the HR field.

Humanities (HUMA)

HUMA 196 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

HUMA 201 Field Studies in Humanities1-3 Credits
Study/travel tours of varying lengths in the United States and foreign countries to acquaint students in some depth with particular aspects of world culture (language, the arts, literature, etc.) both contemporary and historical.

HUMA 296 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

HUMA 300 History and Development of Books3 Credits
History and development of the book from the development of the alphabet to the present in the context of changing technologies and various social, cultural, and economic influences. 
Prerequisites: Junior or senior standing, or permission of instructor.

HUMA 301 Field Studies in Humanities1-3 Credits
Prerequisites: Junior or above standing.

HUMA 395 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

HUMA 396 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

HUMA 495 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

HUMA 496 Topics1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

HUMA 499 Internship8 Credits
See faculty advisor for details. 
Course may be taken multiple times up to maximum of 15 credit hours.

Innovation (INOV)

INOV 310 The Process of Innovation3 Credits
Introduction to the process and key components of innovation. Topics include investigation of major innovations throughout history and how to hone design thinking to improve analytical, critical thinking, creativity and problem solving skills. Students will become certified to operate equipment at the Mav Innovation Center; the Business Incubator Center Makerspace; and co-working spaces across Grand Junction. 
Terms Typically Offered: Fall, Spring.

INOV 320 Innovation Launch3 Credits
Introduction to the process of turning an idea into a successful business – ideation through commercialization. Students create blueprints for ideas and strategies that become the foundation for a successful business. 
Terms Typically Offered: Fall, Spring.

INOV 450 Innovation Garage3 Credits
Research, data analysis, prototype building, and creation of technical report findings in teams. Students will use equipment at the Mav Innovation Center; the Business Incubator Center Makerspace; and co-working spaces across Grand Junction. Commercialization of an innovation is expected. Teams generally work with Mav Innovation Center Sponsor companies. 
Terms Typically Offered: Fall, Spring.
International Studies (INTS)

INTS 101 Introduction to International Studies 3 Credits
Introduction to concepts, paradigms, and theories used to describe and explain International Studies. Attention given to the interdisciplinary nature of academic disciplines, peoples in cultural context, environments, education systems, world resources, social and economic institutions.

INTS 396 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

Kinesiology-Academic (KINE)

KINE 100 Health and Wellness 1 Credit
The presentation of information concerning the benefits, positive effects, assessment, and implementation of healthy life styles.

KINE 195 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

KINE 200 Foundations of Kinesiology 3 Credits
Orientation to the history and philosophy of Kinesiology and the development of various sub-disciplines. Introduction to career pathways.

KINE 203 Human Nutrition 3 Credits
Introduction to the science of the effects of food on the body and the body's need for and utilization of essential nutrients.

KINE 205 Introduction to Sport Management 3 Credits
Survey and introduction to the field of sport management.

KINE 211 Methods of Lifetime, Individual, and Dual Activities 3 Credits
Instructional content (scope and sequence) and teaching methodology related to various individual, dual and lifetime activities appropriate for K-12 physical education.

KINE 213 Applications of Physical Fitness and Exercise Prescription 3 Credits
Exercise program design and prescription to meet individual needs, assess existing exercise programs, and evaluation of the effectiveness. Major components of cardio-respiratory endurance, muscular strength, muscular endurance, flexibility, and body composition discussed in detail.
Prequisites: KINE 100.

KINE 214 Methods of Team Activities 3 Credits
Instructional content (scope and sequence) and teaching methodology related to various team activities appropriate for K-12 physical education.

KINE 250 Lifeguard Training 3 Credits
Knowledge and skills required towards certification in lifeguard training.

KINE 251 Water Safety Instructor Course 3 Credits
Instructional content (scope and sequence) and teaching methodology related to various aquatic activities.

KINE 256 Methods of Creative Play, Dance, Gymnastics, and Literacy 3 Credits
Instructional content (scope and sequence) and teaching methodology related to creative play, dance, gymnastics and literacy activities.
Prequisites: KINE 211 or KINE 214.

KINE 260 School Health Education 3 Credits
School health issues. Emphasis on development of proper health attitudes and practices, teaching methodology, and application of health knowledge and practice in school and public health situations.
Prequisites: KINE 100.

KINE 265 Emergency Care 3 Credits
Knowledge and skills required to meet the needs of emergency care situations. Course leads to obtaining valid First Aid and CPR/AED for the Health Care Provider cards as well as experience associated with care and prevention of common injuries experienced by the physically active.
Terms Typically Offered: Fall, Spring.

KINE 296 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

KINE 297 Practicum 1-2 Credits
Work-oriented instruction involving the implementation of classroom or laboratory experience under the direct supervision of a faculty member. Course may be taken 5 times for credit.

KINE 301 Health and Fitness Assessment 3 Credits
Health and fitness testing and evaluation for children, athletes, and adults of all ages and abilities. Statistical techniques for exercise testing analyses.
Prequisites: KINE 213.

KINE 303 Physiology of Exercise 3 Credits
The effects of various types of exercise upon human body structure and function. Three one-hour lectures and one two-hour laboratory per week.
Prequisites: KINE 213 and BIOL 209/Biol 209L.
Corequisites: KINE 303L.

KINE 303L Physiology of Exercise Laboratory 1 Credit
Lab component required for KINE 303.
Prequisites: KINE 213 and BIOL 209/Biol 209L.
Corequisites: KINE 303.

KINE 307 Philosophy and Psychology of Coaching 3 Credits
Fundamental philosophical and psychological principles related to coaching competitive athletic teams.

KINE 309 Anatomical Kinesiology 3 Credits
Analysis of joint movement and muscular involvement during physical activity.
Prequisites: BIOL 209/Biol 209L.

KINE 310 Methods of Exercise Instruction 3 Credits
Practical experience in teaching safe and effective exercise for multiple populations.
Prequisites: KINE 213 and KINE 309.

KINE 320 Methods of Teaching Physical Education in Elementary Schools 3 Credits
Exploration of the physical education content and teaching methods appropriate for elementary school education.
Prequisites: EDUC 115, EDUC 215, and KINE 256.

KINE 321 Physical Activity and Health in the Classroom 3 Credits
Integration of health and physical activity concepts in the gym and classroom. For education majors.

KINE 333 Community Health 3 Credits
Introduction to the areas of epidemiology, disease prevention and control, environmental health, health care, injury prevention, and safety education.

KINE 335 Sport in Society 3 Credits
The sociology of sport, covering the cultural traditions, social values, and psychosocial experiences of sport from antiquity to today.

KINE 340 Sport Operations 3 Credits
Theoretical background and practical applications designed to provide a framework for the management of resources associated with the planning, implementation and evaluation of festivals and special events.
KINE 342 Sport Law and Risk Management3 Credits
Legal duties, responsibilities, rights, duties and risk management techniques involved in sport.

KINE 346 Survey of Economics and Finance in Sport3 Credits
The economic, financial, and managerial accounting concepts for sport. 
Prerequisites: ECON 201.

KINE 350 Leadership and Ethics in Sport3 Credits
This course is designed to give individuals an understanding of the various aspects of leadership as well as a survey course of the development and application of moral and ethical values in sport administration settings.

KINE 360 Motor Learning3 Credits
Foundations of motor learning and the relation of motor performance to other aspects of behavior.

KINE 370 Biomechanics3 Credits
Application of mechanical principles and anatomical structure to human movement using quantitative analysis methods. 
Prerequisites: BIOL 209/BIOL 209L and KINE 309. 
Corequisites: KINE 370L.

KINE 370L Biomechanics Laboratory1 Credit
Lab component required for KINE 370. 
Prerequisites: BIOL 209/BIOL 209L and KINE 309. 
Corequisites: KINE 370.

KINE 395 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

KINE 396 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

KINE 401 Organization/Administration/Legal Considerations in Physical Education and Sports3 Credits
Organizational structures, administrative techniques, and legal considerations in physical education and sports.

KINE 402 Sport Marketing3 Credits
The application of the principles of promotion and marketing to the sport and fitness industry including the areas of professional sports, corporate fitness, college/high school athletics, clubs and resorts, and others. 
Prerequisites: MARK 231.

KINE 403 Advanced Strength and Conditioning3 Credits
Emphasis on strength and conditioning program design and considerations based on activity and sport type. 
Prerequisites: KINA 128 or KINA 180-KINA 193, and KINE 303/KINE 303L.

KINE 404 Clinical Exercise Physiology and Advanced Exercise Prescription3 Credits
Emphasis on clinical risk stratification for conducting health and fitness assessments and exercise program design for healthy individuals and individuals with medically controlled disease. 
Prerequisites: KINE 303/KINE 303L.

KINE 405 Sports Nutrition3 Credits
In-depth study of macronutrient metabolism as it relates to sport. Practical consideration in the use or non-use of carbohydrate supplements, vitamins, and/or other ergogenic aids. Three one-hour lectures per week. 
Prerequisites: KINE 203, KINE 303, and KINE 303L.

KINE 406 Governance and Communication in Sport3 Credits
The laws and rules governing various sport organizations from interscholastic to professional sport as well as the major means of sport communication.

KINE 408 Methods of Teaching Physical Education in Secondary Schools3 Credits
Instructional strategies on a practical application level for prospective secondary physical education teachers preparatory to entry into student teaching. Field experiences are required to supplement lectures and discussions. 
Prerequisites: EDUC 215, KINE 214, and KINE 301. 
Terms Typically Offered: Fall.

KINE 411 Worksite Health Promotion3 Credits
Covers worksite health promotion: its description, planning, implementation, marketing, and evaluation. 
Prerequisites: KINE 213.

KINE 415 Physical Activity and Aging3 Credits
The study of the dynamic relationship between physical activity and the aging process. Course focuses on the impact of physical activity on the physiological, psychological, and social well-being of older adults. 
Prerequisites: KINE 303/KINE 303L.

KINE 417 Health Behavior Change3 Credits
Introduction to the areas of psychosocial, cultural, and situational factors that influence the voluntary behavior change process. Review of the theories related to health behavior. 
Terms Typically Offered: Spring.

KINE 420 Therapeutic Interventions3 Credits
Review of the theoretical and scientific basis for, and the practical use of, contemporary therapeutic modalities and techniques utilized in the treatment of acute and chronic musculoskeletal injuries.

KINE 430 Medical Conditions and Pharmacology in Sports3 Credits
An overview of the effects on physical activity resulting from the pre-existence of selected medical conditions and the use of pharmacological agents.

KINE 435 Sports Nutrition3 Credits
In-depth study of macronutrient metabolism as it relates to sport. Practical consideration in the use or non-use of carbohydrate supplements, vitamins, and/or other ergogenic aids. Three one-hour lectures per week. 
Prerequisites: KINE 203, KINE 303, and KINE 303L.

KINE 480 Inclusive Physical Activity3 Credits
Study of physical activities, modifications, and adaptations for individuals with disabilities.

KINE 487 Structured Research1-3 Credits
Capstone research experience with a formal manuscript and presentation. Topic, methods, and writing are to be guided and approved by a faculty member. 
Prerequisites: KINE 303, senior standing, and permission of instructor.

KINE 494 Kinesiology Senior Seminar1 Credit
Discussion and research of current issues in kinesiology and exercise physiology. 
Prerequisites: Senior status.

KINE 494A Sport Management Senior Seminar1 Credit
Discussion and research of current issues in sport management. 

KINE 495 Independent Study1-5 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

KINE 496 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

KINE 497 Pre-Internship in Physical Education3 Credits
Standards-based education and teaching practices in a K-12 physical education setting. 
Prerequisites: KINE 320, KINE 408, and senior standing. 
Terms Typically Offered: Fall, Spring.
KINE 499 Internship 3-12 Credits
Work experience obtained on a job where assignments are related to the student's specific concentration area within the Kinesiology degree.
Prerequisites: Kinesiology major and senior standing.
Course may be taken multiple times up to maximum of 15 credit hours.

KINE 500 Facility and Equipment Management in Sport and Fitness3 Credits
Provides an in-depth study of the facilities and equipment used in a variety of sport and fitness settings, from public to private organizations, educational settings, athletics (interscholastic, intercollegiate, and professional sports) as well as commercial and corporate fitness centers. The focus is on designing, planning, funding, and maintaining a facility as well as the equipment necessary for its successful operation.

KINE 501 Research Methods3 Credits
Examination of the methods of research in kinesiology. Topics will include selection of the problem, hypothesis testing, historical research, descriptive research, experimental research, tools of research, and data interpretation.
Terms Typically Offered: Fall.

KINE 502 Sport Marketing3 Credits
Overview of marketing in sport. Emphasis on enabling the marketing manager to create strategies that 'fit' products and services to an athletic department or sport organization's distinctive competencies and target market. Development of decision-making skills in marketing and overview of the marketing management process. Case studies in sport marketing address and exemplify issues in creating and implementing the marketing strategy.
Terms Typically Offered: Spring.

KINE 510 Event and Program Management in Sport and Fitness3 Credits
Duties and responsibilities of sport and fitness managers in creating policies, conducting events, and developing programs for sport or fitness organizations. Includes extensive examination of the topics and issues involved in the planning, funding, promotion, implementation, and evaluation of events and programs.

KINE 520 Management Policies and Regulations in Sport and Fitness3 Credits
Study of managerial policies and regulations to specific sport and fitness organizations to include educational, athletic, commercial and corporate entities. Topics will include the following: human resource management; labor relations; policy issues; sponsorship; budgeting; federal, state, and local statues; CHSAA and NCAA rules and guidelines; and professional organization policies. Specific attention will be given to compliance strategies.

KINE 530 Advanced Coaching for Basketball 1 Credit
Examination of the trends, techniques, methods and philosophies in coaching basketball at skilled levels. Specific attention is given to video analysis and game management.

KINE 534 Advanced Injury Management for Coaches 1 Credit
Specialized procedures and techniques involved in the prevention and management of common athletic injuries.

KINE 535 Sport in Society 3 Credits
Exploration of role and impact of sports in our society from a social view. The course will discuss various sociological constructs as they impact all levels of sport participation, including amateur and professional team sports, and the challenges of these constructs in managing sport organizations.
Terms Typically Offered: Fall.

KINE 542 Sport Law and Ethics3 Credits
Focus on legal issues pertaining to amateur and professional sports. Tort law, negligence, contract, antitrust, labor, facility, exculpatory, and licensing law will be analyzed in the context of sports-related cases. This course examines moral and ethical issues within sport environments, including major social criticisms and constructs of sport, analysis of relevant ethical theories, and synthesizing ethical reasoning knowledge and skills.
Terms Typically Offered: Fall.

KINE 545 Sport Finance3 Credits
Study of the basic financial considerations for an effective sports management professional, including the financial challenges facing the profession, sources of funding, budgeting and financial statements, the concept of economic impact analysis, and the pros and cons of using public-sector funds.
Terms Typically Offered: Fall.

KINE 587 Research3 Credits

KINE 590 Thesis I 3 Credits
Controlled learning experience supervised by faculty and guided by a contract that specifies student learning outcomes and assignments. Prior to registering, the student must meet with a Sport Management faculty member to approve a topic.
Prerequisites: KINE 501.
Terms Typically Offered: Spring.

KINE 591 Directed Readings3 Credits

KINE 592 Thesis II 3 Credits
Continuation of controlled learning experience supervised by faculty and guided by a contract that specifies student learning outcomes and assignments. Prior to registering, the student must meet with a Sport Management faculty member to approve a topic.
Prerequisites: KINE 590.
Terms Typically Offered: Summer.

KINE 595 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

KINE 599 Internship3 Credits

Kinesiology-Activity (KINA)

KINA 101 Beginning Swimming 1 Credit
Introduction to the basic swimming strokes and knowledge needed to prevent aquatic emergencies. Prepare students to acquire proper competitive swimming skills.
Terms Typically Offered: Fall, Spring.

KINA 102 Intermediate Swimming 1 Credit
Continued development of swimming and water safety skills. Enhance swimming fitness and overall conditioning.
Terms Typically Offered: Fall, Spring.

KINA 103 Springboard Diving 1 Credit
Instruction of the basic techniques and mechanics of springboard diving. Develop proper competitive diving skills.
Terms Typically Offered: Fall, Spring.

KINA 104 Water Polo 1 Credit
Introduction to the basic skills and rules of water polo. Progression of skills leading into full scrimmages.
Terms Typically Offered: Fall, Spring.
KINA 105 Water Aerobics 1 Credit
Conditioning program in the pool that emphasizes muscle tone, strength, flexibility, balance, coordination, and cardiovascular endurance.
Terms Typically Offered: Fall, Spring.

KINA 106 Beginning Scuba1 Credit
Introduction to snorkeling techniques, scuba gear preparation, equipment maintenance, and 20 basic scuba skills. Designed to prepare students for a certification by helping them become safe, comfortable, and confident divers.
Terms Typically Offered: Fall, Spring.
Fees: Yes.

KINA 107 Advanced Scuba1 Credit
Advanced scuba skills and dives to expand safety, confidence, and enjoyment of scuba diving. Designed for certified scuba divers.
Terms Typically Offered: Fall, Spring.
Fees: Yes.

KINA 108 Canoeing1 Credit
Introduction to the basic skills and safety of canoeing. Students will learn how to use the equipment involved, as well as how to scout the river.
Terms Typically Offered: Fall, Summer.

KINA 108A Stand Up Paddle Boarding1 Credit
Foundational skills required to develop and refine effective Stand Up Paddle Board (SUP) navigation in moving flatwater and lake settings. Focuses on the knowledge of SUP equipment, proper safety precautions, SUP movement, basic hydrology, flatwater self-rescue skills, and overall water and SUP safety.
Terms Typically Offered: Fall, Spring.

KINA 109 Kayaking1 Credit
Introduction to basic kayak and water reading skills. Students will learn kayaking safety, hazard evaluation, terminology, whitewater river reading skills, and paddling strokes.
Terms Typically Offered: Fall, Spring, Summer.

KINA 110 River Rafting1 Credit
Introduction to whitewater rafting skills and knowledge. Students will learn about river trip planning, safety procedures, equipment, logistics, and minimizing environmental impact.
Terms Typically Offered: Fall, Summer.

KINA 111 Rock Climbing1 Credit
Introduction to the sport of rock climbing. Students will learn how to use equipment, tie knots, belay, communicate, basic climbing movements, and proper progression.
Terms Typically Offered: Fall, Spring.

KINA 111A Rock Climbing II1 Credit
Foundational technical skills required to move into outdoor climbing locations. Focus on teaching an in depth and standardized understanding of the skills essential to progressing into both sport and traditional lead climbing, anchor building, and overall climbing site safety.
Terms Typically Offered: Fall, Spring.

KINA 112 Hiking1 Credit
Introduction to hiking. Students will learn how to read a map, be safe while hiking, and properly prepare for a hike.
Terms Typically Offered: Fall, Spring.

KINA 115 Beginning Golf1 Credit
Introduction to the fundamentals, rules, and regulations of golf. Students will learn skills such as putting, chipping, and driving the ball, as well as proper golf etiquette.
Terms Typically Offered: Fall, Spring.

KINA 116 Intermediate Golf1 Credit
Development of the student's golf skills. Designed to refine the skills and strategies to ensure students can compete at an intermediate level.
Terms Typically Offered: Fall, Spring.

KINA 117 Badminton1 Credit
Introduction to the fundamental knowledge and skills of badminton. Students will enhance their skills related to the various serves and shots including drop, lob, clear, and smash shots. Instruction will include an emphasis on the fundamental strategies and rules used in both singles and doubles play.
Terms Typically Offered: Fall, Spring.

KINA 118 Karate1 Credit
Introduction to the history, culture, and practice of Okinawan Karate. Students will learn the basic terminology, warm-up procedure, and moving drills associated with the art of Karate.
Terms Typically Offered: Fall, Spring.

KINA 119 Archery1 Credit
Introduction to the basic skills of archery. Students will learn about the safety, rules, equipment, and regulations associated with archery.
Terms Typically Offered: Fall, Spring.

KINA 120 Backpacking1 Credit
Introduction to the basics of backpacking. Foundational technical skills required to successfully and safely perform an overnight backpacking trip in a wilderness setting. Focuses on technical specifications and proper use of equipment, how to properly load and carry a backpack, campsite selection, camp cooking, water treatment and Leave No Trace etiquette.
Terms Typically Offered: Fall, Spring.

KINA 121 Beginning Tennis1 Credit
Introduction to the basic skills of tennis. Topics include forehand, backhand, serve, and volley. Students will learn strategies, history, rules, and etiquette of tennis.
Terms Typically Offered: Fall, Spring.

KINA 121A Pickleball1 Credit
Introduction to the fundamental knowledge and skills of pickleball. Students will enhance their skills related to the various serves and shots including drop, lob, clear, and smash shots. Instruction will also emphasize the fundamental strategies and rules used in both singles and doubles play.
Terms Typically Offered: Fall, Spring.

KINA 122 Intermediate Tennis1 Credit
Development and refinement of the fundamentals of tennis. Students will learn advanced strokes and strategies that can be used to compete at an intermediate level.
Terms Typically Offered: Fall, Spring.

KINA 123A Racquet Sports1 Credit
Combination of racquetball, pickleball, and badminton. Introduction to rules, shots and strategies for each game.
Terms Typically Offered: Fall, Spring.

KINA 126 Fitness Walking1 Credit
Individualized approach to fitness walking. Students will gain knowledge about fitness principles and practices, as well as improve one's individual fitness levels.
Terms Typically Offered: Fall, Spring, Summer.
KINA 127 Physical Conditioning 1 Credit
Introduction to basic skills in physical conditioning and new fitness concepts. Students will gain knowledge on developing and executing an exercise program that combines strength training and cardiovascular endurance training.
Terms Typically Offered: Fall, Spring.
Fees: Yes.

KINA 128 Intermediate Weight Training 1 Credit
Proper guidelines, principles, and techniques of weight lifting. Development of muscular strength, endurance, and power at an advanced level. Introduces Olympic lifting techniques. Continues development of individual weight training programs and advanced evaluation techniques.
Terms Typically Offered: Fall, Spring.

KINA 129 Weight Training 1 Credit
Introduction to weight training principles and application with an individualized approach. Students will learn to design and implement a weight training program tailored to their own fitness goals.
Terms Typically Offered: Fall, Spring.

KINA 131A Aerobics 1 Credit
Aerobics to strengthen the cardiovascular system using low- or high-impact movements. Topics include workouts on the floor, bench, stability ball, and circuits.
Terms Typically Offered: Fall, Spring.

KINA 133 Downhill Skiing 1 Credit
Introduction to the knowledge, techniques, equipment, and safety necessary for participating in downhill skiing. Students will learn about the safety, practice, and etiquette associated with the snow sport.
Terms Typically Offered: Spring.
Fees: Yes.

KINA 134 Snowboarding 1 Credit
Introduction to the knowledge, techniques, equipment, and safety necessary for participating in snowboarding. Students will learn about the safety, practice, and etiquette associated with the snow sport.
Terms Typically Offered: Spring.
Fees: Yes.

KINA 135A Backcountry Winter Travel 1 Credit
Foundational and technical skills required to travel in the backcountry in winter conditions. Will utilize a variety of travel methods including skis, split boards, snowshoes, and cross country skis. Focus is on proper gear use, travel in extreme cold conditions, proper terrain choices, and winter safety and survival techniques.
Terms Typically Offered: Fall.

KINA 137 Fencing 1 Credit
Introduction to the basic skills and rules involved in fencing. Students will develop strategies for both attacking and defending using all three weapons (foil, saber, epee) of fencing.
Terms Typically Offered: Fall, Spring.

KINA 137A Intermediate Fencing 1 Credit
Development of basic fencing skills and strategies. Footwork and handwork skills will be developed to ensure students can compete at an intermediate level.
Terms Typically Offered: Fall, Spring.

KINA 138 Step Aerobics 1 Credit
Basic aerobic step patterns with the freedom of creativity. Students will learn choreographic terminology, as well as improve their cardiovascular fitness through aerobic step training.
Terms Typically Offered: Fall, Spring.

KINA 140 Snowshoeing 1 Credit
Introduction to snowshoeing. Topics include on- and off-trail techniques for various terrains, recognition and treatment of cold injuries, risk management, and trip planning.
Terms Typically Offered: Spring.

KINA 142 Self-Defense 1 Credit
Fundamental applications of Jujitsu, boxing, karate, wrestling, and Kung Fu. Students will learn the proper maneuvers for a variety of potential real-life combative situations.
Terms Typically Offered: Fall, Spring.

KINA 143 Orienteering 1 Credit
Introduction to the science of orienteering. Emphasis on acquiring a respect for the environment by route finding in a “low-impact” manner and gaining the knowledge to comfortably navigate from a map.
Terms Typically Offered: Fall, Spring.

KINA 144 Pilates 1 Credit
Introduction to the practice of Pilates. Students will learn low-impact mat exercises designed to develop whole body awareness and control for various fitness levels. Focus is on increasing core strength and stabilization, muscle balance, tone, coordination, and flexibility.
Terms Typically Offered: Fall, Spring.

KINA 146 Indoor Cycling 1 Credit
Basic concepts associated with indoor cycling. Emphasis on building cardiorespiratory endurance through structured, individually-paced indoor cycling workouts.
Terms Typically Offered: Fall, Spring.

KINA 151 Adaptive Physical Activity 1 Credit
Adaptive physical activity for students with a variety of disabilities, including both temporary and permanent injuries. Focus is on an individualized program that could include training and activity in muscle strength and endurance, flexibility, motor skills, swim skills, and/or cardiovascular endurance.
Terms Typically Offered: Fall, Spring.

KINA 152 Softball 1 Credit
Introduction to the fundamental skills of softball. Topics include the rules and regulations of the game and how to play each position on the field.
Terms Typically Offered: Fall, Spring.

KINA 156 Soccer 1 Credit
Introduction to the basic skills and techniques of soccer. Topics include rules, strategies, and the etiquette involved in a game situation.
Terms Typically Offered: Fall, Spring.

KINA 157 Adaptive Physical Activity II 1 Credit
Activity course for students with temporary and permanent disabilities. This course continues with students of temporary or permanent disabilities. Focus is on activities that improve one’s muscular strength, muscular endurance, flexibility, motor skills, swimming skills, and/or cardiovascular endurance.
Terms Typically Offered: Fall, Spring.

KINA 160A Nordic Skiing 1 Credit
Introduction to Nordic skiing techniques for groomed tracks and ungroomed snow conditions. Emphasizes speed control, efficient body movement, and safety. Covers basic winter survival techniques, proper clothing, and trail etiquette.
Terms Typically Offered: Fall, Spring.

KINA 161 Two-Person Outdoor Volleyball 1 Credit
Exploration of the game of sand volleyball as a lifetime activity. Students build on their basic understanding of volleyball skills and game strategies.
Terms Typically Offered: Fall, Spring.
KINA 162 Volleyball1 Credit
Introduction course of the fundamentals of volleyball including passing, serving, setting, and spiking. Students will learn rules and court strategies involved in the game and be able to demonstrate their skills in game-play.

Terms Typically Offered: Fall, Spring.

KINA 163 Intermediate Volleyball1 Credit
Enhancement of basic skills of volleyball learned as a beginner volleyball player. Advanced techniques taught such as, blocking, setting, and hitting. Different strategies of offense and serving will be emphasized.

Terms Typically Offered: Fall, Spring.

KINA 164 Beginning Basketball1 Credit
Introduction to the fundamental skills of basketball. Acquaints the student with the knowledge and skills necessary to participate in the game of basketball while acquiring the necessary physical fitness to play the sport.

Terms Typically Offered: Fall, Spring.

KINA 165 Intermediate Basketball1 Credit
Development of basketball skills and knowledge at an intermediate level. This course covers the implementation of set plays and skills through drills and game play.

Terms Typically Offered: Fall, Spring.

KINA 166 Flag Football1 Credit
Introduction to the fundamental skills, rules, and strategies of flag football. Students will learn the safety and etiquette of the game.

Terms Typically Offered: Fall, Spring.

KINA 166A Touch Rugby1 Credit
Introduction to the basic skills of touch rugby. This course emphasizes ball handling and attacking strategies. Students will learn the rules and the history of the game.

Terms Typically Offered: Fall, Spring.

KINA 167 Tai Chi1 Credit
Introduction to the ancient Chinese traditional martial art of Tai Chi as an effective way to reduce stress levels, improve health, and increase the ability to focus. Students will develop a relaxed sequence of moves that emphasize proper alignments and release muscular tension, aiding in preventing and recovering from injuries.

Terms Typically Offered: Fall, Spring.

KINA 168 Introduction to Yoga1 Credit
Fundamental poses for the practice of yoga, stress reduction techniques, and strength and flexibility development.

Terms Typically Offered: Fall, Spring.

KINA 169 Hatha Yoga & Relaxation1 Credit
Participation in the practice of Hatha yoga, including the integration of mind-body, stress reduction techniques, strength and flexibility enhancement.

Terms Typically Offered: Fall, Spring.

KINA 169A Flow Yoga1 Credit
Participation in the practice of Vinyasa yoga with an emphasis on synchronizing breath and movement to enhance strength and focus.

Terms Typically Offered: Fall, Spring.

KINA 170 Zumba1 Credit
Introduction to Zumba, Latin dance styles, through a variety of choreographed songs. Topics include basic information about aerobic training, how to perform basic Latin steps, and how to design a choreographed Latin-based dance routine.

Terms Typically Offered: Fall, Spring.

KINA 171 Adaptive Skiing/Snowboarding1 Credit
Adaptive snowsports for students with all types of disabilities. Students will develop knowledge, techniques, and an understanding of the safety involved in skiing/snowboarding. Specialized equipment will be available and customized depending on abilities.

Terms Typically Offered: Spring.

Fees: Yes.

KINA 174 Social Dance1 Credit
Introduction to partner dancing in common styles of social dance. Styles for each course will be specific to instructor expertise.

Terms Typically Offered: Fall, Spring.

KINA 175 Snorkeling/Free Diving1 Credit
Introduction to snorkeling and free diving. Topics include how to handle the equipment and the physics involved in free diving. Takes basic snorkelers to an advanced level of knowledge, skills, and safety.

Terms Typically Offered: Fall, Spring.

KINA 180V Varsity Sport Participation1 Credit
Participation in a varsity sport for credit. Course focuses on countable athletic-related activities, rules associated with sport, and maintenance of physical health.

Terms Typically Offered: Fall, Spring.

KINA 196 Topics:1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

KINA 396 Topics:1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

Land Surveying (SURV)

SURV 100 Introduction to Surveying/Field Work3 Credits
Introduction to the common surveying units, the theory of significant figures, the basic theory of errors, and the use of surveying field notes. Topics also include the instrumentation and methodologies of measuring the common surveying units, such as differences in elevation, distances, angles, bearings, and azimuths.

Prerequisites: MATH 113 or higher.

Corequisites: SURV 102.

Terms Typically Offered: Fall, Spring, Summer.

SURV 102 Surveying Calculations4 Credits
Fundamental mathematical calculations and theories associated with measuring techniques taught in SURV 100 in order to calculate the horizontal and vertical relationship between points, lines, and areas based on plane geometry.

Prerequisites: MATH 113 or higher.

Corequisites: SURV 100.

Terms Typically Offered: Fall, Spring.

SURV 200 Advanced Surveying Field Work3 Credits
Use of total station and robotic equipment, global positioning system (GPS) equipment, methods of construction staking, overall concepts of GPS, mapping surveys, mapping in general, photogrammetry, and an introduction to GIS.

Prerequisites: SURV 100 and SURV 102.

Corequisites: SURV 205.

Terms Typically Offered: Fall, Spring, Summer.
SURV 203 Legal Aspects of Surveying
3 Credits
Introduction to the concepts of boundary control and legal principles. Topics include rights in land, Public Land System of Surveys, metes and bounds surveys, proportionate measurement, junior/senior title rights, retracement of original surveys, deed first/survey first, common and case law, ranking/proritizing evidence, controlling monuments and corners, errors in legal descriptions and plats, record research, and case studies.
Corequisites: SURV 204.
Terms Typically Offered: Fall, Spring.

SURV 204 Real Property Descriptions
2 Credits
Reading, writing, and interpreting property descriptions to be consistent with boundary law principles. Several areas of boundary law are reviewed, with an emphasis on the written legal documents that describe those properties.
Corequisites: SURV 203.
Terms Typically Offered: Fall, Spring.

SURV 205 Advanced Surveying Computations/Calculations
4 Credits
Review of horizontal curve concepts and calculations followed by advanced skills development. Topics include vertical curve calculations, volume calculations, an introduction to the concepts of least squares adjustments, an overview of astronomical observations, an introduction of control surveys and geodetic reductions, and an introduction of state plane coordinates and other map projections.
Prerequisites: SURV 100 and SURV 200.
Corequisites: SURV 203 and SURV 204.
Terms Typically Offered: Fall, Spring.

SURV 206 Property Law - Boundary Evidence
3 Credits
Select topics of evidence and procedures for boundary location. Presents an introduction to the Public Land Survey System (Rectangular Survey System) of surveys used in the United States. Reviews Colorado Revised Statutes related to surveying and the Architects, Engineers, and Surveyor’s Board Rules (AES Board Rules).
Prerequisites: SURV 203 and SURV 204.
Terms Typically Offered: Fall, Spring.

SURV 207 Surveying Ethics: An Overview of Ethical Expectations
2 Credits
Overview of the ethical standards of the Professional Land Surveyor and insight into the numerous ethical choices faced by the Professional Land Surveyor.
Terms Typically Offered: Fall, Spring, Summer.

SURV 298 Internship/Capstone Project
4 Credits
Demonstrated proficiency in the required surveying-specific knowledge to pass the Colorado exams through an internship and delivery of a capstone project on a mutually agreed upon topic.
Prerequisites: SURV 100, SURV 102, SURV 200, SURV 203, SURV 204, SURV 205, SURV 206, SURV 207, STAT 200, MATH 130, and one of the following: MATH 141, MATH 121, MATH 135, MATH 146, or MATH 151.
Terms Typically Offered: Fall, Spring, Summer.

Maching/Machining (MAMT)

MAMT 101 Introduction to Manufacturing
2 Credits
The course is designed to give the student a broad overview of the world of manufacturing. The course will include people, materials, machines, design, organization, waste, quality, and other subjects which effect society and production of a product.

MAMT 102 Machining Fundamentals
1 Credit
Concentrated unit dealing with speeds and feeds of machines, materials, tooling, tapping, boring, and manufacturing processes.

MAMT 105 Print Reading and Sketching
2 Credits
Reading of blueprints and process sheets as used in industry, application of that information to various manufacturing processes.

MAMT 106 Geometric Tolerancing
2 Credits
Identification, interpretation, and application of the blueprint symbols (referred to as Geometric Tolerancing symbols) in manufacturing and inspection operations.

MAMT 110 Gauging and Measuring Tools
1 Credit
Uses and techniques of inspection including micrometers, Vernier scales, instruments, hole gauges in surface plate work, finish of parts and overall inspection techniques.
Prerequisites: MAMT 106 or permission of instructor.

MAMT 115 Introduction to Machine Shop
3 Credits
Safety procedures: using bench tools, layout tools, power saws, and taps; sharpening general purpose drills, grinding lathe bits; and identifying and operating basic machines such as the bench grinder, drill press, band saw, and others. One hour lecture and three hours laboratory per week.

MAMT 120 Machine Technology I
4 Credits
Operation of engine lathes, milling machines and surface grinders. One hour lecture and five hours laboratory per week.
Prerequisites: Permission of instructor.

MAMT 125 Machine Technology II
4 Credits
Further development of skills acquired in MAMT 120. Emphasis will be placed on technical aspects of tooling and machining tolerances. One hour lecture and five hours laboratory per week.

MAMT 135 Job Shop Machining I
3 Credits
Production of machined parts from a shop blueprint, writing process sheets, and estimating machine time. Machining of parts may involve one or more machine operations. Machine time, paperwork, inspection, and accuracy will be emphasized. One hour lecture and three hours laboratory per week.
Prerequisites: Permission of instructor.

MAMT 145 Machine Maintenance
2 Credits
Maintaining, lubricating, and repairing machinery including making gib adjustments, selecting and using proper lubricants and selecting or manufacturing parts of making repairs with emphasis on workmanship and inspection. One hour lecture, one and one-half hours laboratory per week.
Prerequisites: Permission of instructor.

MAMT 148 CNC Applications
3 Credits
Introduction to Computer Numerical Control programming basics, CAM software and tooling used in today’s manufacturing CNC Milling machines and CNC lathes.

MAMT 150 Introduction to Numerical Control
1 Credit
Numerical control/computerized numerical control machining. Its advantages and how it operates. The course is designed as an informational unit for customized pre-employment training.

MAMT 170 Practical Applications
3 Credits
Students will gain a working knowledge in manufacturing through Co-op, internship, work experience or required lab work in industrial study if outside work cannot be acquired.
Prerequisites: Permission of instructor.

MAMT 196 Topics
1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.
MAMT 207 Introduction to Statistical Process Control2 Credits
Introduction to the philosophical and economic bases for statistical process control and its uses; mathematical and nonmathematical SPC techniques with emphasis on application.

MAMT 230 Machine Technology II4 Credits
Exploration of advanced machine operations including O.D. grinding, cutter tool grinding, gear cutting, indexing, and rotary table work with an emphasis on workmanship, accuracy, and inspection.

MAMT 240 Job Shop Machining II3 Credits
Comprehensive capstone course utilizing all the machine tools in the machining laboratory. Further development of writing process sheets, estimating machine time, and performing final inspections on finished projects. Development of prototypes and reverse-engineering concepts using CNC machine tools and 3D printers. Final design presentation and written report.

MAMT 250 Process Systems Technology2 Credits
Advanced concepts of the philosophical and economic bases for statistical process control and its uses; mathematical and nonmathematical SPC techniques with emphasis of application.
Corequisites: MAMT 250L.

MAMT 250L Process Systems Technology Laboratory2 Credits
Advanced concepts of the philosophical and economic bases for statistical process control and its uses; mathematical and nonmathematical SPC techniques with emphasis of application.
Corequisites: MAMT 250.

MAMT 251 CNC Machining I3 Credits
Exploration of computerized numerical control machining operations, including control of functions, programming format, CNC machining setup and operation.

MAMT 255 CNC Machining II3 Credits
Further development of concepts introduced in MAMT 251. Emphasis of advanced operations of CNC machine tools.

MAMT 260 Properties of Materials3 Credits
Exploration of the processes of smelting and refining various types of metals. Discussions and demonstrations on heat-treatment, hardness testing and molecular manipulation of metals.

MAMT 295 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

MAMT 296 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

MANG 121 Human Relations In Business3 Credits
Human side of organizations: morale, motivation, human needs, minorities as working partners, leadership styles, organizational environment, and other human forces having an impact on business structures.

MANG 201 Principles of Management3 Credits
Management as the process of achieving organizational goals or objectives by and through others. Emphasizes functions performed by managers and how they are influenced by forces both within and outside the organization. Managers' use of resources will be investigated.

MANG 201A Principles of Management : Part 1 of 31 Credit
Introduction to the activities of management and decision making in the global environment, with an emphasis on leadership and managing change and innovation.

MANG 201B Principles of Management: Part 2 of 31 Credit
Introduction to management planning, goal setting, organizing, human resources, teams, and organizational behavior.

MANG 201C Principles of Management: Part 3 of 31 Credit
Introduction to management control, quality, the role of information technology, and electronic business.

MANG 221 Supervisory Concepts and Practices3 Credits
For practicing or potential supervisors and managers who hold or will hold first-line to middle-level management positions. Focuses on the management functions of planning, organizing, staffing, directing, and controlling and their relation to the daily job of the supervisor.

MANG 296 Topics:1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

MANG 299 Internship3-6 Credits
Practical workplace experience under the joint supervision of the employer and the internship coordinator. Designed for business majors working in the business environment.
Prerequisites: ACCT 201 and BUGB 211.
Course may be taken multiple times up to maximum of 6 credit hours.

MANG 301 Organizational Behavior3 Credits
Human behavior, its causes and effects in organizational settings. Description of and development of an understanding of human behavior in such settings.
Prerequisites: MANG 201 or permission of instructor.

MANG 370 Leadership3 Credits
Review of current leadership literature with an emphasis in application and skill building.
Prerequisites: MANG 201.
Terms Typically Offered: Fall, Spring.

MANG 395 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

MANG 396 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

MANG 401 Strategic Consulting3 Credits
Students are placed in the role of consultant for an area business furnishing management assistance to the small business community. Businesses benefit from the insight of student recommendations. Provides students practical training, supplementing academic theory by handling problems in a real business environment.
Prerequisites: Permission of instructor.

MANG 402 Advanced Problems in Small Business Operations II6 Credits
Continuation of MANG 401.
Prerequisites: Permission of instructor. (Not necessary to complete MANG 401 before MANG 402.)

MANG 410 Effective Workplace Communication3 Credits
Application of communication methods including: personal selling, negotiation, interviewing, and individual and group presentations. Emphasis placed upon application of effective practices used in communicating in today's business world.
Prerequisites: Junior or senior standing, or permission of instructor.

MANG 421 Credit and Collection Management3 Credits
Consumer and commercial credit in relationship to the management of credit by business firms, legal aspects of credit extension, and current legislation. Information on credit operations of business for both students of business and practicing businessmen.
Prerequisites: ACCT 202, MANG 201 or permission of instructor.
MANG 442 Experiential Management: Student Run Business3 Credits
Principles of developing/operating a functioning business. Track and analyze records of a student-run business. Analyze data, apply theory and practical experience to effect positive change. Work with CMU administration and government regulators to assure rules and regulations followed.
Prerequisites: Permission of instructor.

MANG 451 Career Research and Development3 Credits
Principles and techniques involved in a job search with emphasis on conducting career research, identification of goals, preparing a job campaign, and elements of a job interview. Preparation of a job kit including a prospect list, resume, cover letter, advertisements, prospect letters, and sales and follow-up letters which can be used in a job search.
Prerequisites: Senior standing or permission of instructor.

MANG 471 Operations Management3 Credits
The use of resources in producing goods and services; concepts of planning, scheduling, and controlling productive activities and physical resources.
Prerequisites: FINA 301 and senior standing.

MANG 491 Business Strategy3 Credits
Duties and responsibilities of decision makers in analyzing the organization, its operating environment and the subsequent development of objectives, policies, and long term planning for organizations. Includes complex cases taken from actual experiences in situations involving analysis, planning, and decision making.
Prerequisites: ACCT 201, ACCT 202, BUGB 231, FINA 301, MANG 201, MANG 231, and senior standing.
Terms Typically Offered: Fall, Spring.

MANG 495 Independent Study1-4 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

MANG 496 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

MANG 499 Internship1-9 Credits
Provides BBA students with an opportunity to learn more about management functions and activities through exposure to an actual business or agency environment. Observation and participation in management activities enable students to relate classroom theory to on-the-job experiences.
Prerequisites: BBA major, second semester junior or senior, written permission of instructor prior to registration.
Course may be taken multiple times up to maximum of 15 credit hours.

MANG 500 Advanced Management Theory3 Credits
Designed to advance the student’s understanding of management theories and the application of these theories to the business world. Contemporary issues will be discussed.

MANG 501 Operations Management3 Credits

MANG 510 Leading Organizations3 Credits
Designed to encourage the application of diverse conceptual and theoretical perspectives to the analysis and control of behavior in organizations. Practice in diagnosing organizational problems is gained by combining the use of theories, texts, readings, cases and exercise. The course focuses on problems related to perception, motivation, leadership, cultural diversity, interpersonal and group conflict, stress, work-family conflict, influence, decision-making, ethics, international management issues and change.

MANG 540 Advanced Quantitative Methods3 Credits
Analytical models to support decision making. Topics include linear optimization, sensitivity analysis, linear regression, decision making under uncertainty, decision making under risk, project management, transportation and assignment methods, and forecasting.

MANG 590 Business Strategy3 Credits
The capstone course in the MBA program. The purpose of this course is to develop an understanding of strategic management and the ‘how’ and ‘why’ of strategic decisions. Emphasis is also placed on how the manager goes about translating strategy into action and achieves integration in the organization. Integration involves the functional areas of management and how to balance the trade-offs from the perspective of strategic decision making at the top management level.
Prerequisites: Permission of instructor.

Marketing (MARK)

MARK 231 Principles of Marketing3 Credits
Use and development of marketing strategy and the effects of buyer motivation. Major functions of marketing, buying, selling, distribution, pricing, advertising, and storage are studied. A contrast is made between the two marketing institutions: wholesaling and retailing.

MARK 325 Consumer Behavior3 Credits
Overview of the processes involved when individuals or groups select, purchase, use or dispose of products and services to satisfy needs and desires.
Prerequisites: MARK 231.

MARK 332 Promotion3 Credits
Overview of the many ways in which goods, services, and ideas can be promoted to consumers and businesses through advertising, public relations, and publicity.
Prerequisites: MARK 231.

MARK 335 Sales and Sales Management3 Credits
The salesperson as a counselor whose role is to help buyers make better decisions. Professional salesmanship is recognized as an integral function in modern society, with basic sales techniques studied and practiced in sales presentations. The course is taught from a management perspective.
Prerequisites: MARK 231.

MARK 340 Creating Marketing Materials3 Credits
Overview and process development for creating marketing materials for all supply chain stakeholders. Development and analysis of multi-faceted levels of business marketing.
Prerequisites: MARK 231.
MARK 350 Marketing Research 3 Credits
Marketing research theory and techniques designed to educate the student in the use of the scientific method, develop analytical ability, present basic marketing research tools, and develop proficiency in the art of writing research reports. Cases and actual research projects will be utilized.
Prerequisites: CISB 241 or STAT 241.

MARK 360 Services Marketing 3 Credits
Application of marketing concepts and strategies for addressing marketing problems and opportunities in the service sector (Finance, Hospitality, and Healthcare).
Prerequisites: MARK 231, MARK 350, or permission of instructor. Course will utilize case problems and an actual research project.

MARK 395 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

MARK 396 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

MARK 402 Sport Marketing 3 Credits
The application of the principles of promotion and marketing to the sport and fitness industry including the areas of professional sports, corporate fitness, college/high school athletics, clubs and resorts, and others.
Prerequisites: MARK 231.

MARK 432 Advanced Marketing 3 Credits
In-depth complex marketing problems confronting modern business. Development of marketing strategy to allow the firm to progress toward its corporate objectives.
Prerequisites: MARK 231 and MARK 350 or CISB 341.

MARK 495 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

MARK 496 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

MARK 500 Marketing Strategy 3 Credits
Examines the state-of-the-art in marketing strategy from both a practical and theoretical perspective. Focusing on integrating a broad range of marketing concepts, the emphasis is on setting realistic marketing objectives, understanding marketing research concepts, demographic market segmentation, and current marketing topics.

Mass Communications (MASS)

MASS 110 Mass Media: Impact and History-GTAH 23 Credits
Role played by media in everyday life and media’s social, economic, and historical influence on society.
Essential Learning Categories: Humanities
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

MASS 140 Media Theory Introduction 3 Credits
Introduction to theories of Mass Communication. Exploration of theory constructs, audience research, effects of emerging media and technologies, and message content.
Prerequisites: MASS 110 or permission of instructor.

MASS 144 Multimedia Storytelling 3 Credits
Journalism-based techniques and methods for modern storytelling of accurately written information through the use of the internet, video, and audio.
Prerequisites: MASS 110.

MASS 196 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

MASS 213 Introduction to Media Writing and Reporting 3 Credits
Fundamentals of news gathering and reporting through a variety of media. Exploration of ethical and legal aspects of journalistic endeavors.
Prerequisites: MASS 140.

MASS 251 Mass Media: Advertising and Promotions 3 Credits
Principles of media advertising and promotions. Considers research, analysis, strategy, advertising barriers, design, and perspective.
Prerequisites: MASS 140.

MASS 261 Audio Announcing and Production 3 Credits
Exploration of the art and science of announcing for media and the importance and use of the spoken word in persuasive messages. Creation and execution of programs and formats for audio source distribution both traditional and emerging.
Prerequisites: MASS 140.

MASS 271 Video Production 3 Credits
Fundamentals of electronic field production and non-linear editing with hands-on experience with broadcast-quality equipment. Creation and execution of productions involves videography, scripting, graphic layout, and editing.

MASS 296 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

MASS 301 Media Law and Ethics 3 Credits
Ethical principles and laws affecting media. Includes study and application of ethics and laws involved in print, broadcasting, and emerging media.
Prerequisites: MASS 213.

MASS 313 Broadcast Journalism Reporting 3 Credits
Introduction to broadcast writing styles and history. Specific applications for radio, television, and internet. Emphasis on formatting, newsgathering, interviewing, and researching.
Prerequisites: MASS 213.

MASS 315A Specialized Writing for Media: Science 3 Credits
Specialized writing about science for various media platforms.
Prerequisites: MASS 213.

MASS 315B Specialized Writing for Media: Sports 3 Credits
Specialized writing about sports for various media platforms.
Prerequisites: MASS 213.

MASS 315C Specialized Writing for Media: Health 3 Credits
Specialized writing about health for various media platforms.
Prerequisites: MASS 213.

MASS 315D Specialized Writing for Media: Crime 3 Credits
Specialized writing about crime for various media platforms.
Prerequisites: MASS 213.

MASS 317 Writing Opinion for Impact 3 Credits
Persuasive and insightful writing. Subjects include public issues, supporting beliefs, analysis, and documentation for targeted audiences through broadcast, print, and internet/web.
Prerequisites: MASS 213.

MASS 342 Photojournalism 3 Credits
Fundamentals of camera techniques, qualities of print and digital images, history and ethics of photojournalism, uses of software in image acquisition and use, and development of esthetic values.
Prerequisites: MASS 213 or permission of instructor.
MASS 350 Public Relations Concepts 3 Credits
Historical and theoretical approach to contemporary public relations with emphasis on the persuasion process and ethics, propaganda, and advertising techniques in mass media.
Prerequisites: MASS 213.

MASS 352 Print Design and Production for Editors 3 Credits
Various essential processes and duties editors face in preparing articles, graphics, and photos for print publication - including digital design and pre-press, typography, press-ready PDFs, CMYK offset printing, writing headlines and cutlines, and meeting all expectations in the printed final product. Adobe InDesign also is introduced and utilized.
Prerequisites: MASS 213.

MASS 357 Documentary and News Producing 3 Credits
Creation of multimedia content for students to develop their skills as producers, researchers, interviewers, writers, and videographers, as well as on-camera and voice talent. The focus of study will be on analyzing and practicing the aesthetic and technical elements of documentary and news content in order to create original stories for broadcast, print, and web.

MASS 372 TV Studio Production 3 Credits
Combination of multi-camera studio and electronic field productions. Includes videography, live-editing, non-linear editing, graphic creation, audio manipulation and script writing, culminating in broadcast-quality programming.

MASS 387 Structured Research 1-3 Credits

MASS 395 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

MASS 396 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

MASS 397 Practicum 1 Credit
Practical experience with student media outlets under faculty advisor supervision or with CMU Sports Information. Practicum coordinator must be consulted in first week of term.
Prerequisites: MASS 140 and MASS 144 or permission of instructor.
Course may be taken multiple times up to maximum of 10 credit hours.

MASS 415 Advanced Media Writing and Reporting 3 Credits
In-depth journalism writing and reporting course. Focuses on the development of long-form journalism pieces, including magazine features, public affairs reporting, news analysis, and news investigations using public records and interviews. Emphasis on fair and accurate reporting and writing under deadline, with critical attention paid to law and ethics.
Prerequisites: MASS 213.

MASS 417 Writing for Public Relations and Advertising 3 Credits
Emphasizes copywriting function in public relations and advertising for organizations and agencies.
Prerequisites: MASS 213.

MASS 441 Emerging Media 3 Credits
Experimentation with tools, techniques, and concepts of social and new media resulting in the creation of online content.
Prerequisites: MASS 213.

MASS 442 Photojournalism I 3 Credits
Considers advanced skills necessary to capture and edit images to high aesthetic values, professionalism, news photography, photo illustration, creation of image portfolios for public display or potential employers, and use of image management software.
Prerequisites: MASS 342.

MASS 450 Public Relations Campaigns 3 Credits
Campaigns and case histories presenting the scope of PR, research methodology, and audience targeting. Practical application of PR theory.
Prerequisites: MASS 213.

MASS 452 Designing for Brand and Message 3 Credits
Publishing attractive and effective content. Includes designing print materials such as company newsletters, logos, brochures, magazines, as well as electronic publishing.

MASS 471 Advanced Video Production 3 Credits
Emphasis on aesthetic values of electronic field productions and post-production projects. Builds upon concepts and skills acquired in MASS 271 to create and execute high quality video and creative productions for air and/or web use.
Prerequisites: MASS 271.

MASS 494 Seminar: Advanced Theory and Research 3 Credits
Capstone course. Examination and exploration of mass communication theories. Focus on research and its importance to media disciplines and industries.
Prerequisites: MASS 213.

MASS 495 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

MASS 496 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

MASS 497 Practicum 1 Credit
Practical experience with student media outlets under faculty advisor supervision or with CMU Sports Information. Practicum coordinator must be consulted in first week of term.
Prerequisites: MASS 397 or permission of instructor.
Course may be taken 10 times for credit.

MASS 498 Senior Project Portfolio 1 Credit
Identification and preparation of projects that highlight Mass Communication skills, abilities, talents, and applications.
Prerequisites: MASS 213 and MASS 397.

MASS 499 Internship 1-12 Credits
Work in media industry positions.
Prerequisites: MASS 213, MASS 310, and at least junior standing with at least half of major requirements completed.
Course may be taken multiple times up to maximum of 15 credit hours.

Math - Foundations (MATC)

MATC 090 Introductory Algebra 4 Credits
Introduction to algebra with a review of basic arithmetic. Includes decimals, fractions, percentage, ratio, proportion, signed numbers, algebraic expressions, factoring, exponents and radicals, linear equations, functions and graphs.

MATC 091 Intermediate Algebra 4 Credits
Further study in topics of algebra. Includes properties of real and complex numbers; laws of exponents and radicals; factoring polynomials; solving linear and quadratic equations and inequalities; rational expressions and complex fractions; introduction to functions and relations; applications.
Prerequisites: MATC 090 or equivalent, or appropriate Accuplacer score.
Mathematics (MATH)

MATH 101 Review in Mathematics 1 Credit
Review of mathematical concepts and computations. Content will vary and topics will be chosen to prepare students for a specific subsequent course.
Prerequisites: Permission of instructor.

MATH 105 Elements of Mathematics 13 Credits
Mathematics for the prospective elementary teacher with an emphasis on understanding mathematical reasoning and processes. Topics include problem solving, set theory, number theory, numeration systems, the integers and rational numbers.
Prerequisites: Appropriate mathematics placement test score and interview, and permission of instructor.

MATH 107 Career Math 3 Credits
Covers material designed for career technical or general studies students who need to study particular mathematical topics. Topics include measurement, algebra, geometry, trigonometry, graphs, and/or finance. These are presented on an introductory level and the emphasis is on applications.

MATH 108 Technical Mathematics 4 Credits
Covers material designed for career technical or general studies students who need to study particular mathematical topics. Topics may include measurement, algebra, geometry, trigonometry, graphs, and/or finance. These are presented on an introductory level and the emphasis is on applications.

MATH 110 College Mathematics-GTMA 13 Credits
Essential mathematical concepts for B.A. students. Topics include logic, set theory, solving equations, basic inequalities, combinatorics, probability, descriptive statistics, geometry, consumer mathematics and the appropriate use of calculators
Prerequisites: MATC 090 or equivalent or appropriate mathematics placement test score.

MATH 113 College Algebra-GTMA 14 Credits
College-level treatment of algebra. Topics include algebraic properties of the integers, rationals, real and complex numbers; techniques for manipulation of expressions; techniques for solving linear, non-linear, absolute value equations, and inequalities; techniques for solving systems of equations; the Cartesian plane, relations and functions; properties and graphs of polynomial, rational, exponential, logarithmic and inverse functions; conic sections.
Prerequisites: MATC 091 or MATC 092 or equivalent, or appropriate mathematics placement test score.

MATH 119 Precalculus Mathematics-GTMA 15 Credits
An in-depth treatment of the mathematics essential to Calculus. Topics include the Cartesian plane, functions; polynomial, rational, exponential, logarithmic, inverse, circular and trigonometric functions; solving inequalities and systems of equations Additional topics may include matrices, determinants and vectors.
Prerequisites: MAT 113 or equivalent, or appropriate mathematics placement test score.

MATH 121 Calculus for Business 3 Credits
An introduction to calculus with an emphasis on applications to business and economics. Topics include linear and quadratic functions, limits, continuity, differentiation, integration, the logarithmic and exponential functions, and applications. Computer algebra systems will be used where applicable. Current college algebra skills and graphic calculator are required.
Prerequisites: MAT 113 or equivalent, or appropriate mathematics placement test score.

MATH 127 Mathematics of Finance 3 Credits
Simple interest, simple discount, compound interest, continuously compounded interest, annuities, perpetuities, capitalization, determining payment size, determining outstanding principal, and constructing amortization schedules, including the derivation of mathematical formulae and the methods for solving many financial problems.
Prerequisites: MAT 113 or permission of instructor.

MATH 130 Trigonometry 3 Credits
A college-level treatment of trigonometry. Topics include the Cartesian plane, functions, inverse functions, the circular function, trigonometric functions, graphs of trigonometric functions, trigonometric identities, solving trigonometric equations, inverse trigonometric functions, triangle solution techniques and vectors.
Prerequisites: MAT 113 or equivalent, or appropriate mathematics placement test score.

MATH 135 Engineering Calculus I 4 Credits
Introduction to differentiation and integration of functions of a single variable. Emphasis on computational aspects. Includes functions, limits, continuity, differentiation, related rates, optimization problems, graphing, integration and applications.
Prerequisites: MAT 119, or appropriate mathematics placement score.
MATH 136 Engineering Calculus II4 Credits
Continuation of MATH 135 Engineering Calculus I. Includes techniques of integration, trigonometric and hyperbolic functions, inverse, logarithmic and exponential functions, sequences, series, conic sections, polar coordinates and parametric equations.
Prerequisites: MATH 135 or MATH 151.

MATH 141 Analytical Geometry3 Credits
A college-level treatment of analytic geometry. Topics include Cartesian coordinate systems, distance, parallel and perpendicular lines and planes, the locus of a condition, generalizations of lines, planes and parabolas, polar coordinates and vectors in two and three dimensions.
Prerequisites: MATH 130 or permission of instructor.

MATH 146 Calculus for Biological Sciences5 Credits
An introduction to calculus with an emphasis on applications to biology. Topics include functions, properties and graphs of polynomials, rational functions, the trigonometric, inverse, exponential and logarithmic functions, limits, continuity, differentiation, related rates, min-max problems, integration and applications of biology.
Prerequisites: MATH 119 or permission of instructor.

MATH 147 Introduction to Computer Algebra Systems1 Credit
Introduction to computer algebra using an appropriate computer algebra system (CAS) such as Maple, Mathematica, Derive, etc. Topics will include the syntax and simple programming of the CAS used. Assignments and projects will emphasize applications in Calculus.
Prerequisites: MATH 119.
Corequisites: MATH 151.

MATH 149 Honors Mathematics-GTMA13 Credits
An in-depth exploration of mathematical concepts, with an emphasis on the process of mathematical discovery. Topics are left to the discretion of the instructor, and typically include an introduction to more advanced topics such as group theory or graph theory. This course fulfills the essential learning requirement for students in the Honors Program.
Prerequisites: Permission of instructor.

MATH 150 Topics and Careers in Mathematics1 Credit
Introduction to the nature of mathematical thinking. Advanced topics and applications of mathematics and statistics will be presented at an introductory level. Career options will be investigated.
Prerequisites: MATH 151 or MATH 135 or MATH 146 (any of these courses may be taken concurrently with MATH 150).

MATH 151 Calculus I-GT-MA15 Credits
An introduction to differentiation and integration of functions of a single variable. Topics include functions, limits, continuity, differentiation, related rates, min-max problems, graphing, integration and applications.
Prerequisites: MATH 119, or appropriate mathematics placement test score.
Essential Learning Categories: Mathematics See the program requirements list to determine the minimum level math needed Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

MATH 152 Calculus II5 Credits
A continuation of MATH 151 Calculus I. Topics include techniques of integration, trigonometric and hyperbolic functions, inverse, logarithmic and exponential functions, sequences, series, conic sections, polar coordinates and parametric equations.
Prerequisites: MATH 151.

MATH 196 Topics1-4 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

MATH 205 Elements of Mathematics II-GTMA13 Credits
Decimal numbers, probability, statistics, geometry, and the metric system. A continuation of MATH 105 designed for the prospective elementary teacher.
Prerequisites: MATH 105 or permission of instructor.
Essential Learning Categories: Mathematics See the program requirements list to determine the minimum level math needed Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

MATH 225 Computational Linear Algebra3 Credits
Computational approach to systems of equations, vector spaces, matrices, matrix transformations, eigenvalues, as well as their applications. Software for linear algebra computations is introduced and utilized.
Prerequisites: MATH 151 or MATH 135 or MATH 146.

MATH 236 Differential Equations and Linear Algebra4 Credits
Prerequisites: MATH 152 or MATH 136.

MATH 240 Introduction to Advanced Mathematics4 Credits
An introduction to writing mathematical proofs. This course is designed to provide students with a transition from computationally-based lower level classes to proof-based upper level classes. The primary goal of the course is to train students to construct and analyze rigorous mathematical proofs. Topics include introductory logic, set theory, relations, functions, induction, equivalence relations, partitions and combinatorics.
Prerequisites: MATH 152.

MATH 253 Calculus III4 Credits
Vectors in three-dimensional space, vector functions, partial derivatives, directional derivative and multiple integrals.
Prerequisites: MATH 136 or MATH 152.

MATH 260 Differential Equations3 Credits
Techniques of solving differential equations of order one, linear differential equations, linear equations with constant coefficients, non-homogeneous equations, variation of parameter techniques, and Laplace transform methods.
Prerequisites: MATH 152 or MATH 136.

MATH 296 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

MATH 301 Mathematics for Elementary Teachers3 Credits
A selection of mathematics topics addressing content and standards for elementary education. Strong emphasis on written and oral communication.
Prerequisites: MATH 205 and formal acceptance into the Teacher Education Program, or permission of instructor.

MATH 305 Euclidean Geometry3 Credits
Development of Euclidean Geometry. Topics include basic concepts of logic, axiomatic proofs, inductive reasoning, analytic geometry, applications of technology, and van Hiele levels of learning. Intended for students seeking elementary teacher licensure.
Prerequisites: MATH 301, and MATH 151 or MATH 146.

MATH 310 Number Theory3 Credits
Classical number theory including the fundamental theorem of arithmetic, congruences, and linear diophantine equations.
Prerequisites: MATH 240.
MATH 325 Linear Algebra 3 Credits
Proof-based treatment of linear algebra. Topics include vector spaces, linear transformations, eigenvalues, and orthogonality.
Prerequisites: MATH 225 and MATH 240.

MATH 340 Ethnomathematics 3 Credits
Study of mathematics within cultures, especially small-scale indigenous cultures. Through the lens of culture, students can compare/contrast mathematics systems, their logical structures, and their modes of expression.
Prerequisites: MATH 240 or MATH 301 or permission of instructor.

MATH 352 Advanced Calculus 3 Credits
Proof-based treatment of calculus of one real variable with focus on axiomatic development. Topics include completeness of the real numbers, limits, continuity, derivatives, integrals, and the Fundamental Theorem of Calculus.
Prerequisites: MATH 240.

MATH 360 Methods of Applied Mathematics 3 Credits
Selection of techniques in applied mathematics of particular use to scientists and engineers. Topics include vector analysis, partial differential equations and transform techniques. Applications are stressed.
Prerequisites: MATH 253, and MATH 236 or MATH 260.

MATH 361 Numerical Analysis 4 Credits
Elementary numerical analysis using the hand-held programmable calculator including Taylor’s theorem, truncating errors, iteration processes, least squares methods, numerical solution of algebraic and transcendental equations, systems of equations, ordinary and partial differential equations, integral equations, interpolation, finite differences, eigenvalue problems, relaxation techniques, approximations, and error analysis.
Prerequisites: MATH 152 or MATH 136.

MATH 362 Fourier Analysis 3 Credits
Introduction to continuous and discrete Fourier analysis. Topics include signals as vectors, matrices, and functions; orthogonality and correlation; expansions and transforms; Fourier series and frequency analysis; filtering, thresholding and compression; analysis of accuracy, including aliasing and convergence; Fourier and inverse Fourier transforms; and inverse discrete Fourier transforms.
Prerequisites: MATH 152 or MATH 136.

MATH 365 Mathematical Modeling 3 Credits
A bridge between calculus and the application of mathematics. Investigation of meaningful and practical problems chosen from experiences, encompassing the disciplines of mathematical sciences, operations research, engineering, management sciences and life sciences.
Prerequisites: STAT 200, MATH 152 or MATH 136, and one of the following: MATH 236, MATH 240, MATH 253, MATH 260, MATH 325, or permission of instructor.

MATH 366 Methods of Applied Mathematics II 3 Credits
Treatment of numerical methods used to solve problems in applied mathematics. Topics include iteration, interpolation, numerical integration and differentiation, numerical linear algebra, numerical solutions of matrix eigenvalue problems, and numerical solutions of ordinary and partial differential equations.
Prerequisites: MATH 360; and CSCI 110/CSCI 110L or CSCI 111 or CSCI 130 or CSCI 310.

MATH 369 Discrete Structures II 3 Credits
Elementary logic, induction, recursion, recurrence relations, sets, combinatorics, relations, functions, graphs, trees, and elementary abstract structures.
Prerequisites: MATH 152 or MATH 136; and CSCI 110/CSCI 110L or CSCI 111 or CSCI 130.

MATH 370 Discrete Structures III 3 Credits
Applications of logic, Boolean algebra and computer logic, abstract structures, coding theory, finite-state machines, and computability.
Prerequisites: MATH 369 or both MATH 240 and CSCI 111.

MATH 380 History of Mathematics 3 Credits
History of mathematics from antiquity to the present with emphasis upon the development of mathematics concepts and the people involved.
Prerequisites: MATH 152.

MATH 386 Geometries 4 Credits
A study of Euclidean and non-Euclidean geometries. This course examines the differences in their axiom systems and their models, and how notions in Euclidean geometry are interpreted in non-Euclidean systems.
Prerequisites: MATH 240.

MATH 389 Explorations in Mathematics for Elementary Educators 1 Credit
Broadening of future elementary educators’ exposure to, and understanding of, diverse fields of mathematics through directed readings, analysis, and discussion.
Prerequisites: MATH 301 and permission of instructor.

MATH 394 Mathematics Colloquium 1 Credit
A weekly series of talks on a wide range of contemporary mathematics will be given by local faculty and others. Students must provide written commentary on these talks.
Prerequisites: Permission of instructor.

MATH 395 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

MATH 396 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

MATH 397 Structured Research 1-4 Credits
Designed for junior and senior level students.
Prerequisites: Permission of instructor.
Course may be taken multiple times up to maximum of 12 credit hours.

MATH 420 Introduction to Topology 3 Credits
Introduction to point set topology. Topics include topological spaces, metric spaces, connectedness, compactness, the separation axioms, and the Tychonoff theorem.
Prerequisites: MATH 310 or MATH 325 or MATH 352.

MATH 430 Mathematical Logic 3 Credits
Introduction to the classical areas of mathematical logic (model theory, proof theory, the theory of computation, complexity theory and set theory), the relationships these sub-disciplines have with each other and their relationships to the foundations of mathematics, computational science, computer science and the philosophy of mathematics.
Prerequisites: MATH 240 or MATH 369.

MATH 450 Complex Variables 3 Credits
Algebra of complex numbers, analyticity, differentiation and integration of complex functions, Cauchy’s integral formulae, and series.
Prerequisites: MATH 240.
MATH 496 Topics 3 Credits
Introduction to real analysis from a general metric space perspective. Topics may include point set topology, completeness, compactness and connected sets, sequences, series, continuity, integration and sequences and series of functions.
Prerequisites: MATH 253 and MATH 352.

MATH 453 Intro to Real Analysis II3 Credits
Selected topics in advanced real analysis chosen by instructor.
Prerequisites: MATH 452.

MATH 460 Advanced Linear Algebra3 Credits
Characteristics and minimal polynomial, Cayley-Hamilton Theorem, invariant subspaces, bilinear forms, primary decomposition theorem, dual vector spaces.
Prerequisites: MATH 325.

MATH 466 Methods of Applied Mathematics III3 Credits
Exploration of advanced methods of applied mathematics with an emphasis on extending basic methods and concepts. Specific content may vary but will typically include contemporary techniques in applied mathematics, modeling and data analysis.
Prerequisites: MATH 366.

MATH 484 Senior Seminar I2 Credits
An introduction to conducting mathematical research with discussion of various research topics, including how to read and analyze articles in mathematics. Presentations and papers will be required.
Prerequisites: MATH 452 or MATH 490 or MATH 366 or STAT 350.

MATH 490 Abstract Algebra I3 Credits
Introduction to the theory of algebraic structures. Topics include groups, subgroups, cyclic groups, groups of permutations, homomorphisms, isomorphisms, the order of group elements, cosets, quotient structures, isomorphism theorems and an introduction to rings and fields.
Prerequisites: MATH 310.

MATH 491 Abstract Algebra II3 Credits
A continuation of MATH 490 Abstract Algebra I. Topics include properties of rings, subrings, ideals, quotient structures; ring homomorphisms and isomorphisms, integral domains, polynomial rings, properties of fields, subfields, field extensions, finite fields and Galois Theory.
Prerequisites: MATH 490.

MATH 492 Senior Capstone3 Credits
Exploration and communication of mathematical ideas and problems relevant to individual mathematics concentrations by integrating and extending material covered in mathematics coursework. Investigations may also include placing mathematics in historical, applied, professional and social contexts.
Prerequisites: Senior standing.
Terms Typically Offered: Fall.

MATH 494 Senior Seminar II2 Credits
Capstone course, with discussion of specialized topics and analysis of mathematical results, requiring students to interpret and present research. Subject matter will vary. Presentations and/or written research papers will be required.
Prerequisites: Permission of instructor.

MATH 495 Independent Study1-3 Credits
Course may be taken multiple times up to a maximum of 6 credit hours.

MATH 496 Topics1-3 Credits
Course may be taken multiple times up to a maximum of 15 credit hours.

MATH 500 Introduction to Graduate Studies in Applied Mathematics3 Credits
Introduction to methods and concepts of applied mathematics, including differentiation and integration of single and multivariate functions, vector calculus methods, matrix-vector computations, vector space concepts, and mathematical proofs.
Prerequisites: Acceptance into the Graduate Certificate in Applied Mathematics program.

MATH 510 Applied Probability and Statistics3 Credits
Development of an understanding of statistical methods that are most common in educational research. Emphasizes on statistical concepts that will further prepare teachers to teach introductory-level college statistics and critically examine and comprehend the data analysis in educational literature. Graphing calculators and computer software may be used to analyze and display data.
Prerequisites: Acceptance into the Graduate Certificate in Applied Mathematics program.

MATH 520 Applied Numerical Methods3 Credits
Exploration of fundamental algorithms and analysis of numerical methods commonly used by scientists, engineers, and mathematicians to approximately solve mathematical problems that are analytically impossible or intractable.
Prerequisites: MATH 500.

MATH 530 Applied Mathematical Modeling3 Credits
Investigation of applications of mathematics in the natural and social sciences, involving continuous, discrete, and probabilistic models. Survey of historical applications of mathematics in fields including chemistry, engineering, finance, ecology, and management; and creation of new models to address current questions in these fields. Involves model creation and model selection, analytical and computational methods of solving a model, and presentation of original work in a seminar setting.
Prerequisites: MATH 500.

MATH 540 Applied Audio and Image Processing3 Credits
Investigation of the mathematics behind the processing of sound waves and digital images. Both theory and computer-based applications will be explored, using methods of calculus, matrix-vector algebra, and inner product spaces.
Prerequisites: MATH 500.

MATH 550 Mathematical Logic and Foundations in Mathematics3 Credits
Study of logical systems, formal languages, satisfaction, deduction, correctness, completeness, applications to algebraic structures and orderings, construction of ordinal and cardinal numbers within axiomatic set theory, models of computation, undecidability, computational complexity, intractability, and introduction to themes within the philosophy of mathematics.
Prerequisites: Acceptance into the Graduate Certificate in Applied Mathematics program.

MATH 560 Applied Number Theory3 Credits
Applied treatment of number theory including prime numbers, congruences, quadratic residues and primitive roots.
Prerequisites: Acceptance into the Graduate Certificate in Applied Mathematics program.

MATH 570 Applied Cryptography3 Credits
Exploration of cryptography. Topics include number theory, classical ciphers, integer factorization, primality testing, public-key ciphers, digital signatures schemes, commitment schemes, elliptic curve methods, and applications to e-commerce. Additional topics upon student interest.
Prerequisites: MATH 560.
MATH 596 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

Medical Lab Technician (MLTP)

MLTP 101 Phlebotomy 3 Credits
Orientation to the clinical lab areas and workflow. Emphasis on venipuncture and dermal collections. Skills necessary for limiting pre-analytic errors with sample collections and processing. Knowledge of POC testing, patient collection instructions, send out testing and informatics. Review of regulatory, ethical and legal issues, healthcare delivery system, certification and licensure, organ systems, basic medical terminology, infection prevention, and professionalism.
Corequisites: MLTP 102.
Fees: Yes.

MLTP 102 Applied Phlebotomy 2 Credits
Clinical laboratory experience at an affiliated site. Application of knowledge and skills to venipuncture and dermal collections, sample processing, POC testing, patient collection instructions, send-out testing, informatics, OSHA practices and phlebotomist professionalism are included.
Corequisites: MLTP 101.

MLTP 132 Clinical Hematology and Coagulation 3 Credits
Introduction to the theory and practical application of hematology and hemostasis as it relates to the medical laboratory. Bone marrow, blood cell formation, hemoglobin structure and synthesis, cell function and morphology, and coagulation are explored. Correlation of test results with normal results, blood cell disorders and clotting abnormalities emphasized. Laboratory techniques, instrumentation, and quality assurance in the hematology/hemostasis lab.
Prerequisites: BIOL 209/BIOI 209L, BIOL 210/BIOI 210L, CHEM 121/ CHEM 121L or CHEM 131/CHEM 131L, MLTP 101, and MLTP 102.

MLTP 132L Clinical Hematology and Coagulation Lab 1 Credit
Lab component required for MLTP 132.
Prerequisites: BIOL 209/BIOI 209L, BIOL 210/BIOI 210L, CHEM 121/BIOI 121L or CHEM 131/CHEM 131L, MLTP 101, and MLTP 102.
Fees: Yes.

MLTP 138 Clinical Immunology 2 Credits
Fundamentals and procedures of the immune defenses as it relates to medical laboratory testing; innate and adaptive immune responses, deficiencies, autoimmunity, hypersensitivity and tissue transplantation. Exploration of serologic techniques and instrumentation in the detection and diagnoses of viral illness, immune related diseases and its applications in immunohematology. Introduction to theories and principles of molecular testing methods.
Prerequisites: BIOL 209/BIOI 209L, BIOL 210/BIOI 210L, CHEM 121/ CHEM 121L or CHEM 131/CHEM 131L, MLTP 101, and MLTP 102.
Corequisites: MLTP 138L, MLTP 142/MLTP 142L, and MLTP 231/MLTP 231L.

MLTP 138L Clinical Immunology Lab 1 Credit
Lab component required for MLTP 138.
Prerequisites: BIOL 209/BIOI 209L, BIOL 210/BIOI 210L, CHEM 121/ CHEM 121L or CHEM 131/CHEM 131L, MLTP 101, and MLTP 102.
Corequisites: MLTP 138L, MLTP 142/MLTP 142L, and MLTP 231/MLTP 231L.
Fees: Yes.

MLTP 141 Clinical Immunohematology 2 Credits
Theoretical principles and procedures in immunohematology and application in the medical laboratory. Blood banking procedures and potential problems in blood bank testing relative to antibody identification, compatibility testing, transfusion reactions and maternal/neonatal screening for hemolytic disease of the newborn.
Prerequisites: BIOL 209/BIOI 209L, BIOL 210/BIOI 210L, CHEM 121/ CHEM 121L or CHEM 131/CHEM 131L, MLTP 101, MLTP 102, MLTP 138/MLTP 138L, MLTP 142/MLTP 142L, and MLTP 231/MLTP 231L.

MLTP 141L Clinical Immunohematology Lab 1 Credit
Lab component required for MLTP 141.
Prerequisites: BIOL 209/BIOI 209L, BIOL 210/BIOI 210L, CHEM 121/ CHEM 121L or CHEM 131/CHEM 131L, MLTP 101, MLTP 102, MLTP 138/MLTP 138L, MLTP 142/MLTP 142L, and MLTP 231/MLTP 231L.
Corequisites: MLTP 138/MLTP 138L, MLTP 142L, and MLTP 231/MLTP 231L.
Fees: Yes.

MLTP 142 Clinical Microscopy 2 Credits
Introduction to microscopy in the medical laboratory. Emphasis on kidney function and urine formation: examination of the physical, chemical and microscopic components of urine. Body fluid analysis of feces, seminal, vaginal, amniotic, cerebrospinal, serous, and synovial fluids. Critical analysis and problem solving with regards to pre-analytic, analytic and post-analytic variables in sample testing.
Prerequisites: BIOL 209/BIOI 209L, BIOL 210/BIOI 210L, CHEM 121/ CHEM 121L or CHEM 131/CHEM 131L, MLTP 101, and MLTP 102.
Corequisites: MLTP 138/MLTP 138L, MLTP 142L, and MLTP 231/MLTP 231L.

MLTP 142L Clinical Microscopy Lab 1 Credit
Lab component required for MLTP 142.
Prerequisites: BIOL 209/BIOI 209L, BIOL 210/BIOI 210L, CHEM 121/ CHEM 121L or CHEM 131/CHEM 131L, MLTP 101, and MLTP 102.
Corequisites: MLTP 138/MLTP 138L, MLTP 142L, and MLTP 231/MLTP 231L.
Fees: Yes.

MLTP 180 Applied Immunohematology 3 Credits
Clinical laboratory experience in the principles and procedures of immunohematology at an affiliated site. It is an online supported, off-campus clinical laboratory experience taught by clinical faculty. Emphasis is on the application of knowledge and technical skills to clinical testing, methodology, instrumentation, quality control, correlation of laboratory data with pathophysiology, OSHA practices and medical laboratory technician professionalism are included.
Corequisites: MLTP 182, MLTP 250, MLTP 252, and MLTP 253.

MLTP 182 Applied Hematology and Body Fluids 4 Credits
Clinical laboratory experience in the principles and procedures of hematology, hemostasis, urinalysis and body fluids at an affiliated site. It is an on-line supported, off-campus clinical laboratory experience taught by clinical faculty. Emphasis is on the application of knowledge and technical skills to clinical testing, methodology, instrumentation, quality control, correlation of laboratory data with pathophysiology, OSHA practices and medical laboratory technician professionalism are included.
Corequisites: MLTP 180, MLTP 250, MLTP 252, and MLTP 253.
MLTP 195 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

MLTP 231 Clinical Microbiology I 3 Credits
Study of normal flora and pathogenic microorganisms. Methods for recovery, identification of pathogens, culture techniques, procedures, antibiotic testing, automation and interpretation of clinical data. Emphasis on clinical specimens, testing algorithms and data correlation including diagnostics, public health, safety and quality control.
Prerequisites: BIOL 209/BIOL 209L, BIOL 210/BIOL 210L, CHEM 121/ CHEM 121L or CHEM 131/CHEM 131L, MLTP 101, and MLTP 102.
Corequisites: MLTP 138/MLTP 138L, MLTP 142/MLTP 142L, and MLTP 231L.

MLTP 231L Clinical Microbiology I Lab 1 Credit
Lab component required for MLTP 231.
Prerequisites: BIOL 209/BIOL 209L, BIOL 210/BIOL 210L, CHEM 121/ CHEM 121L or CHEM 131/CHEM 131L, MLTP 101, and MLTP 102.
Corequisites: MLTP 138/MLTP 138L, MLTP 142/MLTP 142L, and MLTP 231.

MLTP 242 Clinical Chemistry 3 Credits
Introduction to basic identification and classification of medically significant mycobacteria and other bacteria with unusual growth requirements, fungi, parasites and viruses. Sample collection, processing, isolation methods, and immunologic diagnosis and treatment. Epidemiology and pathogenesis of associated diseases are explored.
Prerequisites: MLTP 142/MLTP 142L, and MLTP 231/MLTP 231L.

MLTP 242L Clinical Chemistry Lab 1 Credit
Lab component required for MLTP 242.
Prerequisites: BIOL 209/BIOL 209L, BIOL 210/BIOL 210L, CHEM 121/ CHEM 121L or CHEM 131/CHEM 131L, MLTP 101, MLTP 102, MLTP 138/ MLTP 138L, MLTP 142/MLTP 142L, and MLTP 231/MLTP 231L.

MLTP 250 Applied Chemistry and Serology 2 Credits
Clinical laboratory experience in the principles and procedures of chemistry and serology at an affiliated site. It is an on-line supported, off-campus clinical laboratory experience taught by clinical faculty. Emphasis is on the application of knowledge and technical skills to clinical testing, methodology, instrumentation, quality control, correlation of laboratory data with pathophysiology, OSHA practices and medical laboratory technician professionalism are included.
Corequisites: MLTP 180, MLTP 182, MLTP 252, MLTP 253.

MLTP 252 Applied Microbiology 4 Credits
Clinical laboratory experience in the principles and procedures of clinical microbiology at an affiliated site. It is an on-line supported, off-campus clinical laboratory experience taught by clinical faculty. Emphasis is on the application of knowledge and technical skills to clinical testing, methodology, instrumentation, quality control, correlation of laboratory data with pathophysiology, OSHA practices and medical laboratory technician professionalism are included.
Corequisites: MLTP 180, MLTP 182, MLTP 250, and MLTP 253.

MLTP 253 Certification Exam Review 1 Credit
Review of key principles and content in preparation for national certification examination.
Corequisites: MLTP 180, MLTP 182, MLTP 250, and MLTP 252.

MLTP 275 Capstone Seminar 1 Credit
Preparation for clinical internships. Conflict resolution, communication skills, professional behavior in the workplace, resume writing and interview skills.
Prerequisites: BIOL 209/BIOL 209L, BIOL 210/BIOL 210L, CHEM 121/ CHEM 121L or CHEM 131/CHEM 131L, MLTP 101, MLTP 102, MLTP 138/ MLTP 138L, MLTP 142/MLTP 142L, and MLTP 231/MLTP 231L.
Corequisites: MLTP 132/MLTP 132L, MLTP 141/MLTP 141L, MLTP 232, and MLTP 242/MLTP 242L.

Medical Office Assistant (MOAP)

MOAP 110 Medical Office Administration 4 Credits
Learn to perform the administrative duties specifically used in medical offices.

MOAP 111 Introduction to Medical Assisting 3 Credits
Description and career opportunities. Professionalism and effective communication. Overview of health care, types of organizations and health care team. Legal considerations in the medical office, patient rights and the Health Information Portability and Accountability Act (HIPAA), and principles of law and ethics in health care.

MOAP 130 Medical Office Administration Insurance Billing and Coding 3 Credits
Introduction to outpatient coding with topics including identifying medical procedures and services performed (CPT codes), correlating the diagnosis, symptom, complaint or condition (ICD-9 codes), and establishing the medical necessity required for third-party reimbursement.
MOAP 133 Basic Medical Sciences I 4 Credits
Organization and function of the human body. Introductory anatomy, physiology, and pathophysiology of integumentary, musculoskeletal, cardiovascular, blood, lymphatic and immune, and respiratory. Health problems, illnesses, diagnostic tests, drug therapy and treatment common in the ambulatory patient care setting.

MOAP 135 Basic Medical Sciences II 4 Credits
Organization and function of urinary, male and female reproductive systems, musculoskeletal, and eyes, ears, nose and throat. Implications in pediatrics, geriatrics and nutrition are reviewed. Health problems, illnesses, diagnostic tests, drug therapy and treatment common in the ambulatory patient care setting.

MOAP 136 Introduction to Clinical Skills 2 Credits
Principles and procedures. Collection of patient history and data, vital signs, height, weight, and appropriate documentation. Methods of assisting clinicians with physical examinations, procedures, and treatments in the medical office. Infection control and medical asepsis.

MOAP 138 Medical Assisting Laboratory Skills 4 Credits
Laboratory skills and techniques for collection, handling, examination and testing of laboratory specimens often encountered in the ambulatory care setting. Emphasizes hands-on experience.
Prerequisites: MOAP 111 and MOAP 136.

MOAP 140 Medical Assisting Clinical Skills 4 Credits
Principles and procedures. Methods of assisting clinicians with specialty physical examinations, diagnostic testing, procedures, treatments, and minor surgical procedures in the medical office. Principles of medication administration with an emphasis on oral and parenteral routes of drug administration.
Prerequisites: MOAP 111 and MOAP 136.

MOAP 147 Medical Terminology 4 Credits
Basic medical terminology as applied to major systems of the body and related diseases. Includes special applications and related to medical practice with emphasis on spelling.

MOAP 150 Pharmacology for Medical Assistants 3 Credits
Overview of pharmacology. Drug action and uses, names, classifications, effects, interactions, regulation and safety. Vaccine and immunization schedules and administration. Information regarding the measurement of medications, dosage calculations, routes of administration, and commonly prescribed drugs in the medical office is provided.
Prerequisites: MOAP 111.

MOAP 183 Medical Assistant Internship 5 Credits
Supervised placement in contracted facility for guided experience in application of knowledge and skill acquired in the classroom. Business and clinical procedures. Positions are non-paid due to accreditation requirements. Permission of program coordinator required to begin internship.

MOAP 189 Review for Medical Assistant National Exam 1 Credit
Preparation and practice for a national registration examination.
Prerequisites: Permission of Program Director.

MOAP 196 Topics: 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

Multimedia Animation (MGDA)

MGDA 105 Creative Development 3 Credits
Hands-on strategies for developing, stimulating, and maintaining creativity to accomplish professional and personal goals.
MGDA 270 Advanced 3D Animation3 Credits
Investigate advanced 3D animation concepts that include workflow, advanced scene design, lighting, cameras, keyframing, textures, and rendering.

MGDA 285 3D Animation Capstone3 Credits
Develop and produce a short-form 3D animated movie using a production workflow and producing techniques. Explore the production process from conceptualization through finalization.

MGDA 296 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

Music/Academic (MUSA)

MUSA 101 Concert Attendance0 Credits
Exploration of repertoire, current trends in music, and career development through attendance at concerts and a weekly music forum.
Terms Typically Offered: Fall, Spring.
Course may be taken 8 times for credit.

MUSA 111 Music Technology1 Credit
Introduction to music software programs that are widely accepted in the field of music.
Prerequisites: Music major or consent of instructor.
Terms Typically Offered: Fall, Spring.

MUSA 113 Fundamentals of Theory3 Credits
Study of the fundamentals of music theory for music majors and music theater majors in preparation to begin the music theory sequence. Covers harmonic principles of music, including major and minor scales, intervals, triads, and chords.
Terms Typically Offered: Fall.

MUSA 114 Theory I-Introduction3 Credits
Harmonic principles of the 'common-practice' period including scales, intervals, triads and 7th chords. Introduction to part writing and voice leading.
Prerequisites: Satisfactory score on theory placement examination.
Corequisites: MUSA 116.
Terms Typically Offered: Fall, Spring.

MUSA 115 Theory II-Diatonic Concepts3 Credits
Continuation of MUSA 114, extending to all types of diatonic 7th chords, and their usages. Includes advanced rules of tonal harmonization.
Prerequisites: MUSA 114.
Corequisites: MUSA 117.
Terms Typically Offered: Fall, Spring.

MUSA 116 Ear Training and Sightsinging I2 Credits
Development of skills in reading rhythms, sightsinging, and listening. Emphasis on beginning melodic, harmonic, and rhythmic dictation.
Corequisites: MUSA 114.
Terms Typically Offered: Fall, Spring.

MUSA 117 Ear Training and Sightsinging II2 Credits
Further development of skills in sightsinging, rhythmic recognition, advanced listening abilities, including dictation of melodic and harmonic intervals, chord progressions, and two, three, and four-part chorales.
Prerequisites: MUSA 116.
Corequisites: MUSA 115.
Terms Typically Offered: Fall, Spring.

MUSA 120 Class Piano for Non Majors2 Credits

MUSA 121 Class Piano for Non Majors2 Credits
Open to all students (no prerequisites or corequisites), but recommended specifically for students who have little or no training in piano and are not music (or music theatre) majors or minors. Introductory piano proficiency (rudimentary note reading, music vocabulary, technique, aural skills, theory, and creative application of musical skills).

MUSA 122 Class Guitar2 Credits
Introduction to guitar for all students, including performance in various styles, reading notation, and technical skills.
Terms Typically Offered: Fall.

MUSA 129 Singer's Diction I: English and German1 Credit
Study of the International Phonetic Alphabet (IPA) and its use in the pronunciation of lyric diction for English and German.
Terms Typically Offered: Fall.

MUSA 130 Class Piano I2 Credits
Introduction of basic keyboard skills including scales, chords, transposition, harmonization, choir warmups, improvisation, and sightreading. Recommended for music majors, music minors and music theatre majors needing piano proficiency skills required by their program of study. Students move at their own pace completing specified sequenced skills.

MUSA 131 Class Piano II2 Credits
Continuation of keyboard skills learned in MUSA 130 including experience with arpeggios, chord inversions, different accompaniment styles and ensemble experiences. Students move at their own pace completing specified sequence skills.
Prerequisites: MUSA 130 or permission of instructor.

MUSA 137 Class Voice1 Credit
Fundamentals of singing, interpretation, phonetics, language (diction for singers), and solo repertoire for beginning voice students.

MUSA 138 Guitar1 Credit
Introduction to guitar for all students, including performance in various styles, reading notation, and technical skills.

MUSA 139 Singer's Diction I: English and German1 Credit
Study of the International Phonetic Alphabet (IPA) and its use in the pronunciation of lyric diction for English and German.
Terms Typically Offered: Fall.

MUSA 140 Guitar for Non Majors1 Credit
Open to all students (no prerequisites or corequisites), but recommended specifically for students who have little or no training in guitar and are not music (or music theatre) majors or minors. Introductory guitar proficiency (rudimentary note reading, music vocabulary, technique, aural skills, theory, and creative application of musical skills).

MUSA 214 Theory IV - Chromatic Concepts3 Credits
Full use of chromaticism through secondary dominants, altered chords, Neapolitan and augmented sixth chords, and modulation techniques. Continues into 20th Century including the use of advanced chromaticism. Includes advanced development of ear training and sightsinging.
Prerequisites: MUSA 115 and MUSA 117.
Terms Typically Offered: Fall, Spring.

MUSA 215 Theory IV - Twentieth Century Form and Analysis3 Credits
Final components of Common Practice Period harmony, including augmented sixth and common-tone diminished seventh chords, then progressing into musical form. Study of 20th century techniques, including Impressionism, Expressionism, Neo-Classicism, Neo-Romanticism, Serialism and other atonal techniques. Jazz Theory will also be covered.
Prerequisites: MUSA 214.
Terms Typically Offered: Fall, Spring.

MUSA 220 Music Appreciation-GTAH13 Credits
Overview of the basic elements of music and of Western music history. Emphasis on listening to a variety of music with intellect and emotion, and above all, purposeful attention. Examples come mainly from the Western “classical” tradition, jazz, and popular music.

Essential Learning Categories: Fine Arts

Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum
Terms Typically Offered: Fall, Spring.
MUSA 229 Singer's Diction II: Italian & French 1 Credit
Study of the International Phonetic Alphabet (IPA) and its use in the pronunciation of lyric diction for French and Italian.
Prerequisites: MUSA 129.
Terms Typically Offered: Spring.

MUSA 230 Class Piano III/II Credits
Continuation of concepts covered in MUSA 130 and MUSA 131 including minor scales, chords, transposition, playing from lead sheets, improvisation, basic jazz keyboarding skills, sightreading.
Prerequisites: MUSA 130 and MUSA 131.
Terms Typically Offered: Fall.

MUSA 231 Class Piano IV Credits
Culmination of concepts covered in MUSA 130, MUSA 131, and MUSA 230. Emphasis on jazz keyboarding skills, reading from open vocal score or instrumental score with transposing parts, creating and playing accompaniments for simple pieces.
Prerequisites: MUSA 230 or permission of instructor.

MUSA 232 String Techniques and Materials2 Credits
Study of violin, viola, cello, and string bass with emphasis on fundamental playing techniques and pedagogical approaches for teaching in schools.
Terms Typically Offered: Fall.

MUSA 233 Woodwind Techniques and Materials2 Credits
Study of woodwind instruments with emphasis on fundamental playing techniques and pedagogical approaches for teaching in schools.
Terms Typically Offered: Fall.

MUSA 234 Brass Techniques and Materials2 Credits
Study of brass instruments with emphasis on fundamental playing techniques and pedagogical approaches for teaching in schools.
Terms Typically Offered: Spring.

MUSA 235 Percussion Techniques and Materials2 Credits
Study of percussion with emphasis on fundamental playing techniques and pedagogical approaches for teaching in schools.
Terms Typically Offered: Spring.

MUSA 240 Introduction to Music Education2 Credits
Survey of the history and pedagogical methods used in the profession. Includes in-class observations of effective music teachers to determine successful classroom management systems and methods of instruction. Students develop their personal philosophies of music education while exploring the career possibilities in music education.
Terms Typically Offered: Spring.

MUSA 250 Beginning Conducting2 Credits
Development of basic techniques necessary for musical leadership. Students are expected to master fundamental patterns, fermatas, dynamics, etc. Includes observation of professional conductors.
Terms Typically Offered: Spring.

MUSA 258 Introduction to Improvisation1 Credit
Exploration of theory, philosophy, and application of basic improvisational techniques for musicians. Improvisation on the basic elements of music such as rhythm, melody, harmony, and timbre.
Terms Typically Offered: Fall.

MUSA 266 History of Popular Music-GTAH13 Credits
Introduction to musical and cultural roots of popular music. Focus is to engage listening skills at a higher level, identify elements of popular music, evaluate the intent of lyrics, differentiate between styles of popular music, and examine the social impact popular music has on society, and vice versa.
Essential Learning Categories: Fine Arts
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum
Terms Typically Offered: Fall, Spring.

MUSA 267 Jazz History and Literature3 Credits
Survey of prominent artists, innovators, and stylistic trends in jazz from its origins to the contemporary.
Essential Learning Categories: Fine Arts

MUSA 268 Beginning Jazz Improvisation1 Credit
Materials and techniques for improvisation, including chord and scale construction, modal harmony, harmonic patterns, linear concepts, with emphasis on technique, style and idiomatic usage.
Prerequisites: MUSA 115.
Terms Typically Offered: Fall.

MUSA 296 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

MUSA 302 Keyboard Literature I3 Credits
Survey of keyboard literature from Elizabethan music through Mendelssohn.
Prerequisites: MUSA 230 or permission of instructor, MUSL 230.

MUSA 303 Symphonic Literature3 Credits
Survey of symphonic music from early instrumental to present-day compositions. Emphasis on composers' styles, orchestras, conductors; chamber orchestra music also included.
Prerequisites: MUSA 231, MUSL 230, or permission of instructor.

MUSA 310 Accompanying Techniques2 Credits
Development of accompanying proficiency, including listening skills, form, and analysis of the music to be performed; rehearsing techniques; accompanying repertoire for vocal; instrumental; and ensemble playing.
Prerequisites: MUSA 214, or permission of instructor.

MUSA 311 Advanced Music Technology2 Credits
Application of advanced technological tools in music including recording, editing, production, and sound reinforcement.
Prerequisites: MUSA 111.
Terms Typically Offered: Fall.

MUSA 312 Electronic Music2 Credits
Techniques for the creation of electronic music in contemporary composition and live performance.
Terms Typically Offered: Fall.

MUSA 317 Applied Orchestration and Arranging2 Credits
Choral and instrumental arranging; instrumentation, scoring, and analysis of harmonic styles of various composers. Arrangement of works for various combinations of instruments.
Prerequisites: MUSA 214.
Terms Typically Offered: Fall.
MUSA 318 Vocal Literature 3 Credits
Follows the changing patterns, styles, and fashions of the secular art-song from medieval Europe to Europe and America of the day.
Prerequisites: MUSA 137 or previous enrollment in private vocal studies.

MUSA 319 Choral Literature 3 Credits
Historical, analytical, and interpretive study of choral literature spanning the Renaissance through the 20th Century. Important course for those planning to direct choirs.
Prerequisites: Previous or concurrent enrollment in a Colorado Mesa University choir or permission of the instructor.

MUSA 326 Music History and Literature I 3 Credits
Literature and styles of the master composers of music through the Medieval, Renaissance, and Baroque periods.
Prerequisites: MUSA 214.
Terms Typically Offered: Spring.

MUSA 327 Music History and Literature II 3 Credits
Literature and styles of the master composers of music through the classic, romantic, and modern ages.
Prerequisites: MUSA 214.
Terms Typically Offered: Spring.

MUSA 340 Teaching Elementary and General Music: Methods, Principles, and Materials 3 Credits
For Music Education Majors: The course is designed for standards-based curriculum for elementary and general music classes. Weekly laboratory experiences focus on course content dealing with teaching competencies in elementary and general music. Also addresses how to teach literacy in the music classroom. Includes 30 hours of field experience.
Prerequisites: MUSA 240.
Terms Typically Offered: Fall.

MUSA 350A Advanced Conducting: Choral 2 Credits
Development of advanced techniques, such as score study, interpretive conducting, gestural vocabulary, and ensemble rehearsal techniques.
Prerequisites: MUSA 250.
Terms Typically Offered: Fall.

MUSA 350B Advanced Conducting: Instrumental 2 Credits
Development of advanced techniques, score study, interpretive conducting, gestural vocabulary, ensemble rehearsal techniques, and rehearsal observations.
Prerequisites: MUSA 250.
Terms Typically Offered: Fall.

MUSA 363 Music Industry and Marketing 2 Credits
Exploration of business aspects of the music industry, with an emphasis on careers and music marketing.
Terms Typically Offered: Fall.

MUSA 365 Entrepreneurship for Creatives 2 Credits
Preparation for aspiring creatives in a variety of disciplines to build a career through entrepreneurial activities including business model development, project management strategy development, budgeting, and promotion, leading to a startup endeavor in the creative sector.
Terms Typically Offered: Spring.

MUSA 367 Arts Management 2 Credits
Introduction to the field of arts management, exploring principles of arts administration and trends and issues for non-profit social ventures as well as for-profit entities in a wide variety of arts disciplines.
Terms Typically Offered: Fall.

MUSA 368 Advanced Jazz Improvisation 2 Credits
Expansion upon the fundamental concepts presented in Beginning Jazz Improvisation. Topics addressed include chromaticism, harmony and scales in minor keys, diminished seventh chords and scales, rhythm changes, tritone substitutions, modal jazz, and improvisational patterns as applied to a variety of jazz standards.
Prerequisites: MUSA 214 and MUSA 268.
Terms Typically Offered: Spring.

MUSA 395 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

MUSA 396 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

MUSA 410 Vocal Pedagogy 3 Credits
The physiology of the human vocal mechanism, various teaching styles, vocal problems related to various age groups, and vocal repertoire pertinent to all age groups and levels of development.
Prerequisites: MUSA 137 or previous or concurrent enrollment in private vocal studies.

MUSA 411 Piano Pedagogy 3 Credits
Introduction to the field of piano teaching and learning/teaching theories with application to piano teaching. Survey of methods and literature. Instructional techniques for group and individual lesson settings.
Prerequisites: MUSA 231, MUSL 230, or permission of instructor.

MUSA 426 The Music of World Cultures 2 Credits
Exploration of the methods and philosophies of ethnomusicology—the study of music making with perspectives from anthropology, sociology, history, linguistics, and cultural studies. The course includes study of music from a variety of worldwide cultures.
Prerequisites: MUSA 214.
Terms Typically Offered: Spring.

MUSA 438 Singer's Diction 3: Russian 1 Credit
Study of the International Phonetic Alphabet (IPA) and its use in the pronunciation of lyric diction for Russian.
Prerequisites: MUSA 229.

MUSA 440 Teaching Vocal Music K-12: Methods, Principles, and Materials 3 Credits
Standards-based instruction of ensemble classes at the secondary level. Training in concepts, methodology and materials necessary to teach standards-based vocal music in public/private schools.
Prerequisites: MUSA 137 or MUSL 137 or MUSP 156 or MUSP 157 or MUSP 158 or MUSP 159.
Terms Typically Offered: Spring.

MUSA 441 Teaching Instrumental Music K-12: Methods, Principles, and Materials 3 Credits
Standards-based music curriculum for teaching instrumental music in the public schools. Includes developing teaching competencies, administration of the music program, and methods, materials, equipment and technology needed for the instrumental music program.
Prerequisites: MUSA 240.
Terms Typically Offered: Spring.

MUSA 442A Teaching Special Ensembles: Choral 2 Credits
Practical knowledge and methodology in the teaching of (A) Show/Jazz Choirs and (B) Marching/Jazz Bands. Students will learn the skills necessary to direct these ensembles. Includes 30 hours of field experience.
Prerequisites: MUSA 215, MUSA 240 and MUSA 250.
Corequisites: MUSA 350A or 350B if not completed.
MUSA 442B Teaching Special Ensembles: Instrumental2 Credits
Practical knowledge and methodology in the teaching of (A) Show/Jazz Choirs and (B) Marching/Jazz Bands. Students will learn the skills necessary to direct these ensembles. Includes 30 hours of field experience.
Prerequisites: MUSA 215, MUSA 240 and MUSA 250.
Corequisites: MUSA 350A or MUSA 350B if not completed.
MUSA 495 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.
MUSA 496 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.
MUSA 499 Internship1-4 Credits
Work experience obtained on a job in the music industry.
Prerequisites: Senior status, MUSA 363, and permission of instructor.
Course may be taken multiple times up to maximum of 15 credit hours.
MUSA 596 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

Music/Lessons (MUSL)

MUSL 130 Piano1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.
MUSL 131 Guitar1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.
MUSL 132 Strings1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.
MUSL 133 Woodwinds1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.
MUSL 134 Brass1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.
MUSL 135 Percussion1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.
MUSL 136 Electronic Instruments1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.
MUSL 137 Voice1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.
MUSL 138 Composition1 or 2 Credits
Development of individual music composition skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. An instructional fee is required. For first-year students.
Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.
MUSL 139 Jazz1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.
MUSL 230 Piano1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.
MUSL 231 Guitar 1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 232 Strings1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 233 Woodwinds1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 234 Brass1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 235 Percussion1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 236 Electronic Instruments1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 237 Voice1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 238 Composition1 or 2 Credits
Development of individual music composition skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. An instructional fee is required. For second-year students.

Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSL 239 Jazz1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 330 Piano1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 331 Guitar1-2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 332 Strings1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 333 Woodwinds1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 334 Brass1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.
MUSL 335 Percussion1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 336 Electronic Instruments1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 337 Voice1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 338 Composition1 or 2 Credits
Development of individual music composition skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. An instructional fee is required. For third-year students. Terms Typically Offered: Fall, Spring. Course may be taken 2 times for credit.

MUSL 339 Jazz1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 340 Instrumental Pedagogy and Literature1 Credit
Private one-on-one instruction of instrumental pedagogy and literature for woodwinds, brass, and strings music performance major students. The student will develop skills and knowledge of pedagogy of his/her primary instrument for future studio teaching. The student will also explore a survey of repertory for the instrument, including solo, chamber, band, and/or orchestra literature. Terms Typically Offered: Fall, Spring. Course may be taken 2 times for credit.

MUSL 350 Conducting1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 350 Piano1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 351 Guitar1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 352 Strings1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 353 Woodwinds1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 354 Brass1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 355 Percussion1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 356 Electronic Instruments1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 357 Voice1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 358 Composition1 or 2 Credits
Development of individual music composition skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. An instructional fee is required. For third-year students. Terms Typically Offered: Fall, Spring. Course may be taken 2 times for credit.

MUSL 359 Jazz1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 360 Instrumental Pedagogy and Literature1 Credit
Private one-on-one instruction of instrumental pedagogy and literature for woodwinds, brass, and strings music performance major students. The student will develop skills and knowledge of pedagogy of his/her primary instrument for future studio teaching. The student will also explore a survey of repertory for the instrument, including solo, chamber, band, and/or orchestra literature. Terms Typically Offered: Fall, Spring. Course may be taken 2 times for credit.

MUSL 361 Piano1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 362 Strings1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 363 Woodwinds1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 364 Brass1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 365 Percussion1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.

MUSL 366 Electronic Instruments1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required. Course may be taken 2 times for credit.
MUSL 437 Voice1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required.
Course may be taken 4 times for credit.

MUSL 438 Composition1 or 2 Credits
Development of individual music composition skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken up to four times at the 400 level. An instructional fee is required.
For fourth-year students.
Terms Typically Offered: Fall, Spring.
Course may be taken 4 times for credit.

MUSL 439 Jazz1 or 2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required.
Course may be taken 4 times for credit.

MUSL 450 Conducting1-2 Credits
Development of individual music performance skills through weekly lessons. Available to all students and may be used as an elective choice to students concurrently enrolled in a MUSP course. Lessons may be taken twice at each level. Music majors are required to attend and perform at weekly recitals as a component of applied music lessons. An instructional fee is required.
Course may be taken 4 times for credit.

Music/Performing (MUSP)

MUSP 140 Wind Symphony1 Credit
A symphony comprised of serious wind and percussion students, including music majors and non-music majors, who perform a wide variety of standard and current literature. Audition with conductor required.
Course may be taken 2 times for credit.

MUSP 141 Symphony Orchestra1 Credit
Ensemble designed to rehearse and perform string orchestra and symphonic literature as well as choral, opera and concerto repertoire. Audition required. For first-year students.
Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 144 Jazz Ensemble1 Credit
Performance of a variety of styles related to the jazz idioms in large and small ensembles. For first-year students.
Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 145 Chamber Ensembles1 Credit
Groups organized upon the talents and interests of the members. Specified ensembles may be offered in the format brass, keyboard, percussion, string, woodwind, and vocal ensembles. For first-year students.
Prerequisites: Membership approval by the director.
Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 146 Community Performance Organizations1 Credit
Opportunity for students and other musicians in the community to participate in various community musical groups, such as the Grand Junction Symphony. Audition with conductor is required.
Course may be taken 2 times for credit.

MUSP 147 Marching Band1 Credit
Rehearsal and presentation of musical and physical performance proficiencies. Specific skills associated with self-discipline, leadership, and individual and ensemble performance are developed. Advanced practice in physical alignment, balance, endurance, flexibility, and strength in technical competency. Available to all university students. Offered every fall semester. Monday/Wednesday/Friday 6:00-8:00 p.m., football practice field. Audition or consent of instructor required. Previous band experience highly recommended. Only MUSP 147 counts as a KINA activity credit.
Course may be taken 2 times for credit.

MUSP 148 Chamber Orchestra1 Credit
Ensemble designed to rehearse and perform chamber orchestra works. This ensemble will involve strings as well as woodwind and brass instruments. Audition required.
Course may be taken 2 times for credit.

MUSP 156 Vocal Arts Ensemble1 Credit
CMU’s flagship choral ensemble. Mid-sized vocal ensemble that performs choral music from all eras. Vocal Arts Ensemble performs on and off campus and on concert tours. Any student is eligible through audition. For first-year students.
Prerequisites: Successful audition with director.
Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 157 Tenor/Bass Choir1 Credit
Campus-wide chorus open to all interested students and faculty. Performs all types of music written for combined tenor and bass voices. Concertizes in conjunction with other university choral ensembles and in separate performances on-off campus. Members must perform a brief audition with instructor. For first-year students.
Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 158 Soprano/Alto Choir1 Credit
Campus-wide chorus open to all interested students and faculty. Performs all types of music written for combined soprano and alto voices. Concertizes in conjunction with other university choral ensembles and in separate performances on-off campus. Members must perform a brief audition with instructor. For first-year students.
Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 159 Vocal Jazz Ensemble1 Credit
Exploration of wide range of vocal literature. Performances given, both on and off campus.
Prerequisites: Permission of instructor.
Course may be taken 2 times for credit.
MUSP 162 Commercial Ensemble1 Credit
Experience performing in a commercial music group. Repertoire is chosen from many different contemporary and classic popular music genres. For first-year students.

Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 240 Wind Symphony1 Credit
A symphony comprised of serious wind and percussion students, including music majors and non-music majors, who perform a wide variety of standard and current literature. Audition with conductor required.
Course may be taken 2 times for credit.

MUSP 241 Symphony Orchestra1 Credit
Ensemble designed to rehearse and perform string orchestra and symphonic literature as well as choral, opera and concerto repertoire. Audition required. For second-year students.

Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 244 Jazz Ensemble1 Credit
Performance of a variety of styles related to the jazz idiom in large and small ensembles. For second-year students.

Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 245 Chamber Ensembles1 Credit
Groups organized upon the talents and interests of the members. Specified ensembles may be offered in the format brass, keyboard, percussion, string, woodwind, and vocal ensembles. For second-year students.

Prerequisites: Membership approval by the director.

Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 246 Community Performance Organizations1 Credit
Opportunity for students and other musicians in the community to participate in various community musical groups, such as the Grand Junction Symphony. Audition with conductor is required.
Course may be taken 2 times for credit.

MUSP 247 Marching Band1 Credit
Rehearsal and presentation of musical and physical performance proficiencies. Specific skills associated with self-discipline, leadership, and individual and ensemble performance are developed. Advanced practice in physical alignment, balance, endurance, flexibility, and strength in technical competency. Available to all university students. Offered every fall semester. Monday/Wednesday/Friday 6:00-8:00 p.m., football practice field. Audition or consent of instructor required. Previous band experience highly recommended. Only MUSP 147 counts as a KINA activity credit.
Course may be taken 2 times for credit.

MUSP 248 Chamber Orchestra1 Credit
Ensemble designed to rehearse and perform chamber orchestra works. This ensemble will involve strings as well as woodwind and brass instruments. Audition required.
Course may be taken 2 times for credit.

MUSP 249 Vocal Jazz Ensemble1 Credit
Experience performing in a commercial music group. Repertoire is chosen from many different contemporary and classic popular music genres. For second-year students.

Prerequisites: Membership approval by the director.

Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 250 Wind Symphony1 Credit
Campus-wide chorus open to all interested students and faculty. Performs all types of music written for combined tenor and bass voices. Concertizes in conjunction with other university choral ensembles and in separate performances on-off campus. Members must perform a brief audition with the instructor. For second-year students.

Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 255 Vocal Arts Ensemble1 Credit
CMU's flagship choral ensemble. Mid-sized vocal ensemble that performs choral music from all eras. Vocal Arts Ensemble performs on and off campus and on concert tours. Any student is eligible through audition. For second-year students.

Prerequisites: Successful audition with director.

Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 257 Tenor/Bass Choir1 Credit
Campus-wide chorus open to all interested students and faculty. Performs all types of music written for combined tenor and bass voices. Concertizes in conjunction with other university choral ensembles and in separate performances on-off campus. Members must perform a brief audition with the instructor. For second-year students.

Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 258 Soprano/Alto Choir1 Credit
Campus-wide chorus open to all interested students and faculty. Performs all types of music written for combined soprano and alto voices. Concertizes in conjunction with other university choral ensembles and in separate performances on and off campus. Members must perform a brief audition with the instructor. For second-year students.

Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 259 Vocal Jazz Ensemble1 Credit
Exploration of wide range of vocal literature. Performances given, both on and off campus.

Prerequisites: Permission of instructor.

Course may be taken 2 times for credit.

MUSP 260 Commercial Ensemble1 Credit
Experience performing in a commercial music group. Repertoire is chosen from many different contemporary and classic popular music genres. For second-year students.

Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 270 Junior Recital1 Credit
Preparation and successful completion of junior-level recital/presentation in the student's concentration. Recital/presentation must be approved by the music faculty and given during the semester in which the student is registered for this course. Required for Music Performance majors. Must include scholarly program notes covering historical aspects, analytical issues, and/or performance considerations of the recital repertoire.

Corequisites: 1 credit of MUSL 300-level.

MUSP 271 Wind Symphony1 Credit
A symphony comprised of serious wind and percussion students, including music majors and non-music majors, who perform a wide variety of standard and current literature. Audition with conductor required.
Course may be taken 2 times for credit.

MUSP 272 Chamber Orchestra1 Credit
Ensemble designed to rehearse and perform chamber orchestra and symphonic literature as well as choral, opera and concerto repertoire. Audition required. For third-year students.

Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.
MUSP 344 Jazz Ensemble 1 Credit
Performance of a variety of styles related to the jazz idioms in large and small ensembles. For third-year students.
Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 345 Chamber Ensembles 1 Credit
Groups organized upon the talents and interests of the members. Specified ensembles may be offered in the format brass, keyboard, percussion, string, woodwind, and vocal ensembles. For third-year students.
Prerequisites: Membership approval by the director.
Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 346 Community Performance Organizations 1 Credit
Opportunity for students and other musicians in the community to participate in various community musical groups, such as the Grand Junction Symphony. Audition with conductor is required.
Course may be taken 2 times for credit.

MUSP 347 Marching Band 1 Credit
Rehearsal and presentation of musical and physical performance proficiencies. Specific skills associated with self-discipline, leadership, and individual and ensemble performance are developed. Advanced practice in physical alignment, balance, endurance, flexibility, and strength in technical competency. Available to all university students. Offered every fall semester. Monday/Wednesday/Friday 6:00-8:00 p.m., football practice field. Audition or consent of instructor required. Previous band experience highly recommended. Only MUSP 147 counts as a KINA activity credit.
Course may be taken 2 times for credit.

MUSP 348 Chamber Orchestra 1 Credit
Ensemble designed to rehearse and perform chamber orchestra works. This ensemble will involve strings as well as woodwind and brass instruments. Audition required.
Course may be taken 2 times for credit.

MUSP 356 Vocal Arts Ensemble 1 Credit
CMU's flagship choral ensemble. Medium-sized vocal ensemble that performs choral music from all eras. Vocal Arts Ensemble performs on and off campus and on concert tours. Any student is eligible through audition. For third-year students.
Prerequisites: Successful audition with director.
Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 357 Tenor/Bass Choir 1 Credit
Campus-wide chorus open to all interested students and faculty. Performs all types of music written for combined tenor and bass voices. Concertizes in conjunction with other university choral ensembles and in separate performances on and off campus. Members must perform a brief audition with instructor. For third-year students.
Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 358 Soprano/Alto Choir 1 Credit
Campus-wide choir open to all interested students and faculty. Performs all types of music written for combined soprano and alto voices. Concertizes in conjunction with other university choral ensembles and in separate performances on and off campus. Members must perform a brief audition with instructor. For third-year students.
Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 359 Vocal Jazz Ensemble 1 Credit
Exploration of wide range of vocal literature. Performances given, both on and off campus.
Prerequisites: Permission of instructor.
Course may be taken 2 times for credit.

MUSP 362 Commercial Ensemble 1 Credit
Experience performing in a commercial music group. Repertoire is chosen from many different contemporary and classic popular music genres. For third-year students.
Terms Typically Offered: Fall, Spring.
Course may be taken 2 times for credit.

MUSP 365 Opera Workshop 1 Credit
Development of vocal performance operatic skills for majors and minors within a musical and theatrical workshop. Operatic repertoire selected for class study. Stage movement, character study, audition techniques, resume construction and mock auditions incorporated.
Prerequisites: Completion of Sophomore Review.
Corequisites: MUSL 337.
Course may be taken 2 times for credit.

MUSP 395 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

MUSP 396 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

MUSP 420 Senior Recital/Presentation 1 Credit
Preparation and successful completion of senior-level recital/presentation in the student's concentration. Recital/presentation must be approved by the music faculty and given during the semester in which the student is registered for this course. A music recital is required for Performance and Music Education majors and must include scholarly program notes (required for the official printed senior recital program) covering historical aspects, analytical issues, and/or performance considerations of the recital repertory. Students in the Liberal Arts or Elective Studies in Business programs may likewise present recital or, alternatively, may elect to give a faculty-approved ‘capstone presentation’ (e.g., lecture/recital; lecture/demonstration; or other presentation of creative work such as video, original compositions, arrangements, etc.). Performance majors take this course for two credits; all other music majors take this course for one credit.

MUSP 440 Wind Symphony 1 Credit
A symphony comprised of serious wind and percussion students, including music majors and non-music majors, who perform a wide variety of standard and current literature. Audition with conductor required.
Course may be taken 4 times for credit.

MUSP 441 Symphony Orchestra 1 Credit
Ensemble designed to rehearse and perform string orchestra and symphonic literature as well as choral, opera and concerto repertoire. Audition required. For fourth-year students.
Terms Typically Offered: Fall, Spring.
Course may be taken 4 times for credit.

MUSP 444 Jazz Ensemble 1 Credit
Performance of a variety of styles related to the jazz idioms in large and small ensembles. For fourth-year students.
Terms Typically Offered: Fall, Spring.
Course may be taken 4 times for credit.
MUSP 445 Chamber Ensembles 1 Credit
Groups organized upon the talents and interests of the members. Specified ensembles may be offered in the format brass, keyboard, percussion, string, woodwind, and vocal ensembles. For fourth-year students.
Prerequisites: Membership approval by the director.
Terms Typically Offered: Fall, Spring.
Course may be taken 4 times for credit.

MUSP 446 Community Performance Organizations 1 Credit
Opportunity for students and other musicians in the community to participate in various community musical groups, such as the Grand Junction Symphony. Audition with conductor is required.
Course may be taken 4 times for credit.

MUSP 447 Marching Band 1 Credit
Rehearsal and presentation of musical and physical performance proficiencies. Specific skills associated with self-discipline, leadership, and individual and ensemble performance are developed. Advanced practice in physical alignment, balance, endurance, flexibility, and strength in technical competency. Available to all university students. Offered every fall semester. Monday/Wednesday/Friday 6:00-8:00 p.m., football practice field. Audition or consent of instructor required. Previous band experience highly recommended. Only MUSP 147 counts as a KINA activity credit.
Course may be taken 4 times for credit.

MUSP 448 Chamber Orchestra 1 Credit
Ensemble designed to rehearse and perform chamber orchestra works. This ensemble will involve strings as well as woodwind and brass instruments. Audition required.
Course may be taken 4 times for credit.

MUSP 456 Vocal Arts Ensemble 1 Credit
CMU’s flagship choral ensemble. Medium-sized vocal ensemble that performs choral music from all eras. Vocal Arts Ensemble performs on and off campus and on concert tours. Any student is eligible through audition. For fourth-year students.
Prerequisites: Successful audition with director.
Terms Typically Offered: Fall, Spring.
Course may be taken 4 times for credit.

MUSP 457 Tenor/Bass Choir 1 Credit
Campus-wide chorus open to all interested students and faculty. Performs all types of music written for combined tenor and bass voices. Concertizes in conjunction with other university choral ensembles and in separate performances on-off campus. Members must perform a brief audition with instructor. For fourth-year students.
Terms Typically Offered: Fall, Spring.
Course may be taken 4 times for credit.

MUSP 458 Soprano/Alto Choir 1 Credit
Campus-wide chorus open to all interested students and faculty. Performs all types of music written for combined soprano and alto voices. Concertizes in conjunction with other university choral ensembles and in separate performances on and off campus. Members must perform a brief audition with instructor. For fourth-year students.
Terms Typically Offered: Fall, Spring.
Course may be taken 4 times for credit.

MUSP 459 Vocal Jazz Ensemble 1 Credit
Exploration of wide range of vocal literature. Performances given, both on and off campus.
Prerequisites: Permission of instructor.
Course may be taken 4 times for credit.

MUSP 462 Commercial Ensemble 1 Credit
Experience performing in a commercial music group. Repertoire is chosen from many different contemporary and classic popular music genres. For fourth-year students.
Terms Typically Offered: Fall, Spring.
Course may be taken 4 times for credit.

MUSP 465 Opera Scenes 1 Credit
Continuation of artistic and technical skills introduced in MUSP 365. Focus on operatic production of staged, public performance of either selected opera scenes or a one or two-act opera.
Prerequisites: Completion of Sophomore Review or instructor approval.
Corequisites: MUSL 437 or permission of instructor.
Course may be taken 4 times for credit.

MUSP 495 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

MUSP 496 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

Nurse Aide Training (NURA)

NURA 101 Nurse Aide Healthcare Skills 4 Credits
Fundamental skills of the nurse aide. Basic nursing skills, communication skills, restorative services, personal care skills, safety and emergency care covered. Includes knowledge and/or principles of asepsis, OSHA and HIPAA regulations. Ethical behaviors, cultural sensitivity, principles of mental health, patient/resident rights addressed.
Fees: Yes.

NURA 170 Nurse Aide Clinical Experience 1 Credit
Applies knowledge and skill gained in NURA 101 to patient care. Independent functioning within the nurse aide scope of practice in applying knowledge and skills gained in Nurse Aide Healthcare Skills. Enhanced communication, cultural competency, end of life care, critical thinking and organizational skills emphasized.
Prerequisites: NURA 101.

Nursing (NURS)

NURS 101 Pharmacology Calculations 1 Credit
Course introduces the concepts and techniques of dosage calculations and medication administration by a variety or routes. Application of basic math concepts to complex conversion of dosages between and among various systems of weights and volumes, and application of critical thinking skills to the calculation and administration of medications by oral and parenteral (including intravenous) routes of administration.
Prerequisites: Admission into the Practical Nursing certificate program.
Corequisites: NURS 106, NURS 106L, NURS 107, NURS 107L and NURS 112.

NURS 106 Adult Concepts 13 Credits
Application of nursing concepts, skills, critical thinking, and assessment in caring for a variety of clients in various health care settings.
Prerequisites: Admission into the Practical Nursing certificate program.
Corequisites: NURS 101, NURS 106L, NURS 107, NURS 107L, and NURS 112.

NURS 106L Adult Concepts 1 Laboratory 2 Credits
Lab component required for NURS 106.
Prerequisites: Admission into the Practical Nursing certificate program.
Corequisites: NURS 101, NURS 106, NURS 107, NURS 107L, and NURS 112.
Fees: Yes.
NURS 107 Foundations of Nursing 3 Credits
Exploration of basic nursing concepts and skills to develop critical thinking while utilizing the nursing process.
Prerequisites: Admission into the Practical Nursing certificate program.

NURS 107L Foundations of Nursing Laboratory 3 Credits
Application of basic nursing and IV certification skills through training, practice, and checkoffs of essential skills needed for safe practice.
Prerequisites: Admission into the Practical Nursing certificate program.
Corequisites: NURS 101, NURS 106, NURS 106L, NURS 107, and NURS 112.

NURS 109 Introduction to Mental Health 2 Credits
Introduction to complex concepts and behaviors of nursing roles within the cohort of the nursing process, holistic care, and mental health care. Emphasizes theoretical and practical aspects of the mental health nursing skills required to meet the needs of clients in a variety of settings.
Prerequisites: NURS 101, NURS 106, NURS 106L, NURS 107, NURS 107L, and NURS 112.
Corequisites: NURS 109L, NURS 117, NURS 117L, NURS 156, NURS 172, and NURS 172L.
Terms Typically Offered: Spring.

NURS 109L Introduction to Mental Health Laboratory 1 Credit
Lab component required for NURS 109.
Prerequisites: NURS 101, NURS 106, NURS 106L, NURS 107, NURS 107L, and NURS 112.
Corequisites: NURS 109, NURS 117, NURS 117L, NURS 156, NURS 172, and NURS 172L.
Terms Typically Offered: Spring.

NURS 112 Basic Concepts of Pharmacology 2 Credits
Introduction to basic concepts of pharmacology related to the actions, therapeutic and adverse effects, interactions of drugs, drug classifications, and the basic pharmacology of commonly used medications. Emphasis is placed on nursing considerations and client education.
Prerequisites: Admission into the Practical Nursing certificate program.
Corequisites: NURS 101, NURS 106, NURS 106L, NURS 107, and NURS 107L.
Terms Typically Offered: Fall.

NURS 117 Obstetrics and Pediatrics 4 Credits
Exploration of fundamental content in the nursing care of the childbearing family, which focuses on pregnancy, physiologic and psychological changes experienced, and care of the normal newborn. Includes the individual needs of the child from infancy through adolescence focusing on developmental stages, as well as childhood diseases and illness within each stage.
Prerequisites: NURS 101, NURS 106, NURS 106L, NURS 107, NURS 107L, and NURS 112.
Corequisites: NURS 109, NURS 109L, NURS 117L, NURS 156, NURS 172, and NURS 172L.

NURS 117L Obstetrics and Pediatrics Laboratory 2 Credits
Application of concepts related to pregnancy, newborns, and children from infancy to adolescence utilizing critical thinking, nursing process, and assessment in caring for this population within the various health care settings.
Prerequisites: NURS 101, NURS 106, NURS 106L, NURS 107, NURS 107L, and NURS 112.
Corequisites: NURS 109, NURS 109L, NURS 117, NURS 156, NURS 172, and NURS 172L.

NURS 156 Socialization into Practical Nursing 2 Credits
Examination of legal and ethical responsibilities of the practical nurse. Emphasis is given to the Colorado Nurse Practice Act, portfolio building, and preparing for the NCLEX PN exam. Job seeking skills are discussed.
Prerequisites: NURS 101, NURS 106, NURS 106L, NURS 107, NURS 107L, and NURS 112.
Corequisites: NURS 109, NURS 109L, NURS 117, NURS 117L, NURS 156, NURS 172, and NURS 172L.
Terms Typically Offered: Spring.

NURS 172 Adult Concepts I 3 Credits
Application of clinical practicum to apply nursing theory in medical surgical nursing using the nursing process to assist clients with more complex health care needs.
Prerequisites: NURS 101, NURS 106, NURS 106L, NURS 107, NURS 107L, and NURS 112.
Corequisites: NURS 109, NURS 109L, NURS 117, NURS 117L, NURS 156, NURS 172, and NURS 172L.

NURS 172L Adult Concepts I Lab 3 Credits
Lab component required for NURS 172.
Prerequisites: NURS 101, NURS 106, NURS 106L, NURS 107, NURS 107L, and NURS 112.
Corequisites: NURS 109, NURS 109L, NURS 117, NURS 117L, NURS 156, and NURS 172.
Terms Typically Offered: Spring.

NURS 200 LPN to RN Role Transition 1 Credit
Prepares the advanced placement student to enter the Nursing Program through orientation to the program, review of the nursing process and exploration of the role change from practical to professional nursing. Introduction to selected concepts related to the role of the Associate Degree nurse as a provider of care, teacher, manager, client advocate and member of the profession. Emphasis placed on critical thinking in providing and managing comprehensive care in a variety of health care settings with clients across the lifespan. Course is designed to assist the Licensed Practical Nurse with the transition into the practice of professional nursing.
Prerequisites: All essential learning education and program prerequisites.

NURS 206 Advanced Concepts of Medical-Surgical Nursing 3 Credits
Role of the registered professional nurse as care provider, teacher, manager, professional and advocate in meeting the nursing care needs of adults across the life span experiencing illness to wellness. The clinical lab provides opportunity for the student to utilize the nursing process and integrate previous learning to assist the patient and family in achieving optimal functioning in the various health care settings.
Corequisites: NURS 206L and NURS 288.

NURS 206L Advanced Concepts of Medical-Surgical Nursing Laboratory 2 Credits
Lab component required for NURS 206.
Corequisites: NURS 206 and NURS 288.
Fees: Yes.
NURS 210 Nursing Care of Complex Obstetrical and Pediatric Clients
3 Credits
[AAS Program only] Prepares the professional nurse to comprehend and apply advanced concepts in care of the high-risk child bearing family and for children with complex health problems from birth through adolescence. Emphasizes special needs and complications during the perinatal experience and altered functioning, special needs, and disease processes manifested in children. The nursing process is used as a framework to attain optimal levels of maternal-newborn and pediatric health and wellness. Legal and ethical accountability are integrated throughout the course. Critical thinking skills are utilized throughout. 
Prerequisites: All general education and prerequisites, NURS 288 and NURS 200.
Corequisites: NURS 210L

NURS 210L Nursing Care of Complex Obstetrical and Pediatric Clients Laboratory
1 Credit
Prepares the professional nurse to comprehend and apply advanced concepts in care of the high-risk child bearing family and for children with complex health problems from birth through adolescence. Emphasizes special needs and complications during the perinatal experience and altered functioning, special needs and disease process manifested in children. The nursing process is used as a framework to attain optimal levels of maternal-newborn and pediatric health and wellness. Legal and ethical accountability and critical thinking skills are integrated throughout the course. Theoretical content is applied in acute care and community clinical settings.
Prerequisites: NURS 200, NURS 206/NURS 206L, NURS 211/NURS 211L, NURS 286, and NURS 288.
Corequisites: NURS 210, NURS 216/NURS 216L, and NURS 289.
Fees: Yes.

NURS 211 Nursing Care of the Psychiatric Client
3 Credits
Develops concepts of psychosocial integrity and emphasizes the function and responsibility of nursing in promoting and maintaining mental health of individuals and families. This course emphasizes communication and caring through the application of the therapeutic relationship and nursing process in the care and treatment of common clinical conditions/disorders. In the clinical lab students will develop proficiency in working with psychiatric clients in various settings in the community.
Prerequisites: NURS 200 and NURS 288.
Corequisites: NURS 211L.

NURS 211L Nursing Care of the Psychiatric Client Laboratory
1 Credit
Lab component required for NURS 211.
Prerequisites: NURS 200, NURS 206, NURS 206L, NURS 286, and NURS 288.
Corequisites: NURS 211 and NURS 217.
Fees: Yes.

NURS 216 Advanced Concepts of Medical Surgical Nursing II
2 Credits
[AAS Program only] Continues to focus on the role of the registered professional nurse as care provider, teacher, manager, professional, and advocate in meeting the complex medical and surgical health care needs of adult clients. Utilizing the nursing process, the student is expected to integrate previous learning to assist the patient and family in achieving optimal functioning in various complex health care situations and settings.
Prerequisites: All essential learning and prerequisites, NURS 206, NURS 206L, NURS 288, and NURS 200.
Corequisites: NURS 216L.

NURS 216L Advanced Concepts of Medical Surgical Nursing II Laboratory
3 Credits
Continues to focus on the role of the registered professional nurse as care provider, teacher, manager, professional, and advocate in meeting the complex medical and surgical health care needs of adult clients. Utilizing the nursing process, the student is expected to integrate previous learning to assist the patient and family in achieving optimal functioning in various complex health care situations and settings. In addition to inpatient acute care patient units the student will rotate through the critical care areas of the health care facility.
Prerequisites: NURS 200, NURS 206/NURS 206L, NURS 211/NURS 211L, NURS 217, NURS 286, and NURS 288.
Corequisites: NURS 210/NURS 210L, NURS 216, and NURS 289.
Fees: Yes.

NURS 217 Leadership for Professional Nursing Practice
2 Credits
[AAS Program only] Socializes the student into the graduate registered nurse role. The focus is on the exploration and analysis of contemporary nursing practice, current trends and issues impacting nursing care delivery. Advanced leadership and management concepts are discussed as part of the nursing role.
Prerequisites: All essential learning and prerequisites, and NURS 200.

NURS 244 Introduction to Adult Concepts of Health
2 Credits
Introduction of nursing concepts, skills, and assessment in caring for adult clients in various health care settings.
Prerequisites: Admission into the Associate of Applied Sciences in Nursing program.
Corequisites: NURS 244L, NURS 246, NURS 247, and NURS 247L.
Terms Typically Offered: Fall.

NURS 244L Introduction to Adult Concepts of Health Laboratory
2 Credits
Introduction of nursing concepts, skills, and assessment in caring for adult clients in various health care settings.
Prerequisites: Admission into the Associate of Applied Sciences in Nursing program.
Corequisites: NURS 244, NURS 246, NURS 247, and NURS 247L.
Terms Typically Offered: Fall.

NURS 246 Pharmacological Concepts I
3 Credits
Introduction to basic pharmacology concepts, which include interactions, classification, adverse effects, drug dosages and math calculations.
Prerequisites: Admission into the Associate of Applied Science in Nursing program.
Corequisites: NURS 244, NURS 244L, NURS 246, and NURS 247L.
Terms Typically Offered: Fall.

NURS 247 Fundamentals of Nursing
3 Credits
Exploration of nursing concepts and skills utilized in the nursing process to develop critical thinking. Application of essential nursing skills including IV skills for safe practice.
Prerequisites: Admission into the Associate of Applied Science in Nursing program.
Corequisites: NURS 244, NURS 244L, NURS 246, and NURS 247L.
Terms Typically Offered: Fall.

NURS 247L Fundamentals of Nursing Laboratory
2 Credits
Lab component required for NURS 247.
Prerequisites: Admission into the Associate of Applied Sciences in Nursing program.
Corequisites: NURS 244, NURS 244L, NURS 246, and NURS 247.
Terms Typically Offered: Fall.
NURS 248 Adult Concepts of Health I 3 Credits
Exploration of the role of the registered nurse as a care provider, teacher, manager, professional, and advocate. Explores disease processes in adults.
Prerequisites: NURS 244, NURS 244L, NURS 246, NURS 247, and NURS 247L.
Corequisites: NURS 248L, NURS 249, NURS 250, and NURS 250L.
Terms Typically Offered: Spring.
NURS 248L Adult Concepts of Health I Laboratory 3 Credits
Exploration of the role of the registered nurse as a care provider, teacher, manager, professional, and advocate. Explores disease processes in adults.
Prerequisites: NURS 244, NURS 244L, NURS 246, NURS 247, and NURS 247L.
Corequisites: NURS 248, NURS 249, NURS 250, and NURS 250L.
Terms Typically Offered: Spring.
NURS 249 Pharmacological Concepts I 3 Credits
Integration of concepts in pharmacology with a focus on high risk medications, drug calculations, and teaching.
Prerequisites: NURS 244, NURS 244L, NURS 246, NURS 247, and NURS 247L.
Corequisites: NURS 248, NURS 248L, NURS 250, and NURS 250L.
Terms Typically Offered: Spring.
NURS 250 Health Assessment for Nurses 3 Credits
Acquisition of knowledge and skills necessary for completing health assessment across the life span.
Prerequisites: NURS 244, NURS 244L, NURS 246, NURS 247, and NURS 247L.
Corequisites: NURS 248, NURS 248L, NURS 249, and NURS 250L.
Terms Typically Offered: Spring.
NURS 250L Health Assessment for Nurses Laboratory 1 Credit
Acquisition of knowledge and skills necessary for completing health assessment across the life span.
Prerequisites: NURS 244, NURS 244L, NURS 246, NURS 247, and NURS 247L.
Corequisites: NURS 248, NURS 248L, NURS 249, and NURS 250.
Terms Typically Offered: Spring.
NURS 251 Adult Concepts of Health II 3 Credits
Continuation of study to meet the needs of higher level acuity patients and evaluating optimal healthcare outcomes. Students incorporate evidence-based care and apply clinical reasoning while developing additional practice and skills in organizing and prioritizing patient care more effectively.
Prerequisites: NURS 248, NURS 248L, NURS 249, NURS 250, and NURS 250L.
Corequisites: NURS 251L, NURS 253, and NURS 253L.
Terms Typically Offered: Fall.
NURS 251L Adult Concepts of Health II Laboratory 3 Credits
Continuation of study to meet the needs of higher level acuity patients and evaluating optimal healthcare outcomes. Students incorporate evidence-based care and apply clinical reasoning while developing additional practice and skills in organizing and prioritizing patient care more effectively.
Prerequisites: NURS 248, NURS 248L, NURS 249, NURS 250, and NURS 250L.
Corequisites: NURS 251, NURS 253, and NURS 253L.
Terms Typically Offered: Fall.
NURS 252 Mental Health Concepts in Nursing 2 Credits
Exploration of psychosocial concepts with a focus on maintaining mental health of the community, individual, and family.
Prerequisites: NURS 251, NURS 251L, NURS 253, and NURS 253L.
Corequisites: NURS 252L, NURS 254, NURS 254L, NURS 255, NURS 255L, NURS 256, and NURS 256L.
Terms Typically Offered: Spring.
NURS 252L Mental Health Concepts in Nursing Laboratory 2 Credits
Exploration of psychosocial concepts with a focus on maintaining mental health of the community, individual, and family.
Prerequisites: NURS 251, NURS 251L, NURS 253, and NURS 253L.
Corequisites: NURS 252, NURS 254, NURS 254L, NURS 255, NURS 255L, NURS 256, and NURS 256L.
Terms Typically Offered: Spring.
NURS 253 Family Nursing Obstetrics and Pediatrics 4 Credits
Exploration of family health with particular focus on pregnant women and the developmental health of infants, children, and adolescents.
Prerequisites: NURS 248, NURS 248L, NURS 249, NURS 250, and NURS 250L.
Corequisites: NURS 251, NURS 251L, and NURS 253L.
Terms Typically Offered: Fall.
NURS 253L Family Nursing Obstetrics and Pediatrics Laboratory 2 Credits
Exploration of family health with particular focus on pregnant women and the developmental health of infants, children, and adolescents.
Prerequisites: NURS 248, NURS 248L, NURS 249, NURS 250, and NURS 250L.
Corequisites: NURS 251, NURS 251L, and NURS 253.
Terms Typically Offered: Fall.
NURS 254 Leadership 1 Credit
Exploration of management and leadership theory with special emphasis on the role of the Registered Nurse as a change agent within health care.
Prerequisites: NURS 251, NURS 251L, NURS 253, and NURS 253L.
Corequisites: NURS 252, NURS 252L, NURS 254, NURS 255, NURS 255L, NURS 256, and NURS 256L.
Terms Typically Offered: Spring.
NURS 254L Leadership Laboratory 1 Credit
Exploration of management and leadership theory with special emphasis on the role of the Registered Nurse as a change agent within health care.
Prerequisites: NURS 251, NURS 251L, NURS 253, and NURS 253L.
Corequisites: NURS 252, NURS 252L, NURS 254, NURS 255, NURS 255L, NURS 256, and NURS 256L.
Terms Typically Offered: Spring.
NURS 255 Adult Concepts of Health III 2 Credits
Exploration of critical care needs of adult patients. Previous knowledge is integrated throughout to assist with optimal functioning in various complex health care situations.
Prerequisites: NURS 251, NURS 251L, NURS 253, and NURS 253L.
Corequisites: NURS 252, NURS 252L, NURS 254, NURS 254L, NURS 255, NURS 255L, NURS 256, and NURS 256L.
Terms Typically Offered: Spring.
NURS 255L Adult Concepts of Health III Laboratory 2 Credits
Exploration of critical care needs of adult patients. Previous knowledge is integrated throughout to assist with optimal functioning in various complex health care situations.
Prerequisites: NURS 251, NURS 251L, NURS 253, and NURS 253L.
Corequisites: NURS 252, NURS 252L, NURS 254, NURS 254L, NURS 255, NURS 255L, NURS 256, and NURS 256L.
Terms Typically Offered: Spring.
NURS 256 Capstone1 Credit
Exploration of the physiological and psychosocial factors that contribute to altered health states and their impact on patients and their families. Emphasis is on the application of the nursing process and refinement of clinical skills. Students gain experience in working with patients in acute care settings as well as working with the families of acutely ill individuals.
Prerequisites: NURS 251, NURS 251L, NURS 253, and NURS 253L.
Corequisites: NURS 252, NURS 252L, NURS 254, NURS 254L, NURS 255, NURS 255L, and NURS 256L.
Terms Typically Offered: Spring.

NURS 256L Capstone Laboratory2 Credits
Exploration of the physiological and psychosocial factors that contribute to altered health states and their impact on patients and their families. Emphasis is on the application of the nursing process and refinement of clinical skills. Students gain experience in working with patients in acute care settings as well as working with the families of acutely ill individuals.
Prerequisites: NURS 251, NURS 251L, NURS 253, and NURS 253L.
Corequisites: NURS 252, NURS 252L, NURS 254, NURS 254L, NURS 255, NURS 255L, and NURS 256.
Terms Typically Offered: Spring.

NURS 286 Advanced Pharmacology for Nurses2 Credits
Focuses on advanced concepts of pharmacology within nursing with an emphasis on nursing process, drug doses, calculations and relevant assessments and patient teaching.
Prerequisites: LPN license.

NURS 288 Health and Physical Assessment for Nursing2 Credits
[AAS Program only] Development of the knowledge necessary for completing health assessment across the life span. History taking, physical assessment skills, and principles of health promotion are utilized to develop appropriate interventions designed to assist clients with health promotion and lifestyle changes.
Prerequisites: All essential learning and prerequisites.
Corequisites: NURS 206 and NURS 200.
Fees: Yes.

NURS 289 Capstone: Comprehensive Nursing Internship2 Credits
Facilitates transition from student to graduate nurse through application of nursing principles and skills in an area of health care delivery. Critical thinking, life long learning, nursing process, caring, collaboration, and health teaching and promotion are emphasized.
Prerequisites: All prerequisites for the AAS program, NURS 200, NURS 206/NURS 206L, NURS 211/NURS 211L, NURS 217, NURS 286, NURS 288.
Corequisites: NURS 210/NURS 210L and NURS 216/NURS 216L.

NURS 300 Developing the Baccalaureate Role3 Credits
Designed to facilitate the transition from diploma or associate degree registered nurse to professional practice of nursing at the baccalaureate level. Development of leadership and management skills in the context of the dynamic field of health care including effective communication, resolution, critical thinking, management of resources and quality improvement. Focus on the role of nurse leader and manager as a safety using evidence based practice principles. Prerequisites for RN-BSN students: RN licensure and admission to RN-BSN program. All prerequisite essential learning course work for the BSN degree must be completed before starting the 300-level nursing courses.

NURS 318 Health Assessment and Promotion3 Credits
Development of the knowledge necessary for completing health assessment across the life span. History taking, physical assessment skills, and principles of health promotion are utilized to develop appropriate interventions designed to assist clients with health promotion and prevention over the life span.
Prerequisites: Admission to the LPN-BSN program.
Corequisites: NURS 318L, NURS 329, NURS 329L, NURS 333, and NURS 400.

NURS 318L Health Assessment and Promotion Laboratory1 Credit
Application of techniques necessary for completing health assessments across the life span. Includes history taking, physical assessment skills, and principles of health promotion. Apply information to develop appropriate interventions designed to assist clients with health promotion and lifestyle style changes.
Prerequisites: Admission to the LPN-BSN Program.
Corequisites: NURS 318, NURS 329, NURS 329L, NURS 333, and NURS 400.
Fees: Yes.

NURS 320 Health Assessment and Promotion for the Nurse3 Credits
Apply knowledge necessary for completing a child, adult, and geriatric client health assessment. Use history taking and physical assessment skills to develop appropriate interventions designed to assist clients with health promotion and lifestyle changes. Apply principles of health promotion through the life span in a variety of settings.
Prerequisites: Admission to the RN-BSN Program or practicing RN with current license and permission of instructor.
Corequisites: NURS 320L.

NURS 320L Health Assessment and Promotion for the Nurse Laboratory1 Credit
Application of knowledge necessary for completing a child, adult, and geriatric client health assessment. Use of history-taking and physical assessment skills to develop appropriate interventions designed to assist clients with health promotion and lifestyle changes. Application of principles of health promotion through the life span in a variety of settings.
Prerequisites: Admission into RN-BSN program or practicing RN with current license and permission of instructor.
Corequisites: NURS 320.

NURS 329 Advanced Adult Health I4 Credits
Exploration of the registered professional nurse as care provider, teacher, manager, professional, and advocate in meeting the nursing care needs of adults across the life span.
Prerequisites: Admission into the LPN-BSN Program.
Corequisites: NURS 318, NURS 318L, NURS 329L, NURS 333, and NURS 400.
Terms Typically Offered: Spring.

NURS 329L Advanced Adult Health I Laboratory3 Credits
Lab component required for NURS 329.
Prerequisites: Admission to the LPN-BSN program.
Corequisites: NURS 318, NURS 318L, NURS 329, NURS 333, and NURS 400.
Fees: Yes.
NURS 333 Basic Concepts of Pharmacology II 2 Credits
Exploration of advanced concepts of pharmacology within nursing with an emphasis on nursing process, drug doses, calculations, relevant assessments, and patient teaching.
Prerequisites: Admission into the LPN-BSN program.
Corequisites: NURS 318, NURS 318L, NURS 329, NURS 329L, and NURS 400.
Terms Typically Offered: Spring.

NURS 350 Health Assessment Across the Lifespan 3 Credits
Introduction to the basic skills of history taking and physical assessment of individuals through the lifespan. Emphasis on knowledge and skills necessary for conducting a systematic or focused health assessment and determining areas in which to implement health promotion activities.
Prerequisites: Admission to the BSN program. Foundation courses required. See program sheet for details.
Corequisites: NURS 350L, NURS 353, NURS 353L, NURS 370, and NURS 372.

NURS 350L Health Assessment Across the Lifespan Laboratory 1 Credit
Application of knowledge and clinical skills in obtaining a health history and performing a physical examination of individuals across the lifespan. Focus is on the practice and refinement of psychomotor, communication, and critical thinking skills with an emphasis on privacy, confidentiality, and safety.
Prerequisites: Admission to the BSN program. Foundation courses required. See program sheet for details.
Corequisites: NURS 350, NURS 353, NURS 353L, NURS 370, and NURS 372.

NURS 353 Foundation of Nursing Practice 4 Credits
Introduction to the fundamentals of nursing practice and the knowledge required to implement patient-centered care through the lifespan in a variety of settings. Focus is on safety, basic nursing care, assessment, communication, documentation, and quality care.
Prerequisites: Admission to the BSN program.
Corequisites: NURS 350, NURS 350L, NURS 353L, NURS 370, and NURS 372.

NURS 353L Foundations of Nursing Practice Laboratory 3 Credits
Application of fundamental concepts and evidenced-based nursing skills in settings that provide safe learning opportunities. Sites include clinical labs, simulation labs, and an array of local healthcare facilities.
Prerequisites: Admission to the BSN program.
Corequisites: NURS 350, NURS 350L, NURS 353, NURS 370, and NURS 372.

NURS 370 Pharmacology for Nurses I 3 Credits
Introduction to drug therapy including specific drug classifications, terminology, theories and techniques of safe administration. Focus on nursing considerations, utilizing the nursing process, and becoming proficient at medication calculations. Major content includes the basic concepts of pharmacology, commonly prescribed drugs, drug effects on body tissues, responses to drug therapy, and principles of therapy in various circumstances and populations.
Prerequisites: Admission to the BSN program. Foundation courses required. See program sheet for details.
Corequisites: NURS 350, NURS 350L, NURS 353, NURS 353L, and NURS 372.

NURS 372 Professional Development I: Nursing Theory, Roles and Ethics 2 Credits
Introduction to knowledge, skills, and attitudes related to nursing practice. Emphasis on history of professional nursing, nursing theory, legal, ethical, and safety issues. Exploration of principles of communication, time management, and critical thinking as they relate to the professional nurse.
Prerequisites: Admission to the BSN program.
Corequisites: NURS 350, NURS 350L, NURS 353, NURS 353L, and NURS 370.

NURS 373 Acute and Chronic Illness I 4 Credits
Application of the nursing process in care of individuals and families experiencing deviations from usual levels of wellness. Exploration of pathophysiology of moderate intensity and relative stability. Emphasis on identification of coping mechanisms of individuals and families to assist in health recovery, health promotion, and the adoption of strategies for illness prevention.
Prerequisites: Admission to the BSN program.
Corequisites: NURS 373L, NURS 388/NURS 388L, and NURS 394.

NURS 373L Acute and Chronic Illness I Clinical 3 Credits
Prerequisites: Admission to the BSN program.
Corequisites: NURS 373, NURS 388/NURS 388L, and NURS 394.

NURS 388 Mental Health Nursing I 3 Credits
Introduction to the patient-centered, culturally sensitive approach to needs of individuals, families, and groups experiencing alterations in mental health across the lifespan. Emphasis on theoretical knowledge and evidence-based practice to promote, maintain and restore mental and emotional health. Exploration of use of self as a therapeutic tool, principles of therapeutic relationships and communication and a knowledge-base of psychopathology.
Prerequisites: Admission to the BSN program.
Corequisites: NURS 373/NURS 373L, and NURS 388L and NURS 394.

NURS 388L Mental Health Nursing Clinical I 2 Credits
Application of theory in care of clients with a wide-range of psychiatric and/or mental health disorders across the lifespan. Emphasis on the nurse's role in various treatment settings and current treatment modalities. Development of proficiency in mental health practice with diverse populations. Emphasis on therapeutic use of self with individuals and groups in a variety of community-based settings.
Prerequisites: Admission to the BSN program.
Corequisites: NURS 373/NURS 373L, and NURS 388 and NURS 394.

NURS 394 Nursing Research: An Evidence-Based Practice 3 Credits
Exploration of nursing research and evidence-based practice in the process of scholarly inquiry in health care. Examination of research methodologies and related theories to facilitate development of a literature review and an evidence-based practice proposal to investigate nursing questions and outcomes. Emphasis on research as a basis for assessment of outcomes of health promotion and health care interventions.
Prerequisites: Admission to the BSN program.
Corequisites: NURS 373/NURS 373L and NURS 388/NURS 388L.
NURS 395 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

NURS 396 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

NURS 400 Nursing Research3 Credits
Exploration of evidence-based practices related to outcomes within the health care setting. Research questions relevant to clinical practice are developed and pursued.
Prerequisites: Admission to the LPN-BSN program.
Corequisites: NURS 318, NURS 318L, NURS 329, NURS 329L, and NURS 333.

NURS 408 Health Information Systems3 Credits
Explores the use of information systems in health care and nursing practice. Examines current trends and issues in using, designing, and implementing health care information systems, healthcare information management, decision support and knowledge management applications in the context of challenges facing healthcare organizations today. Explores legal and ethical issues as related to the protection of the privacy, confidentiality, and security of information in health care environments, utility of wide array of personal health information management and social networking tools in communicating health-related information.
Prerequisites: RN degree at the associate or diploma level; permission of instructor; application in to HITS program.

NURS 409 Quality Assessment and Improvement in Health Care Settings3 Credits
Prerequisites: Permission of instructor.

NURS 410 Population Health Nursing3 Credits
Exploration of theoretical basis for community and population health and the role of the nurse. Exploration of microsystems, applications of transitions of care, financing concepts in the community setting, and analysis of the health of populations. Emphasis on health promotion, disease prevention, using epidemiology, environmental health, health policy, aggregates, systems, populations, community assessment, and community interventions.
Prerequisites: NURS 320 and NURS 320L.
Corequisites: NURS 410L.

NURS 410L Population Health Nursing Practice Experience1 Credit
Application of theory in practice with diverse populations and aggregates in the community to achieve an optimum level of wellness. Emphasis on health disparities, cultural diversity, social justice, and health laws and policies related to population vulnerability throughout the life course. Exploration of the continuum of outpatient care in home health and collaboration with community services.
Prerequisites: NURS 320 and NURS 320L.
Corequisites: NURS 410.

NURS 415 Business of Health Care2 Credits
Appraisal of financial indicators on impact of health outcomes explored in the context of the professional's ability to provide quality care to a diverse patient population.
Prerequisites: NURS 403/NURS 403L, NURS 406/NURS 406L, and NURS 407.
Corequisites: NURS 411/NURS 411L, NURS 412L, and NURS 416.

NURS 417 Forensic Science: The Human Interface2 Credits
Introduces the principles of forensic science as they relate to care of individuals experiencing events which require intervention from both the legal and health care systems. Integrates concepts from health care, psychology, sociology, criminology used to clinically investigate crimes against humans. Focuses on the unique knowledge and attributes that health care professionals contribute to multidisciplinary forensic investigation. Addresses various aspects of forensic investigation including role of the forensic scientist in working with the victim and the perpetrator, wound identification and collection of evidence. Specific areas of domestic violence, sexual assault, elder abuse, gang behavior, death investigation, victims’ advocacy and courtroom dynamics are included. Students will experience forensic investigation in clinical areas.
Prerequisites: Acceptance into the B.S.N. program, or permission of instructor.

NURS 418 Gerontological Nursing and Chronic Illness3 Credits
Evaluate current key clinical information and issues central to caring for the highly specialized physiological and psycho-social needs of older adults. Review of the current financial, social, political, and cultural issues that affect nursing care for the elderly explored through a geriatric nursing curriculum in a scientifically sound, holistic process to provide care to this vulnerable population.

NURS 420 Global Health3 Credits
This is a multidimensional course for nursing students who want to broaden their understanding of health care in the global community. The course involves pre-trip seminars, travel to a country of focus and post-trip sessions. Attendance is required at all sessions. Level Two nursing preparation recommended. The pre-trip seminars are conducted by the lead faculty and guest speakers. Students will prepare and present on topics during the seminars and will have opportunities to develop leadership skills. Within the focus country, students will travel as a group, meeting local health care professionals, student nurses, and nursing faculty. Students will volunteer alongside local providers, delivering care within their scope of practice and the boundaries delineated by the Ministry of Health. Opportunities to develop critical thinking skills, the nursing process and culturally sensitive care will be part of the pre-trip and in-country experiences. A post-trip seminar and a presentation to the community are also mandatory.

NURS 421 Population Health3 Credits
Approaches to care and finance in the community care setting. Application of population risk reduction used to develop nursing interventions for high risk aggregates.
Prerequisites: NURS 318, NURS 318L, NURS 329, NURS 329L, NURS 333, and NURS 400.
Corequisites: NURS 427, NURS 427L, and NURS 421L.
Terms Typically Offered: Summer.

NURS 421L Population Health Laboratory2 Credits
Lab component required for NURS 421.
Prerequisites: NURS 318, NURS 318L, NURS 329, NURS 329L, NURS 333, and NURS 400.
Corequisites: NURS 421, NURS 427, and NURS 427L.
 Fees: Yes.

NURS 426 Nursing Research and Evidence-Based Practice3 Credits
Emphasis on nursing research and evidence-based practice in the process of scholarly inquiry in health care. Examination of research methodologies and related theories to facilitate development of a research proposal to investigate health care questions and outcomes.
Prerequisites: MATH 110 or higher and STAT 200.
NURS 427 Mental Health3 Credits
Exploration of psychosocial integrity with emphasis on the function and responsibility of nursing in promoting and maintaining mental health of individuals and families. This course emphasizes communication and caring through the application of the therapeutic relationship and nursing process in the care and treatment of common clinical conditions/disorders.
Prerequisites: NURS 318, NURS 318L, NURS 329, NURS 329L, NURS 333, and NURS 400.
Corequisites: NURS 421, NURS 421L, and NURS 427L.

NURS 427L Mental Health Laboratory1 Credit
Approaches to psychosocial integrity with emphasis on the function and responsibility of nursing in promoting and maintaining mental health of individuals and families. Students will develop proficiency in working with psychiatric clients in various settings in the community.
Prerequisites: NURS 318, NURS 318L, NURS 329, NURS 329L, NURS 333, and NURS 400.
Corequisites: NURS 421, NURS 421L, and NURS 427.

NURS 429 Adult Health III3 Credits
Exploration of the role of the registered professional nurse as care provider, teacher, manager, professional, and advocate in meeting the complex medical and surgical health care needs of critically ill adult clients. Students are expected to integrate previous learning to assist the patient and family in achieving optimal functioning in various complex health care situations and settings.
Prerequisites: NURS 421, NURS 421L, NURS 427, and NURS 427L.
Corequisites: NURS 429L, NURS 431, NURS 431L, NURS 449, NURS 449L, and NURS 470L.
Terms Typically Offered: Fall.

NURS 429L Adult Health II Laboratory3 Credits
Integration of previous learning to assist the patient and family in achieving optimal functioning in various complex health care situations and settings. In addition to inpatient acute care units, the student will rotate through the critical care areas of the health care facility.
Prerequisites: NURS 400, NURS 421, NURS 421L, NURS 427, and NURS 427L.
Corequisites: NURS 429, NURS 431, NURS 431L, NURS 449, NURS 449L, and NURS 470L.
Terms Typically Offered: Fall.

NURS 430 Leadership for the RN3 Credits
The multiple nursing leadership roles at the baccalaureate level. Business and culture of health care. Roles include mentorship, change agents that inform, direct and manage the organizational structure, and evaluation of multiple health care systems. Evaluation of legislative and organizational policies influencing health care trends.
Prerequisites: Admission to the RN-BSN Program and NURS 426.
Corequisites: NURS 430L.

NURS 430L Leadership for the RN Laboratory1 Credit
Exploration of the multiple nursing leadership roles at the baccalaureate level. Business and culture of health care. Roles include mentorship, change agents that inform, direct, and manage the organizational structure, and evaluation of multiple health care systems. Evaluation of legislative and organizational policies influencing health care trends.
Prerequisites: Admission to the RN-BSN program, NURS 426, and NURS 428.
Corequisites: NURS 430.

NURS 431 High Risk Obstetrics and Pediatrics3 Credits
Exploration of advanced concepts in the care of the high-risk childbearing family and for children with complex health problems from birth through adolescence. Emphasizes special needs and complications during the prenatal experience and altered functioning.
Prerequisites: NURS 421, NURS 421L, NURS 427, and NURS 427L.
Corequisites: NURS 429, NURS 429L, NURS 431L, NURS 449, NURS 449L, and NURS 470L.
Terms Typically Offered: Fall.

NURS 431L High Risk Obstetrics and Pediatrics Laboratory2 Credits
Application of advanced concepts in the care of the high-risk childbearing family and for children with complex health problems from birth through adolescence. Emphasizes special needs and complications during the prenatal experience and altered functioning.
Prerequisites: NURS 421, NURS 421L, NURS 427, and NURS 427L.
Corequisites: NURS 429, NURS 429L, NURS 431L, NURS 449, NURS 449L, and NURS 470L.
Terms Typically Offered: Fall.

NURS 432 Capstone Leadership for the RN4 Credits
Contributions of the registered nurse to quality health care through lifelong learning and professional development of herself/himself and others, research data generation, clinical supervision and development of policy, and clinical practice guidelines. The registered nurse develops their professional practice in accordance with the health needs of the population/society and changing patterns of disease and illness.
Prerequisites: NURS 300, NURS 320, NURS 320L, NURS 408, NURS 409, NURS 410, NURS 410L, NURS 418, NURS 426, NURS 430, and NURS 430L.

NURS 449 Leadership2 Credits
Exploration of leadership and management theory utilized in development of characteristics of a nurse leader. The role of the professional nurse as a change agent in shaping health care for the future is explored.
Prerequisites: NURS 421, NURS 421L, NURS 427, and NURS 427L.
Corequisites: NURS 429, NURS 429L, NURS 431, NURS 431L, NURS 449L, and NURS 470L.
Terms Typically Offered: Fall.

NURS 449L Leadership Laboratory1 Credit
Application of leadership and management theory utilized in development of characteristics of a nurse leader. The focus is on the exploration and analysis of contemporary nursing practice and current evidence-based practice as the basis for nursing care in the clinical setting.
Prerequisites: NURS 421, NURS 421L, NURS 427, and NURS 427L.
Corequisites: NURS 429, NURS 429L, NURS 431, NURS 431L, NURS 449L, and NURS 470L.
Terms Typically Offered: Fall.

NURS 450 Intensive Care Areas Specialty Practice Preparedness3 Credits
Overview of the dynamics of the collaborative and independent nature of nursing practice within critical care, perioperative, and emergency nursing. Commonalities of practice areas will be explored within the context of the nursing process. Includes recognizing and analyzing pertinent diagnostic data and physical and psychosocial assessment data; identifying common patient health problems and interventions; and determining patient outcomes. Prerequisite to the in-depth specialty practice courses.
NURS 457 Obstetrical Nursing2 Credits
Introduction to nursing care of the childbearing family. Emphasis is on growth and developmentally appropriate management of the health needs of the mother and neonate. Exploration of psychological, psychosocial, and pathophysiological changes of the population. Application of nursing process to gather and analyze data and formulate interventions for the obstetrical patient and neonate within culturally diverse families.
Prerequisites: Admission to the BSN program.
Corequisites: NURS 458, NURS 459L, NURS 472, NURS 473, NURS 473L.
Terms Typically Offered: Fall, Spring.

NURS 458 Pediatric Nursing2 Credits
Introduction to nursing care of the child. Emphasis is on growth and developmentally appropriate management of the health and illness related needs of the child within the family. Exploration of physiological, psychosocial, and pathophysiological changes of the population. Application of nursing process to gather and analyze data and formulate interventions for children within culturally and socially diverse families.
Prerequisites: Admission to the BSN program.
Corequisites: NURS 457, NURS 459L, NURS 472, NURS 473, NURS 473L.
Terms Typically Offered: Fall, Spring.

NURS 459L Obstetrical and Pediatric Nursing Clinical3 Credits
Application of the nursing care of the childbearing family. Emphasis on growth and development and management of the health and illness needs of the mother, newborn, and child within the family. Exploration of nursing care in labor and delivery, post-partum, newborn, and pediatrics will incorporate physiological, psycho-social, and pathophysiological changes of the population.
Prerequisites: Admission to the BSN program.
Corequisites: NURS 457, NURS 458, NURS 472, NURS 473, NURS 473L.
Terms Typically Offered: Fall, Spring.

NURS 470L Capstone Laboratory2 Credits
Application of nursing principles and skills in an area of health care delivery. Critical thinking, lifelong learning, nursing process, caring, collaboration, and health teaching and promotion are emphasized.
Prerequisites: NURS 421, NURS 421L, NURS 427, and NURS 427L.
Corequisites: NURS 429, NURS 429L, NURS 431, NURS 431L, NURS 449, and NURS 449L.
Terms Typically Offered: Fall.

NURS 472 Professional Development II: Health Informatics2 Credits
Exploration of information systems in health care and nursing practice. Exploration of current trends and issues in using, designing, and implementing health care information systems, healthcare information management, decision support, and knowledge management applications. Introduction of legal and ethical issues, management, and social networking tools in communicating health-related information.
Prerequisites: Admission to the BSN program.
Corequisites: NURS 457, NURS 458, NURS 459L, NURS 473, NURS 473L.
Terms Typically Offered: Fall, Spring.

NURS 473 Acute and Chronic Illness II4 Credits
Application of critical thinking skills and the nursing process in caring for individuals in the acute care setting. Emphasis on disease pathophysiology, patient teaching, and continuity of care upon discharge. Exploration of coping mechanisms, adaptation, and implementation of health care strategies in acute illness.
Prerequisites: Admission to the BSN program.
Corequisites: NURS 457, NURS 458, NURS 459L, NURS 472, NURS 473L.
Terms Typically Offered: Fall, Spring.

NURS 473L Acute and Chronic Illness II Clinical3 Credits
Application of theory to complete comprehensive assessments and plan care for patients in acute and critical care. Exploration of health problems in critical care, emergency, medical-surgical units, invasive procedure labs, renal dialysis, specialized healthcare teams, and other acute care clinical areas. Introduction of the high fidelity simulation lab.
Prerequisites: Admission to the BSN program.
Corequisites: NURS 457, NURS 458, NURS 459L, NURS 472, NURS 473.
Terms Typically Offered: Fall, Spring.

NURS 480 Basic Concepts in Palliative Care2 Credits
Provides basic theory about the practice of hospice and palliative care with focus on the consequences of progressive, predictable disease, providing attention to the whole person and family, and using scientific practice in developing treatment for pain and symptoms. Explores assessment, advanced communication skills, responses to loss, advance care planning, symptom management, and cultural and ethical issues.
Prerequisites: Prior RN degree and licensure, and current enrollment in the BSN program.

NURS 482 Professional Development III: The Professional Nurse2 Credits
Exploration of transitioning into professional nursing practice. Emphasis on scope of practice, delegation, professional development, and licensure. Exploration of health care systems as they relate to quality improvement, patient outcomes, finance, and policy development.
Prerequisites: Admission to the BSN program.
Corequisites: NURS 487/NURS 487L, NURS 490/NURS 490L, NURS 492, and NURS 493/NURS 493L.

NURS 487 Community and Population Nursing3 Credits
Exploration of theoretical basis for community and population health and the role of the nurse. Exploration of microsystems, applications of transitions of care, financing concepts in the community setting, and analysis of the health of populations. Emphasis on health promotion, disease prevention, using epidemiology, environmental health, health policy, aggregates, systems, populations, community assessment, and community interventions.
Prerequisites: Admission to the BSN program.
Corequisites: NURS 482, NURS 487L, NURS 490/NURS 490L, NURS 492, and NURS 493/NURS 493L.

NURS 487L Community and Population Nursing Clinical2 Credits
Application of theory in practice with diverse populations and aggregates in the community to achieve an optimum level of wellness. Emphasis on health disparities, cultural diversity, social justice, and health laws and policies related to population vulnerability throughout the lifespan. Exploration of the continuum of outpatient care in home health and collaboration with community services.
Prerequisites: Admission to the BSN program.
Corequisites: NURS 482, NURS 487, NURS 490, NURS 490L, NURS 492, NURS 493, and NURS 493L.
Fees: Yes.

NURS 490 Nursing Leadership and Management3 Credits
Exploration of leadership and management theories for application and entry into practice. Examination of nurse leaders and managers as change agents, personal leadership styles, trends and issues, and leadership strategies in local, state, and/or national practice settings for culturally diverse populations.
Prerequisites: Admission to the BSN program.
Corequisites: NURS 482, NURS 487/NURS 487L, NURS 490L, NURS 492, and NURS 493/NURS 493L.
NURS 401L Nursing Leadership and Management Clinical1 Credit
Exploration of leadership and management theories for application and entry into practice. Examination of nurse leaders and managers as change agents, personal leadership styles, trends and issues, and leadership strategies in local, state, and/or national practice settings for culturally diverse populations.
Prerequisites: Admission to the BSN program.
Corequisites: NURS 482, NURS 487, NURS 487L, NURS 490, NURS 492, NURS 493, and NURS 493L.
Fees: Yes.

NURS 492 Pharmacology for Nurses II2 Credits
Application of concepts of clinical pharmacology including preparation for the NCLEX exam. Emphasis on major drug classifications, nursing considerations, and patient education. Exploration of ethical, legal, and economic factors.
Prerequisites: Admission to the BSN program. Foundation courses required. See program sheet for details.
Corequisites: NURS 482, NURS 487/NURS 487L, NURS 490/NURS 490L, and NURS 493/NURS 493L.

NURS 493 Senior Capstone1 Credit
Experiential learning under the direction of nurse preceptors and nursing faculty in a variety of practice settings. Emphasis is placed on the development of personal and professional strategies necessary to transition from the role of student to graduate nurse.
Prerequisites: Admission to the BSN program.
Corequisites: NURS 482, NURS 487, NURS 487L, NURS 490, NURS 490L, NURS 492, NURS 493L.
Terms Typically Offered: Fall, Spring.

NURS 493L Senior Capstone Clinical3 Credits
Experiential learning under the direction of nurse preceptors and nursing faculty in a variety of practice settings. Emphasis is placed on the development of personal and professional strategies necessary to transition from the role of student to graduate nurse.
Prerequisites: Admission to the BSN program.
Corequisites: NURS 482, NURS 487, NURS 487L, NURS 490, NURS 490L, NURS 492, and NURS 493.
Fees: Yes.

NURS 495 Independent Study1-4 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

NURS 496 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

NURS 500 Theoretical Foundations3 Credits
Exploration of the critical components of nursing knowledge, including concepts, philosophies, theories, and conceptual models. Evaluates the variety of ways to organize nursing knowledge. Explores the application of nursing theory and nursing knowledge in the healthcare environment.
Prerequisites: Admission to the MSN or DNP program.

NURS 501 Evidence-Based Practice3 Credits
Introduction to advanced research concepts and their relationship to evidence-based practice. Explores application of research, ethics, designs, and methods. Incorporates integration of clinical practice standards and guidelines for the purpose of promoting healthcare quality and safety.
Prerequisites: Admission to the Master of Science in Nursing or the Doctor of Nursing Practice degree programs.

NURS 502 Technology for the Nurse Educator3 Credits
Exploration of educational technologies used to advance health education to build safe, quality learning communities. Legal and ethical issues related to challenges and opportunity for technology use, computer-literacy, information-literacy and informatics will be examined for teaching in a variety of health care organizations.
Prerequisites: Admission to the MSN program.

NURS 503 Organizational Leadership3 Credits
Utilizes leadership and management theory and application to develop skills or the understanding and implementation of change. Components of the course include leadership theory and models, change theory and models, project management and systems theory, financial management, organizational culture, and continuous process improvement.
Prerequisites: Admission to the MSN or DNP program.

NURS 504 Advanced Health Policy and Ethics2 Credits
Analysis of health policies to prepare for advanced nursing leadership roles. Health care policy, cultural, sociopolitical, and legal statutes will be explored on the local, national, and/or global level. Policy influences on ethical health care dilemmas will be evaluated.
Prerequisites: Admission to the MSN or DNP program.

NURS 505 Advanced Quality Improvement and Leadership3 Credits
Approaches to outcomes-based quality assessment and improvement. Focuses on leading techniques of measuring quality of care, customer satisfaction, and safety. Implementation of quality management programs, and creating a culture of supporting adherence to best practices and standards.
Prerequisites: Admission to the MSN or DNP program.

NURS 525 Advanced Pathophysiology3 Credits
Exploration of physiologic and pathophysiologic processes underlying health and disease across the lifespan. Includes cellular, genetic, and environmental factors that impact human health and illness.
Prerequisites: Admission to the MSN or DNP program.

NURS 526 Advanced Pharmacology for Nursing3 Credits
Pharmacology decision making and advanced management required for medication therapeutics. Assessment of advanced and in-depth evaluation of pharmacotherapeutics, pharmacokinetics, pharmacodynamics, contraindications and precautions, adverse effects, and drug interactions. Emphasis is on nurses' pharmacologic management of maximizing therapeutic effect, minimizing adverse effects, and patient and family education.
Prerequisites: NURS 525.

NURS 527 Advanced Health Assessment2 Credits
Demonstration of a focused and comprehensive health assessment of clients across the lifespan. Includes diverse populations, biological, psychological, sociological, spiritual, and cultural aspects.
Prerequisites: NURS 525.
Corequisites: NURS 577.

NURS 530 Chronic Illness Management3 Credits
Provides a framework for competency in chronic illness and disease which now accounts for a large percentage of the nation's health care costs. Introduction to the prevalence of chronic disease and its impact on the individual, family, community, and society is explored. Explores nursing's role in prevention and intervention of specific medical diseases, and psychosocial aspects of chronic illness and disability.
Prerequisites: Bachelor of Science in Nursing Degree.
NURS 535 Health Promotion and Disease Prevention 2 Credits
Theories and principles involved in planning, implementing, and evaluating interventions for health promotion and disease prevention across the lifespan. Focus is on behavior change at the individual and aggregate levels, while considering cultural variations of patient populations and ethical decision-making for nursing professionals. Factors underlying development of chronic illnesses are explored.
Prerequisites: Admission to the MSN or DNP program.

NURS 536 Leading Through Quality, Policy, and Ethics 3 Credits
Survey of leadership theories and skills, quality improvement principles, health policies, and ethical and legal issues to prepare for advanced nursing roles on the local, national, and/or global level using evidence-based practice for contemporary social change and complex health care delivery systems.
Prerequisites: Admission to the MSN or DNP program.
Terms Typically Offered: Summer.

NURS 540 Teaching Strategies for the Nurse Educator 3 Credits
Exploration of strategies to promote proficiency in teaching and learning. Teaching and learning theories, principles, and the application of teaching strategies that promote a positive learning environment will be explored for a variety of settings.
Prerequisites: Acceptance into the Master of Science of Nursing-Nurse Educator program.
Corequisites: NURS 545L.

NURS 545 Curriculum Design/Evaluation 3 Credits
Approaches to curricular design and evaluation within nursing education. Program and course development for online, hybrid, and face-to-face courses, assessment and evaluation concepts, and basic legal and ethical issues for nursing education will be explored.
Prerequisites: Acceptance into the Master of Science in Nursing program.
Corequisites: NURS 545L.

NURS 545L Curriculum Design/Evaluation Laboratory 1 Credit
Approaches to curricular design and evaluation within nursing education. Program and course development for online, hybrid, and face-to-face courses, assessment and evaluation concepts, and basic legal and ethical issues for nursing education will be explored.
Prerequisites: Acceptance into the Master of Science in Nursing program.
Corequisites: NURS 545.
Terms Typically Offered: Fall.

NURS 560 Nurse Educator Practicum 3 Credits
Application of nursing teaching theory in a variety of teaching settings. Integrates knowledge from previous courses and includes opportunities to participate in all aspects of the educator role.
Prerequisites: NURS 502, NURS 540, NURS 545, and NURS 545L.
Corequisites: NURS 565.

NURS 565 Role Development: Nurse Educator 3 Credits
Exploration of the role and responsibilities of a nurse educator in a variety of settings will be discovered. Concepts and issues specific to nurse educators will be examined, while concluding this course through a comprehensive literature review on a topic of choice related to a nurse educator role.
Prerequisites: NURS 545 and NURS 545L.
Corequisites: NURS 560.
Terms Typically Offered: Spring.

NURS 575 Capstone Project 3 Credits
Development of capstone project demonstrates synthesis of graduate work and establishes groundwork for future scholarship. Capstone project reflects the student's clinical practice setting with a selected population group. Culminates in a formal paper and presentation in an academic setting.
Prerequisites: NURS 500, NURS 501, NURS 502, NURS 503, NURS 504, NURS 505, NURS 525, NURS 526, and NURS 527.

NURS 577 Clinical Practicum: Advanced Health Assessment 1 Credit
Application of didactic content related to advanced health assessment of individuals across the lifespan.
Prerequisites: NURS 525.
Corequisites: NURS 527.
Terms Typically Offered: Spring.

NURS 580 Thesis 3 Credits
Development of thesis. Synthesis of graduate work. Establishes groundwork for future scholarship. Topic chosen for thesis should reflect the student's nursing practice setting with a selected population group. Thesis project involves original research. Culminates in dissemination of findings in a formal paper to be submitted for publication.
Prerequisites: NURS 500, NURS 501, NURS 502, NURS 503, NURS 504, NURS 505, NURS 525, NURS 526, and NURS 527.

NURS 586 Clinical Procedures 1 Credit
Exploration of common clinical procedures performed by primary care nurse practitioners.
Prerequisites: NURS 525, NURS 526, NURS 527 and NURS 577.
Terms Typically Offered: Summer.

NURS 588 Diagnostic Testing 1 Credit
Exploration of clinical diagnostic testing for the purpose of diagnosing and monitoring pathophysiologic processes underlying health and illness.
Prerequisites: NURS 525, NURS 526, NURS 527 and NURS 577.
Terms Typically Offered: Summer.

NURS 595 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

NURS 596 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

NURS 600 Advanced Practice Nursing Issues 2 Credits
Roles and responsibilities of the nurse practitioner in augmenting client health and health services. Examines the history of nurse practitioners, client relations, and legal and ethical considerations. Interdisciplinary teams, health policy formation and political strategies considered. Professional involvement and practice, leadership, collaboration and team work in various settings examined.
Prerequisites: Bachelor of Science in Nursing Degree, Master of Science in Nursing Degree, or completion of 500-level coursework.

NURS 601 Primary Care of the Infant, Child, and Adolescent 3 Credits
Focuses on primary care of the child and adolescent, beginning with the newborn. Growth, nutrition, well child care and guidance, assessment, diagnosis and management of acute and chronic conditions in the client population. Culture and ethnic considerations, child development, family, environment theories and concepts integrated throughout the didactice and clinical components.
Prerequisites: NURS 602 and NURS 620; or NURS 603 and NURS 630.
Corequisites: NURS 610.
NURS 602 Primary Care of the Adult3 Credits
Exploration of the role of the primary care nurse practitioner in adult health. Emphasis on clinical presentation, physical examination, diagnostic testing, differential diagnosis, and management of acute and chronic conditions affecting adult populations. Application of clinical practice guidelines, inter-disciplinary care, health promotion, and disease prevention in adult patients in the primary care setting.
Prerequisites: Admission to the MSN or DNP program.
Corequisites: NURS 620.

NURS 603 Primary Care of the Older Person3 Credits
Focus on the primary care nurse practitioner’s role in older adult health. Emphasis on clinical presentation, physical examination, diagnostic testing, differential diagnosis, and management of acute and chronic conditions affecting older adult populations. Explores the application of clinical practice guidelines, inter-disciplinary care, health promotion, and disease prevention in older adults in primary care settings.
Prerequisites: Admission to the MSN or DNP program.
Corequisites: NURS 630.

NURS 604 Primary Care of Rural and Underserved Populations: Capstone1 Credit
Synthesis of primary care in the unique role of an advanced practice nurse. Emphasis on rural populations and nursing’s ethical code for care of underserved populations.
Prerequisites: NURS 602 and NURS 620; or NURS 603 and NURS 630.
Corequisites: NURS 640.

NURS 605 Mental and Behavioral Health2 Credits
Exploration of mental and behavioral health disorders seen and managed in the primary care setting. Review of clinical presentations, diagnostic reasoning, and therapeutic management options for individuals with mental and behavioral health conditions seen in primary care settings.
Prerequisites: Admission to the MSN or DNP program.
Corequisites: NURS 615.
Terms Typically Offered: Fall.

NURS 610 Clinical Practicum: Infant, Child, and Adolescent2 Credits
Application of theoretical concepts of primary care in care of infants, children, and adolescents. Integration of health assessment, pathophysiology, pharmacology, health promotion and disease prevention, and chronic and acute illness management in clinical practice as an advanced practice nurse.
Prerequisites: NURS 602 and NURS 620; or NURS 603 and NURS 630.
Corequisites: NURS 601.

NURS 615 Clinical Practicum: Mental and Behavioral Health1 Credit
Application of clinical assessment, diagnostic reasoning, and therapeutic management of mental and behavioral health disorders seen and managed in the primary care setting.
Prerequisites: Admission to the MSN or DNP program.
Corequisites: NURS 605.
Terms Typically Offered: Fall.

NURS 620 Clinical Practicum: Adult3 Credits
Application of theoretical concepts of primary care of families with a concentration on adult patients and the environments where adult primary care is rendered. Students are supervised by community-based clinical preceptors and course faculty in the assessment, diagnostic and laboratory evaluation, and management of families across the continuum of health and illness.
Prerequisites: Admission to the MSN or DNP program.
Corequisites: NURS 602.

NURS 625 Statistics for Health Sciences3 Credits
Exploration of commonly used statistical methods and procedures used for health science research and practice. Students develop data sets and perform a variety of statistical tests using statistical software packages.
Prerequisites: NURS 500, NURS 501, NURS 502, NURS 503, NURS 504, NURS 505, NURS 525, NURS 526, and NURS 527.

NURS 626 Clinical Epidemiology3 Credits
Exploration of epidemiological concepts as applied to public health. Translating evidence and evaluating the impact of policies and programs in public health investigation. Includes dynamic behavior of disease, usage of rates, ratios and proportions, study designs for application of epidemiology in health services, screening, genetics, and environmental policy.
Prerequisites: NURS 525, NURS 526, NURS 527, NURS 602, and NURS 620.

NURS 627 Health Information Systems in Advanced Nursing Practice2 Credits
Exploration of information systems in health care and advanced nursing practice. Trends and issues in using, designing, implementing, and managing health care information systems as a disciplinary science for advanced nursing practice will be examined.
Prerequisites: Admission to the DNP Program.
Terms Typically Offered: Summer.

NURS 630 Clinical Practicum: Older Person2 Credits
Application of theoretical concepts of primary care for older adults. Integration of health assessment, pathophysiology, pharmacology, health promotion and disease prevention, and chronic and acute illness management in the care of older persons as an advanced practice registered nurse.
Prerequisites: Admission to the MSN or DNP program.
Corequisites: NURS 603.

NURS 640 Clinical Practicum Capstone: Primary Care of Rural and Underserved Populations3 Credits
Application of theoretical concepts of primary care across the lifespan with particular emphasis on rural and/or underserved populations. Explores unique aspects of the advanced practice nursing role as a primary care provider in rural and underserved populations in health care.
Prerequisites: NURS 602 and NURS 620; or NURS 603 and NURS 630.
Corequisites: NURS 604

NURS 650 Clinical Preceptorship I3 Credits
Integration of preceding clinical and didactic course knowledge and skills. Experience in the role of advanced nursing practice with an approved preceptor/mentor.
Prerequisites: Acceptance to the DNP program and NURS 660.

NURS 652 Clinical Preceptorship II3 Credits
Synthesis of preceding clinical and didactic course knowledge and skills. Experience in the role of advanced nursing practice with an approved preceptor/mentor.
Prerequisites: NURS 650.
Terms Typically Offered: Fall, Spring.

NURS 660 Doctor of Nursing Practice Scholarly Project: Identification2 Credits
Concepts of leadership and autonomy for the Doctor of Nursing Practice. Needs assessment for identification of a gap in clinical practice and project problem are formalized. Professional practice and collaboration are demonstrated.
Prerequisites: NURS 600, NURS 602, NURS 604, NURS 620, NURS 625, NURS 626, and NURS 640.
NURS 700 Translational Evidence-Based Practice2 Credits
Strategies to incorporate research findings into the clinical setting. Critical appraisal of the evidence in guiding patients or systems in improvement or implementation. Translation of evidence-based methods to establish the association between observed outcomes and intervention. Criteria for causal inferences, legal and ethical issues, associations between risk factors and disease outcomes will be explored. 
Prerequisites: Admission to the MSN or DNP program.

NURS 725 Doctor of Nursing Practice Scholarly Project: Development2 Credits
Synthesis of available knowledge and literature in development and refinement of the scholarly project purpose. Nature and significance of the problem are constructed in a logical sequence to support the purpose. 
Prerequisites: NURS 660. 
Terms Typically Offered: Fall.

NURS 750 Doctor of Nursing Practice Scholarly Project: Design and Defend3 Credits
Final development of scholarly project proposal that demonstrates synthesis of doctoral work. Emphasis on evidence-based practice models and methods, culminating with a proposal defense to improve practice or patient outcomes. 
Prerequisites: NURS 725.

NURS 760 Doctor of Nursing Practice Scholarly Project: Implementation and Evaluation3 Credits
Culmination of scholarly project, including translation of evidence to address a gap in practice or to inform clinical practice at an individual or aggregate level. Implementation and evaluation of improvements in practice and outcomes of care. Project follows a systematic process and lays the groundwork for future scholarship. 
Prerequisites: NURS 750.

NURS 795 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

Outdoor Recreation Industry Studies (OREC)

OREC 205 Foundations of Outdoor Recreation Industry Studies3 Credits
Exploration of the outdoor recreation industry, including the history, ethics, and principles of this sector. Covers legislation, policy, economics, and theory, and addresses the industry accords of economic development; education and workforce; health and wellness; diversity, equity, and inclusion; and conservation and stewardship. Examines different sectors of the outdoor recreation industry, including outlining job opportunities and industry potential. 
Terms Typically Offered: Fall, Spring.

OREC 305 Outdoor Industry Business3 Credits
Examination of leadership, ethics, and organizational culture in outdoor industry businesses, including law and finance, brand management and strategic marketing, innovation and entrepreneurship, product design and service development, liability and risk management and corporate social responsibility. Explores the quantitative and analytical techniques used in product and service-based businesses, including planning and management. 
Prerequisites: OREC 205. 
Terms Typically Offered: Fall, Spring.

OREC 311 Avalanche Rescue Techniques and Theory3 Credits
Theoretical background and essential skills for responding to emergencies and rescues in avalanche terrain, including stability analysis, terrain evaluation, travel techniques and decision-making tools. Advanced search and rescue techniques will be taught. 
Prerequisites: KINA 135A.
Terms Typically Offered: Spring.

OREC 312 Swiftwater Rescue Techniques and Theory3 Credits
Theoretical background and essential skills for responding to emergencies and rescues in a moving water environment. Explores swiftwater rescue professional avenues and the evidence basis for modern rescue techniques. Technical rescue skills and wilderness medical consideration are integrated in scenarios where students are challenged to work on individual skills while simultaneously demanding coordinated teamwork. 
Prerequisites: KINA 108A, KINA 109, or KINA 110. 
Terms Typically Offered: Fall.

OREC 313 Rock Climbing Instructor and Rope Rescue3 Credits
In-depth and standardized understanding of the skills essential to teaching climbing in an outdoor setting and intensive training in rope rescue fundamentals. Prepares students to set-up and manage groups of climbers on technical terrain with non-technical access. Includes the setup of top rope anchors, belay instruction and management, and site evaluation. Reviews current research and the evidence basis for techniques. 
Prerequisites: KINA 111A. 
Terms Typically Offered: Fall.

OREC 315 Professional Outdoor Guide3 Credits
Exploration of minimal impact recreation practices, expedition nutrition and backcountry cooking, technical rescue skills, wilderness safety, and comprehensive and practical training for leaders in remote areas. Topics include the essential principles and skills required to assess and manage a group of people in isolated and extreme environments. 
Prerequisites: KINA 111A, KINA 120, and KINA 143. 
Terms Typically Offered: Spring.

OREC 350 Community Health and the Outdoor Recreation Industry3 Credits
Principles that promote outdoor recreation as essential to community, corporate, and individual health. Addresses equitable access to community outdoor resources; examines data on nature’s health benefits; investigates cross-sector partnerships and funding to create a healthy workforce and community. 
Prerequisites: OREC 205. 
Terms Typically Offered: Fall, Spring.

OREC 405 Outdoor Recreation Leadership, Programming, Education, and Assessment3 Credits
Practical skills of teaching, facilitation, education, sequencing and assessment of outdoor and adventure activities. Explores leadership as an essential component in the transformation of a group into a high functioning team all focused on a shared goal and outcome. 
Prerequisites: OREC 205 and two of the following: OREC 311, OREC 312, OREC 313, or OREC 315. 
Terms Typically Offered: Fall, Spring.

OREC 499 Internship3-12 Credits
Course may be taken multiple times up to maximum of 15 credit hours.
Philosophy (PHIL)

PHIL 105 Critical Thinking-GTAH33 Credits
An introduction to the basic skill of critical reading, writing, and thinking needed for the intelligent, responsible, and ethical construction of one's worldview, conduct of one's life, and execution of one's civic duties. Topics include: argument identification, analysis, and construction; avoidance of common fallacies of reasoning; common deceptive and manipulative uses of language; writing clear and convincing argumentative essays.

Essential Learning Categories: Humanities
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

PHIL 110 Introduction to Philosophy-GTAH33 Credits
Includes an orientation to the discipline's concerns, branches, major schools of thought, and its relationship to other disciplines; a selection of readings from philosophers of all historical periods concerning major philosophical issues; practice in the process of philosophical reasoning, the critical analysis of philosophical writings, and the most basic rules of logic.

Essential Learning Categories: Humanities
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

PHIL 120 Ethics-GTAH33 Credits
Introduction to theoretical and applied Ethics. Major moral philosophers and moral theories surveyed. A general approach to moral reasoning developed. Development applied to discussion of recent writings on such issues as euthanasia, abortion, war, capital punishment, affirmative action, etc.

Essential Learning Categories: Humanities
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

PHIL 130 Philosophy of Religion-GTAH33 Credits
Exploration of fundamental issues regarding religion and examination of the principles of inquiry involved in dealing with such issues philosophically. Issues include the concept of God, arguments for the existence of God, the relationship between faith and reason, the validity of religious experience, pluralism in world religions, etc.

Essential Learning Categories: Humanities
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

PHIL 150 Philosophical Forum3 Credits
Engagement with, and confrontation of, issues that challenge the community of Grand Junction and the Western Slope. Forum for speakers with varying positions and perspectives on economic, environmental, legal, social and cultural controversies. The deeper philosophical implications will remain in the forefront of the discussion.

PHIL 275 Introduction To Logic3 Credits
Forms of reasoning, valid versus fallacious inferences, strong versus weak arguments. Designed to increase the ability to reason clearly and correctly and follow and critically evaluate the reasoning of others.

PHIL 296 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

PHIL 340 The Examined Life3 Credits
Introduction to practical philosophy. The application of philosophy to one's life in order to work toward the Socratic goal of living well. Topics covered include: Socratic thought, wisdom, Epicureanism, Stoicism, mindfulness, limiting beliefs, acceptance of reality, the self, creativity.

PHIL 350 The Roots of Western Thought3 Credits
Examination of the development of Western philosophical thought from its inception with the ancient Hellenes, through the Hellenistic and Medieval periods. Philosophical methods and problems will be discussed, including (but not limited to): ontology, metaphysics, political and social thought, death and the afterlife, the influence of philosophy on Christianity, the nature of the universe, human nature, the development of science and logic. Philosophers covered will include: The Presocratics, Socrates, Plato, Aristotle, Augustine, Aquinas, and others.

PHIL 395 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

PHIL 396 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

PHIL 410 Major Thinker3 Credits
In-depth study of one or two important philosophers. Attention paid to their historical, cultural, scientific, and philosophical contexts. Examination of relevant portions of the philosophers' works, arguments, objections, and responses. Additional emphasis on the place of the thinkers in the 'great conversation' that is philosophy via related primary and secondary texts.

Course may be taken 4 times for credit.

PHIL 420 Major Works3 Credits
In-depth study of the major and classic philosophical works of a philospher or philosophical school. Emphasis on the historical, cultural, scientific, and philosophic contexts of the works. Examination of texts as they are situated in the philosopher's or school's opus, along with important influential writings preceding and following works influenced by these texts.

Course may be taken 4 times for credit.

PHIL 430 Major Issues3 Credits
In-depth study of major and classic philosophical issues, with attention to their historical development, major contributors, and seminal texts. Exploration of the important works surrounding the issue and important objections and responses, with a view to developing individual positions.

Course may be taken 4 times for credit.

PHIL 495 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

PHIL 496 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

Physician Assistant (PHAS)

PHAS 501 Biomedical Science4 Credits
Exploration of the physiologic and pathophysiologic process influencing the human organism. Explores basic principles of cell biology, histology, embryology, immunology, genetics, and infectious process. Focuses on pathophysiology related to the molecular, organ, and system level mechanisms of disease progression and manifestation.

Corequisites: BIOL 500/BIOL 500L, PHAS 502, PHAS 510, PHAS 520/PHAS 520L, PHAS 530, and PHAS 541.

Terms Typically Offered: Spring.
PHAS 502 Clinical Pharmacology 3 Credits
Introduction to foundational concepts of pharmacotherapeutics, pharmacodynamics, pharmacokinetics, drug interactions, drug classifications, adverse effects, drug contraindications, and precautions. Prescriptive writing, prescriptive authority, and prescriptive medical-legal regulations will be explored.
Corequisites: BIOL 500/BIOL 500L, PHAS 501, PHAS 510, PHAS 520/PHAS 520L, PHAS 530, and PHAS 541.
Terms Typically Offered: Spring.

PHAS 503 Health Promotion and Disease Prevention 2 Credits
Theories and concepts involved in the planning and implementation of appropriate individual and community interventions to promote health and prevent disease in patients across the lifespan. Focuses on concepts of nutrition, exercise, and behavioral interventions important in health promotion.
Prerequisites: PHAS 511, PHAS 521, and PHAS 531.
Corequisites: PHAS 512, PHAS 522, and PHAS 532.
Terms Typically Offered: Fall.

PHAS 510 Foundation to Clinical Medicine 2 Credits
Introduction to concepts of holistic, relationship-centered medical principles needed for the clinical medicine series. Introduces principles of epidemiology and public health, government health care regulations, including HIPPA, OSHA, and meaningful use of electronic medical records. Focuses on common screening and diagnostic laboratory studies, as well as foundational skills in radiological imaging.
Corequisites: BIOL 500/BIOL 500L, PHAS 501, PHAS 502, PHAS 520/PHAS 520L, PHAS 530, and PHAS 541.
Terms Typically Offered: Spring.

PHAS 511 Clinical Medicine I 3 Credits
Application of a systematic organ-system approach to common medical issues encountered in primary care. Focuses on the etiology, epidemiology, clinical presentation, patient assessment, laboratory and diagnostic studies, pathology, diagnosis and therapeutic interventions, and disease management specific to the following modules: Infectious Disease, Behavioral Medicine, Hematology and Oncology, Endocrinology, Otolaryngology, and Gastroenterology.
Prerequisites: BIOL 500/BIOL 500L, PHAS 501, PHAS 502, PHAS 510, PHAS 520/PHAS 520L, and PHAS 530.
Corequisites: PHAS 521 and PHAS 531.
Terms Typically Offered: Summer.

PHAS 512 Clinical Medicine II 3 Credits
Continuation of the clinical medicine course series, with an organ-system approach to common medical issues encountered in primary care. Focus is on the etiology, epidemiology, clinical presentation, patient assessment, laboratory and diagnostic studies, pathology, diagnosis, and therapeutic interventions, and disease management specific to the following modules: Dermatology, Cardiovascular, Pulmonary, Genitourinary, Renal, Neurology, Geriatrics, and Rehabilitative care.
Prerequisites: PHAS 511, PHAS 521, and PHAS 531.
Corequisites: PHAS 503, PHAS 522, and PHAS 532.
Terms Typically Offered: Fall.

PHAS 513 Clinical Medicine III 13 Credits
Continuation of the clinical medicine series, systematic organ-system approach to common medical issues encountered in primary care. Focus is on the etiology, epidemiology, clinical presentation, patient assessment, laboratory and diagnostic studies, pathology, diagnosis and therapeutic interventions, and disease management specific to the following modules: Women's Health, Orthopedics, Rheumatology, Pediatric populations, Surgery and Emergency Medicine.
Prerequisites: PHAS 503, PHAS 512, PHAS 522, and PHAS 532.
Corequisites: PHAS 523, PHAS 533, and PHAS 570.
Terms Typically Offered: Spring.

PHAS 520 History and Physical Exam 2 Credits
Introduction to principles and skills of inspection, auscultation, percussion, palpation, and diagnostic equipment needed to complete an accurate and thorough exam. Foundational concepts of necessary skills to elicit both a comprehensive and problem specific medical history. Content focused on documenting normal adult exam findings builds the foundation for recognition of abnormal findings in the clinical medicine course series and clinical skills labs.
Corequisites: BIOL 500/BIOL 500L, PHAS 501, PHAS 502, PHAS 510, PHAS 520L, PHAS 530, and PHAS 541.
Terms Typically Offered: Spring.

PHAS 520L History and Physical Exam Lab 1 Credit
Introduction to principles and skills of inspection, auscultation, percussion, palpation, and diagnostic equipment needed to complete an accurate and thorough exam. Foundational concepts of necessary skills to elicit both a comprehensive and problem specific medical history. Content focused on documenting normal adult exam findings builds the foundation for recognition of abnormal findings in the clinical medicine course series and clinical skills labs.
Corequisites: BIOL 500/BIOL 500L, PHAS 501, PHAS 502, PHAS 510, PHAS 520, PHAS 530, and PHAS 541.
Terms Typically Offered: Spring.

PHAS 521 Patient Assessment, Diagnostics and Clinical Skills Lab I 2 Credits
Application of skills necessary for eliciting a problem-focused patient history, diagnostic skills, and clinical procedures necessary for clinical practice. Focuses on the exam and procedural skills related to topics specific to Infectious Disease, Behavioral Medicine, Hematology and Oncology, Endocrinology, Otolaryngology, and Gastroenterology.
Prerequisites: BIOL 500/BIOL 500L, PHAS 501, PHAS 502, PHAS 510, PHAS 520/PHAS 520L, and PHAS 530.
Corequisites: PHAS 511 and PHAS 531.
Terms Typically Offered: Summer.

PHAS 522 Patient Assessment, Diagnostics and Clinical Skills Lab II 2 Credits
Continuation of skills necessary for eliciting a problem focused patient history, diagnostic skills, and clinical procedures necessary for clinical practice. Focuses on the exam and procedural skills related to topics specific to Dermatology, Cardiovascular, Pulmonary, Genitourinary, Neurology, and Geriatrics.
Prerequisites: PHAS 511, PHAS 521, and PHAS 531.
Corequisites: PHAS 503, PHAS 512, and PHAS 532.
Terms Typically Offered: Fall.
PHAS 523 Patient Assessment, Diagnostics and Clinical Skills Lab III
2 Credits
Continuation of patient assessment and diagnostic skills, focusing on the exam and procedural skills related to topics specific to Pediatric Populations, Women's Health, Orthopedics, Rheumatology, Surgery, and Emergency Medicine.
**Prerequisites:** PHAS 503, PHAS 512, PHAS 522, and PHAS 532.
**Corequisites:** PHAS 513, PHAS 533, and PHAS 570.
**Terms Typically Offered:** Spring.

PHAS 530 Introduction to Research and Evidence-Based Medicine II
2 Credits
Introduction to critically evaluating the medical literature and applying these principles to patient-centered care. Emphasis on research design, biostatistics, searching and evaluating medical literature, and application of evidence into the medical practice setting to improve patient-centered care.
**Corequisites:** BIOL 500/BIOL 500L, PHAS 501, PHAS 502, PHAS 510, PHAS 520/PHAS 520L, and PHAS 541.
**Terms Typically Offered:** Spring.

PHAS 531 Clinical Reasoning II
2 Credits
Development of clinical problem-solving and decision-making skills introduced in PHAS 530. Application of critical reasoning skills in case-based, small group collaboration to cover clinical medicine topics related to acute care. Emphasis on developing a differential diagnosis, patient assessment, treatment plans, and effective communication. Focus on skills of case presentations, utilizing point-of-care evidence, medical documentation, and informed consent.
**Prerequisites:** BIOL 500/BIOL 500L, PHAS 501, PHAS 502, PHAS 510, PHAS 520/PHAS 520L, and PHAS 530.
**Corequisites:** PHAS 511 and PHAS 521.
**Terms Typically Offered:** Summer.

PHAS 532 Clinical Reasoning II
2 Credits
Continuation of clinical problem-solving and decision-making skills introduced in PHAS 531. Application of critical reasoning skills in case-based, small group collaboration to cover clinical medicine topics related to chronic longitudinal care. Emphasis on enhancing interpersonal skills and application of evidence-based resources. Focus on the Physician Assistant professional role in team-based care.
**Prerequisites:** PHAS 511, PHAS 521, and PHAS 531.
**Corequisites:** PHAS 503, PHAS 512, and PHAS 522.
**Terms Typically Offered:** Fall.

PHAS 533 Clinical Reasoning III
2 Credits
Continuation of problem-solving and decision-making skill development as part of the clinical reasoning series. Application of critical reasoning skills in case-based, small group collaboration to cover clinical medicine topics related to emergent and urgent care. Emphasis on the management of the medically complex patient, focusing on referrals, supporting clinical rationale, interprofessional teams, and scope of practice.
**Prerequisites:** PHAS 503, PHAS 512, PHAS 522, and PHAS 532.
**Corequisites:** PHAS 513, PHAS 523, and PHAS 570.
**Terms Typically Offered:** Spring.

PHAS 541 PA Professionalism II
2 Credits
Focus on the integrative principles of professionalism, team-based patient-centered care, medical ethics, Physician Assistant practice issues, history of the profession, community service and the business of health care delivery. Explore racial, ethnic, and socioeconomic health disparities and their impact on health outcomes and health systems.
**Prerequisites:** Admission to the MPAS program.
**Terms Typically Offered:** Spring.

PHAS 542 PA Professionalism II
2 Credits
Continuation of the integrative principles of professionalism, practice issues and the business of health care delivery. Explore billing and coding, medical liability, quality improvement, error prevention and patient safety. Focus on professional organizations and the process of licensure, certification, credentialing, and contracts. Varying healthcare delivery systems and health policy will be explored.
**Prerequisites:** PHAS 513, PHAS 523, PHAS 533, and PHAS 570.
**Terms Typically Offered:** Summer.

PHAS 543 PA Professional Capstone
1 Credit
Synthesis of knowledge and skills in a scholarly project with direct application to quality improvement, health promotion, or community-based care. A written scholarly research paper is completed and a presentation is given relating findings to community health or clinical practice.
**Prerequisites:** PHAS 542.
**Terms Typically Offered:** Fall.

PHAS 570 Clinical Year Seminar
1 Credit
Focus on readiness for supervised clinical practice experiences. Clinical knowledge and skills, critical thinking, and professionalism are evaluated. Explore program policies, student self-care, coping with illness, injury and stress, electronic medical records, integrity, work ethic and professional expectations.
**Prerequisites:** PHAS 503, PHAS 512, PHAS 522, and PHAS 532.
**Corequisites:** PHAS 513, PHAS 523, and PHAS 533.
**Terms Typically Offered:** Spring.

PHAS 571 Family Medicine Rotation
4 Credits
Emphasis on the pathophysiology, diagnosis, and management of systemic disease and conditions unique to the clinical practice of primary care. Clinical preceptors supervise student participation in patient care, skill development, and growing medical knowledge, emphasizing care of patients of all ages.
**Prerequisites:** PHAS 513, PHAS 523, PHAS 533, and PHAS 570.
**Terms Typically Offered:** Fall, Spring, Summer.

PHAS 572 Behavioral Medicine and Mental Health Rotation
2 Credits
Emphasis on the pathophysiology, diagnosis, and management of systemic disease and conditions of mental health disorders. Clinical preceptors supervise student participation in patient care, skill development, and growing medical knowledge in the discipline specific principles inherent in patient care in a mental health setting.
**Prerequisites:** PHAS 513, PHAS 523, PHAS 533, and PHAS 570.
**Terms Typically Offered:** Fall, Spring, Summer.

PHAS 573 Internal Medicine Rotation
4 Credits
Emphasis on the pathophysiology, diagnosis, and management of systemic disease and conditions unique to the longitudinal care of patients with chronic health problems. Clinical preceptors supervise student participation in patient care, skill development, and growing medical knowledge, with exposure to geriatric populations and healthy aging.
**Prerequisites:** PHAS 513, PHAS 523, PHAS 533, and PHAS 570.
**Terms Typically Offered:** Fall, Spring, Summer.

PHAS 574 Women's Health Rotation
2 Credits
Emphasis on the pathophysiology, diagnosis, and management of systemic disease in a women's health setting. Clinical preceptors supervise student participation in patient care, skill development, and growing medical knowledge in obstetrical, gynecologic, and women's preventive care.
**Prerequisites:** PHAS 513, PHAS 523, PHAS 533, and PHAS 570.
**Terms Typically Offered:** Fall, Spring, Summer.
PHAS 575 Pediatric Medicine Rotation 2 Credits
Emphasis on the pathophysiology, diagnosis, and management of systemic disease and conditions unique to pediatric clinical practice. Clinical preceptors supervise student participation in patient care, skill development, and growing medical knowledge specific to care for the pediatric patient.
Prerequisites: PHAS 513, PHAS 523, PHAS 533, and PHAS 570.
Terms Typically Offered: Fall, Spring, Summer.

PHAS 576 Surgery Rotation 4 Credits
Emphasis on evaluation and care of patients with commonly encountered conditions requiring surgical management. Clinical preceptors supervise student participation in patient care, skill development, and growing medical knowledge specific to the provision of care in the surgical setting.
Prerequisites: PHAS 513, PHAS 523, PHAS 533, and PHAS 570.
Terms Typically Offered: Fall, Spring, Summer.

PHAS 577 Emergency Medicine Rotation 4 Credits
Emphasis on the pathophysiology, diagnosis, and management of disease and conditions in the emergency department setting. Clinical preceptors supervise student participation in patient care, skill development, and growing medical knowledge of emergent medical conditions in the emergency department.
Prerequisites: PHAS 513, PHAS 523, PHAS 533, and PHAS 570.
Terms Typically Offered: Fall, Spring, Summer.

PHAS 578 Inpatient Medicine Rotation 4 Credits
Emphasis on the pathophysiology, diagnosis, and management of systemic disease and conditions unique to providing care in an inpatient setting. Clinical preceptors supervise student participation in patient care, skill development, and growing medical knowledge specific to medical or surgical inpatient care.
Prerequisites: PHAS 513, PHAS 523, PHAS 533, and PHAS 570.
Terms Typically Offered: Fall, Spring, Summer.

PHAS 579 Elective Rotation I 4 Credits
Emphasis on the pathophysiology, diagnosis, and management of systemic disease and conditions unique to the clinical practice of student’s selected area of interest. Clinical preceptors supervise student participation in patient care, skill development, and growing medical knowledge in student’s selected clinical rotation.
Prerequisites: PHAS 513, PHAS 523, PHAS 533, and PHAS 570.
Terms Typically Offered: Fall, Spring, Summer.

PHAS 580 Elective Rotation II 4 Credits
Emphasis on the pathophysiology, diagnosis, and management of systemic disease and conditions unique to the clinical practice of student’s selected area of interest. Clinical preceptors supervise student participation in patient care, skill development, and growing medical knowledge in student’s selected clinical rotation.
Prerequisites: PHAS 513, PHAS 523, PHAS 533, and PHAS 570.
Terms Typically Offered: Fall, Spring, Summer.

PHAS 581 Summative Seminar I 1 Credit
Summative evaluation for student demonstration of the knowledge, clinical skills, and professional competencies necessary to practice as an entry-level physician assistant. Preparation for the Physician Assistant National Certifying Exam (PANCE) is discussed.
Prerequisites: PHAS 513, PHAS 523, PHAS 533, and PHAS 570.
Terms Typically Offered: Spring.

PHAS 595 Independent Study 1-3 Credits
Independent study if student needs additional instruction in a core content area.
Terms Typically Offered: Fall, Spring, Summer.

Physics (PHYS)

PHYS 100 Concepts of Physics-GTSC23 Credits
Introduction to physics. Emphasis on basic conceptual aspects described in everyday language. Elementary mathematics introduced when necessary. Survey of topics such as Newtonian mechanics, heat and energy, electricity and magnetism, light, relativity and quantum theory. The course is designed for majors outside of the sciences.
Essential Learning Categories: Natural Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

PHYS 101 Elementary Astronomy-GTSC23 Credits
Introduction to astronomy. Survey of topics such as observational astronomy, the solar system, stellar astronomy, galaxies and cosmology. Emphasis on basic conceptual aspects of astronomy. Minimal use of elementary mathematics such as basic arithmetic, fractions, square roots and powers. The course is designed for students in all majors.
Essential Learning Categories: Natural Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

PHYS 105 Physics by Inquiry-GTSC1 3 Credits
Laboratory-based introduction to physics and the physical sciences. Starting from their own observations, students develop basic physical concepts, use and interpret different forms of scientific representations, and construct explanatory models with predictive capabilities. Topics include properties of matter, heat and temperature, magnets, electric circuits, motion, and astronomy. Recommended for prospective K-12 teachers.
Corequisites: PHYS 105L.
Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

PHYS 105L Physics by Inquiry Laboratory-GTSC11 Credit
Lab component required for PHYS 105.
Corequisites: PHYS 105.
Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

PHYS 111 General Physics-GTSC14 Credits
Algebra-based introduction to classical mechanics and thermodynamics. Includes mechanics, energy and momentum conservation, thermodynamics and statistical mechanics. Extensive use of high school level algebra and trigonometry, mastery of these subjects required. Four lectures and one two-hour laboratory per week.
Corequisites: PHYS 111L.
Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum
PHYS 111 General Physics Laboratory-GTSC11 Credit
Lab component required for PHYS 111.
Corequisites: PHYS 111.
Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

PHYS 112 General Physics-GTSC14 Credits
Algebra-based introduction to classical electromagnetism, optics and modern physics. Detailed coverage of electrostatics, electric circuits, magnetism, electromagnetic waves, geometrical optics and wave optics. Topics from modern and atomic physics. Extensive use of algebra and trigonometry.
Prerequisites: PHYS 111/PHYS 111L, or PHYS 131/PHYS 131L, with a grade of C or higher.
Corequisites: PHYS 112L.
Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

PHYS 112L General Physics Laboratory-GTSC11 Credit
Lab component required for PHYS 112.
Prerequisites: PHYS 111/PHYS 111L, or PHYS 131/PHYS 131L, with a grade of C or higher.
Corequisites: PHYS 112.
Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

PHYS 131 Fundamental Mechanics-GTSC14 Credits
Calculus-based introduction to classical mechanics. Detailed coverage of the kinematics and dynamics of linear and rotational motion using Newton's Laws, momentum and energy conservation. The mathematics of calculus and vectors is used throughout. For majors in the sciences and engineering.
Prerequisites: MATH 151 or MATH 135 (either may be taken concurrently).
Corequisites: PHYS 131L.
Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

PHYS 131L Fundamental Mechanics Laboratory-GTSC11 Credit
Lab component required for PHYS 131.
Prerequisites: MATH 151 or MATH 135 (either may be taken concurrently).
Corequisites: PHYS 131.
Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

PHYS 132 Electromagnetism and Optics-GTSC14 Credits
Calculus-based introduction to classical electromagnetism and optics. Detailed coverage of electrostatics, electric circuits, magnetism, electromagnetic waves, geometrical optics and wave optics. The mathematics of calculus and vectors is used throughout. For majors in the sciences and engineering. Requires a mastery of the foundations of classical mechanics as covered in PHYS 131.
Prerequisites: PHYS 131/PHYS 131L, and MATH 152 or MATH 136 (either may be taken concurrently). A grade of C or higher in PHYS 131/PHYS 131L is required.
Corequisites: PHYS 132L.
Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

PHYS 132 Electromagnetism and Optics Laboratory-GTSC11 Credit
Lab component required for PHYS 132.
Prerequisites: PHYS 131/PHYS 131L, and MATH 152 or MATH 136 (either may be taken concurrently). A grade of C or higher in PHYS 131/PHYS 131L is required.
Corequisites: PHYS 132.
Essential Learning Categories: Natural Science with lab - Both the lab and lecture must be completed
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

PHYS 196 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

PHYS 230 Intermediate Dynamics3 Credits
Intermediate treatment of the dynamics of physical systems not covered in Fundamental Mechanics sequence. Includes fluid dynamics, classical waves and vibrations, thermodynamics, and relativistic kinematics and dynamics.
Prerequisites: PHYS 132, PHYS 132L, and MATH 253 (may be taken concurrently).

PHYS 231 Modern Physics3 Credits
Quantum theory in the examination of blackbody radiation, the photoelectric effect, and energy quantization of atoms. The Schrodinger wave equation used to analyze simple quantum systems. Applications drawn from atomic and molecular physics, solid-state physics, nuclear and high-energy physics, and astrophysics.
Prerequisites: PHYS 132, PHYS 132L, and MATH 253 (may be taken concurrently).

PHYS 251 Electronics for Scientists3 Credits
This laboratory-based course is an introduction to electric circuits and electronic instrumentation for scientists. The course will emphasize a practical approach, with students learning about electronic devices and how they work by building working circuits. Topics explored include passive circuits with resistors and capacitors, including applications in electric filtering; diodes; transistors; op-amps; timing circuits; feedback and amplification; and digital circuits.
Prerequisites: PHYS 132 or PHYS 112.

PHYS 252 Intermediate Laboratory3 Credits
Students will perform experiments in optics, acoustics, and modern physics. Experiments will include measuring the speed of light, measuring the wavelength of atomic discharge lines, X-ray diffraction, and measuring h/e among others. Emphasis will be on experimental design, use of modern instrumentation, preparation of lab reports, and data analysis.
Prerequisites: PHYS 231 (may be taken concurrently).
**PHYS 296 Topics** 1-3 Credits  
Course may be taken multiple times up to maximum of 15 credit hours.

**PHYS 300 New Directions in Science** 3 Credits  
A survey of recent developments in science. This course is open to qualified students in liberal arts as well as the sciences. Faculty from various disciplines will participate. Topics will be drawn from astronomy, biology, chemistry, geology, physics, engineering, and applied mathematics.  
**Prerequisites:** Permission of instructor.

**PHYS 301 Introduction to Space Science** 3 Credits  
The history and technology of space and space exploration. Designed for all non-science majors, particularly prospective K-12 teachers. Topics include: the solar system, space environments, space travel, satellite communication and design.  
**Prerequisites:** Junior or senior status, or permission of instructor.

**PHYS 311 Electromagnetic Theory I** 3 Credits  
A mature study of electromagnetic fields. Electrostatics and magnetostatics presented. Special techniques, including multipole expansion of fields, analyzed. Electrodynamics introduced leading to Maxwell's equations.  
**Prerequisites:** MATH 253; and MATH 260 or MATH 236; and PHYS 230 or PHYS 231.

**PHYS 312 Electromagnetic Theory II** 3 Credits  
A continuation of PHYS 311. Electromagnetic waves were studied. Wave propagation in conducting and nonconducting media is examined, along with dispersion phenomena. Waveguides are examined. Electromagnetic field radiation is studied, both for point charges and for arbitrary charge distributions. The course concludes with a reformulation of electromagnetism in the language of special relativity.  
**Prerequisites:** PHYS 311.

**PHYS 321 Quantum Theory I** 3 Credits  
Quantum physics foundation. Includes quantum states, measurements, and time evolution using Dirac formalism for discrete and continuous systems. Connection between Dirac formalism and wave mechanics established and Schrödinger equation solved in various context. Includes particles in piecewise square potentials, tunneling, the harmonic oscillator, angular momentum, and the hydrogen atom. Introduces linear algebra for describing quantum physics and uses techniques for solving differential equations.  
**Prerequisites:** PHYS 231, and MATH 260 or MATH 236.

**PHYS 331 Advanced Laboratory I** 3 Credits  
A course in experiment design and technique. Laboratory investigations provide experience in instrumental methods, planning of laboratory experiments, data analysis, preparation of reports according to professional standards, and training in the use of computers for data acquisition and processing. The experiments to be performed are selected from electromagnetism, atomic, nuclear, and solid-state physics.  
**Prerequisites:** PHYS 252.

**PHYS 342 Advanced Dynamics** 3 Credits  
In-depth survey of classical mechanics, includes advanced treatment of Newtonian dynamics, conservation laws, gravitation, and the Lagrangian and Hamiltonian formulations of dynamics. Topics may include central force motion, systems of particles, non-inertial reference frames, rigid bodies, oscillating systems, couple oscillations, and waves on a string.  
**Prerequisites:** PHYS 230, and MATH 260 or MATH 236.

**PHYS 352 History and Philosophy of Physics** 3 Credits  
Material varies from year-to-year. The course addresses problems in the interpretation and development of physics. Case studies of crucial experiments are analyzed. The interaction of physics with other philosophical and cultural pursuits is discussed.  
**Prerequisites:** One year of physics or permission of instructor.

**PHYS 362 Statistical and Thermal Physics** 3 Credits  
Study of the physics of bulk matter. Fundamental principles of quantum mechanics, statistical methods employed to explain macroscopic laws of thermodynamics to make detailed predictions about the large-scale behavior of solids, liquids, and gases. Applications: specific heat of solids, thermal radiation, magnetic susceptibilities, stellar equilibrium, and chemical reactions.  
**Prerequisites:** PHYS 230 or CHEM 321; and MATH 236 or MATH 260.

**PHYS 372 General Relativity** 3 Credits  
Introduction to Einstein's theory of general relativity. Newtonian gravitation and Einstein's theory of special relativity reviewed. Topics may include spherically symmetric stars, static and rotating black holes, FRW cosmologies, gravitational waves, and wormholes.  
**Prerequisites:** PHYS 230 and MATH 236 or MATH 260.  
**Terms Typically Offered:** Fall, Spring.

**PHYS 395 Independent Study** 1-3 Credits  
Course may be taken multiple times up to maximum of 6 credit hours.

**PHYS 396 Topics** 1-3 Credits  
Course may be taken multiple times up to maximum of 15 credit hours.

**PHYS 422 Quantum Theory II** 3 Credits  
Continuation of PHYS 321. Central forces, complete derivation of hydrogen atom energy levels and eigenstates. Perturbation theory and other approximately techniques. Other selected topics include: multiple quantum systems, scattering, quantum foundations.  
**Prerequisites:** PHYS 321.

**PHYS 432 Nuclear and High-Energy Physics** 3 Credits  
An introduction to the structure and interactions of nuclear and subnuclear particles. Topics include a survey of the intrinsic properties of nuclei, descriptions of various nuclear models, studies of radioactivity and nuclear reactions, and an overview of the technologies of high-energy accelerators and detectors. The course concludes with an introduction to the properties and structures of elementary particles and discussions of current developments in unified theories of force.  
**Prerequisites:** PHYS 322.

**PHYS 441 Solid State Physics** 3 Credits  
The structure and properties of solids. This course is a study of the crystalline state of matter, including crystal classifications, vibrational specific heats, electronic structures and conductivities, cohesive energies, magnetic susceptibility, and optical properties.  
**Prerequisites:** PHYS 321.

**PHYS 471 Computational Physics** 3 Credits  
Foundation covering application of computational techniques to solving physical problems. Numerical integration, differentiation, and matrix methods covered. Techniques of solving various regular and partial differential equations studied. Application of discretizing numerical solutions for physical problem stressed. Turning analytic problems into solvable computational schemes. Data analysis and visualization covered. Familiarity with any programming language is required. For any Science, Engineering or Mathematics major.  
**Prerequisites:** MATH 260 or MATH 236.
PHYS 472 Computational Physics III 3 Credits
A continuation of PHYS 471. Advanced topics in solving partial differential equations and simulating physical systems using modern parallel computing covered. MPI, Open MP, and their applications to physical phenomenon on Linux workstations covered. Introduction to translating analytical problems to parallel computational problems. **Prerequisites:** PHYS 471.

PHYS 473 Modern Optics 3 Credits
Modern principles and applications of optics. Optical models including ray and wave optics presented. Laws of reflection and refraction studied within the context of both ray and wave optics. Reflectivity and transmissivity analyzed. Superposition and wave interference discussed. Diffraction theory used in a number of applications. Concludes with an introduction to lasers and quantum optics. **Prerequisites:** PHYS 311.

PHYS 482 Senior Research 1 Credit
An individual research project, supervised by a faculty advisor. The project may be selected from experimental or theoretical topics. The research concludes with a formal report written in accordance with The American Institute of Physics Style Manual. This course is normally taken twice in the senior year. Course may be taken 2 times for credit.

PHYS 487 Structured Research 3 Credits
Physics research under the direct guidance of a faculty member. Designed for advanced junior and senior level students. **Prerequisites:** Permission of instructor.

PHYS 494 Physics Seminar 1 Credit
A forum for topical physics. In this seminar, faculty and students of physics participate in both informal discussions and formal oral presentations of selected topics of scientific interest, including significant current advances and crucial historical developments. **Prerequisites:** Upper division standing and permission of instructor. Course may be taken 4 times for credit.

PHYS 495 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

PHYS 496 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

PHYS 596 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

**Political Science (POLS)**

POLS 101 American Government-GTSS13 Credits
Structures and functions of the American political system and the constitutional development of federalism and separation of powers. Also, citizen participation and influence in politics, the congress, presidency and the supreme court, and public policy including civil rights and liberties. **Essential Learning Categories:** Social and Behavioral Sciences Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

POLS 151 Introduction to Political Ideas 3 Credits
Introduction to the major theories of human political organization and ideas that frame those approaches. Emphasis on theories of democracy, authoritarianism, liberalism, conservatism and contemporary ideologies of liberation (feminism, environmentalism and race). **Essential Learning Categories:** Social and Behavioral Sciences

POLS 196 Topics: 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

POLS 201 Introduction to Political Inquiry 3 Credits
Introduction to major tools of investigation in the study of politics. Examination of modern scientific research design and methods. Additional emphasis on discipline-specific skills in critical thinking, information literacy, writing and citation mechanics, and oral communication.

POLS 236 State and Local Government 3 Credits
Theories of state formation and constitutional development, city charters, county government, and intergovernmental relations with emphasis on Colorado.

POLS 261 Comparative Politics-GTSS13 Credits
Introduction to conceptual models and approaches utilized in the comparative study of nations and their politics. Application of these theories to selected democratic, communist, and developing political systems. **Essential Learning Categories:** Social and Behavioral Sciences Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

POLS 270 World Politics 3 Credits
Introduction to structures, processes, and behaviors shaping world politics. Emphasis on states and their interactions as well as non-state actors and cultural, economic, and environmental forces shaping an emerging world community. **Essential Learning Categories:** Social and Behavioral Sciences

POLS 324 The Legislative Process 3 Credits
A study of the legislative process emphasizing the U.S. Congress. Attention will be given to the development of legislative systems, the operation of legislatures, the election of legislators, and a comparison with legislatures in other national states. **Prerequisites:** POLS 101 or permission of instructor.

POLS 325 The American Presidency 3 Credits
A study of the American chief executive, emphasizing the historical development of the office, the various functions of the modern chief executive and a brief comparison with the executive officer of other national states.

POLS 328 The American Court System 3 Credits
The American court system; local, state, and national, including consideration of the impact of prosecutors, defense personnel, judges, and other factors on court decisions and the criminal justice system. **Prerequisites:** POLS 101 or CRMJ 201. **Equivalent Course(s):** CRMJ 328

POLS 342 Public Administration 3 Credits
Historical development of public administration including organizational structure and theory, management, personnel administration, fiscal administration, and administrative responsibility.

POLS 351 Public and Elite Political Behavior 3 Credits
Behavior of elected officials and the public in American politics. Achievement of power and how actions are evaluated via public opinion and voting. Role of media in American politics explored. **Prerequisites:** POLS 101.

POLS 352 Religion and Politics 3 Credits
The interactions of religion and politics in the United States, several liberal democracies and within international relations.

POLS 358 International Relations 3 Credits
The study of the international system with emphasis on the interactions of states, nonstate actors, and institutions, and the impact of these interactions on the world political process. **Prerequisites:** POLS 270.

POLS 365 Money and Politics 3 Credits
An introduction to the role of money and its impact on campaign finance, legislation, media, and American politics. **Prerequisites:** POLS 101 and one other 300-400 level POLS course.

POLS 366 Information Technology and Politics 3 Credits
A study of how information technology affects American politics. Topics include: the role of social media, and the impact of computer and Internet technology on politics in the United States, and other national states. **Prerequisites:** POLS 101.

POLS 376 Law and Politics 3 Credits
The study of law as it affects politics, public administration, and government. **Prerequisites:** POLS 101.

POLS 393 Special Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

POLS 401 Advanced Seminar 1 Credit
A forum for topical political science. This course is normally taken twice in the senior year. Course may be taken 4 times for credit.

POLS 407 Advanced Research 1-3 Credits
A continuation of POLS 401, for advanced students. **Prerequisites:** POLS 401.

POLS 408 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.
POLS 353 Politics of Human and Natural Resources3 Credits
Study of politics and public policy surrounding natural resource allocation, preservation, development and consumption by human social systems. Emphasis on challenges of public policy formation and implementation in areas of land, water, energy, minerals, food and habitat at domestic and global levels.

POLS 354 Political Geography3 Credits
Exploration of ways in which physical landscapes shape political attitudes, ideas, and institutions. Emphasis on key concepts of place, mapping, borders, territory, nationalism, and ecological and social impact of natural settings.

POLS 356 Indigenous Politics3 Credits
Study of interactions between the state and various indigenous peoples around the world. Internal political structure and practice of selected indigenous groups and the role of indigenous nations in global politics.

POLS 366 Government and Politics of Asia3 Credits
Study of political systems of China, Japan, Korea, India, and Indonesia. Emphasizes political development, sources, processes, and evaluation of policy making, and contemporary challenges facing these countries.

POLS 372 Peace and Conflict Studies3 Credits
Interdisciplinary study of nature and causes of conflict, conflict resolution, and foundations of justice and peace. Analyzes historical and contemporary conflicts, both civil and international, and examines how evidence and theory are used to understand peace and conflict.

POLS 373 Global Politics of Women and Gender3 Credits
Analysis of women and gender in global security and the global political economy. Topics include violence and war, transnational activism, migration, development, human rights, sex work, and domestic work. Examines contemporary case studies, how evidence and theory are used to explain the gendered nature of global security and economic systems.

POLS 395 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

POLS 396 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

POLS 399 Internship1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

POLS 412 Constitutional Law3 Credits
An analysis of American constitutional theory as articulated by the U. S. Supreme Court. Specific topics include the nature of judicial review, the powers of the President and Congress, federalism, the regulation of commerce and the development of substantive due process.
Prerequisites: POLS 101 or permission of instructor.
Equivalent Course(s): CRMJ 412

POLS 452 Political Theory: Classical and Medieval3 Credits
POLS 453 Political Theory: Modern3 Credits

POLS 462 Public Policy: Theory and Practice3 Credits
Overview of theory and practice of public policy making and implementation. Examination of participants and stages of public policy making. Analysis of success/failure of controversial public policies. Topics may include healthcare policy, drug policy and welfare.

POLS 471 Politics of Global Governance3 Credits
Analysis of management of world politics and economics by networks of states, international and regional organizations, and non-state participants. Includes human and environmental security, human rights, global health, organized crime, global political economy, and development. Examines successful and unsuccessful problem management in a globalized world.
Prerequisites: POLS 270.

POLS 472 International Political Economy3 Credits
Analysis of origins, evolution, and trajectory of global political economy. Includes international regulation, trade, finance, and monetary systems, as well as development, foreign aid, migration, organized crime, and resource extraction. Explores theory and evidence used to explain global economic developments.
Prerequisites: POLS 270.

POLS 475 American Foreign and National Security Policy3 Credits
American foreign and national security policy with emphasis on 1945 to the present and beyond. Foreign and domestic factors shaping policy, the mechanisms and dynamics of policy making, the role of perception and motives underlying decision and action, and case studies of historical crises and contemporary debates are examined.

POLS 482 International Relations Theory3 Credits
Study of the major theoretical approaches to international relations and global politics. Special emphasis placed on foundational concepts such as the state, sovereignty, governance, borders, and emerging issues of identity, non-state participants, and human security.
Prerequisites: POLS 270.

POLS 488 Environmental Politics and Policy3 Credits
An introduction to the political issues and problems associated with patterns of socio-economic growth and its environmental impact at both domestic and global levels of analysis.

POLS 490 Senior Seminar for Political Science3 Credits
Arranged tutorials and seminars with political science faculty and students, design and execution of a research project, and submission of a senior thesis.
Prerequisites: POLS 201 and senior standing.

POLS 495 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

POLS 496 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

POLS 499 Internship1-15 Credits
May be performed in areas relating to Political Science, such as civic, political, or legal. Internships will be conducted in Mesa County, the Denver legislature, or in Washington, D.C.
Prerequisites: Junior or senior standing.
Course may be taken multiple times up to maximum of 15 credit hours.

POLS 501 Theories of Political Science3 Credits
Graduate-level introduction to theoretical approaches in political science. Topics will include basic issues in the philosophy of social science, as well as theoretical frameworks that cut across the sub-fields of the discipline: rational choice, social constructivism, institutionalism, Marxism, feminism, and post-structuralism. Approaches unique to the three major subfields of comparative politics, international relations, and political philosophy will also be covered.
Prerequisites: Admission into Social Studies Graduate Certificate Program.
POLS 505 American Government3 Credits
Graduate-level introduction to the foundations of American government. The course will cover major readings and theories in American government. Topics include American political development, institutions (Congress, presidency, judiciary), political behavior (public opinion, voting and elections, political parties and interest groups), and public policy. Prerequisites: Admission into Social Sciences Graduate Certificate Program.

Process Technology (PROS)

PROS 100 Introduction to Process Technology3 Credits
Provides an overview or introduction into the field of Process Operations within the process industry. The course will introduce the roles and responsibilities of process technicians, the environment in which they work, and the equipment and systems in which they operate.

PROS 117 Electronics I3 Credits
Fundamentals of practical and theoretical DC and AC circuits. Application of basic entry skills and analysis/verification of theoretical results. Introduces the basic skills required by many careers in electronics and related fields. Operations and applications of basic DC and AC circuits consisting of resistors, capacitors, inductors, transformers and diodes, and introducing basic digital concepts. Emphasis on common test instruments in troubleshooting, working on real-world and applicable projects. Lecture/lab format.

PROS 118 Electronics II3 Credits

PROS 120 Process Technology I: Equipment4 Credits
Provides an overview or introduction into the field of equipment within the process industry. This course will introduce many process industry-related equipment concepts including purpose, components, operation, and the Process Technician's role for operating and troubleshooting the equipment.

PROS 195 Independent Study1-4 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

PROS 196 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

PROS 220 Process Technology III: Operations4 Credits
Provides an introduction to the field of operation within the process industry. Students will use existing knowledge of equipment, systems, and instrumentation to understand the operation of an entire unit. Students study concepts related to commissioning, normal startup, normal operations, normal shutdown, turnarounds, and abnormal situations, as well as the Process Technician's role in performing the tasks associated with these concepts within an operating unit.

PROS 230 Quality in Process Technology3 Credits
Provides an introduction to the field of Quality within the Process Industry. This course will introduce many process industry-related quality concepts including operating consistency, continuous improvement, plant economics, team skills and statistical process control (SPC).

PROS 290 Certification:1 Credit
Capstone certification preparation specifically addressing each emphasis and associated certifications. Addresses Certified Electronics Technician (CET) program and other certifications.

PROS 292 Capstone4 Credits
Knowledge to articulate the tactical planning functions performed within field projects. Access and apply the various tactical planning tools and data elements to supporting documentation including troubleshooting. Economic principles in costing, value, capital investment, profitability and inventory.

Psychology (PSYC)

PSYC 150 General Psychology-GTSS3 Credits
Examines the fundamental principles of psychology. Essential Learning Categories: Social and Behavioral Sciences Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

PSYC 201 Orientation to the Psychology Major3 Credits
Foundations for further study in psychology. Education and career planning. Basic information competence and writing skills, including APA writing format. Basic descriptive statistics, data reporting and graphic representation. Importance of research. Applying to graduate school. Prerequisites: Declared psychology major, PSYC 150 and ENGL 112.

PSYC 202 APA Style of Writing for Psychology Minors1 Credit
APA writing format as foundation for further study in the psychology minor. Not intended for psychology majors. Prerequisites: PSYC 150, ENGL 112, and declared minor in psychology.

PSYC 216 Research Methods in Psychology4 Credits
Designing, conducting, and reporting psychological investigations. Experimental, non-experimental, and quasi-experimental methods examined. Research project and presentation of results in APA style. Prerequisites: PSYC 150, STAT 215, and PSYC 201. Terms Typically Offered: Fall, Spring.

PSYC 233 Human Growth and Development-GTSS3 Credits

PSYC 296 Topics1-4 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

PSYC 300 Health Psychology3 Credits
Health and psychology are intertwined in a variety of ways. This course examines what it means to be healthy and look at the connection between behavior and both physical health and illness and mental health and illness. Prerequisites: PSYC 150 or PSYC 233.

PSYC 310 Child Psychology3 Credits
A study of the principles of human development and psychology from conception to puberty. Prerequisites: PSYC 150.

PSYC 314 Psychology Of Learning3 Credits
Classic and modern explanations of the phenomena of learning in both lower animals and humans. Classical and operant conditioning covered in detail. Prerequisites: Junior or senior status and PSYC 150.
PSYC 320 Social Psychology3 Credits
Social influences upon behavior with consideration given to topics such as: social perception, attitude formation and change, communication, and leadership.
**Prerequisites:** PSYC 150.

PSYC 330 Psychology of Adolescents and Emerging Adulthood3 Credits
Study of principles of human development (biological, cognitive, and social/emotional) from puberty through emerging adulthood.
**Prerequisites:** PSYC 150.

PSYC 335 Psychology of Women3 Credits
A brief account of the role of women in mythology and history will be followed by coverage of women’s heritage in psychology. Then gender specific aspects of physical, psychological and social development will be covered. Current areas of interest will be included, e.g., communication, work related issues, relationships.
**Prerequisites:** PSYC 150.

PSYC 340 Abnormal Psychology3 Credits
Concepts related to psychopathology and personality disorders including functional causation, general psychological theory, and behavior deviation patterns.
**Prerequisites:** PSYC 150 or permission of instructor.

PSYC 345 Abnormal Child Psychology3 Credits
Child and adolescent disorders within the context of a developmental framework. This course will encourage the developmental consideration that influence diagnosis, behavioral manifestation, and treatment of childhood disorders as well as the contextual influences on development, maintenance, and treatment of childhood disorders.
**Prerequisites:** PSYC 233 or PSYC 310.
**Terms Typically Offered:** Fall, Spring.

PSYC 350 Psychology Of Adulthood3 Credits
Study of principles of human development (biological, cognitive, and social/emotional) from the latter part of young adulthood through late adulthood.
**Prerequisites:** PSYC 150.

PSYC 370 Cross-Cultural Psychology3 Credits
Survey of theory and methods in cross-cultural psychology.
**Prerequisites:** PSYC 150.

PSYC 395 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

PSYC 396 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

PSYC 400 Psychological Testing3 Credits
Theory, problems, methods, and content of psychological measurement, including concepts of the purpose of testing, test administration and scoring, standardization, reliability, validity test evaluation, and a survey of the major tests used in educational and psychological testing.
**Prerequisites:** PSYC 150 and STAT 215.

PSYC 401 Sport Psychology3 Credits
Introduction to theories and research in Sport Psychology. Includes aggression and violence in sport, psychological characteristics of participants, sexual identity and motivation.
**Prerequisites:** PSYC 150.

PSYC 408 Foundations of School Counseling3 Credits
Examination of conceptual foundation of the counseling and school counseling professions including history, philosophy, principles and trends. Includes functions of counselors, administrators, teachers and parents in meeting students’ needs in a K-12 education setting.
**Prerequisites:** PSYC 233 or PSYC 310.
**Terms Typically Offered:** Fall.

PSYC 410 Drugs and Human Behavior3 Credits
Study of pharmacological effects and behavioral consequences of self-administered depressants, stimulants, and euphoriants, of marijuana, alcohol and tobacco, and of medicines. Prevention of drug-related problems is considered briefly.
**Prerequisites:** Junior or senior standing.

PSYC 411 Human Sexuality3 Credits
Study of the biological, psychological, and social bases and manifestations of human sexual behavior. Includes theory, research and diversity in sexuality, the biology of sex, gender development, sexual diseases, deviancy and coercion.
**Prerequisites:** PSYC 216.
**Terms Typically Offered:** Fall, Spring.

PSYC 412 Industrial and Organizational Psychology3 Credits
Psychological principles applied to formal, productive organizations such as businesses, governments, and schools. Personnel selection, placement, training, evaluation, motivation to work, job satisfaction, and morale are examined. Counts as a management course for BBA candidates.
**Prerequisites:** PSYC 150 or permission of instructor.

PSYC 414 History of Psychology3 Credits
Systems and theories of modern psychology and the development of scientific psychology since 1879.
**Prerequisites:** PSYC 150, and good standing as a junior or above psychology major, or permission of instructor.

PSYC 416 Memory And Cognition3 Credits
Study of the mental processes that underlie our abilities to recognize stimuli, think, remember, learn language, and solve problems. Current research in each of these areas will be discussed. Includes a research paper written in APA style.
**Prerequisites:** PSYC 150.

PSYC 420 Personality3 Credits
Examination of personality psychology from the time of Freud through the present. Theories and various approaches to understanding the development and functioning of both the general and the unique in personality are emphasized.
**Prerequisites:** PSYC 216; PSYC 400 is recommended.
**Terms Typically Offered:** Fall, Spring, Summer.

PSYC 422 Sensation and Perception3 Credits
Study of the human senses, especially vision and hearing, and of people’s meaningful organization of sensory information.
**Prerequisites:** PSYC 150 or permission of instructor.

PSYC 425 Forensic Psychology3 Credits
Introduction to the production and application of psychological knowledge to the civil and criminal justice systems.
**Prerequisites:** Junior or senior standing.
PSYC 430 Biopsychology3 Credits
The biological bases of the behaviors of the organism, emphasizing the structure and function of the nervous system. The role of biological factors in such behaviors as sleep, sexual behavior, drug addiction, emotion, etc. will be examined.
Prerequisites: Junior or senior standing and PSYC 216.
Terms Typically Offered: Fall, Spring.

PSYC 435 Applied Social Psychology3 Credits
Survey of theories and research in social psychology. Advanced topics in social psychology through readings and discussion on historical and current perspectives. May include self, person perception, attitudes, attributions, close relationships, social influence, and group conflict.
Prerequisites: PSYC 150 and upper division standing.

PSYP 495 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

PSYP 496 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

PSYP 499 Internship1-12 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

Psychology - Counseling (PSYP)

PSYP 305 Suicide Intervention Training1 Credit
Provides a clear and direct method to intervene with those at risk of suicide. Students learn to identify risk factors, develop safety plans, practice skills to intervene, and develop an understanding of resources available. This is a two day (16 hour) suicide intervention workshop.

PSYP 306 Applied Ethics in Mental Health and Counseling1 Credit
Application of professional ethical principles and codes to mental health and health service settings.

PSYP 320 Career Development3 Credits
Theories of, and factors influencing, career development such as assessment, career maturity, decision making, problem solving, and planning. Current developments in adult career and life development will be discussed including life stages, transitions, midlife crisis, stress, and adjustments necessary for career development effectiveness.
Prerequisites: PSYC 201 or permission of instructor.

PSYP 322 Multicultural Service Learning3 Credits
Exploration of multiculturalism through ethnography and community service field work.
Prerequisites: PSYC 201.

PSYP 396 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

PSYP 410 Introduction to Marriage and Family Counseling3 Credits
Key theories and approaches for diverse problem areas in Marriage and Family Counseling, including domestic violence and substance abuse. Explore career options and training for counselors.
Prerequisites: PSYC 150 or SOCO 144.

PSYP 420 Counseling Processes and Techniques3 Credits
Counseling principles and practices which facilitate interpersonal communication and effective personal and social development. Counseling skills in attending behavior, listening, problem exploration, responding, understanding, and modes of action are examined, discussed and applied in classroom counseling situations.
Prerequisites: PSYP 320 and PSYC 340 or permission of instructor.

PSYP 422 Psychological Interviewing3 Credits
Psychological interviewing techniques, methods, and interpretation will be examined using the DSM-V. Interview types will include counseling, intake, assessment, and diagnosis.
Prerequisites: PSYC 201, PSYC 340 and PSYC 400.

PSYP 424 Group Processes3 Credits
Dynamics, procedures, and processes of the group. Focus will be on understanding self and learning how to help others develop self-understanding as well as personal and social skill.
Prerequisites: PSYP 420.

PSYP 496 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

PSYP 497 Practicum I4 Credits
Interpersonal training and counseling practice under professional supervision. A typed paper/journal must be submitted for approval and course credit.
Prerequisites: Senior standing and permission of instructor. Practicum must be arranged for the semester prior to enrollment.

PSYP 499 Practicum II4 Credits
Counseling experience in external field locations according to needs and career goals of the student. A typed paper/journal must be submitted for approval and course credit.
Prerequisites: Permission of instructor. Internship must be arranged for the semester prior to enrollment.

Public Administration (PADM)

PADM 314 Public Organization Theory3 Credits
Examination of the historical development of organizational theory. Focuses on various theoretical approaches to the study of organizational structure and human behavior in public sector organizations.

PADM 315 Public Management3 Credits
Exploration of the concepts and skills essential to successful management in public organizations. Focuses on the management functions critical for success of the organization and how these functions are affected by operating in the public sector.

PADM 350 Ethics in Public Administration3 Credits
Philosophical and practical issues related to ethical decision making in the public sector. Emphasis on the analysis of ethical problems and the development of analytical skills and values framework to act ethically in public service roles.

PADM 396 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

PADM 442 Public Budgeting3 Credits
Examines the principles and practices of resource allocation and the role of the budget in policy development and implementation focusing primarily on state and local government. Focuses on the relationship of the budget to strategic planning, policy implementation and performance measures.

PADM 446 Public Personnel Management3 Credits
Examination of the major issues and components of public personnel systems. Special focus will be placed on the role of the first line government supervisor or middle manager in all facets of personnel administration.

PADM 495 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.
Radiologic Sciences (RADS)

RADS 320 Introduction to Radiologic Technology and Patient Care 3 Credits
Introduction to radiologic technology with emphasis on the education program, the profession, and the healthcare delivery system. Fundamentals of patient care including ethics, professional conduct, communication, radiation protection, and patient management. Study of medical terminology is included.
Prerequisites: Acceptance into the Radiologic Sciences program.
Corequisites: RADS 320.

RADS 320L Introduction to Radiologic Technology and Patient Care Laboratory 1 Credit
Lab component required for RADS 320.
Corequisites: RADS 320.

RADS 321 Radiographic Anatomy and Positioning I 2 Credits
Exploration of every phase of radiography in an integrated coverage of the appendicular skeletal system, abdomen, thoracic, viscera, and body systems. Radiographic anatomy, positioning, and procedures are discussed and applied in the energized laboratory.
Corequisites: RADS 321L.

RADS 321L Radiographic Anatomy and Positioning I Laboratory 1 Credit
Lab component required for RADS 321.
Prerequisites: Acceptance into the Radiologic Sciences program.
Corequisites: RADS 321.

RADS 322 Principles of Radiographic Exposure 2 Credits
Exploration of fundamental factors that govern and influence the radiographic image, including equipment, accessory devices, and exposure mathematics. Technical and prime exposure factors are discussed and applied in the energized laboratory.
Prerequisites: Acceptance into the Radiologic Sciences program.
Corequisites: RADS 322L.

RADS 322L Principles of Radiographic Exposure Laboratory 1 Credit
Lab component required for RADS 322.
Prerequisites: Acceptance into the Radiologic Sciences program.
Corequisites: RADS 322.

RADS 323 Digital Imaging 2 Credits
Exploration of components, principles, and operation of digital imaging systems found in diagnostic radiology. Factors affecting image acquisition, display, archiving, and retrieval are discussed.
Prerequisites: Acceptance into the Radiologic Sciences program.

RADS 329 Radiographic Clinical Experience I 1 Credit
Introduction to the radiographic clinical education experience in the clinical education site. Designed to provide patient care and assessment, competent performance of radiologic imaging, and total quality management. Levels of competency and outcomes measurement ensure the well-being of the patient prior to, during, and following the radiologic procedure.
Prerequisites: Acceptance into the Radiologic Sciences program.

RADS 331 Radiographic Anatomy and Positioning II 2 Credits
Continuation of RADS 321 with instruction in every phase of radiography of the spinal column, digestive system, urinary system, cranium, and facial bones. Radiographic anatomy, positioning, and procedures are discussed and applied in the energized laboratory.
Prerequisites: Acceptance into the Radiologic Sciences program.
Corequisites: RADS 331L.

RADS 331L Radiographic Anatomy and Positioning II Laboratory 1 Credit
Lab component required for RADS 331.
Prerequisites: Acceptance into the Bachelor of Science in Radiologic Sciences program.
Corequisites: RADS 331.

RADS 332 Specialized Imaging I 2 Credits
Introduction to medical imaging modalities and treatment, including equipment, dose differences, types of radiation, patient preparations, indications, and contraindications. Educational and certification requirements are included. Mobile and trauma radiography also are discussed. The course includes an introduction to sectional anatomy of head/brain, chest, mediastinum, abdomen, pelvis, and musculoskeletal system.
Prerequisites: Acceptance into the Radiologic Sciences program.

RADS 333 Imaging Equipment and Quality Assurance 2 Credits
Introduction to radiographic, fluoroscopic, and mobile equipment requirements and design. Applied practice of equipment maintenance, quality control, and testing performed in lab.
Prerequisites: Acceptance into the Radiologic Sciences program.
Corequisites: RADS 333L.

RADS 333L Imaging Equipment and Quality Assurance Laboratory 1 Credit
Lab component required for RADS 333.
Prerequisites: Acceptance into the Radiologic Sciences program.
Corequisites: RADS 333.

RADS 334 Image Analysis I 2 Credits
Principles of analyzing radiographic images of the appendicular skeleton, chest, and abdomen. The importance of optimal imaging standards, as well as discussion of a problem-solving technique for image evaluation and the factors that can affect image quality are also addressed. Actual images will be included for analysis.
Prerequisites: Acceptance into the Radiologic Sciences program.

RADS 335 Radiation Biology and Protection 2 Credits
Principles of radiation interaction in cells and factors affecting cell response to radiation. The course also addresses acute and chronic effects of radiation, dose equivalent limits, and regulatory involvement. Responsibility by the radiographer to patients, personnel, the public, and self are also discussed.
Prerequisites: Acceptance into the Radiologic Sciences program.

RADS 339 Radiographic Clinical Experience II 4 Credits
Exploration of additional concepts correlating skills with academic courses in radiographic clinical education. Designed to provide patient care and assessment, competent performance of radiologic imaging, and total quality management. Levels of competency and outcomes measurement ensure the well-being of the patient prior to, during, and following the radiologic procedure.
Prerequisites: Acceptance into the Radiologic Sciences program.

RADS 354 Image Analysis II 2 Credits
Principles of analyzing radiographic images of the axial skeleton (including the spine, sternum, ribs, and cranium), facial bones, paranasal sinuses, and the digestive system. The importance of optimal imaging standards, as well as discussion of a problem-solving technique for image evaluation and the factors that can affect image quality are also addressed. Actual images will be included for analysis.
Prerequisites: Acceptance into the Radiologic Sciences program.
RADS 449 Radiographic Clinical Experience III6 Credits
Further exploration of clinical education. Designed to provide patient care and assessment, competent performance of radiologic imaging and total quality management. Levels of competency and outcomes measurement ensure the well-being of the patient prior to, during, and following the radiologic procedure.
Prerequisites: Acceptance into the Radiologic Sciences program.

RADS 451 Imaging Pathology3 Credits
Introduction to concepts related to the disease process with emphasis on the radiographic appearance of disease.
Prerequisites: Acceptance into the Radiologic Sciences program.

RADS 452 Sectional Anatomy3 Credits
Exploration of the location and identification of structures in multiple anatomical planes. Function, orientation, imaging, and pathology will be discussed.
Prerequisites: Acceptance into the Radiologic Sciences program.

RADS 453 Advanced Patient Care3 Credits
Development of patient care knowledge and skills required for advanced medical imaging procedures. Focus is on legal and ethical considerations, drug administration, patient monitoring, emergency care, and sterile technique.
Prerequisites: Acceptance into the Radiologic Sciences program.

RADS 459 Radiographic Clinical Experience IV5 Credits
Further exploration of clinical education. Designed to provide patient care and assessment, competent performance of radiologic imaging and total quality management. Levels of competency and outcomes measurement ensure the well-being of the patient prior to, during, and following the radiologic procedure.
Prerequisites: Acceptance into the Radiologic Sciences program.

RADS 460 Principles of Magnetic Resonance Imaging2 Credits
Introduction to the operation of a magnetic resonance imaging (MRI) scanner. Includes magnetic resonance imaging instrumentation, safety, physics, and contrast media. Does not include clinical experience.
Prerequisites: Acceptance into the Bachelor of Applied Science program or Radiologic Sciences MRI Certificate Program; registered radiologic technologist with minimum associate degree.

RADS 461 Principles of Computed Tomography2 Credits
Introduction to the operation of computed tomography equipment. Includes instrumentation, image display, radiation safety, and contrast media. Does not include clinical experience.
Prerequisites: Acceptance into the Radiologic Sciences program, or CT Certificate program.

RADS 462 Leadership and Management3 Credits
Identification of skills necessary to work within an effective interdisciplinary health care team. Includes principles of leadership, quality management, and health care law.
Prerequisites: Acceptance into the Radiologic Sciences program.

RADS 463 Information Literacy in Radiologic Sciences3 Credits
Development of life-long learning skills necessary to function competently in the continually changing medical imaging environment. Content includes intellectual inquiry, information literacy, and scholarly research methods.
Prerequisites: Acceptance into the Radiologic Sciences program.

RADS 464 Senior Capstone3 Credits
Synthesis of radiologic science concepts, principles, and procedures. Includes development of resume and interview skills.
Prerequisites: Acceptance into the Radiologic Sciences program.

RADS 469 Radiographic Clinical Experience V3 Credits
Further exploration of clinical education. Designed to provide patient care and assessment, competent performance of radiologic imaging and total quality management. Levels of competency and outcomes measurement ensure the well-being of the patient prior to, during, and following the radiologic procedure.
Prerequisites: Acceptance into the Radiologic Sciences program.

RADS 470 Applied Magnetic Resonance Imaging3 Credits
Continuation of RADS 460. Development of knowledge and cognitive skills underlying the intelligent performance of tasks typically required of technologists who perform magnetic resonance imaging procedures. Includes patient care, image production, procedures, artifacts, and quality control. Does not include clinical experience.
Prerequisites: RADS 460.

RADS 471 Applied Computed Tomography3 Credits
Continuation of RADS 461. Development of knowledge and cognitive skills underlying the intelligent performance of tasks typically required of technologists who perform computed tomography procedures. Includes patient care and safety, imaging procedures, and image assessment. Does not include clinical experience.
Prerequisites: RADS 461.

RADS 480 Clinical Specialization I4 Credits
Demonstration of clinical competency in Radiologic Science imaging modality. Practical experience gained and demonstrations of competency in positioning, machine control, patient care and image quality in chosen modality.
Prerequisites: RADS 460 or RADS 461 (may be taken concurrently).

RADS 490 Clinical Specialization II4 Credits
Continuation of RADS 480. Demonstration of clinical competency in Radiologic Science imaging modality. Practical experience gained and demonstrations of competency in positioning, machine control, patient care and image quality in chosen modality.
Prerequisites: RADS 470 or RADS 471 (may be taken concurrently); and RADS 480.

RADS 495 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

Reading (READ)

READ 092 College Reading Studio1 Credit
This course is designed to offer supplemental support for students in reading intensive courses across the disciplines. Daily mini-lessons will be provided based on Ten Steps to Advanced College Reading Skills, and will follow with individual assistance with discipline-specific vocabulary from college texts. This is a corequisite with social science 100 discipline strands for students with Accuplacer scores of 62-79. Course may be taken 3 times for credit.

READ 096 Topics:1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

Real Estate (REAL)

REAL 350 Real Estate Fundamentals3 Credits
Overview of basic components of the real estate industry. Includes industry terminology and basic real estate concepts and principles.
Terms Typically Offered: Fall, Spring.
REAL 410 Real Estate Finance and Development3 Credits
Exploration of the process of land development, land packaging and land banking. Analyzes and evaluates real estate financing transactions and opportunities.
Prerequisites: REAL 350.
Terms Typically Offered: Fall, Spring.

REAL 415 Real Estate Valuation and Investment3 Credits
Examination of real estate appraisals using the current industry practices. Calculate and analyze real estate investment opportunities and strategies using current industry investment analysis tools.
Prerequisites: REAL 350.
Terms Typically Offered: Fall, Spring.

Social Science (SOCI)

SOCI 101 Introduction to Lesbian, Gay, Bisexual, and Transgender Studies3 Credits
Introduction to lesbian, gay, bisexual, and transgender studies. Exploration of LGBT studies as an academic field and consideration of the experience of being lesbian, gay, bisexual or transgender.
Essential Learning Categories: Social and Behavioral Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

SOCI 120 Technology and Society-GTSS33 Credits
Overview of technological innovations and human societies throughout modern history. Emphasizes impacts of technology within a social, political, economic, and environmental context.
Essential Learning Categories: Social and Behavioral Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

SOCI 196 Topics1-6 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

SOCI 270 Introduction to Pre-Law Studies2 Credits
Exploration of the path to law school. Dispels the myths about the practice of law and law school acceptance. Understanding of skills needed to succeed in law school. Career outlook and resources available to applicants. Open to all majors.

SOCI 296 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

SOCI 390 GRE Preparation1 Credit
Introduction to the GRE, including the verbal, quantitative, and writing sections. Includes study tips, practice questions, and critical reading and writing techniques for students to improve their performance on the exam.

SOCI 395 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

SOCI 396 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

SOCI 397 Structured Research1-3 Credits

SOCI 401 LSAT Preparation3 Credits
Preparation for the Law School Admissions Test (LSAT).

SOCI 410 Death, Dying & Bereavement3 Credits
Provides an in-depth overview of the issues surrounding death, dying and bereavement. The social and psychological processes of death using interdisciplinary readings from psychology, sociology, anthropology, history, medicine and philosophy.

SOCI 470 Pre-Law in Practice3 Credits
Prepare for law school. Information about types of law, career outlook, making connections, and selecting the right school. Building skills needed for law school. Understanding what is expected, how to apply. Hear from attorneys in the community. Open to all majors.
Prerequisites: Junior or senior standing.

SOCI 495 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

SOCI 496 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

SOCI 497 Structured Research1-3 Credits
Social or behavioral science research under the directed guidance of a faculty member. Designed for junior and senior level students.
Course may be taken multiple times up to maximum of 9 credit hours.

SOCI 499 Internship1-6 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

Social Work (SOWK)

SOWK 150 Introduction to Social Work3 Credits
Introduction to the profession of social work and its historical development; overview of the knowledge, values, skills, practice settings and groups served by social workers.

SOWK 210 Social Work for Diverse Populations3 Credits
Knowledge and skills necessary for social work practice with diverse populations. Explores issues of stereotypes, prejudice, discrimination and oppression. Examines cultural diversity in U.S. society and how to increase self-awareness related to worldviews and beliefs about diversity issues. Emphasis on empowerment of individuals and groups and on multicultural competence.

SOWK 296 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

SOWK 301 Child Welfare3 Credits
Prerequisites: SOWK 150.

SOWK 308 Medical Social Work3 Credits
Explores interface of social work and patients' rights, medical decision-making, case management, process of diagnosis and treatment, palliative and end-of-life care, and the concept of health care consumer. Focus on the current health care system in the United State, the interface of health care and populations-at-risk, and role of the social worker in medical settings.
Prerequisites: SOWK 150.

SOWK 311 Ethical Issues in Social Work3 Credits
Analysis of specific ethical dilemmas from personal, professional and policy perspectives. Focus on ethical issues common to the social work profession and on the NASW Code of Ethics. Utilize code of ethics as guide to decision making. Explore relationship between professional ethical issues and the development of social policy.
Prerequisites: SOWK 150 and SOWK 210.
SOWK 320 Social Work Practices in Mental Health 3 Credits
Practice models and methods of intervention for effective social work practice in mental health care. Includes the promotion of mental health, the prevention of mental illnesses, and delivery of psychosocial treatment and rehabilitation services.
Prerequisites: SOWK 150, SOWK 210, SOWK 311, and SOWK 365.

SOWK 344 School Social Work3 Credits
Overview of social work practice in an educational setting. Cooperative work with school personnel in the identification, prevention and treatment of social, emotional and behavioral problems of children and intervention techniques with parents.
Prerequisites: SOWK 150.

SOWK 350 Legal Aspects of Social Work3 Credits
Exploration of the roles of the social worker in the legal field. Legal terms, procedures, state and federal court systems studied. The legal aspects of protective services for children and adults, the child support laws and the juvenile justice system examined.
Prerequisites: SOWK 150.

SOWK 365 Social Work Intervention Methods I3 Credits
Knowledge, values, and skills for multilevel (micro, mezzo, macro) general practices. Focuses on engaging clients in the helping process, interviewing skills, assessment tools, social histories, goal writing, termination and evaluation. Addresses professional ethics and values and applying systems and ecological frameworks to practice situations. Examines strengths-based assessments, the phases of the helping relationship, and the dynamics of change in interpersonal helping relationships, within a framework of social justice and diversity.
Prerequisites: SOWK 150.

SOWK 375 Social Work Intervention Methods II3 Credits
Examines generalist social work roles and techniques in group work practice. Building on interviewing and engagement skills presented in Intervention Methods I. Focuses on assessment, planning, and intervention with treatment and task groups. Emphasizes basic theory about groups and group process, demonstrates skills necessary for effective practice, explores leadership, group cohesion, and group dynamics. Uses of task and treatment groups in a broad range of settings with diverse client groups.
Prerequisites: SOWK 150, SOWK 210, SOWK 320, and SOWK 365. This course is only open to social work majors who have been formally accepted into the BSW program.

SOWK 377 Spirituality and Social Work3 Credits
Overview of the knowledge, values, and skills to provide spiritually sensitive social work practice. Prepare generalist social work practitioners to work with clients and their families from a holistic framework (bio, psycho, social, cultural, spiritual) and with diversity and respect. Use of interview techniques, spirituality assessments, and strengths-based approaches.
Prerequisites: SOWK 150.

SOWK 381 Gerontology and Social Work3 Credits
Overview of the knowledge aspects of aging in the United States. Explores theories of aging, social and health issues, family and caregiving dynamics, and end of life concerns. Prepares generalist social work practitioners to work with older clients and their families and with service delivery systems addressing the needs of this population.
Prerequisites: SOWK 150.

SOWK 385 SW Intervention Methods III3 Credits
Emphasizes study of skills from a problem-solving strengths and empowerment perspective with organizations and community systems. Viewed as an integral component of a model for bringing about social change, especially at the mezzo and macro levels. Attention paid to developing processes of building constituencies, mobilizing resources, networking, political participation, leadership development, and grassroots development. Introductory overview of strategies, tactics, and techniques of social change. Explores basic skills necessary to write effective grant proposals.
Prerequisites: SOWK 150, SOWK 210, SOWK 311, SOWK 320, SOWK 365, SOWK 375, and SOWK 387. This course is only open to social work majors who have been formally accepted into the BSW program.

SOWK 387 Social Work Research Methods3 Credits
Provides an overview of the principles and methods of basic social work research. Explores qualitative and quantitative research methods and how to critically consume research studies and use research findings to strengthen social work practice. Explore how quality research can assist in making important decisions about the design and implementation of projects, programs, and policies that address the social needs of diverse groups. Create research instruments for numerous purposes (e.g. intake, assessment, client satisfaction, facilitating group services, etc.)
Prerequisites: SOWK 150, SOWK 210, SOWK 311, and SOWK 365. This course is only open to social work majors who have been formally accepted into the BSW program.

SOWK 394 Social Work Practicum Seminar I1 Credit
Discussion of practicum-related issues, professional development, and exploration of learning objectives in field practicum experiences. Requires regular reporting of field activities.
Prerequisites: SOWK 150, SOWK 210, SOWK 320, SOWK 365, SOWK 375, SOWK 385, and SOWK 387. This course is only open to social work majors who have been formally accepted into the BSW program.
Corequisites: SOWK 397.

SOWK 396 Topics: 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

SOWK 397 Social Work Practicum I5 Credits
Involves 225 clock hours per semester. Opportunities to apply theories, techniques, and concepts through observation and participation in supervised activities. Assists in the understanding and achievement of learning objectives in field practicum experiences.
Prerequisites: SOWK 150, SOWK 210, SOWK 320, SOWK 365, SOWK 375, SOWK 385, and SOWK 387. This course is only open to social work majors who have been formally accepted into the BSW program.
Corequisites: SOWK 394.

SOWK 460 Social Welfare Policy3 Credits
Nature and development of American social policy. Includes history of current structures of social welfare services, the role of policy in service delivery and analysis of current social policy issues including gender policy, homelessness, health care policy, domestic poverty, and child welfare policy. Provides an overview of social policy and legislation and the processes of influencing public policy. It links policy with social work practice.
Prerequisites: SOWK 150, SOWK 210, SOWK 311, SOWK 320, SOWK 365, SOWK 375, SOWK 385, and SOWK 387.
SOWK 491 Directed Readings 1-5 Credits
Student and/or faculty initiated special projects/independent study that explores some aspect of social work theory or practice such as: intervention methods, policy, research, populations-at-risk, values and ethics, aging, spirituality, child welfare, addictions, mental health, social and economic justice, and diversity.
Prerequisites: SOWK 150, SOWK 210, SOWK 320, SOWK 365, SOWK 375, SOWK 387, senior standing, instructor permission, and a plan for study.

SOWK 494 Social Work Practicum Seminar II 1 Credit
Discussion of practicum-related issues, professional development, and exploration of learning objectives in field practicum experiences. Requires regular reporting of field activities.
Prerequisites: SOWK 150, SOWK 210, SOWK 320, SOWK 365, SOWK 375, SOWK 385, SOWK 387, SOWK 397, SOWK 394, and SOWK 460.
Corequisites: SOWK 497.

SOWK 495 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

SOWK 497 Social Work Practicum II 5 Credits
Involves 225 clock hours per semester. Provides students with opportunities to apply theories, techniques, and concepts through observation and participation in supervised activities. Assists students in the understanding and achievement of learning objectives in their field practicum experiences.
Prerequisites: SOWK 150, SOWK 210, SOWK 320, SOWK 365, SOWK 375, SOWK 385, SOWK 387, SOWK 397, SOWK 394. This course is only open to social work majors who have been formally accepted into the BSW program.
Corequisites: SOWK 494.

SOCIOLOGY (SOCO)

SOCO 144 Marriage and Families-GTSS33 Credits
Survey of patterns of marriage and family life in social context, with an emphasis on sociological explanations of family patterns and relevant policy implications.
Essential Learning Categories: Social and Behavioral Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

SOCO 202 Introduction to Sociological Inquiry 3 Credits
Orientation to the sociological major with a focus on introductory methods of sociological research. Preparation for writing and research requirements of upper-division sociology courses. Exploration of possible careers and marketing of skills after graduation.
Prerequisites: SOWK 260 or SOWK 264.

SOCO 260 General Sociology-GTSS33 Credits
An overview of sociological concepts, terminology, basic principles, and important theories; introduction to substantive areas of the field.
Essential Learning Categories: Social and Behavioral Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

SOCO 264 Social Problems-GTSS33 Credits
Analysis of contemporary social problems from a sociological perspective, including the social construction of problems, theoretical explanations, and policy implications. Specific problems covered will vary but may include topics such as inequality along with problems in social institutions such as the economy, education, and the family.
Essential Learning Categories: Social and Behavioral Sciences
Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum

SOCO 296 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

SOCO 300 Political Sociology 3 Credits
The interactions and interrelationships between social and political forces. Topics covered include state and society, the social bases of power, ideology, and the media.
Prerequisites: SOWK 260, or POLS 101, or permission of instructor.

SOCO 303 Sociological Research Methods 3 Credits
Methods of sociological research, including practical application of quantitative methods to social science data, culminating in an individual research project.
Prerequisites: SOWK 202 and STAT 215.

SOCO 305 Environmental Sociology 3 Credits
An overview of the interrelations among the physical environment, population, and technology; the origin and basis of environmental social movement organizations; the social construction of environmental issues.
Prerequisites: SOWK 260 or permission of the instructor.

SOCO 310 Sociology of Religion 3 Credits
Examination of religious beliefs, practices, and organizations from a sociological perspective. Consideration also given to the intersection of religion with race, class, gender, and sexuality.
Prerequisites: SOWK 260.

SOCO 312 Social Movements and Political Activism 3 Credits
Sociological study of historical and contemporary social movements and political activism. Overview of the literature on social movement development, organization, participation and outcomes.
Prerequisites: SOWK 260.

SOCO 314 Population 3 Credits
Basic concepts of population studies in international context. Demographic trends including fertility, mortality and migration, as well as the causes and consequences of those trends.
Prerequisites: SOWK 260, or permission of instructor.

SOCO 316 Social Inequality 3 Credits
Causes and effects of inequality, especially social class, with consideration of race and gender.
Prerequisites: SOWK 260, or SOWK 264, or permission of instructor.

SOCO 318 Sociology of Health & Illness 3 Credits
Exploration of sociological perspectives relating to the definitions and experiences of health and illness. Overview of the literature on social inequalities in health and illness, cultural constructions of illness, social experiences of illness, and local and global health care systems.
Prerequisites: SOWK 260.

SOCO 320 Life Course and Aging 3 Credits
Investigation of development and aging as lifelong processes situated in social context. Exploration and application of a social scientific framework for understanding the interplay between human lives and social change.
Prerequisites: SOWK 260.

SOCO 323 Self and Society 3 Credits
Investigation of microsociology, which examines the nature of everyday social interactions, relationships, and groups. Consideration also given to interdisciplinary perspectives that shed light on human social behavior.
Prerequisites: SOWK 260.
Terms Typically Offered: Spring.
SOCO 325 Race and Ethnic Relations 3 Credits
Sociological analysis of race and ethnic relations in the United States both historically and today.
Prerequisites: SOCO 260.

SOCO 340 Sociology of Gender 3 Credits
Investigation of sociological perspectives on gender, with an emphasis on the social construction of gender, gender inequality in social institutions, and patterns of gendered social relations.
Prerequisites: SOCO 260.

SOCO 345 Sociology of Sexuality 3 Credits
Exploration of sexuality from a sociological perspective. Analysis of the intersections of race, class, and gender as well as social institutions as they apply to understanding sexuality.
Prerequisites: SOCO 260.
Terms Typically Offered: Fall.

SOCO 395 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

SOCO 396 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

SOCO 399 Internship 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

SOCO 400 Classical Social Theory 3 Credits
The development of social theory from the Enlightenment through early twentieth century, with emphasis on Marx, Weber, and Durkheim.
Prerequisites: SOCO 260 and 6 credits in upper division SOCO.

SOCO 410 Contemporary Social Theory 3 Credits
An overview of sociological theory from the early 20th century to the present, with an emphasis on the development of contemporary theory from its classical roots.
Prerequisites: SOCO 400.

SOCO 420 Field Studies 6 Credits

SOCO 495 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

SOCO 496 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

Speech (SPCH)

SPCH 101 Interpersonal Communications 3 Credits
Exploration of multiple aspects of human behavior including the communication process, perception, verbal and nonverbal communication, diversity and adapting to others, conflict, culture, and relationships in personal/professional contexts.
Essential Learning Categories: Social and Behavioral Sciences

SPCH 102 Speechmaking 3 Credits
The preparation, organization, and delivery of a speech.
Essential Learning Categories: Humanities

SPCH 103 Persuasion 3 Credits
The use of the speaking voice emphasizing voice placement, speech sounds, breath control, projection, and the phonetic alphabet. Recommended for theatre majors, teachers, prelaw, ministers and business majors.

SPCH 104 Communication and Conflict 3 Credits
The nature of conflict, conflict structure, conflict styles, and the use of power in conflicts. Application of theories to analyze and set goals to plan strategies and tactics. Study of intervention principles and practices.
Prerequisites: Upper division standing.

SPCH 105 Communication: Culture, Diversity and Gender 3 Credits
Research and practical application to facilitate constructive relationships with individuals from other countries, with individuals from sub-cultures within our culture, and with individuals of the opposite sex.
Prerequisites: SPCH 101.

SPCH 106 Communication and Leadership 3 Credits
Study of communication styles of great leaders from every field of endeavor to determine the sources of their influence over the behaviors, thoughts, and feelings of their followers. Included will be study of the historical environments that gave rise to each leader’s style.
Prerequisites: SPCH 101.

SPCH 112 Acting II: Voice and Diction 3 Credits
The reading aloud of prose, poetry, and essays with the intention of conveying the author’s ideas to a listening audience.

SPCH 196 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

SPCH 203 Persuasion 3 Credits
Open discussions on the ethics, process, and application of everyday use of persuasion; how it applies to our advertisements, politics, and friendships; preparation for debate.
Prerequisites: SPCH 102.

SPCH 241 Oral Interpretation 3 Credits
The reading aloud of prose, poetry, and essays with the intention of conveying the author’s ideas to a listening audience.

SPCH 296 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

SPCH 303 Nonverbal Communication 3 Credits
The opportunity to observe, record and interpret the nonverbal dimensions of communication behavior and the opportunity to enhance awareness and skill in nonverbal communication behavior in mass media, law, theatre, group dynamics, etc.

SPCH 304 Communication and Conflict 3 Credits
The opportunity to observe, record and interpret the nonverbal dimensions of communication behavior and the opportunity to enhance awareness and skill in nonverbal communication behavior in mass media, law, theatre, group dynamics, etc.

SPCH 305 Communication: Culture, Diversity and Gender 3 Credits
The opportunity to observe, record and interpret the nonverbal dimensions of communication behavior and the opportunity to enhance awareness and skill in nonverbal communication behavior in mass media, law, theatre, group dynamics, etc.

SPCH 306 Communication and Leadership 3 Credits
Study of communication styles of great leaders from every field of endeavor to determine the sources of their influence over the behaviors, thoughts, and feelings of their followers. Included will be study of the historical environments that gave rise to each leader’s style.
Prerequisites: SPCH 101.

SPCH 307 Argumentation and Debate 3 Credits
Research and development of various types of debate such as student congress, mock trial, value debate, etc., using national and international topics of current interest.
Prerequisites: SPCH 102 or SPCH 203 or permission of instructor.

SPCH 395 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

SPCH 396 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

SPCH 495 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

SPCH 496 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.
**Statistics (STAT)**

**STAT 200 Probability and Statistics-GTMA13 Credits**  
Descriptive statistical methods, elementary probability, sample distribution, binomial, normal, T and F distributions, parameter estimation, one and two sample tests of hypothesis, simple correlation and regression analysis, one-way analysis of variance, nonparametric inference, time permitting. Introduction to statistical software.  
**Prerequisites:** MATH 110 or MATH 113 or permission of instructor.

**STAT 215 Statistics for Social and Behavioral Sciences4 Credits**  
Descriptive and inferential statistical techniques within the Social and Behavioral Science realm. Topics include: Types of Random Variables, Studies, and Sampling Methods; Plots and Descriptive Statistics; Correlation and Regression; Probability Theory; Hypothesis Testing & Inference including one and two sample t-tests, Chi-Squared Test for Independence, One and Two Factor ANOVA, t-test for Linear Regression Co-variates. SPSS will be used for data analysis.  
**Prerequisites:** MATH 110 or higher, and PSYC 150 or SOCO 260 or CRMJ 201 or POLS 101.

**STAT 241 Introduction to Business Analysis3 Credits**  
Introduction to descriptive, predictive, and inferential analysis techniques, data interpretation, business research skills, and techniques for analysis and modeling of business problems in the workplace using appropriate software.  
**Prerequisites:** MATH 113 or higher.  
**Equivalent Course(s):** CISB 241

**STAT 301 Computational Statistics3 Credits**  
Introduction to computational methods within statistical software, with a primary focus on R, SPSS, and Excel. Topics include inference on population means and variances, sampling from probability distributions, linear regression and correlation, analysis of variance, power of statistical tests, nonparametric methods, categorical data techniques, and graphics.  
**Prerequisites:** STAT 200 or STAT 215 or STAT 241 or CISB 241.  
**Terms Typically Offered:** Fall, Spring.

**STAT 305 Statistics and Quality Control for Engineering3 Credits**  
Introduction to descriptive and inferential statistics, and principles of quality management. Includes descriptive statistics, probability distributions, hypothesis testing, regression analysis, control charts, total quality management, quality improvement process, process capability, gauge repeatability and reproducibility, six-sigma, risk assessment, quality audit and ISO 9000.  
**Prerequisites:** MATH 135 or MATH 151, and CSCI 130.

**STAT 311 Statistical Methods3 Credits**  
Power of statistical tests, categorical data techniques, inference about population means and variances, nonparametric methods, simple and multiple linear regression and correlation, analysis of variance, multiple comparisons, introduction to some experimental designs. Use of statistical software.  
**Prerequisites:** STAT 200.

**STAT 312 Correlation and Regression3 Credits**  
Graphical, numerical, and theoretical least-squares analysis for simple and multiple regression and correlation, including inference methods, diagnostics and remedial measures, simultaneous inference methods, the matrix approach to regression and correlation analysis, and stepwise regression procedures. Use of statistical software.  
**Prerequisites:** STAT 301.  
**Terms Typically Offered:** Spring.

**STAT 313 Sampling Techniques3 Credits**  
Methodology of simple random sampling, stratified, systematic cluster, and two-stage sampling is developed. Estimation of sample size determination, and minimized costs of sampling are discussed. Use of resampling statistical software.  
**Prerequisites:** STAT 301.

**STAT 350 Mathematical Statistics I3 Credits**  
Calculus based mathematical development of discrete and continuous random variables. Topics include probability axioms and rules, Bayes' Theorem, discrete and continuous distributions, expectation, variance, moment generating functions, marginal and conditional distributions, bivariate distributions, transformations, sampling distributions and the central limit theorem.  
**Prerequisites:** STAT 200 and MATH 253 (may be taken concurrently).

**STAT 351 Mathematical Statistics II3 Credits**  
This course is a continuation of STAT 350 Mathematical Statistics I. This course is a calculus-based theoretical study of point estimators by method of moments and maximum likelihood, confidence intervals, hypothesis testing, simple linear regression, analysis of variance, and nonparametric methods. Additional topics may include experimental design, quality control, multiple linear regression, and survival analysis.  
**Prerequisites:** STAT 350.

**STAT 395 Independent Study1-3 Credits**  
Course may be taken multiple times up to a maximum of 6 credit hours.

**STAT 396 Topics1-3 Credits**  
Course may be taken multiple times up to a maximum of 15 credit hours.

**STAT 425 Design and Analysis of Experiments3 Credits**  
Design and analysis of single and multiple factor experiments, fixed, mixed and random effects designs including multiple comparison procedures, transformations, fixed, mixed and random effects designs, completely randomized designs, randomized block designs, Latin square designs, and nested designs.  
**Prerequisites:** STAT 301; and MATH 121 or MATH 135 or MATH 146 or MATH 151.

**STAT 430 Categorical Data Analysis3 Credits**  
Study of appropriate methods for the collection and analysis of qualitative data. Topics include inference for contingency tables, chi-square and nonparametric tests, logistic regression, modelling for multinomial responses, and generalized linear models.  
**Prerequisites:** STAT 312.  
**Terms Typically Offered:** Fall.

**STAT 435 Introduction to Time Series3 Credits**  
Statistical methods for analyzing time series. Topics include stationarity, autocorrelation, ARIMA models, spectral analysis, filtering, forecasting, and GARCH models.  
**Prerequisites:** STAT 312.  
**Terms Typically Offered:** Spring.

**STAT 460 Actuarial Exams Preparation3 Credits**  
Preparation for the Probability Exam (P Exam) as well as the Financial Mathematics Exam (FM Exam) from the Society of Actuaries.  
**Prerequisites:** STAT 351.  
**Terms Typically Offered:** Spring.

**STAT 492 Senior Capstone1 Credit**  
Independent capstone research project under the guidance of a faculty member.  
**Prerequisites:** MATH 484.  
**Terms Typically Offered:** Spring.
Surgical Technology (SUTE)

SUTE 200 Medical Terminology in Surgical Technology2 Credits
Exploration of word roots, prefixes, and suffixes used in medicine and healthcare. Students will learn medical terminology and definitions related to major body systems and procedures associated with the surgical setting.
Prerequisites: Admission to the Surgical Technology Program; BIOL 209, BIOL 209L, BIOL 210, BIOL 210L, BIOL 241, and PSYC 150.
Terms Typically Offered: Fall.

SUTE 202 Fundamentals in Surgical Technology4 Credits
Introduction to the scope and breadth of surgical technology. Students learn evidence-based practices to promote patient safety and to adhere to standards of practice in the surgical setting.
Prerequisites: Admission to the Surgical Technology Program; BIOL 209, BIOL 209L, BIOL 210, BIOL 210L, BIOL 241, and PSYC 150.
Terms Typically Offered: Fall.

SUTE 202L Fundamentals in Surgical Technology Laboratory4 Credits
Approaches to surgical technology. Students will learn tasks and responsibilities of the surgical technologist including the practice of sterile technique, surgical scrub, gown and glove, patient positioning, draping, and surgical prep on patients. Students will learn the practice of standard precautions in surgery. Skills will be practiced in a clinical setting.
Prerequisites: Admission to the Surgical Technology Program; BIOL 209, BIOL 209L, BIOL 210, BIOL 210L, BIOL 241, and PSYC 150.
Terms Typically Offered: Fall.

SUTE 206 Pharmacology for Surgical Technology3 Credits
Exploration of safe use of prescription and nonprescription drugs. Emphasis will be placed on the impact of safe drug use in promoting and maintaining health. The course will examine how drugs affect the body by changing many of its normal mechanisms, thereby contributing to potential health problems during surgery.
Prerequisites: Admission to the Surgical Technology Program; BIOL 209, BIOL 209L, BIOL 210, BIOL 210L, BIOL 241, and PSYC 150.
Terms Typically Offered: Fall.

SUTE 210 Safety and Equipment3 Credits
Exploration of hazard prevention in the surgical setting. Students learn to prepare, plan, detect and communicate safety and security principles. Students learn tasks and responsibilities of incident-management, all-hazard preparation, and components of personal, community, and institutional disaster planning. Evidence based practice guidelines, healthcare regulations and legal considerations are discussed.
Prerequisites: Admission to the Surgical Technology Program; BIOL 209, BIOL 209L, BIOL 210, BIOL 210L, BIOL 241, and PSYC 150.
Corequisites: SUTE 200, SUTE 202, SUTE 202L, and SUTE 206.
Terms Typically Offered: Fall.

SUTE 212 Surgical Procedures I4 Credits
Exploration of surgical specialties including, but not limited to, general surgery, obstetrics and gynecologic, genitourinary, orthopedics, and neurosurgical. This course introduces the student to specialized instrumentation and surgical modalities of each surgical specialty.
Prerequisites: SUTE 200, SUTE 202L, SUTE 206, SUTE 210.
Corequisites: SUTE 212L, SUTE 218, and SUTE 220.
Terms Typically Offered: Spring.

SUTE 212L Surgical Procedures I Laboratory4 Credits
Exploration of specific surgical specialties including general surgery, obstetrics and gynecologic, genitourinary, orthopedics, and neurosurgical. This course introduces the student to the surgical specialties with a focus on a systems review of pathology in conjunction with specific procedures performed, specialized instrumentation, and surgical modalities of each surgical specialty.
Prerequisites: SUTE 200, SUTE 202L, SUTE 206, SUTE 210.
Corequisites: SUTE 212L, SUTE 218, and SUTE 220.
Terms Typically Offered: Spring.

SUTE 218 Specialty Surgical Procedures4 Credits
Exploration of specific surgical specialties including, but not limited to, plastics, ophthalmic, vascular, thoracic, and cardiac surgeries. The student will focus on specific procedures performed, specialized instrumentation, and surgical modalities of each specialty.
Prerequisites: SUTE 200, SUTE 202L, SUTE 206, SUTE 210.
Corequisites: SUTE 212, SUTE 212L, and SUTE 220.
Terms Typically Offered: Spring.

SUTE 220 Surgical Clinical I2 Credits
Demonstration of basic surgical technology skills and abilities. Emphasis is placed on accrual of practice experiences necessary for national certification. Students participate in general surgical procedures through a variety of surgical cases.
Prerequisites: SUTE 200, SUTE 202, SUTE 202L, SUTE 206, SUTE 210.
Corequisites: SUTE 212, SUTE 212L, and SUTE 218.
Terms Typically Offered: Spring.

SUTE 230 Surgical Clinical II3 Credits
Demonstration of surgical technology skills and abilities of increasing complexity. Emphasis is placed on accrual of practice experiences necessary for national certification. Students participate in complex procedures through a variety of surgical cases.
Prerequisites: SUTE 212, SUTE 212L, SUTE 218, and SUTE 220.
Corequisites: SUTE 240.
Terms Typically Offered: Summer.
SUTE 240 Surgical Clinical III4 Credits  
Demonstration of the roles and responsibilities of a surgical technologist. Emphasis is placed on preparation for minimally supervised practice and completion of the national certification exam. Students function in increasingly autonomous roles through a variety of surgical cases.  
**Prerequisites:** SUTE 212, SUTE 212L, SUTE 218, and SUTE 220.  
**Corequisites:** SUTE 230.  
**Terms Typically Offered:** Summer.

**Technology Integration (TECI)**

TECI 111 Healthcare Data Management and Information Systems3 Credits  
Introduction to the electronic health record (EHR) components and health informatics including infrastructure, privacy, security, and legal implications. Federal involvement and its impact on information technology regarding health data will be discussed. The transformation of data into meaningful information, through research, vital statistics, and epidemiology will be demonstrated. Data quality, integrity, collection, access, and retention will also be emphasized.

TECI 118 AC Passive Circuits3 Credits  
Analysis of AC circuits including resistors, capacitors, inductors, and use of standard test equipment. Three one-hour lectures and one one-and-one-half hour laboratory per week.  
**Corequisites:** TECI 118L.

TECI 118L AC Passive Circuits Laboratory1 Credit  
Lab component required for TECI 118.  
**Corequisites:** TECI 118.

TECI 131 Principles of Information Assurance3 Credits  
Exploration of skills and knowledge required to survey key issues associated with protecting information assets, determine the levels of protection and response to security incidents, and design a consistent, reasonable information security system. Students learn to inspect and protect information assets, detect and react to threats to information assets, and examine pre- and post-incident procedures.

TECI 132 Introduction to IT Hardware and System Software3 Credits  
Basic hardware and software study of stand-alone or local/wide-area computers. Hands-on experience using 5x or above architecture.

TECI 142 Internet of Things3 Credits  
Introduction to the network and how the internet expands to sectors such as manufacturing floors, energy grids, healthcare facilities, and transportation. Students will learn the network of physical objects that contain embedded technology to communicate and interact with their internal states. Topics will also include cloud applications and cloud-based office productivity software.

TECI 163 Convergent Technologies3 Credits  
Introduction to telecommunications, including how data, voice, and video technologies are converging for telecommunications systems. Topics will also include wireless, ISDN, PCM, DSL, cable, IP voice, and computer networks.

TECI 170 Introduction to Communications3 Credits  
Overview of communication systems that include both central office based and premise based platforms. The switching and service components of RBOC and inter-exchange providers will be examined and discussed. Characteristics, advantages, and disadvantages of the various systems will be compared and contrasted. Architecture and design of switching infrastructures and components will also be covered.

TECI 180 Cisco Networking I3 Credits  
The first of four semester courses in Cisco’s Networking Academy curriculum. Concepts covered are: OSI model, internetworking devices, IP addressing, LAN media and topologies, structured cabling, electronics. CCNA certified individual can perform the following tasks: -Install and configure Cisco Switches and routers in multi-protocol internetworks using LAN and WAN interfaces. -Provide Level 1 troubleshooting service -Improve network performance and security -Perform entry-level tasks in the planning, design, installation, operation, and troubleshooting of Ethernet and TCP/IP networks.

TECI 185 Cisco Networking II3 Credits  
The second of four semester courses in Cisco’s Networking Academy curriculum. Concepts covered are: Safety; Networking; Network terminology and protocols; Network standards; LANs, MANs, SANs, WANS; OSI model; Ethernet; Token ring; FDDI; TCP/IP addressing protocol; Dynamic routing, the Network Administrator’s role and function.  
**Prerequisites:** TECI 180.

TECI 195 Independent Study1-4 Credits  
Course may be taken multiple times up to maximum of 6 credit hours.

TECI 196 Topics:1-3 Credits  
Course may be taken multiple times up to maximum of 15 credit hours.

TECI 230 Cisco Networking III3 Credits  
The third of four semester courses in Cisco’s Networking Academy curriculum. Concepts covered are: LAN switching; VLANs; LAN design; IGRP; Access lists; IPX/SPX; with concepts applied through design of a Threaded Case Study (TCS).  
**Prerequisites:** TECI 180 and TECI 185.

TECI 235 Cisco Networking IV3 Credits  
The fourth of four semester courses in Cisco’s Networking Academy curriculum. Concepts covered are: WANs, SANs design; PPP; ISDN; Frame relay; Master documentation skills; with concepts applied through design of a Threaded Case Study (TCS).  
**Prerequisites:** TECI 180, TECI 185, and TECI 230.

TECI 240 VoIP Fundamentals3 Credits  
Covers the components of engineering the telephone outside plant, fundamentals of transmission, resistance design, and distribution cable design in serving a customer area.

TECI 242 Cloud Computing3 Credits  
Introduction to cloud computing and how to install, configure, and manage a cloud environment. Builds on knowledge of hypervisor and virtual machine environments.

TECI 245 Security Fundamentals3 Credits  
Comprehensive overview of network security. Includes general security concepts. Communication security includes remote access, e-mail, the Web, directory and file transfer, and wireless data. Common network attacks introduced. Cryptography basics incorporated. Operational/organizational security discusses as it relates to physical security, disaster recovery, and business continuity. Computer forensics introduced.

TECI 260 Information Technology Hardware and System Software3 Credits  
Use of an internal systems approach to building and maintaining stand-alone or local/wide area computers utilized in networking. Hands on experience using 5x or above architecture.
TECI 265 Advanced IT Hardware and System Software 3 Credits
**Prerequisites:** TECI 260.

TECI 292 Capstone in Technical Engineering Planning and Economics 4 Credits
Knowledge to articulate the tactical planning functions performed within capacity provisioning. Access and apply the various tactical planning tools and data elements to supporting documentation. Economic principles in costing, value, capital investment, profitability and inventory.

TECI 295 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

**Theatre (THEA)**

THEA 102 Introduction to Theatre Technology: Stagecraft 3 Credits
Introduction to basic scene shop safety, organization of materials, hand and machine carpentry and basic stagecraft techniques. 
**Terms Typically Offered:** Fall.

THEA 103 Introduction to Theatre Technology: Costume 3 Credits
Introduction to basic costume shop safety, organization and materials, hand and machine sewing.
**Terms Typically Offered:** Fall.

THEA 104 Introduction to Theatre Technology: Lighting 3 Credits
Introduction to basic lighting shop safety, organization of materials, electrical repair, and basic hang and focus techniques.
**Terms Typically Offered:** Spring.

THEA 105 Introduction to Theatre Technology: Sound Technology 3 Credits
Introduction to basic theatre sound design, protocol, and execution, including live audio technology and computer editing. 
**Terms Typically Offered:** Spring.

THEA 114 Summer Theatre 3 Credits
Professional summer theatre experience. The student is expected to participate in all phases of the theatre operation including acting, technical work, directing, box office management, etc. It is advisable for a student enrolled in summer theatre not to enroll in any other class. Five plays are presented in a seven-week period.

THEA 116 Music Theatre Workshop 1 Credit
A performance-based ensemble that combines musical theatre singing, acting, and dancing into a unified performance. Through focus on the works of specific composers and/or stylistic eras, students will produce and perform a musical revue for a public audience. Intended for Music Theatre majors, but students from other disciplines are invited to enroll. 
**Prerequisites:** THEA 153, MUSL 137, or permission of instructor.

THEA 117 Play Production 1 Credit
A practical course in stagecraft concerned with the production of plays. The student works in all phases of production. Students will work three hours per week unless other arrangements are made with the instructor.

THEA 118 Play Production 1 Credit
A practical course in stagecraft concerned with the production of plays. The student works in all phases of production. Students will work three hours per week unless other arrangements are made with the instructor.

THEA 119 Technical Performance 1 Credit
Direct participation in the technical aspects of various productions. Grade will depend upon the preparatory work involved and upon the final technical production. Students must work a minimum of two productions in order to receive credit.

THEA 120 Technical Performance 1 Credit
Direct participation in the technical aspects of various productions. Grade will depend upon the preparatory work involved and upon the final technical production. Students must work a minimum of two productions in order to receive credit.

THEA 128 Theatre Forums 1 Credit
Specialized workshops in various aspects of theatre made possible by visiting artists and/or lecturers or by attending seminars or workshops. Papers and discussions are used for evaluation.

THEA 129 Theatre Forums 1 Credit
Specialized workshops in various aspects of theatre made possible by visiting artists and/or lecturers or by attending seminars or workshops. Papers and discussions are used for evaluation.

THEA 130 Script Analysis 3 Credits
Introduction to practical analysis of theatrical texts. Familiarizes students with script analysis techniques useful in production and performance studies. 
**Terms Typically Offered:** Spring.

THEA 141 Theatre Appreciation 1 Credit
Examination of basic presentation techniques and history of theatre. 
**Essential Learning Categories:** Fine Arts 
**Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum**

THEA 142 Make-up 3 Credits
All types of make-up for the stage. Students examine straight and character make-up techniques and learn the use of crepe hair, prosthetics, and other material.

THEA 145 Introduction to Dramatic Literature 1 Credit
Dramatic literature from classical Greeks to modern dramatists. 
**Essential Learning Categories:** Fine Arts 
**Colorado Guaranteed Transfer (GT) Pathways General Education Curriculum**

THEA 147 Drama Performance 1 or 2 Credits
Requires a student to appear in a major production on campus. The grade will depend upon the preparatory work on the play's character and upon the final performance. 
**Prerequisites:** Permission of instructor.

THEA 148 Drama Performance 1 or 2 Credits
Requires a student to appear in a major production on campus. The grade will depend upon the preparatory work on the play's character and upon the final performance. 
**Prerequisites:** Permission of instructor.

THEA 150 Fundamentals of Acting 3 Credits
This course will introduce non-theatre majors to the basic components of the acting process, including scene work, improvisation, and audition techniques.

THEA 153 Acting I: Beginning Acting 3 Credits
Fundamentals of Acting via improvisation and scene study. Students perform in solo, duo and/or group scenes. 
**Prerequisites:** Theatre Arts major or minor in good standing.
THEA 156 Acting II: Contemporary Scenework 3 Credits
Further development in the application of Stanislavski-based theory studied in Acting I. Includes substantial scene and monologue work in addition to beat analysis. Continued investigation into the depth and breadth of the actor's art.
Prerequisites: THEA 153 or permission of instructor.

THEA 196 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

THEA 202 Elements of Theatrical Design 3 Credits
Exposure to the elements of design in a theatrical context through lectures and projects.
Terms Typically Offered: Fall.

THEA 213 Creative Play Activities-Drama 2 Credits
Creative dramatics in a learning situation. Includes subject matter of interest to anyone in early childhood education, general education, social work, religious education, and/or recreation.

THEA 214 Summer Theatre 3 Credits
See THEA 114.

THEA 216 Music Theatre Workshop 1 Credit
A performance-based ensemble that combines musical theatre singing, acting, and dancing into a unified performance. Through focus on the works of specific composers and/or stylistic eras, students will produce and perform a musical revue for a public audience. Intended for Music Theatre majors, but students from other disciplines are invited to enroll.
Prerequisites: THEA 153, MUSL 137, or permission of instructor.

THEA 217 Play Production 1 Credit
See THEA 117 or THEA 118.
Prerequisites: Courses must be taken in sequence or by permission of the instructor.

THEA 218 Play Production 1 Credit
See THEA 117 or THEA 118.
Prerequisites: Courses must be taken in sequence or by permission of the instructor.

THEA 219 Technical Performance 1 Credit
See THEA 119 or THEA 120.

THEA 220 Technical Performance 1 Credit
See THEA 119 or THEA 120.

THEA 228 Theatre Forums 1 Credit
See THEA 128 or THEA 129.

THEA 229 Theatre Forums 1 Credit
See THEA 128 or THEA 129.
Course may be taken 10 times for credit.

THEA 247 Drama Performance 1 or 2 Credits
Course may be taken 4 times for credit.

THEA 248 Drama Performance 1 or 2 Credits
See THEA 147 or THEA 148.
Prerequisites: Permission of instructor.

THEA 253 Acting IV: Stage Movement 3 Credits
Basic techniques of gesture, movement styles, and combat. Developing an awareness of the use of the body as a means of expression is emphasized.
Prerequisites: THEA 156 and SPCH 112.

THEA 255 Musical Theatre Techniques 3 Credits
Exploration of solo song interpretation Emphasis on basic mechanical, analytical, and physical skills needed to perform musical theatre. Building on an acting foundation, issues of range and vocal support as well as style and repertory will be emphasized.
Prerequisites: THEA 150 or THEA 153; MUSA 137, or one semester of private vocal study, or by permission of instructor.

THEA 256 Auditions 3 Credits
Resume writing. Choice and preparation of effective audition pieces.
Prerequisites: THEA 153 and THEA 156.

THEA 296 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

THEA 300 Advanced Acting: Stage Combat 2 Credits
This course is designed to introduce the actor to advanced study in various theatrical fighting styles including: unarmed, rapier and dagger, sword and shield, smallsword, broadsword, knife, single sword, and quarterstaff. The student will learn stage combat techniques adapted from actual historical fighting techniques and use those techniques in scenework.
Prerequisites: THEA 253.
Course may be taken 3 times for credit.

THEA 313 Rendering for Theatre 3 Credits
Exploration of conventional drawing and rendering principles, techniques, and mediums (both hand and computer-aided) for theatre, through practical application.
Prerequisites: THEA 202.
Terms Typically Offered: Fall, Spring.

THEA 314 Summer Theatre 3 Credits
See THEA 114.

THEA 316 Music Theatre Workshop 1 Credit
A performance-based ensemble that combines musical theatre singing, acting, and dancing into a unified performance. Through focus on the works of specific composers and/or stylistic eras, students will produce and perform a musical revue for a public audience. Intended for Music Theatre majors, but students from other disciplines are invited to enroll.
Prerequisites: THEA 153, MUSL 137, or permission of instructor.

THEA 317 Play Production 1 Credit
See THEA 117 or THEA 118.
Prerequisites: Courses must be taken in sequence or by permission of the instructor.

THEA 318 Play Production 1 Credit
See THEA 117 or THEA 118.
Prerequisites: Courses must be taken in sequence or by permission of the instructor.

THEA 319 Technical Performance 1 Credit
See THEA 119 or THEA 120.

THEA 320 Technical Performance 1 Credit
See THEA 119 or THEA 120.

THEA 322 Stage Management 3 Credits
Theory and principles of human resources management, theatre technical production and actual stage management situations.
Prerequisites: THEA 153 or THEA 243 or THEA 244 or permission of instructor.
THEA 323 Computer Aided Drafting for the Theatre3 Credits
Exploration of Vectorworks and other 3D computer aided drafting software (CAD) to create plots and drawings for theatrical scenic and lighting designs.
Prerequisites: THEA 102 and THEA 104.

THEA 325 Rigging and Special Effects3 Credits
Introduction to stage rigging, hanging lighting and scenery, weighting, safety, and flying hard and soft goods. Advanced technique of theatre technology including smoke, electrics, and other backstage effects.
Prerequisites: THEA 102 and THEA 104.

THEA 327 Multimedia Technology for the Theatre3 Credits
Application of video projection technology and integrated show control software to create original designs for live performance.
Prerequisites: THEA 102 and THEA 104.

THEA 328 Theatre Forums1 Credit
See THEA 128 or THEA 129.

THEA 329 Theatre Forums1 Credit
See THEA 128 or THEA 129.

THEA 331 Theatre History I: 400 B.C. to 16423 Credits
History of theatre as an institution and its relationship to the other arts and to the social and economic environment, from 400 B.C. to 1642 A.D.

THEA 332 Theatre History II: From 1642 to the Present3 Credits
Major world theatre events from 1642 to the present day.

THEA 333 Art, Architecture and Fashion: Prehistory to the Present3 Credits
Exploration of art, architecture, and fashion from Pre-History to the present.

THEA 340 Costume Design3 Credits
Principles, practices, and techniques of Costume Design.
Prerequisites: THEA 202.
Terms Typically Offered: Spring.

THEA 341 Musical Theatre History and Literature3 Credits
In-depth study of the literature and styles of the master composers of music theatre from its beginnings through the present day. Course work is designed for the Musical Theatre major, utilizing lecture and listening lab format and a research paper on a subject of the student's choice.

THEA 342 Sound Design3 Credits
Theory and application of conceptual sound design for live theatre. Emphasis on show control software and tools used for live audio engineering.
Prerequisites: THEA 202.
Terms Typically Offered: Fall, Spring.

THEA 343 Scene Design3 Credits
Experience in the designing of scenery and props for various types of productions with emphasis on research, acquisition, drafting, perspective, and rendering techniques.
Prerequisites: THEA 202.
Terms Typically Offered: Fall.

THEA 344 Lighting Design3 Credits
Advanced training in the design and execution of lighting for the stage.
Prerequisites: THEA 202.
Terms Typically Offered: Fall.

THEA 345 World Drama3 Credits
Students will examine the richness and diversity of contemporary world theatre and drama from a global context.

THEA 347 Drama Performance1 or 2 Credits
Prerequisites: Permission of instructor.

THEA 348 Drama Performance1 or 2 Credits
See THEA 147 or THEA 148.
Prerequisites: Permission of instructor. Course may be taken 4 times for credit.

THEA 353 Advanced Acting: Styles in Acting3 Credits
Various styles of acting used for the Classical, Elizabethan, Romantic, 19th century Melodrama and Realistic periods.
Prerequisites: THEA 256 or permission of instructor.

THEA 354 Advanced Acting: The Meisner Approach3 Credits
An examination of the Meisner Approach, the 'film industry standard' technique that actors use to explore the Realistic/Naturalistic genre of plays and screenplays.
Prerequisites: THEA 256 or permission of instructor.

THEA 355 Music Theatre Repertoire3 Credits
Further development of song interpretation through scene study and ensemble performance. Emphasis on creating performances unified both dramatically and musically through show research and script analysis to develop characterization.
Prerequisites: THEA 255, DANC 174, and DANC 177, or permission of instructor.

THEA 356 Advanced Acting: Dialects3 Credits
Introduces students to the fundamentals of acting while using common stage dialects.
Prerequisites: SPCH 112 and THEA 256, or permission of instructor.

THEA 360 Advanced Costume Technology3 Credits
Introduction to advanced construction techniques, basic flat patterning and draping, and interpreting a rendering into a finished garment.
Prerequisites: THEA 103.

THEA 369 Improvisation2 Credits
Introduction to basic improvisational acting techniques, utilizing guided lectures and exercises and illustrating the role of non-script work in the development of the student actor. Students will create characters, scenes, and short original works.
Prerequisites: THEA 256.

THEA 376 World's Greatest Films3 Credits
Aesthetics and elements that qualify film as an important art form as seen through the major contributors from three important culturally diverse areas of the world: Europe, Asia and America.

THEA 380 Playwriting I3 Credits
Fundamentals of playwriting through a systematic, textual approach, the proper format of scriptwriting, and the writing of short scripts based on common thematic elements.

THEA 381 Directing I3 Credits
The fundamentals of directing culminating in the direction of a scene or short play for public viewing.
Prerequisites: Junior or senior level Acting/Directing major, or permission of instructor.

THEA 382 Directing II3 Credits
Advanced directing techniques and production of a one-act play for public viewing.
Prerequisites: THEA 381 or permission of instructor.

THEA 395 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

THEA 396 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.
THEA 401 Career Preparation 3 Credits
An introduction to the administrative and business aspects of the performing arts.
Prerequisites: Senior standing or permission of instructor.

THEA 403 Methods of Teaching Drama and Speech 3 Credits
Teaching communication, speechmaking, debate and discussion, creative drama, oral interpretation, play selection and direction in the public schools.
Prerequisites: Junior standing in English education or speech/theatre programs.

THEA 411 American Drama 3 Credits
The study of American drama and theatre trends from the first American playwright to the current trends of today.

THEA 412 Contemporary Drama 3 Credits
A study of contemporary drama from the advent of Realism to the present day.

THEA 414 Summer Theatre 3 Credits
See THEA 114.

THEA 416 Music Theatre Workshop 1 Credit
A performance-based ensemble that combines musical theatre singing, acting, and dancing into a unified performance. Through focus on the works of specific composers and/or stylistic eras, students will produce and perform a musical revue for a public audience. Intended for Music Theatre majors, but students from other disciplines are invited to enroll.
Prerequisites: THEA 153, MUSL 137, or permission of instructor.

THEA 417 Play Production 1 Credit
See THEA 117 or THEA 118.
Prerequisites: Courses must be taken in sequence or by permission of the instructor.

THEA 418 Play Production 1 Credit
See THEA 117 or THEA 118.
Prerequisites: Courses must be taken in sequence or by permission of the instructor.

THEA 419 Technical Performance 1 Credit
See THEA 119 or THEA 120.

THEA 420 Technical Performance 1 Credit
See THEA 119 or THEA 120.

THEA 428 Theatre Forums 1 Credit
See THEA 128 or THEA 129.

THEA 429 Theatre Forums 1 Credit
See THEA 128 or THEA 129.

THEA 445 Senior Tech/Design Capstone 3 Credits
Work experience in various aspects of theatre tech/design.
Prerequisites: Senior standing or permission of instructor.

THEA 446 Senior Tech/Design Capstone 3 Credits
Work experience in various aspects of theatre tech/design.
Prerequisites: Senior standing or permission of instructor.

THEA 447 Drama Performance 1 or 2 Credits
Prerequisites: Permission of instructor.

THEA 448 Drama Performance 1 or 2 Credits
See THEA 147 or THEA 148.
Prerequisites: Permission of instructor.

THEA 453 Advanced Acting: Acting for the Camera 3 Credits
The transition from stage acting techniques to camera acting techniques. Students will have the opportunity to work on camera with simplified sets and properties.
Prerequisites: THEA 256 or permission of instructor.

THEA 454 Acting V: Shakespeare 3 Credits
An in-depth exploration of acting approaches to the verse drama of Shakespeare.
Prerequisites: THEA 253.

THEA 459 Advanced Acting: Chekhov Technique 3 Credits
Introduction and exploration of the Michael Chekhov Acting technique.
Prerequisites: THEA 256 or permission of instructor.

THEA 490 Honors Seminar 3 Credits
Advanced study of the creative process for students accepted into the Theatre Arts Honors Program. Topics will include commonalities to all creative processes and the interface between the artist, their work, and their community.
Prerequisites: Acceptance into the Theatre Arts Honors Program.

THEA 494 Performance Seminar: Acting/Directing and Musical Theatre Capstone 3 Credits
Exploration of theories of audition, rehearsal and performance for upper division performance majors.

THEA 495 Independent Study 1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

THEA 496 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

THEA 498 Honors Project/Thesis 3 Credits
Development of individualized research and writing for the student accepted into the Department of Theatre Arts Honors program.
Prerequisites: Acceptance into the Theatre Arts Honors Program.

THEA 499 Internship 1-9 Credits
Work in acting/directing, design/tech, music theatre and theatre management, or other situations that meet the instructor's approval.
Prerequisites: Senior standing and permission of the instructors.
Course may be taken multiple times up to maximum of 15 credit hours.

**Transportation Services-Automotive (TSTA)**

TSTA 245 Manual Drive Trains 4 Credits
Standard repair practices for drive train components to include: clutch, transmission, transaxle, drive axle, driveline, c-v and R & R procedures.

TSTA 247 Automatic Drive Train Service 4 Credits
Standard repair practices for automatic drive trains to include: diagnosis, testing, R & R, and servicing of transaxles/rear wheel drive transmissions.
Prerequisites: TSTC 100 and TSTC 101.

TSTA 265 Engine Control Services 3 Credits
Repair and diagnosis of engine control systems with an emphasis on scan tool diagnosis and live hands on repair of systems.
Prerequisites: TSTC 100, TSTC 101, TSTC 130, and TSTC 160.

TSTA 267 Body Controls 3 Credits
Theory, repair, and diagnosis of body accessories including air bags, electronic monitors, power seats, windows and wipers.
Prerequisites: TSTC 100, TSTC 130, and TSTC 160.
TSTA 275 Alignment and Suspension Service 3 Credits
Introduction to anti-lock brake systems to include: ABS types and operation, diagnostics, traction control, stability control, regenerative breaking and active braking systems.

TSTA 286 Hybrid Vehicles 2 Credits
Introduction to hybrid technology in the transportation industry including: power and transmission designs, batteries, plug-in technology, control systems, safety, associated systems, diagnostics and repair of the modern hybrid vehicle.
Prerequisites: TSTC 100, TSTC 130, and TSTC 160.

TSTA 287 Engine Performance and Emissions 3 Credits
Diagnosis and repair of engine performance and emissions-related failures. Emphasis on strategy based diagnostics through the use of exhaust gas analysis.
Prerequisites: TSTC 100, TSTC 130, TSTC 160, and TSTA 265.

TSTA 289 Alternative Fueled Vehicles 2 Credits
Introduction to the operational theory and principles, safety and repair of hybrid, fuel cell and hydrocarbon and alcohol-based alternative fueled vehicles. Emphasis on industry standard safety and repair practices.
Prerequisites: TSTC 130 and TSTC 160.

Transportation Services -Core (TSTC)

TSTC 100 Introduction to Transportation Services 2 Credits
Introduction to procedures, tool usage, basic shop safety, basic employment skills, job documentation and equipment usage.

TSTC 101 Vehicle Service and Inspection 3 Credits
Introduction to vehicle systems, maintenance, inspection, internal combustion engine theory, systems diagnosis, fundamentals and evaluation. Service of the vehicle systems with emphasis on inspection and observation.

TSTC 130 Electrical I 2 Credits
Introduction to electrical theory, circuits, components, testing and use of test equipment.

TSTC 160 Electrical II 2 Credits
Study of electronic control systems applied to today’s modern vehicles. Emphasis on sensors, actuators, and diagnostic techniques.

TSTC 170 Chassis Fundamentals 2 Credits
Introduction to front and rear suspension systems, including: steering front end geometry, maintenance, light repair and component nomenclature.

TSTC 171 Brakes I 2 Credits
Theory, components, general repair practices and diagnosis of current brake systems.

Transportation Services -Diesel (TSTD)

TSTD 177 Air Systems Repair and Service 2 Credits
This course studies the air systems on the heavy duty truck. The brakes, transmission shift, seats, and rear axle shift will be covered, to include, service and repair of components and systems. Repair of foundation brakes will also be included.

TSTD 215 Diesel Engine Reconditioning 5 Credits
Industry standard rebuild practices for diesel engines. R & R of engine, complete disassembly, assembly and running of engine is covered. Tune-up and fuel system adjustment are covered.

TSTD 265 Diesel Engine Controls 3 Credits
Repair and diagnosis of engine control systems with an emphasis on scan tool diagnosis and live hands-on repair of systems.

TSTD 275 Heavy Duty Suspension 2 Credits
Types of on-road suspensions, tires, repair of components, diagnosis, measurements, and adjustments to front and rear suspensions.

Transportation Services-General (TSTG)

TSTG 115 Gas Engine Reconditioning 4 Credits
Industry standard rebuild practices for gas engines. R & R of engine, complete disassembly, assembly and running of engine is covered.
Prerequisites: TSTC 100 and TSTC 101.

TSTG 120 Industrial Safety Practices 2 Credits
Overview of current OSHA and EPA general industry regulations with an emphasis on hazardous materials, right-to-know, record keeping, and worker role in safety.

TSTG 135 Starting and Charging Systems 2 Credits
Electrical component repair to include: alternators, starters, wiring, and other electrical components.
Prerequisites: TSTC 100, TSTC 101, TSTC 130, and TSTC 160.

TSTG 150 Fluid Power 3 Credits
Principles of hydraulics and pneumatic system including the construction, application, repair, maintenance and troubleshooting of components and systems.

TSTG 175 Brakes II 2 Credits
Repair of brake systems to include: shoes, pads, cylinder reconditioning, machining rotors and drums, diagnosis, bleeding, R & R components, parking brakes and anti-lock systems.

TSTG 195 Climate Control 4 Credits
Repair, diagnosis, R & R of components, charging, recycling and testing of heating and air conditioning systems of over the road vehicles. Theory of operation, nomenclature, identification, safety and environmental impact factors of air conditioning. Also covers heating and ventilation systems.

TSTG 220 Workplace Skills 3 Credits
Employment skills encompassing leadership, goal setting, personal traits, conflict resolution, quality, time management, life-long learning, written and oral communication, and customer relations.

TSTG 240 Job Shop 4 Credits
Application of workplace skills in a controlled shop environment, through the use of real-life lab work projects, performed in house, when internships or co-op opportunities are not available.
Prerequisites: Sophomore status or permission of instructor.

TSTG 270 Practical Applications 4 Credits
Designed to increase student competency through the use of internships or co-op training and real-life shop experiences in their chosen area specialty.
Prerequisites: Permission of instructor.

TSTG 275 ABS Diagnostics 2 Credits
Introduction to anti-lock brake systems to include: ABS types and operation, diagnostics, traction control, stability control, regenerative braking and active braking systems.
Prerequisites: TSTC 100, TSTC 130, TSTC 160, TSTC 171, and TSTG 175.

TSTG 296 Topics 1 or 2 Credits
Course may be taken multiple times up to maximum of 15 credit hours.
University College (UNIV)

UNIV 096 Gearing Up For College1-3 Credits
Introduction to fundamental learning skills for Provisional Baccalaureate students, first semester management strategies and campus resources specific to the higher education environment. Emphasized development of basic practical competencies necessary for successful completion of entry-level university courses.

Terms Typically Offered: Fall.

UNIV 100 College Success Skills1 Credit
Prerequisites: UNIV 100.
Introduction to fundamental learning skills and first semester learning and management strategies, specifically for students engaged in career and technical education pathways.

UNIV 103 Community College Success II1 Credit
Continued support strategies for students in the second semester of college.
Prerequisites: UNIV 102.

UNIV 104 Beyond College Success1 Credit
Advanced college success skills to develop student independence and enhance personal and professional growth. Emphasis on self-discovery, practical application of success strategies, and implementation of an academic plan including co-curricular involvement and major/career goals.
Prerequisites: UNIV 100.
Terms Typically Offered: Fall, Spring.

UNIV 105 Competency Portfolio Development1 Credit
Required preparation of learning portfolio for assessment of academic credit. Will aid in organization and completion of portfolio for prior learning experiences; workshop credit is unrelated to final approval of portfolio for specific course credit.

UNIV 196 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

UNIV 201 Theory and Practice of College Peer Tutoring3 Credits
General and specific training for college level peer tutoring. Readings, discussion, experiential exercises expose students to contemporary learning theories, learning enhancement techniques, and effective applications to group and individual learning situations. Supervised tutoring practicum applies theories and concepts to actual tutoring sessions.
Prerequisites: Permission of instructor; 2.5 GPA; recommendation by instructor in subject area.

UNIV 202 Sophomore Year Experience2 Credits
Exploration of career and academic interests. Emphasis on self-discovery, resume building, making connections with faculty and community members, and solidification of academic plans. Includes a follow-up opportunity to job shadow and participate in service learning.
Prerequisites: Sophomore level standing and permission of instructor.

UNIV 296 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

Unmanned Aircraft Systems (UASP)

UASP 101 UAS Pilot Ground School3 Credits
Exploration of Unmanned Aircraft Systems (UAS). Includes history and terminology, all aspects of legal compliance, and what UAS can do. Includes programming and flying indoor UAS.
Terms Typically Offered: Fall, Spring, Summer.

UASP 110 UAS Pilot License Preparation3 Credits
Detailed study of requirements for UAS Pilot License. All topics on the FAA Remote Pilot - Small Unmanned Aircraft Systems Knowledge Test are covered in-depth. Special emphasis on chart reading and navigation.
Terms Typically Offered: Fall, Spring, Summer.

UASP 120 UAS Pilot Operations and Applications3 Credits
Development of proficiency in flying UAS. Students will learn how to prepare for and conduct a data gathering mission. All aspects of flight including sensor payloads are explored. Includes hands-on experience flying UAS.
Terms Typically Offered: Fall, Spring, Summer.

Veterinary Technology (VETT)

VETT 102 Veterinary Medical Terminology1 Credit
Introduction to the structure of veterinary medical terms with emphasis on using and combining the most common prefixes, roots and suffixes. Includes terms related to major body systems, oncology, psychiatry, as well as clinical laboratory and diagnostic procedures and imaging. Class structure provides accepted pronunciation of terms and relative use in the veterinary specific setting.
Terms Typically Offered: Spring.

VETT 106 Exotic Animal Handling2 Credits
Knowledge and skills required for veterinary technicians. This course focuses on exotic animal husbandry, handling, restraint, and specific problems encountered with exotic animals.
Prerequisites: VETT 280.
Terms Typically Offered: Fall.

VETT 108 Introduction to Laboratory Procedures3 Credits
Biology, clinical appearance, and laboratory diagnosis of parasitic diseases of veterinary and zoonotic importance.
Prerequisites: Admission to Veterinary Technology program.
Corequisites: VETT 116, VETT 205, VETT 205L, and VETT 172.
Terms Typically Offered: Spring.

VETT 109 Applied Companion Animal Behavior3 Credits
Exploration of companion animal behavior through: critical reviews of behavioral literature and its implications for applied techniques in behavior, demonstrations of applied techniques for modifying animal behavior, principles of companion animal body posture, everyday treatment of animals. Focuses on treatment of animals in veterinary practice, including improving handling techniques and safety.
Terms Typically Offered: Summer.

VETT 115 Surgical Nursing for Veterinary Technicians2 Credits
Background in veterinary medicine, including familiarity with instruments, surgical support equipment, and proficiency in the proper preparation of the operating room.
Prerequisites: VETT 280.
Terms Typically Offered: Fall.
VETT 116 Humane Treatment and Handling of Animals 3 Credits
Introduction to animal welfare and humane treatment during handling and restraint. Also covers behavior, safety, equipment choice, and typical clinical procedures.
Prerequisites: Admission to the Veterinary Technology program.
Corequisites: VETT 108, VETT 116, VETT 205, and VETT 205L.
Terms Typically Offered: Spring.

VETT 120 Office Procedures and Relations 2 Credits
Presentation of common veterinary office procedures including administration, professional etiquette, client relations, career development and job searching skills. Emphasis on computer skills in relationship to current veterinary management software.
Terms Typically Offered: Summer.

VETT 134 Diagnostic Imaging 2 Credits
Coverage of selected areas of diagnostic imaging with an emphasis on radiology. Topics include radiation properties, x-ray production, radiographic equipment, darkroom procedures, the radiographic image, animal positioning and radiation safety. An introduction to special imaging techniques such as computed tomography (CT scan) and ultrasound will also be included.
Prerequisites: VETT 102, VETT 120, and VETT 172.
Corequisites: VETT 280.
Terms Typically Offered: Summer.

VETT 172 First Year Clinical Basics 2 Credits
Basic animal care, examination, and handling skills essential for veterinary technicians. Focus on cats and dogs. Includes restraining animals safely and effectively, performing thorough physical examinations, obtaining accurate physiological data, obtaining a complete patient history, performing a nail trim, administering vaccines, and collecting blood sample.
Prerequisites: Admission to the Veterinary Technology program.
Corequisites: VETT 108, VETT 116, VETT 205, and VETT 205L.
Terms Typically Offered: Spring.

VETT 205 Veterinary Anatomy and Physiology I 3 Credits
Background on the anatomy and physiology of animals. Includes the structure and function of each body system, including skeletal, muscular, circulatory, integumentary, and respiratory. Other subjects include principles of metabolism and unique characteristics of common domestic species. Applied laboratory experiences will cover canines, felines, equines, and bovines.
Prerequisites: Admission to the Veterinary Technology program.
Corequisites: VETT 108, VETT 116, VETT 172, and VETT 205L.
Terms Typically Offered: Spring.

VETT 205L Veterinary Anatomy and Physiology I Laboratory 1 Credit
Background on the anatomy and physiology of animals. Includes the structure and function of each body system, including skeletal, muscular, circulatory, integumentary, and respiratory. Other subjects include principles of metabolism and unique characteristics of common domestic species. Applied laboratory experiences will cover canines, felines, equines, and bovines.
Prerequisites: Admission to the Veterinary Technology program.
Corequisites: VETT 108, VETT 116, VETT 172, and VETT 205.
Terms Typically Offered: Spring.

VETT 206 Veterinary Anatomy and Physiology II 3 Credits
Continued study of anatomy and physiology of companion and farm animal species. The class covers interrelationships between body systems, such as respiratory, cardiovascular, urogenital, and reproductive. Additional topics include metabolism and digestion, acid/base balance, neurology, and reproductive endocrinology. Applied laboratory experiences are included as well as clinical applications of anatomy.
Prerequisites: VETT 280.
Terms Typically Offered: Fall.

VETT 206L Veterinary Anatomy and Physiology II Laboratory 1 Credit
Continued study of anatomy and physiology of companion and farm animal species. The class covers interrelationships between body systems, such as respiratory, cardiovascular, urogenital, and reproductive. Additional topics include metabolism and digestion, acid/base balance, neurology, and reproductive endocrinology. Applied laboratory experiences are included as well as clinical applications of anatomy.
Prerequisites: VETT 280.
Terms Typically Offered: Fall.

VETT 223 Introduction to Anesthesia 1 Credit
Examination of basic principles in veterinary anesthesiology. Includes the role of the veterinary technician anesthetist, important concepts relating to various types of anesthesia, preparation of anesthetic equipment and machines, pre-operative patient management, and recording information during anesthesia.
Prerequisites: VETT 280.
Terms Typically Offered: Fall.

VETT 224 Pharmacology for Veterinary Technicians 3 Credits
Background in pharmacology principles, including: mechanism of drug action, types of drugs, anesthetic agents, pharmacy management and calculations related to drug dosages.
Prerequisites: VETT 280.
Terms Typically Offered: Fall.

VETT 225 Anesthesiology 3 Credits
Introduction to injectable and gaseous anesthesia appropriate for surgical and diagnostic procedures. Other topics include anesthesia monitoring, emergency procedures, and control of post-surgical pain.
Prerequisites: VETT 109 and VETT 281.
Terms Typically Offered: Spring.

VETT 227 Animal Nutrition 2 Credits
Foundation in the principles of animal nutrition. The course focuses on the basic elements of nutrition, including the major categories of nutrients and their sources, digestion, and metabolism. Both large and small animal feeds and feeding will be covered. Emphasis on the relationship between nutrition and health.
Prerequisites: VETT 109 and VETT 281.
Terms Typically Offered: Spring.
VETT 232 Veterinary Dentistry 1 Credit
Introduction to veterinary dentistry as it concerns the veterinary technician. Includes dental morphology, performing a dental exam, identifying common dental problems, equipment used to perform a professional dental cleaning, the proper steps to perform a dental cleaning, and the role of a veterinary technician in client education and preventative home care.
Prerequisites: VETT 109 and VETT 281.
Terms Typically Offered: Spring.

VETT 238 Small Animal Nursing 2 Credits
Presentation of commonly encountered medical and surgical conditions of the dog and cat with emphasis on the role of the veterinary technician. This course focuses on nursing concepts and specific skills necessary for the profession. Laboratory sessions will provide a hands-on teaching experience.
Prerequisites: VETT 109 and VETT 281.
Terms Typically Offered: Spring.

VETT 239 Large Animal Nursing 3 Credits
Presentation of commonly encountered medical and surgical conditions of common large animal species with emphasis on the role of the veterinary technician. This course focuses on nursing concepts and specific skills necessary for the profession. Laboratory sessions will provide a hands-on teaching experience.
Prerequisites: VETT 109 and VETT 281.
Terms Typically Offered: Spring.

VETT 241 Clinical Laboratory Procedures 4 Credits
Biochemical derangements that characterize disease. Topics include proper collection and analysis of urine, blood, and cytological samples; basic principles of anatomic pathology; necropsy procedure and sample collection.
Prerequisites: VETT 280.
Terms Typically Offered: Fall.

VETT 242 Veterinary Critical Care 2 Credits
Instruction in appropriate nursing assessment, monitoring, and intervention for emergencies. Considers overall anatomy, physiology, and disease or accident processes to assist in veterinary diagnoses and treatment.
Prerequisites: VETT 109 and VETT 281.
Terms Typically Offered: Spring.

VETT 243 Veterinary Diagnostic Microbiology 3 Credits
Introduction to the biology, clinical appearance, and laboratory diagnosis of bacterial and viral diseases of veterinary and zoonotic importance.
Prerequisites: VETT 275.
Corequisites: VETT 282 and VETT 285.
Terms Typically Offered: Summer.

VETT 250 Clinical Competency Evaluation 1 Credit
Evaluation of clinical skills and knowledge in preparation for final cumulative clinical practice. Includes selected clinical laboratory techniques (parasitology, hematology, urinalysis, cytology, chemistry, serology, microbiology); diagnostic imaging; office procedures; surgical preparation, instrumentation and assistance; anesthesia induction, maintenance and monitoring; restraint and handling techniques; small, large and laboratory animal diagnostic and therapeutic techniques; and pharmacology calculations, labeling and drug classification.
Prerequisites: VETT 109 and VETT 281.
Terms Typically Offered: Spring.

VETT 275 Specialty Rotation 2 Credits
Introduction to specialties through site visits and/or on-campus training days delivered by industry professionals and veterinary specialists. Focus on experiential learning opportunities and exposure to specialties such as: dentistry, anesthesia/analgesia, internal medicine, emergency and critical care, surgery, equine, zoology, behavior, clinical practice, nutrition, clinical pathology, dermatology, ophthalmology, and alternative veterinary medicine.
Prerequisites: VETT 109 and VETT 281.
Terms Typically Offered: Spring.

VETT 280 Diagnostic Imaging Clinical 1 Credit
Focus on the use of radiographic equipment, safety, positioning of animals for radiographs, developing a technique chart, and producing diagnostic radiographic and non-radiographic images.
Prerequisites: VETT 102, VETT 120, and VETT 172.
Corequisites: VETT 134.
Terms Typically Offered: Summer.

VETT 281 Clinical I 2 Credits
Opportunity to supplement coursework with practical work experience related to the educational program. Students work under the immediate supervision of experienced personnel at the business location and with the direct guidance of the instructor/Coordinator.
Prerequisites: VETT 280.
Terms Typically Offered: Fall.

VETT 282 Clinical II 3 Credits
Continued opportunity to supplement coursework with practical work experience related to the educational program. Students work under the immediate supervision of experienced personnel at the business location and with the direct guidance of the instructor/Coordinator.
Prerequisites: VETT 275.
Corequisites: VETT 243 and VETT 285.
Terms Typically Offered: Summer.

VETT 285 Veterinary Technician Exam Prep 1 Credit
Preparation for the Veterinary Technician National Exam (VTNE). Includes a comprehensive review of program content and the opportunity to participate in a simulated VTNE.
Prerequisites: VETT 275.
Corequisites: VETT 243 and VETT 282.
Terms Typically Offered: Summer.
Water Quality Mgmt (WQMS)

WQMS 100 Introduction to Water Quality3 Credits
Introduction to the water and wastewater treatment field and the various applied science concepts that are used to operate, maintain and monitor water quality, includes the hydrological cycle, water sources, hydraulics, ecosystems, pollution, water chemistry, water calculations, microbiological aspects of water and water quality control.

WQMS 105 Specific Calculations for Water Quality Management4 Credits
An in-depth study of the calculations associated with water and wastewater treatment; includes dimensional analysis, manipulation of conversation factors, geometric figures, velocities, detention time, surface loading, filtration and backwash rates, porosity, weir overflow rates, efficiencies, weight of dry solids, sludge pumping, settleable solids, volatile solids, mean cell residence times, settleability, disinfection and chemical dosage as relating to trickling filters, ponds, RBC, and activated sludge.

WQMS 106 Mechanical/Physical Treatment3 Credits
Introduction to wastewater treatment; includes the technician and their responsibility, effects of waste discharges, natural cycles, solids in waste discharges, natural cycles, solids in wastewater, NPDES permits, collection systems, pretreatment, primary treatment, secondary treatment, advanced treatment, flow measuring, solids handling and disposal.

WQMS 109 Water Distribution3 Credits
Purpose, selection and location of water storage facilities and the operation and maintenance of related equipment; includes storage facilities and capabilities, booster pumps, water mains and appurtenances, joints, pipe protection and installation, valves, fittings, hydrants, quality standards, contaminants and degradation inspection and monitoring, system troubleshooting, surveillance, cross connections, pressure main breaks, corrosion control, disinfection and emergency planning.

WQMS 116 Conventional Surface Water Treatment3 Credits
Coagulation, flocculation, sedimentation, filtering, corrosion and taste and odors; includes descriptions, operating procedures, associated calculations, start-up and shut down procedures, laboratory tests, troubleshooting, maintenance, safety and records.

WQMS 118 Wastewater Collection Systems3 Credits
Purpose, components and design of collection systems; including safety procedures, inspection and testing, pipeline cleaning and maintenance, underground repair, lift stations and sewer rehabilitation.

WQMS 119 Basic Water Quality Analysis4 Credits
Relation of laboratory control tests to the chemistry of water and wastewater treatment. Students gain the skills and techniques to operate within a laboratory; includes laboratory equipment and instrumentation—identification, set-up and calibration, safety, sample collection and preservation, written reports and laboratory tests. Laboratory testing includes hardness, alkalinity, dissolved oxygen, biochemical oxygen demand, chlorine residual, pH, phosphorus, dissolved solids, total solids, suspended solids, turbidity, Langlier index, fluoride and biomonitoring.

WQMS 125 Wastewater Certification Review for Class C & D3 Credits
Preparation of students for the operator’s certification test in wastewater at the C and D level. Topics include wastewater principles, mathematics, hydraulics, conventional treatment of wastewater, wastewater sedimentation, Colorado Water Quality Control Act, biological treatment of wastewater, effluent standards for wastewater, sludge handling and disposal, disinfection, pumps, safety, housekeeping, and laboratory analysis.

WQMS 126 Safety and Security Systems3 Credits
Exploration of all applied safety aspects in the water and wastewater industry. Topics include development of safety policies and programs, job safety orientation, driving practices, CPR/First Aid, Permit Required Confined Spaces (PRCS), air monitoring and displacement requirements, treatment equipment, construction vehicles/equipment, chlorine and other chemical handling, and security and safety standards as determined by the Bioterrorism Preparedness Act of 2002.

WQMS 127 Water Quality Utility Management3 Credits
Introduction to the fundamental business practices that are utilized in managing a water or wastewater utility. Topics include the functions of a manager, planning, organizing, staffing, public relations, financial management, regulatory compliance, safety, and operations and maintenance from a management perspective.

WQMS 150 Troubleshooting in Water Quality3 Credits
Exploration of troubleshooting practices and procedures for chemical adjustments, equipment failures (electrical, mechanical, pneumatic and hydraulic), source contamination, system control procedures, and redundancies.

WQMS 195 Independent Study1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

WQMS 200 Hydraulics for Water Quality Management4 Credits
Introduction to the mathematical principles of density, specific gravity, pressures, horsepower and energy costs, velocities, weirs, parshall flumes, venturi meters, California Pipe method, flows from open end pipes, settling velocities and classification of flows.

Terms Typically Offered: Fall, Spring.

WQMS 202 Small Water Systems Operation and Maintenance3 Credits
Introduction to the practical, hands-on aspects of the safe and effective operation and maintenance of small water system collection, treatment, and disposal. Topics include the safe operation and maintenance of small water treatment plants, lift stations, and other facilities.

WQMS 203 Water Quality Small Wastewater Systems3 Credits
Introduction to the practical, hands-on aspects of the safe and effective operation and maintenance of small wastewater collection, treatment, and disposal systems. Topics include the safe operation and maintenance of small wastewater treatment plants, lift stations and other facilities, and maintenance and rehabilitation of collection facilities for the small wastewater system operator.

WQMS 212 Drinking Water Regulations4 Credits
Knowledge and skills to establish a compliance program for a water treatment facility using ground water, surface water, or ground water influenced by surface water sources. The student will learn all regulatory requirements for microbiological and chemical contamination (organic, inorganic, and radio) for monitoring and reporting operations.

WQMS 216 Biological and Bacteriological Water Quality Analyses4 Credits
Exploration of microorganisms associated with all phases and concerns of water and wastewater treatment including bacteria, protozoa, and algae. Topics include: microorganisms used in treatment, pathogenic indicators, regulations, health hazards and laboratory safety. Laboratory work involves media preparation, coliform testing, standard plate count, algae identification, activated sludge examination, volatile acids/alkalinity and biomonitoring.
Welding (WELD)

WELD 110 Shielded Metal Arc Welding4 Credits
Study and skill development of safe practices, welding theory, and principles of Shielded Metal Arc Welding equipment and process. SMAW fillet welds in all positions on plate.

WELD 111 Shielded Metal Arc Welding 24 Credits
Study and skill development of safe practices, welding theory, and principles of Shielded Metal Arc Welding equipment and process. SMAW groove welds in all positions on plate. Pipe welding and stainless steel plate tests may be included.
Prerequisites: WELD 110.

WELD 114 Oxy-Fuel Welding & Brazing2 Credits
Study and skill development of safe practices, welding theory, and principles of Oxy-Fuel equipment and process. Oxy-Fuel groove and fillet welding and braze welding will be included.

WELD 117 Oxy-Fuel and Plasma Arc Cutting2 Credits
Study and skill development of safe practices, theory, and principles of cutting equipment used in fabrication. Oxy-Acetylene Cutting (OAC), Plasma Arc Cutting (PAC), and other cutting processes applied to sheet metal, plate, piping, and other materials. Other uses of power tools and hand tools to be included.

WELD 133 Fabrication & Blueprints for Welders4 Credits
Study and skill development of metal fabrication methods. Lecture and laboratory. Measuring tools and techniques, welding shop mathematics, blueprint reading, welding symbols, sheet metal and steel plate fabrication project layout methods applied. Basic blacksmithing techniques and ornamental iron layout included. Structural and pipe connection layout methods introduced.

WELD 151 Introduction to Welding3 Credits
Introductory welding course. Lecture and laboratory. Safe practices, theory, principles, and use of welding and cutting equipment. Oxy/Fuel, Plasma Arc Cutting, Shielded Metal Arc Welding, Gas Metal Arc Welding, Flux Cored Arc Welding with sheet metal and carbon steel plate in most positions. Gas Tungsten Arc Welding may be included.

WELD 201 Gas Metal Arc Welding4 Credits
Study and skill development of safe practices, welding theory, and principles of Gas Metal Arc Welding equipment and process. GMAW fillet and groove welds with short circuit transfer and axial spray transfer will be included. GMAW pulse, aluminum, and stainless steel may be included.

WELD 203 Flux Cored Arc Welding4 Credits
Study and skill development of safe practices, welding theory, and principles of Flux Cored Arc Welding equipment and process. FCAW fillet and groove welds with self-shielded and gas-shielded processes will be covered.

WELD 230 Gas Tungsten Arc Welding4 Credits
Study and skill development of Gas Tungsten Arc Welding (GTAW/TIG). Lecture and laboratory. Safe practices, theory, principles and use of GTAW equipment. GTAW with sheet metal and carbon steel plate in most positions. Also, GTAW stainless steel and aluminum sheet metal in most positions. A.W.S. testing.

WELD 240 Pipe Welding4 Credits
Study and skill development of safe practices, welding theory, and principles of pipe welding using SMAW, GMAW, FCAW, and GTAW processes. AWS, API, and ASME weld procedures will be examined.
Prerequisites: WELD 111, WELD 203, and WELD 230

WELD 261 Testing and Inspection3 Credits
Advanced classroom course on testing and weld inspection. Destructive and non-destructive weld testing methods applied. AWS bridge and structural codes, API cross country pipe welding codes, ASME pressure vessel and pressure piping codes. (On demand)

WELD 270 Practical Applications3 Credits
Exploration of a welding project course. Classroom discussions and directions with laboratory objectives. This class gives welding students the opportunity to apply techniques and knowledge gained from previous welding courses. With the guidance and advice of the instructor, students will fabricate a welding project of their choice.

WELD 275 Automation4 Credits
Study and skill development of safe practices, welding theory, and principles of robotic welding and CNC plasma cutting equipment and processes. Basic programming, setup, and systems integration will be included. Other automation equipment and processes may be included.
Prerequisites: WELD 117 and WELD 201.

WELD 295 Independent Study 1 or 2 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

WELD 296 Topics 1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

WELD 299 Internship 1-14 Credits
Course may be taken multiple times up to maximum of 6 credit hours.

Wildland Fire Mgmt (FSWM)

FSWM 100 Introduction to Wildland Fire Basic Fire Guard School4 Credits
Instruction in the primary environmental factors that affect the start and spread of wildfire and recognition of potentially hazardous situations. This course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training classes: S-110, S-130, S-190, I-100, L-180.

FSWM 103 Expanded Dispatch Recorder1 Credit
The structure of an expanded dispatch organization and how to effectively perform within that organization. Students will develop a working knowledge of the purpose and process of completing the resource order and other dispatch forms and learn established dispatch procedures. This course consists of the curriculum and activities included in the National Wildfire Group Firefighting Training classes: D-110.

FSWM 141 Introduction to Incident Information2 Credits
Cognitive material and skills needed to become type 3 information officers (IOF3). The course covers all aspects of establishing and maintaining an incident information operation, communicating with internal and external audiences to handling special situations. This course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training program class S-203.

FSWM 142 Portable Pumps and Water Use2 Credits
Introduction to the three areas of supply, delivery, and application of water. Students will be required to demonstrate their knowledge of correct water use, basic hydraulics, and equipment care. Modules support required set up, operation, and maintenance of pump equipment. This course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training classes: S-211.
FSWM 143 Wildfire Chain Saws2 Credits
Introduction to the function, maintenance and use of internal combustion, engine-powered chain saws and their tactical wildland fire application. Modules support entry-level training for firefighters with little or no previous experience in operating a chain saw and provides hands-on cutting in surroundings similar to fireline situations. This course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training classes: S-212.

FSWM 144 Fire Operations in the Wildland/Urban Interface2 Credits
Emphasizes the tactical decisions made by structure and wildland firefighters when confronting fire that threatens life, property, and improvements in the wildland/urban interface. Instructional units include interface awareness, size up, initial strategy and incident action plan, structure triage, structure protection tactics, incident action plan assessment and update, follow up and public relations, and firefighter safety in the interface. This course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training class: S-215.

FSWM 147 Ignition Operations2 Credits
Training in the functional roles and responsibilities connected with firing operations. The course covers planning, ignition procedures and techniques, and equipment applicable to wildland and prescribed fire. This course also addresses the role of the ignition specialist or firing boss as the organization manages escalation from a non-complex to a complex situation. This course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training class: S-234.

FSWM 148 Status/Check-In Recorder1 Credit
Introduces students to the tools and techniques used to perform duties of status check-in recorder (SCKN). The course provides an overview of what a student can expect if dispatched to an incident. Each student will need access to a computer that has the most current incident automation software. This course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training Program class S-248.

FSWM 151 Basic Air Operations1 Credit
Covers aircraft types and capabilities, aviation management and safety for flying in and working with agency aircraft, tactical and logistical uses of aircraft, and requirements for helicopter take-off and landing areas. This course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training class: S-270.

FSWM 152 Helicopter Crew Member2 Credits
Competency in all areas of the tactical and logistical use of helicopters to achieve efficiency and standardization. Topics include: aviation safety, aircraft capabilities and limitations, aviation life support equipment, aviation mishap reporting, pre-flight checklist and briefing/debriefing, aviation transportation of hazardous materials, crash survival, helicopter operations, and field exercises. This course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training program class S-271.

FSWM 153 Intermediate Wildland Fire Behavior2 Credits
Prepares the prospective supervisor to undertake safe and effective fire management operations. This course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training class: S-290.

FSWM 155 Initial Attack Incident Commander/Basic Incident Command System2 Credits
Required training for an ICT4 qualification. Course topics include Initial Command organization, functions and responsibilities, readiness, mobilization, size-up, planning, resource ordering, deployment, objectives, strategy, tactics, containment, administrative responsibilities, and post-incident evaluation. This course consists of the curriculum in the National Wildfire Coordinating Group Firefighting Training classes S-200 and I-200.

FSWM 156 Firefighter Type 1 and Fire Line Leadership2 Credits
Required training for Firefighter Type 1 qualification. Topics include fireline reference materials, communications, tactical decision making, leadership values and principles, transition challenges for new leaders, situational leadership, team cohesion factors, and ethical decision making. This course consists of the curriculum in the National Wildfire Coordinating Group S-131 and L-280 courses.

FSWM 158 Driving for the Fire Service2 Credits
Familiarizes the students with the safety and regulations governing the driving practices and vehicle operation expectations in wildfire situations. This course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training class: S-216.

FSWM 162 Advanced Firefighter Position Task Book3 Credits
Documentation processes for the recording of routine and special activities in the field. This course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training program to include not less than 135 hours of documented activities.

FSWM 196 Topics1-3 Credits
Course may be taken multiple times up to maximum of 15 credit hours.

FSWM 200 Extended Attack Incident Commander1 Credit
Covers the training needs of the incident commander type 3 (CT3). The six instructional units cover Information Gathering, Planning, Supporting Organization, Operations, Transitioning, and Demobilization/Administrative Requirement. This course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training program class S-300.

FSWM 204 Medical Unit Leader1 Credit
Covers the skills and information needed to perform in the role of medical unit leader (MEDL). This course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training program class S-359.

FSWM 205 Introduction to Wildland Fire Behavior Calculations2 Credits
Covers the information and skills required for effective fire behavior prediction. This course introduces fire behavior calculations by manual methods, using nomograms. The student gains an understanding of the determinants of fire behavior through studying input (wind, slope, fuels, and fuel moisture). Students also learn how to interpret fire behavior output. Local and regional environment differences are stressed. This course consists of the curriculum and activities included in the National Wildfire Coordinating Group Firefighting Training program class S-390.

FSWM 278 Supervised Work Experience1-3 Credits
Course may be taken multiple times up to a maximum of 15 credit hours.

FSWM 296 Topics1-3 Credits
Course may be taken multiple times up to maximum of 6 credit hours.
GLOSSARY OF TERMS

Academic Probation
The failure of a student to meet the standards required for good standing. Student will be placed on academic probation for one semester and must maintain a 2.00 GPA or higher to avoid academic suspension.

Academic Renewal
Following an absence from the college of at least five years, a student may apply for “academic renewal.” If approved, none of the course credits and grades earned at Colorado Mesa University prior to the five-year minimum absences will be used for meeting graduation requirements or in determining the student’s grade point average. However, the prior courses and their grades will remain on the student’s transcript even though they will not be used in meeting graduation requirements and in calculating the student’s grade point average.

Academic Residency
A specified minimum number of credit hours that must be earned at Colorado Mesa University to receive a degree.

Academic Suspension
Denial of all registration privileges for a specified period of time (minimum one full semester) because of failure to meet minimum academic standards. Suspended students must be readmitted to the college before continuing enrollment.

Academic Term
A period of instruction. During the fall and spring, the term is a standard 15-week semester. During the summer, various length periods of instruction are offered. The term regular semester refers to fall or spring semester.

Academic Year
The traditional cycle of academic terms: fall and spring.

Accreditation
Certification that the university or program has met established standards and is recognized by appropriate accrediting agencies.

Add/Drop
A period of time when students can alter class schedules by adding or dropping classes or changing sections of a course. Add/drop deadlines are published on the Registrar’s Office Important Dates (https://www.coloradomesa.edu/registrar/dates.html) website.

Admitted
Status of students who have applied and have been accepted to the university.

Associate's Degree
Degree awarded upon satisfactory completion of a prescribed, planned program of approximately 60 credit hours. This can be completed in two years of study with an average of 15 semester hours per semester in the fall and spring terms.

Audit
A registration status which allows a student to attend and to participate in a class without benefit of a grade or academic credit. The “audit” status must be recorded in the Registrar’s Office before the withdraw deadline for the class.

Baccalaureate Degree
Bachelor’s degree: the traditional undergraduate degree. Awarded for completion of an undergraduate program of study, usually of 120 semester hours. This can be completed in four years of study with an average of 15 semester hours per semester in the fall and spring terms. Bachelor’s degrees are comprised of essential learning courses, a major, and elective courses.

Capstone
A course, project, paper, presentation, event, or exhibit that must be completed, usually in the senior year, before graduation. A capstone demonstrates in an integrated way everything that has been learned while pursuing a particular major.

College Opportunity Fund (COF)
The method of funding state tax dollar support for students enrolled in Colorado public higher education via a voucher. Implemented in fall 2005, qualifying students create an account at the College Access Network into which the voucher is deposited and, upon registration by the student at a participating institution, then is transferred to the college.

Concentration
An area of interest within a major that is defined by a group of courses. Number of hours will vary by major. Concentrations are generally associated with 4 year programs (BA, BBA, BS, etc).

Concurrent Student
A high school student who is registered for a university class.

Contact Hours
The number of weekly hours student meets in a class, lab, studio, clinical, or class/lab.

Corequisite
Course(s) that must be taken concurrently with one or more additional courses. Subject matter often is similar or complementary.

Course Levels
The numbering system of courses:

<table>
<thead>
<tr>
<th>Category</th>
<th>Numbering System</th>
</tr>
</thead>
<tbody>
<tr>
<td>Developmental/Preparatory</td>
<td>099 and lower</td>
</tr>
<tr>
<td>Lower Division</td>
<td>100 - 199 Freshman</td>
</tr>
<tr>
<td></td>
<td>200 - 299 Sophomore</td>
</tr>
<tr>
<td>Upper Division</td>
<td>300 - 399 Junior</td>
</tr>
<tr>
<td></td>
<td>400 - 499 Senior</td>
</tr>
<tr>
<td>Graduate</td>
<td>500 and above</td>
</tr>
</tbody>
</table>
Course Load
The total number of semester hours registered for in a given academic term.

Cumulative Grade Point Average
An average GPA calculated by dividing the total number of quality points/grade points obtained (credit hours X grade points) by the number of credit hours attempted during all academic sessions at Colorado Mesa University. Grades from other institutions are not included in the calculation.

Dean's List
Recognition of students who achieve a grade point average of between 3.50 and 3.99 while enrolled for a minimum of 12 semester hours in a fall or spring semester.

Degree
A title which the university confers on a student who has satisfactorily completed a required course of study. Degree requirements are established by the university and departments, and are approved by the university's faculty, administration, and authorized by the Colorado Commission on Higher Education. The university offers degrees at three levels: associate, baccalaureate, and master's.

Degree Category
One of three degree categories offered at Colorado Mesa University that may differ in lower division requirements beyond essential learning. These categories include the Bachelor of Arts (BA), Bachelor of Science (BS) and Professional, Technical or Other Programs (PTO).

Discipline
A recognized subject area or field of study within which courses are structured.

Distance Learning
Courses offered for credit by an alternative means of delivery for students who need university credit but are unable to travel to campus on a regular weekly basis (e.g. telecourses, interactive video, or online).

Double Major
Completing the requirements of more than one major within the same degree designation (e.g., a Bachelor of Arts, Bachelor of Science, Bachelor of Business Administration). A student could earn one baccalaureate degree with multiple majors (e.g., Bachelor of Arts with a double major in Psychology and Sociology). Students must meet all the requirements for the degree and for each major.

Dual/Double Baccalaureate Degree
Completing the requirements of more than one major with different degree designations (e.g., a Bachelor of Arts, Bachelor of Science, Bachelor of Business Administration). A student earning two baccalaureate degrees (e.g., Bachelor of Arts in History and a Bachelor of Science in Mathematics) must meet all the requirements for each degree, each major, and additional requirements found in the Requirements for Undergraduate Degrees (p. 68) under the 'Second Baccalaureate Degree'.

Earned Hours
Credit hours earned for college-level courses (numbered 100 and above) with a passing grade.

Electives
Courses selected at a student's discretion. Electives may be partially restricted, such as a selection from a specified group of courses identified to fulfill a particular requirement or they may be "free" electives which may be selected from any course for which the student has proper prerequisites. Electives provide opportunities for students to pursue personal interest and to gain general knowledge.

Emphasis
An area of interest within a major that is defined by a group of courses. Number of hours will vary by major. Emphases are generally associated with 2-year programs (AA, AS, etc.).

Enrollment
Registration for course work and payment of fees constitutes official enrollment. For financial aid purposes, a student must enroll for 12 credit hours to be classified full-time; for other purposes, the minimum may be higher. For graduate students, a six-hour load is typical for full-time classification.

Essential Learning
A university-wide requirement of basic courses that form the foundation of all undergraduate degree programs. CMU's Essential Learning requirement was formerly named General Education.

Essential Learning Capstone
The baccalaureate 4 semester credit hour graduation requirement consisting of corequisite courses Maverick Milestone (3 hours) and Essential Speech (1 hour). This interdisciplinary requirement is designed to allow students to transition between the lower division Essential Learning Core courses and their upper-division major courses. Must be completed in the timeframes of 45 and 75 earned credit hours.

Essential Learning Core
Basic courses providing students with a foundation in the arts and sciences. The Essential Learning Core consists of 31 semester credit hours across the following disciplines: English (6 hours), Mathematics (3 hours), History (3 hours), Humanities (3 hours), Social and Behavioral Sciences (6 hours), Fine Arts (3 hours), and Natural Sciences (7 hours).

Essential Speech
A 200-level, 1 semester credit hour course which provides students with the tools for verbally presenting ideas and information learned in the corequisite Maverick Milestone course. The Maverick Milestone and Essential Speech corequisite courses comprise the Essential Learning Capstone requirement for baccalaureate students. See Essential Learning.

General Education
Former designation of CMU's Essential Learning curriculum.
General Educational Development (GED) Diploma
Award granted upon passing tests that measure student learning normally acquired by completing a typical high school program of study.

Good Standing
A sliding scale of academic status achieved by students for semester hours attempted. Determines eligibility of students to continue to register for university course work.

Grade Improvement
Repeat of any course more than once for academic credit at Colorado Mesa University done so only for "grade improvement." Academic credit is awarded only once and the best grade received is the one used to compute the student's cumulative grade point average and to fulfill requirements for the degree. Some exceptions to this policy apply.

Grade Point Average (GPA)
A measure of a student's academic performance which is computed by dividing credit hours attempted into grade points earned to determine the mean average grade of all courses taken for credit. Does not include courses taken as pass/fail.

Graduate Certificates
Contain graduate level (5xx-7xx) courses. A student must be admitted as a graduate student to attempt a graduate certificate.

Graduate Student
A student who has earned a baccalaureate degree and who is pursuing a master's degree program.

Graduation Honors
Recognition of graduating students who meet the following academic criteria:
- With Distinction - Associate degree graduates with cumulative grade point averages of 3.50 to 3.74.
- With High Distinction - Associate degree graduates with cumulative grade point averages of 3.75 to 4.00.
- Cum Laude - Baccalaureate degree graduates with cumulative grade point averages of 3.50 to 3.74.
- Magna Cum Laude - Baccalaureate degree graduates with cumulative grade point averages of 3.75 to 3.89.
- Summa Cum Laude - Baccalaureate degree graduates with cumulative grade point averages of 3.90 to 4.00.

Independent Study
An upper-division course designated by a special number within a discipline. Allows a student to pursue an individual project independently, for credit, under the supervision of an instructor. Requires consent of the instructor.

Leveling Courses
A set of equivalent courses for graduate students who have not completed specific undergraduate courses prior to beginning graduate study.

Lower Division Course
A course that carries a 100 - 199 or 200 - 299 number.

Major
A set of required courses from one or more departments in a subject chosen as the student's principal field of study. Designed to provide students with the knowledge, skills, and experiences necessary to pursue a specific career and/or advanced study.

Master's Degree
A post-baccalaureate degree. All master's degree candidates must maintain a 3.00 GPA to remain in good academic standing.

Matriculation
Enrollment as an admitted, degree-seeking student.

Maverick Milestone
A 200-level interdisciplinary, topics-oriented, writing-intensive course designed to help students develop the ability to approach problems and evaluate ideas using more than one set of intellectual tools. This 3 semester credit hour course and its 1 semester credit hour corequisite Essential Speech comprise the Essential Learning Capstone requirement for baccalaureate students. See Essential Learning.

Minor
An officially-recognized secondary field of study requiring fewer units than the major. A minor must be in an approved subject area and is less comprehensive than the major.

Multiple Concentrations
Completing the requirements of more than one concentration within the same major (e.g., Bachelor of Arts in Mass Communication with a double concentration in Print Media and Public Relations). Students must meet all the requirements for the degree, major, and each concentration.

Prerequisite
Requirement(s) that must be taken and passed before a higher level course may be taken. Sometimes, permission of the instructor or another requirement (such as graduate status) may be a prerequisite for a course. Prerequisites may include: (1) Course or courses that must be completed before a higher-level course may be taken, sometimes allowed by the instructor to be taken concurrently; (2) Courses outside the major department that must be completed before admission to the major; (3) Successful completion of high school courses (as in languages); (4)
Minimum SAT or ACT scores or sub-scores; (5) Minimum placement test scores; or (6) Acceptance into a certain program.

**President's List**
Recognition of students who achieve a grade point average of 4.00 while enrolled for a minimum of 12 semester hours in a fall or spring semester.

**Priority Registration**
Designated period of early registration for currently enrolled students.

**Professional Certificate**
A Professional Certificate contains primarily upper division (3xx-4xx) courses. For a student to attempt a Professional Certificate after the student has earned a baccalaureate degree, the student must be admitted to study as a post-baccalaureate student or as a graduate student.

**Program Requirements**
The list of requirements a student must satisfy in order to graduate with a specified degree or certificate program. Program requirements for each program can be located via the Programs A-Z page (p. 702).

**Quality Points**
The number points attributed to a grade (A=4, B=3, C=2, etc.) times the number of credit hours in the course.

**Registrar**
Office responsible for course registration, transfer credit evaluation, maintaining academic records, and certifying degree requirements for graduation.

**Student Classification**
Student level based on the number of semester hours successfully completed as follows:

<table>
<thead>
<tr>
<th>Semester Hours Completed</th>
<th>Student Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 - 30</td>
<td>Freshman</td>
</tr>
<tr>
<td>31 - 60</td>
<td>Sophomore</td>
</tr>
<tr>
<td>61 - 90</td>
<td>Junior</td>
</tr>
<tr>
<td>91 - above</td>
<td>Senior</td>
</tr>
</tbody>
</table>

**Technical Certificate**
Award for the completion of technical coursework designed to train students for specific skills required for employment in various vocational occupations.

**Topics Courses**
Courses offered from time to time that contain material of special interest within a specific discipline not considered elsewhere in the curriculum. Prerequisites vary with course material and may require consent of the instructor.

**Transcript**
An official document issued by the Registrar that lists the entire academic record of a student at the university.

**Transfer Credit**
Course work completed at another institution that is accepted for credit toward a degree at the university. Grades from these courses are not included in calculation of a student's cumulative GPA.

**Undergraduate**
A student working toward a technical certificate, professional certificate, associate degree, or baccalaureate degree.

**Upper Level Course**
A course that carries a 300 - 399 or 400 - 499 number.
